Presbyterian, Rev. G. McCosh.

Wesleyan Methodist, Rev. R. L. McDonald, Chairman.

THE GAMBIA.

Situation and Area.

The Gambia is a great river of Western Africa. falling into the Atlantic Ocean by a large estuary measuring in some parts nearly 27 miles across, but narrowing to 10 miles between Bird Island bank and Cape St. Mary, and to little more than two between Barra Point and the town of Bathurst on St. Mary's Island. There are 26 feet of water at the entrance of the river at low tide, and oceangoing steamers drawing not more than 13 feet can at present proceed without trouble to MacCarthy Island. There is no bar to the Gambia River.

The seat of Government is Bathurst, 13° 27' N. lat., 16° 34' W. long., situated on St. Mary's Island, a sandbank about three and a half miles long and a mile and a quarter broad, separated from the mainland by a narrow channel called Oyster Creek. A large portion of the island is a swamp, the level of which is in many parts below that of the river.

The Colony consists of the Island of St. Mary British Kombo, Albreda, the Ceded Mile, the territories of Brefet and Bajana, and MacCarthy Island, situated between the Falls of Barraconda and Bathurst, and 158 miles distant from the latter. MacCarthy Island forms the line of demarcation between those portions of the river known as the Upper and Lower River. The total area of the Colony is about 69 square miles (equal to Jersey and Guernsey).

The Protectorate extends on both banks of the river for 250 miles from its mouth. By Ordinance No. 7 of 1902 (repealed and replaced by Ordinance No. 30 of 1913) all parts of the Colony, except the Island of St. Mary, were placed under the Protectorate system of administration. The Protectorate system of administration. The Island of St. Mary has an area of about 2,500 acres, the greater part of which is swampy, and a population of 14,370. The area of the Protectorate is 3,934 sq. miles, and the population, including that of the parts of the Colony administered as Protectorate, is 185,150 (1931 Census). A survey of the boundaries dividing the Gambia from Senegal was completed by the Anglo-French Boundary Commission in 1905.

History.

The Gambia was discovered by the early Portuguese navigators, but they made no settle-

In 1588 a patent was granted by Queen Elizabeth to some merchants in London and Exeter to trade with the Gambia. This Company did not prosper. Its voyages were not slave trading ventures but were made for legitimate commerce. In 1618 King James I. of England granted a charter to Sir Robert Rich and other London merchants. Their enterprise was entitled "The Company of Adventurers of London trading in Africa," and Fort James was built by them on a small island 17 miles above the island of Banjola (now St. Mary's).

About the year 1631 another British chartered company was formed, King Charles I. having granted a charter to Sir B. Young, Sir ing granted a charter to Sir B. Young, Sir R. Digby and others. This venture was responsible for supplying British settlements in the West Indies with slaves for working on the estates.

In 1662 King Charles II. granted a charter to a third company, known as the "Royal Adventurers of England trading in Africa."

years later this company exhausted its capital and surrendered its charter. In 1672 a fourth company was incorporated under the name of the "Royal African Company," and it was not until 1752, after having in its early days reached the highest point of commercial prosperity which had been touched by England in Africa, that it was superseded by the "Company of Merchants." The right of trade was abandoned to England by France under the treaty of Versailles, 1783, which guaranteed to the English their possession of Fort James and of the River Gambia, with the exception of a French factory established at Albreda on the north bank of the river. The same treaty gave the Senegal river to the French, with the exception of an exclusive right to trade with the Arabs at Portandic for gum, which was retained by England. The year 1807 saw the abolition of the slave trade, and though the "Company of Merchants" lingered on with an annual subsidy, the general commerce between Great Britain and Gambia fell off till 1816, in which year a new settlement was formed on the island of Banjola by the English merchants, who resided at Gorée and in Senegal until those places were given up to the French by the Treaty of Paris (1814). The island was re-named "St. Mary's," and the town which was laid out took its name from Lord Bathurst, Secretary of State at that time. The streets to be inhabited first were named after Lord Wellington and his generals at Waterloo.

The settlement was subject to the Government of Sierra Leone, and was annexed to it by Act of Parliament in 1821. From 1816 to 1822 a Military Commandant, aided by a Board of Merchants, called the "Settlement court," administered the government. From 1822 to 1829 the Commandant governed alone.

In December, 1829, the Secretary of State appointed Lieut.-Colonel Alex. Findlay, R.A.C. Corps, as Lieutenant-Governor (the first) " of the settlement of Bathurst and its dependencies in the Gambia." The laws of Sierra Leone re-mained in force, but the Lieutenant-Governor was not accountable to the officer administering the government there.

The Gambia, in the year 1843, was created an independent Colony, with a Governor and Executive and Legislative Councils for the administration of its affairs. Captain H. P. Seagram, R.N., was the first Governor of the

Colony.

By the charter of 19th February, 1866, it became a portion of the Government of the West African Settlements, and continued to be so under the charter of the 19th December, 1874, until it was made a separate Government in 1888.

MacCarthy Island was purchased in 1823, and named after Maj.-General Sir Charles MacCarthy, K.C.B., Governor-in-Chief of the British West African possessions: the ceded mile was granted by the King of Barra in 1826; and British Kombo was granted by the King of Kombo in various cessions in 1840, 1850, and 1855.

In 1897 the countries of Foni and Jarra, on the south bank of the river, came under British protection.

Foreign Kombo was annexed by the British Government and is now divided into North, South and Central Kombo.

The Protectorate system of administration has been established since 1894, and extended from time to time by agreement with the different chiefs concerned, until Ordinance No. 7 of 1902 was

passed, providing fully for the Government of the whole Protectorate, which is divided into four Provinces and again into Districts. There is a Commissioner in charge of each Province, and each District is under a Head Chief, with a native tribunal specially appointed by the Governor.

The Provinces are as follows:-North Bank Province, with the districts of Lower Niumi, Upper Niumi, Jokadu, Lower Baddibu, Central Baddibu and Upper Baddibu, MacCarthy Island Province, with the districts of Sami, Niani, Nianija, Upper Saloum, Lower Saloum, MacCarthy Island, Fulladu West, Eastern Niamina, Western Niamina and Niamina Dankunku. Upper River Province, with the districts of Fulladu East, Kantora Wuli and Sandu. South Bank Province. with the districts of Central Jarra, Eastern Jarra, Western Jarra, Eastern Kiang and Central Kiang, Kombo St. Mary, Kombo North, Kombo South, Kombo Central, Kombo East, Foni Brefet, Bintang-Karenai, Foni Kansala, Foni Bondali, Foni Jarrol and Kiang West,

Inhabitants of the Gambia.

The inhabitants are mostly of the negro race, the chief tribes being the Jollofs, Mandingos, Sarahulis, Fullas and Jolas. The country of the Jollofs is on the North Bank or Senegal side of the river, and they form a large portion of the community in the town of Bathurst.

The Mandingos are the most numerous people on this portion of the African coast, and derive their name from Manding, a town some 700 miles inland and towards the boundary of the Colony of Sierra Leone. They are mostly Mohammedans.

The Jolas come from Foni, between southern limit of Kombo and on the north bank of the Cassamance River. Their country runs in a north easterly direction towards the south bank of the Gambia River as far as the mouth of the Bintang Creek. They are pagans and a wild uncivilised tribe.

The Sarahulis are the most recent arrivals in the Gambia having migrated from the interior of Senegal. They are found chiefly in the eastern portion of the Upper River where they have established fairly large villages. They are all Mohammedans.

The Fullas (not the pure race, the nomads of West Africa) are good farmers and herdsmen. Their features are somewhat of the Asiatic type and their skins of a lighter colour than negros. The capital of the Fulla country is Timbo in Futta Jallon, and is situated in north latitude 10° 38' and west longitude 11° 10'.

Industry, Trade and Customs.

There are no mines in the Colony, but in several places in the Protectorate iron ore is to be found in large quantities, although not worth exportation. A small quantity of cotton is grown, but only

for local consumption, and it is made into narrow strips of rough coloured cloth, common to all West Africa. The strips average 27 yards in length and 9 inches in width.

Potterv is made in the Upper River Province. A considerable amount of excellent leather is produced from goat skins. It is not exported but utilised by the people in making bags, slippers, sandals, scabbards, saddles and horse trappings, and the skilful manner in which colouredgrasses, silk cotton, etc., are laced through the decorative portion of the leather work is common to most of Mohammedan West Africa.

Kach town or village usually has a "Koranki"

man, or leather worker.

There is an abundance of fish in the lower reaches of the Gambia River, and large quantities are dried and taken each season into the Protectorate for sale. Quantities of cysters are obtained in the creek, and are cooked by the people for food, the shells being made into native lime.

The ground nut is the staple article of cultivation, and forms the chief export crop of the Gambia. Large quantities of foodstuffs, such as rice, maize, guines corn, cassava, etc., are raised for local consumption.

A considerable trade is done with the French settlements and the adjoining coast districts in

cotton goods, tobacco, rice, and hardware.

The principal imports are cotton goods, rice, kola nuts.

The principal exports in 1933 were:

Value. Quantity. £500,766 Ground nuts 67,370 tons ... 4,199 Palm kernels 615 tons Wax 11,095 lbs. 272 ... 1,361 No. 185 Hides

The following table shows the percentages of imports and exports by countries:—

100. 100.

A new Customs Tariff Ordinance was passed in 1932, giving preferential treatment to British manufactures and products. The ad valorem rates of duties are 10% on British goods and 12½% on Foreign goods, except in the case of carriages and parts thereof (inclusive of Motor cars and tyres) where the duties are 5% ad ralorem on British goods and 25% ad ralorem on Foreign goods. In the case of goods subject to specific duties, a similar preference is given to British goods.

The largest proportion of the Customs revenue is derived from duties assessed on a specific basis.

A special customs tariff has been introduced in the case of certain goods imported from Japan, and an Ordinance has been passed empowering the Government to limit the importations of certain textiles. This quota is at present applicable to piece goods of Japanese origin only.

An Export duty of 10s. per ton is levied on

ground nuts.

Bathurst is a port of registry, and had, on its Register on 31st December, 1933, 146 vessels of 3,418 tons gross aggregate tonnage.

Relations with the Interior.

Since the delimitation of the boundary of the Protectorate by the Anglo-French Commissioner in 1891, steps have been taken to bring the inhabitants of the Protectorate gradually into closer relationship with the Government of the Colony. An Order in Council, issued on the 23rd of November. 1893, provided for the establishment of Her Majesty's jurisdiction within the Protectorate, and

since then Ordinances have been passed providing for the establishment of magistrates and also native courts.

Commissioners regularly travel through the Protectorate on both banks of the river for 250 miles. A "yard" or "hut" tax, which averages about 5s. per annum for a family, is imposed in the Protectorate.

Currency and Banking.

The currency is British West African silver alloy and nickel-bronze coins and British West African currency notes for 20s. and 10s. French 5 franc pieces were demonetised at the beginning of 1922. There is one Bank in Bathurst: the Bank of British West Africa.

A Government savings bank was established in 1886, and had on 31st December, 1933, 1,804l.

deposited by 805 persons.

Land.

Land in the Protectorate can be obtained from the Chief of a district for purposes of farming with the sanction of the Governor. Small lots suitable for trading stations may be rented for 3t, per annum and upwards. Freehold interests in Crown lands in the Colony are not disposed of except in special circumstances. No leases are issued in the first instance of lands either in the Colony or Protectorate for a longer period than twenty-one years.

Education.

There is an Education Department under the direction of an Administrative Officer, who is seconded for duty as Superintendent of Education. The Christian schools, which are wholly in the hands of the several denominations, receive grants-Of ordinary primary schools in Batin-aid. hurst, there are one Anglican, two Methodist and two Roman Catholic, with 1,572 scholars in all. Education is not compulsory, and fees are charged. There are two Methodist High schools and two Roman Catholic Secondary Schools, two for boys and two for girls, all under European control. There is also a Mohammedan school with 157 pupils, at which the ordinary rudiments of an English and Arabic education are taught, the payment of the teachers being borne by the Government. At MacCarthy Island there is a primary Methodist school with 36 pupils, and a Government Mohammedan school, started in January, 1927, with 37 pupils on the roll.

A total Government grant-in-aid of 2,397t. was made to the primary schools, and of 360t.

to the secondary schools, during 1933.

Means of Communication.

Communication between the Colony and Europe is effected by the steamers of Elder Dempster Lines, Ltd., which nominally run monthly between Liverpool and Bathurst. Steamers of the Messageries Maritimes sail between Bordeaux and Dakar fortnightly, and by doing an overland journey of about 120 miles from Bathurst to Dakar passengers may get to Europe in eight days.

Internal communication is conducted chiefly by water-borne craft, the Gambia River forming an unrivalled highway for 300 miles. The Government maintains a service of river steamers which run weekly during the trading season and fortnightly at other times of the year.

Telegraph cables place Bathurst in communication with West Africa and cable stations through-

out the world.

Bathurst Wireless Station, which has a range of approximately 1,000 miles, communicates with

Year.

1925

1926

1931

1932

1933

ships at sea and the important town of Dakar in the French Senegal. Wireless stations are also established at Kuntaur, Georgetown and Basse, and a regular service is maintained between these inland towns and Bathurst.

A central battery telephone system is employed in the town of Bathurst, and in direct connection

with Cape St. Mary.

There are no railways. A laterite metalled road connects Bathurst with Cape St. Mary in British Kombo, 7½ miles, crossing Oyster Creek at Denton Bridge. At Mile 6 a similar road leads by Kanifin to Yundum in the Kombo 11½ miles and through Kanifin to Sukuta, 32 miles.

Motor cars are used in Bathurst and its vicinity. The rules of the Postal Union have been adopted by the Colony and the Protectorate.

The following are the rates of postage:-

Letters.

Internal $-\frac{1}{2}d$. per oz. Empire and U.S.A. $-\frac{1}{2}d$. for each oz. or fraction thereof.

Other Countries-3d. for the first oz., and 11d. for each succeeding oz. or fraction thereof.

Parcels Post.

If posted locally for delivery within the Colony, 6d. for first 2 lbs., 4d. for each additional lb.

Parcels from abroad redirected to an Inland Office, 6d, for first 2 lbs., 4d. for each additional lb.

If addressed to the United Kingdom or British West African Colonies :-

Not over 3 lbs. to U.K. 2s. 3d.; W.A.C.

Over 3 lbs., but not over 7 lbs. to U.K. 3s. 6d.; W.A. Colonies 3/.

Over 7 lbs., but not over 11 lbs., to U.K. 4s. 9d.; W.A. Colonies 4/-.

Over 11 lbs., but not over 22 lbs., to U.K. 6s. 9d.; W.A. Colonies 7s.

There is no direct parcel post scheme at present with foreign countries. All parcels are forwarded through the medium of the General Post Office, London, a small additional charge being made for onward transmission.

A weekly letter air mail service operates with Europe via London, Paris, Toulouse, Dakar and thence by sea to Bathurst, and vice versa, as opportunity occurs.

Climate.

The climate of the Gambia during the dry season from the end of November to the middle of May is pleasant and generally healthy. During the wet season—June to October—the conditions are much the same as elsewhere on the West Coast of Africa: the change from excessive dryness to a damp atmosphere is found to be trying. In the interior the temperature is high from March to June. The lowest reading of the thermometer in the shade during 1933 in Bathurst was 57°F. in February, the highest recorded temperature being 100°F. in March.

The rainfall during the year 1933 in Bathurst was 54.70 inches. The rainfall varies considerably; the average is 47 inches.

GIBRALTAR.

Situation and Area.

Gibraltar is a narrow peninsula running southwards from the south-west coast of Spain, in N. lat. 36° 6′ 30″, and W. long. 5° 21′ 12″. It consists of a long high mountain called "The Rock," and a very flat sandy plain to the north of it, raised only a few feet above the level of the sea, and called the North Front. Its greatest elevation is 1,396 feet, its length 27 miles, and its greatest breadth 3 of a mile. Its area is 17 square miles.

History.

The rock of Gibraltar, the Mons Calpe of the ancients, remained under the dominion of the Moors until the 15th century, when it was incorporated with the Spanish kingdom of Granads. It was captured by the British forces under Sir George Rooke, 24th July, 1704, and was ceded by the Treaty of Utrecht in 1713. The Treaty of Utrecht was renewed by Article 2 of Treaty of Versailles, 1783. It was successfully defended by Gen. Eliot (afterwards Lord Heathfield) in the great siege of 1779-83.

General Description.

The promontory forms one side of a bay, called the Bay of Gibraltar, which is about 4 or 5 miles across, and affords good anchorage for the shipping passing through the Straits. The eastern and northern faces of the Rock are an inaccessible precipice rising abruptly from the sea and the sandy plain known as the North Front, which lies between Gibraltar and the Spanish town of La Linea; from the northern end the Rock runs along southward like a knife edge to the ancient site of O'Hara's Tower, from which it slopes gradually till it terminates in a perpendicular cliff about 100 feet high at the water's edge at Europa; these cliffs are continued along the western face to the New Mole, beyond which the fortress is protected by artificial ramparts. Behind these latter lies the larger portion of the town, covering an area of only 2 by 1 mile. is one of the most thickly inhabited places in the world, but it is not unhealthy. Between this part of the town and the southern portion is a picturesque public garden, called the Alameda. The civil population in the southern part of the town is confined to the east and south-east of the South Mole, the remainder of the southern portion of the Rock being entirely taken up with barracks, hospitals, &c., for the Military and the Navy.

Gibraltar is a very popular tourist centre for those wishing to tour Scuthern Spain, and Morocco. It is extensively used as a port of call and coaling station by shipping, and it is also an entrepot of the trade between England and the Arabian states of Northern Africa, for which it has many advantages, having been ever since its occupation by the British a free port, or practically so.

The naval harbour is on the West side of the Rock. It is formed by three separate Moles known as the "North," "Detached" and "South" Moles. The North Mole runs westward from Devil's Tongue for about 2,900 feet, and then southward, giving a total length of over a mile. The South Mole projects into the sea for a distance of 3,660 feet in a north-westerly direction. The Detached Mole, 2,717 feet long, is so situated between these two Moles as to form a breakwater and leave two means of entrance and exit. The harbour contains a water area of 440 acres. There are three large graving docks for naval purposes, and a small dock which is available for merchant vessels of light draught.

The old wharf at Waterport has been extended and improved by the addition of a new mole, which has been provided with sheds for transit cargo, electrical cranes and other equipment to facilitate the handling of cargo.

About 300 persons are employed in tobaccomanufactories, and about 1,200 in the coal depôts. It is a port of registry, having, on 31st December, 1933, 41 vessels, of together 13,150 tons (gross). No statistics of imports or exports are taken.

The revenue is derived from port dues, the rent of the Crown estate in the town, licence duties and fees and import duties.

The present Customs Tariff includes import duties on wines, liquors, spirits, including perfumed spirits, and tobacco with Empire preferential rates, and on motor spirit.

The Government is administered under Letters Patent of the 12th September, 1922, by a Governor, aided by an Executive Council composed of 4 official and 3 unofficial members. The power of legislation is vested in the Governor, who is also the General commanding the garrison. The management of the drainage, water supply, &c., is in the hands of the City Council. Their receipts for 1933 were 119,0301. 5s. 0d., their expenditure 119,3311. 3s. 7d., and their debt, on the 31st of December, 1933, 130,3401.

There are branches of Barelays Bank (Dominion, Colonial and Overseas), the Credit Foncier d'Algerie et de Tunisie, and several private bankers.

A Government savings bank was founded in 1882, and had on 31st Dec., 1932, 113,0291. deposited by 3,567 depositors. Since the 1st Oct., 1898, the legal tender currency has been that of the United Kingdom, and the public accounts are now kept in it, but Spanish money is still freely current. The change from Spanish currency, which had previously been the legal tender, was effected under the provisions of the Orders in Council of the 9th of August, 1898. Under the Currency Note Ordinance, 1927, the currency includes notes issued by the Government of Gibraltar. These notes are of the value of 5l., 1l. and 10s.

There is daily postal communication with England by way of Spain and France. Rates of postage: Letters, 2d. per oz.; newspapers, 4d. The internal postage rate is 4d. per oz. There is direct telegraphic communication with Spain, and by cables to England, Tangier, Malta, Lisbon, and Cadiz.

Education is compulsory since 1917. There are thirteen elementary schools, subsidised by Government, and several private schools, the number of scholars in average attendance being 2,306 for the school year ending 31st March, 1934. The Government-aided schools are for the most part managed by boards of the different denominations.

THE GOLD COAST. THE GOLD COAST COLONY.

Situation and Native Tribes.

The Gold Coast Colony, with Ashanti, the Northern Territories, and Togoland under British Mandate, is situated on the Gulf of Guinea, between 3° 7' W. long. and 1° 14' E. long., and is bounded on the west by the French colony of the Ivory Coast, on the east by Togoland under French Mandate, on the north by the French Soudan, and on the south by the Atlantic

The area of the Colony is 23,937 square miles, of Ashanti, 24,379, of the Northern Territories, 30,486, and of Togoland under British Mandate, 13,041.

The Colony is inhabited by a large number of tribes, whose customs and forms of government are of a more or less similar character. Each tribe has its own head chief and every town or village of the tribe a chief or headman.

The head chiefs and chiefs form the council of

the tribe, and assist in dealing with n affecting its general welfare. The sucto the chiefs' stools is for the most part The suc female line, the heir to the stool being se from among the sons of the occupant's sister brothers and the male off-spring of his auri the mother's side.

The principal sea coast states are the f ing:—Nzima, Ahanta, Sekondi, Kor Edina, Oguaa, Winneba, Assin Gomos Kom

Adangme, Awuna and Agbosome. In the interior of the Colony the privitor states are:—Aowin, upper and lower W Sefwi, upper and lower Denkera, Tufel, Esikuma, Ajumako, Birim Akim Abuaku huma Birim Kwahu, Akim Kotoku, Akwapim, . and western Krobo, Akwamu, Krepi, She

History.

Little is known of the history of the people Gold Coast prior to the first recorded contact Europeans, which took place towards the end = 15th century, but tradition, borne out by the planguage distribution and by the absence of language distribution and by the absence of of large earlier settlements, is that the population resulted from a series of water immigration in comparatively recent historical?

Of these immigrants the most numerous w Akans who, displaced by more warlike and organised tribes, came from the north-west in of sanctuary to the forests of the Gold Coas sections of them eventually reaching the sea. numbers being augmented by a succession of waves, the Akans assimilated the aborigin gradually occupied the greater part of the c Behind the Akans came the Moshi who, pa conquest and partly by peaceful penetration, of supremacy over the inhabitants of the n portion of the Gold Coast and establish Mamprussi and Dagomba kingdoms under t of sons or other relatives of their leaders. later date the south-east corner of the Cold peopled by an infiltration of Ga, Adangbe a tribes from the east and north-east.

The first Europeans to reach the Gold Cos the Portuguese who, arriving in 1471, built the at Elmina eleven years later in order to their trading interests. They found a people of h and fishermen, primitive in habits and develo yet understanding the working of iron an conscious of the value of gold. No native state size had yet been established but numerous chiefdoms were in existence.

Until the close of the 16th centure the Por maintained their trading monopoly. Feeble c on the part of other European Powers, including the COAST.

English, were made to obtain a footing on the Coast, but the Portuguese were never seriously challenged until the advent of the Dutch in 1595.

At first the Portuguese were interested in obtaining gold, ivory and spices, but with the opening up of the New World there came a demand for cheap labour for the plantations. So commenced the transatlantic slave trade which, until its decline and abolition in the 19th century, shaped the history of the Gold Coast.

The main results of the slave trade were two-fold. First, in order to feed the slaves awaiting shipment and their captors, the Portuguese were obliged to introduce food plants and to teach an improved method of agriculture to a people hitherto largely dependent for food on the natural resources of the forest and sea. Secondly, the lucrative nature of the trade attracted the attention of other European nations besides the Portuguese to the possibilities of the Gold Coast.

The Dutch, appearing on the Coast in 1595, rapidly undermined the domination of the Portuguese. In 1637 they captured Elmina and in 1642 the Portuguese abandoned all their possessions in the Gold Coast to the newcomers. Other European Powers, including the English, followed and, fighting amongst themselves, scrambled for a footing on the Coast. By 1750, however, the year in which the African Company of Merchants was formed and subsidised by the British Government to the extent of 13,000, per annum, all had withdrawn except the Dutch with their headquarters at Elmina, the Danes with their head-

quarters at Christiansborg and the English with their

headquarters at Cape Coast Castle.

In 1821 the British Government first assumed the control of the British settlements in the Gold Coast, and the African Company of Merchants was dissolved, its possessions being vested in the Crown and placed under the Government of Sierra Leone. Seven years later, however, the British Government, after considering complete withdrawal from the Coast, entrusted the government of the settlements in the Gold Coast to a Committee of London Merchants. In 1843, however, the 1821 arrangement was restored in consequence of suspected slave trading, which had been abolished by Great Britain in 1833. The year 1850 saw the separation of the British forts and settlements of the Gold Coast from Sierra Leone, the creation by Letters Patent of Executive and Legislative Councils, but in 1866 government from Sierra Leone was resumed.

In 1872 the Dutch withdrew from the Gold Coast, handing over their possessions to the British. Two years later, after Sir Garnet Wolseley's successful Ashanti campaign, came the final separation from Sierra Leone, measures being taken on the conclusion of peace for placing the government of the Gold Coast on a footing of efficiency and security. A new Charter was issued dated the 24th of July, 1874, separating Her Majesty's Settlements on the Gold Coast and Lagos from the Government of Sierra Leone and constituting them into one Colony under the style of the Gold Coast Colony under a Governor-in-Chief with an Administrator at Lagos.

In 1886 all the settlements and territories belonging to Her Majesty on the Gold Coast were, by Letters Patent dated the 13th January, formed into a distinct Colony, Lagos being separated therefrom. This territory, however, did not include all the areas under British protection and had no specified boundaries. To regularise the position, therefore, these protected areas were annexed to His Majesty's Dominions and declared to be part and parcel of His Majesty's Gold Coast Colony by Order-in-Council of the 26th September, 1901. The boundaries of the Colony thus

constituted were defined by Order-in-Council dated the 22nd October, 1906, and have since remained unchanged.

Constitution.

The constitutional instrument providing for the Government of the Colony are the Letters Patent and Royal Instructions dated the 23rd of May, 1925. the former of which create the office of Governor and Commander-in-Chief and constitute an Executive Council consisting of such persons as shall be directed by Instructions under the Royal Sign Manual and Signet, and a Legislative Council constituted in such manner and consisting of the Governor and such persons as are directed by the Order in Council of the 8th of April, 1925.and known as the Gold Coast Colony (Legislative Council) Order in Council, 1925. Royal Instructions were also passed on the 23rd May, 1925, directing that the Executive Council should consist of the Colonial Secretary, the Attorney-General, the Treasurer. the Director of Medical and Sanitary Services, and the Secretary of Native Affairs (these to be styled ex-officio Members) and such other persons as were at the date of the coming into operation of the aforesaid Letters Patent Members of the Council or as may be appointed under the Royal Sign Manual and Signet or as the Governor may appoint in pursuance of Instructions through a Secretary of State. The Legislative Council for the first time contains an elective element and consists of the Governor as President together with fifteen Official Members and fourteen Unofficial Members. The Official Members are the five senior Members of the Executive Council. the Comptroller of Customs, the Director of Public Works, the General Manager of the Railway, the Commissioners of the Eastern, Central and Western Provinces, as ex-officio Members, and such other officials not exceeding two at any one time as the Governor may appoint. The Unofficial Members are six Provincial Members, namely three for the Eastern Province, two for the Central Province, and one for the Western Province; three Municipal Members. namely; one each for the towns of Accra, Cape Coast and Sekondi respectively; one European Mercantile Member, one European Mining Member and three Europeans nominated by the Governor. The Provincial Members are Head Chiefs elected by the Provincial Councils of the said Provinces; the Municipal Members are elected by the electorate of the said towns; the Mercantile Member is elected by the Chambers of Commerce; and the Mining Member is elected by the Chamber of Mines.

Municipal Government.

The Town Councils Ordinance has been extended to the towns of Accra, Sekondi and Cape Coast. The town of Kumasi in Ashanti is under the control of a statutory corporation styled the Kumasi Public Health Board.

Law and Justice.

The Law of the Colony is the Common law, the doctrines of equity, and the statutes of general, application in force in England, on the 24th July-1874, modified by a large number of Local Ordinances passed since that date. The Criminal Law was codified in 1892, and the civil and criminal procedure are regulated by the Supreme Court and Criminal Procedure Ordinances both originally passed in 1876.

Justice is administered by the Supreme Court, which is presided over by the Chief Justice and five Puisne Judges. Divisional Courts of the Supreme Court are held in different parts of the colony

There are also a large number of inferior Courts with limited criminal and civil jurisdiction, some of which are presided over by Police Magistrates and the remainder by Commissioners. The Supreme Court has an original civil and criminal jurisdiction, and also decides appeals from the inferior courts. The Chief Justice, and the Judges in their respective provinces have also powers of revision of the decisions of the Magistrates and Commissioners in criminal cases. Appeals from the Divisional Courts and from the Courts of the Provincial Commissioners in land cases lie to the West African Court of Appeal.

Native customary law is administered in all the Courts, in so far as it is not incompatible with any ordinance, or rule, regulation, order, proclamation, or bye-law made under any ordinance for the time being in force in the Colony, and not repugnant to natural justice, equity and good conscience.

Native Tribunals, presided over by Paramount or Divisional Chiefs, are established throughout the Colony, with criminal and civil jurisdiction in cases where the parties are subject thereto. Such jurisdiction has been much increased by recent legislation, and certain judicial powers have also been conferred upon State Councils and Provincial Councils.

There is an appeal from the Tribunal of a Divisional Chief to that of a Paramount Chief, and from a Paramount Chief's Tribunal to the District Commissioner's Court; but, where a title to land is in dispute, the appeal lies from the Paramount Chief's Tribunal to the Provincial Commissioner's Court.

Prisons.

There are four convict and 20 local prisons. The convict prisons are at Accra, Sekondi, Kumasi

and Tamale.

The following industries are carried on successfully: Carpentry, cabinet-making, tailoring, mat and basket making, boot and shoe making, weaving, farming, string and rope making, brick-making, brush and broom making.

The Mark System, whereby the remission of one quarter of a sentence can be earned by hard work and good conduct, is applied to all persons sentenced to two years or more.

A Boys' Industrial Home under the control of the Salvation Army has been established at Ada,

Climate.

The climate although hot and damp, is cooler than that of most tropical countries situated in similar latitudes. The most adverse feature relative to the residence of Europeans is the very high relative humidity which only falls below 80° in the dry districts of the north and east and during the Harmattan. The average mean temperature is from 77°-81°, being greatest in the north and east and lowest in the forest area. Extremes of shade temperature have been 110° in Tamale and 49° Extremes of shade at Kumasi.

The rainfall varies with the configuration of the country, being greatest in the south-western corner around Axim and least in the far north and coastal belt. There is the double wet season common to Tropical Africa corresponding to the double passage of the sun, the major rains in the south being in May and June and the lesser rains in September and October. In the Northern Territories intensity of the rains is reversed and in the extreme north the passages of the sun are so near to one another in date that there is only one wet season.

The most pronounced season is the Harmattan characterised by a dry north-east wind which blows from the Sahara carrying clouds of red dust during the period of cessation of the south-west monsoon. This occurs at the period when the sun is passing southwards to the spring solstice during January and February, and the feature is the terrific desiccation of the atmosphere. A drop of 63 per cent. of relative humidity has been experienced in 24 hours with a result that papers and books curl up and the skin appears parched and dry. The daily range of temperature is more than doubled and the period in very trying to Europeans. For the year 1933, the rainfall and the average figures for maximum shade temperature, mean daily temperature and mean R.H. at 9.0 a.m. are given in the table below :-

		Rainfall inches.	Max. shade °F.	Mean Temp. °F.	Mean R.H. at 9.0 a.m.
Accra	-	3 5·51	86-0	80-3	75.2
Sekondi		53.50	90.0	80-9	75-2
Kumasi		54-45	88.4	78-5	84-4
Tamale		50.22	93.2	81-1	67.2

Mail and Steamship Services.

Elder Dempeter Lines Limited are under contract with the Postmaster-General for conveyance of His Majesty's mails between Liverpool and the West and South-West coasts of Africa.

Regular sailings are maintained between Liverpool and West African ports for mails, passengers and cargo.

There are also regular sailings from London.

A mail steamer of this company leaves Liverpool for Calabar and Port Harcourt alternately once a The Port Harcourt Service calls at fortnight. Madeira, Las Palmas, Bathurst, Freetown, Takoradi, Accra, Lagos and Port Harcourt. The Calabar Service calls at Madeira, Freetown, Monrovia, Takoradi, Acera, Lagos, Calabar and Victoria; the usual length of voyage being thirteen days to Gold Coast ports.

Cargo steamers are despatched from Liverpool once every three weeks, calling at the principal Gold Coast ports. Length of voyage about 21 days.

At present, cargo steamers are despatched from New York every six weeks and call at the principal

Gold Coast ports both outwards and homewards, the average length of voyage being 28 days. Cargo steamers are despatched from Hamburg every 17 days, calling at Rotterdam, Antwerp and London for the principal Gold Coast ports. Average length of voyage from Hamburg to the first port of call on the Gold Coast is 21 days.

Cargo steamers are despatched about the 25th of each month from Montreal for Freetown, Cape Town, Port Elizabeth, East London, Durban, Lourenço Marques, Beira. This Service occasionally calls on the Gold Coast at Takoradi homewards. The vessels of this Service are scheduled to arrive at Cape Town on the 22nd of the succeeding month to their departure from Montreal.

Elder Dempster Lines, Limited, are directly represented in the main Gold Coast ports.

Mail steamers of Chargeurs Rounis Line, sailing from Bordeaux, call at Acers on the homeward voyage for passengers and cargo once a month. Cargo steamers call at regular intervals outwards Local Agents:-United Africa and homewards. Company, Limited, Lighterage Dept.

Passenger and cargo steamers of Compagnie Prancaise de Navigation a Vapeur (Cvp. Fabre). and Compagnie Marseillaise de Navigation a Vapeur (Cie Fraissinet), sailing from Marseilles call frequently outwards and homewards at Gold Coast ports. Local Agents: -- United Africa Company, Limited. Lighterage Department.

Cargo steamers, with passenger accommodation, of the American West African Line are despatched twice monthly from New York and from the Gulf of Mexico, calling at the principal Gold Coast ports. These sailings are augmented during the Colony's cacao season to relieve congestion of cacao destined for America. The voyage from New York is now reduced to 28 days. Calls are also made at all ports to Loanda, including the Belgian Congo.

Agents:—United Africa Company Local Limited. Lighterage Department.

Cargo steamers of the United Africa Company, Limited, with limited accommodation for passengers, are despatched from Liverpool and the Continent. There are about two sailings per month, and steamers call outwards at all Gold Coast ports, and call homewards as inducement offers. Local Agents:—United Africa Company, Limited, Lighterage Department.

Cargo steamers of the Societe Navale de L'Ouest sail monthly from Hamburg, Antwerp, Havre and Bordeaux and call at the principal Gold Coast ports. They call homewards at continental ports as inducement offers. Local Agents:—United Africa Company, Limited, Lighterage Department.

Cargo steamers of the Navigazione Libera Triestina
Line sailing from Venice, Trieste, Naples, Genoa, Marseilles and Barcelona call at the principal Gold Coast ports once every month outwards. These Coast ports once every month outwards. These steamers now go as far as Durban in South Africa and call at Gold Coast ports homewards. Local Agents :-- United Africa Company, Limited,

Lighterage Department.

Mail and Passenger steamers of the German-African Lines (Woermann-Linie A.G., Deutsche Ost-Afrika Linie, Hamburg Amerika Linie (Afrika Dienst) and Hamburg Bremer (Afrika Linie), managed by the Woermann-Linie A.G. of Hamburg, sail from Hamburg to West African ports via Rotterdam, Boulogne s.M. and Southampton at about monthly intervals, calling at Freetown, Monrovia, Takoradi, Accra, Lagos, Port Harcourt, Calabar, Victoria, Tiko, Duala and Fernando Po. Length of the voyage from Southampton to Gold Coast is 14 days

Two to three Mail and Passenger Steamers to South and East Africa are despatched every month from Hamburg, running either via the Canary Islands and Capetown, or via the Mediterranean and Suez, but these steamers do not always call at Gold Coast ports.

Cargo steamers of the above Lines are despatched from Hamburg via Rotterdam, Antwerp and Havre about twice a month at regular intervals to African ports. These ships have a limited accommodation for passengers. Representative for the Gold Coast:-Woormann-Linie, Resident Agent, Accra.

The Holland West-Afrika Lijn N.V., Amsterdam, maintain mail, passenger and freight services from Hamburg, Amsterdam and Bordeaux to the West

African ports by two sailings monthly.

The mail and passenger steamers are despatched monthly from Hamburg via Amsterdam, Bordeaux (through tickets from United Kingdom), reaching Takoradi in 13 days from Bordeaux. After Accra they proceed down the coast as far as Togo, Dahomey, Nigeria, Fernando Po and the Cameroons.

They call homewards at Acora and Takoradi and reach Europe via Freetown and Conskry within 14 days. All these steamers call at Le Havre homewards and passengers for the United Kingdom are transhipped to Southampton without additional charge.

Cargo steamers of this Line are despatched once every six weeks from Hamburg, Amsterdam and Bordeaux. Several of these boats have limited passenger accommodation. The length of voyage varies from 17 to 27 days.

Local Agents :- Holland West-Afrika Lijn N.V., P.O. Box 269, Accra.

Harboure.

The Gold Coast was for many years at a great disadvantage in that it possessed no deep-water harbour. Jetties protected by breakwaters were built at Sekondi and Accra, for the use of surf boats and lighters.

Sekondi has been replaced by a deep-water harbour a few miles to the westward at Takoradi which was opened to shipping in 1928. The harbour is 220 acres in extent and provides moorings for six ocean-going ships whilst three can be berthed alongside the main wharf, which contains a large manganese-loading transporter. There is a fourth berth for local coal traffic.

Internal Communications.

Railway communication consists of a main line running from Takoradi to Kumasi thence to Accra. a distance of 362 miles, with branches, Sekondi to a distance of 302 miles, with branches, Section to Takoradi Junction (3 miles), Tarkwa to Prestea (19 miles), and Huni Valley to Kade (99 miles). The Main Line and Branches are 3'6' gauge. There is a branch line, Accra to Weija (Accra Water Works), 10 miles in length, which is 2'6' gauge.

The railway gross earnings for the year 1933-34 were 796,730, and the working expenditure, including provision for pensions, was 407,3371. (Transport Section excluded). The total number of miles open for traffic on the 31st March, 1934, was

500, and the capital cost 9,242,4571.

The mileage of motor roads maintained by the Public Works Department is 1,936‡ miles as follows:— Tar

Tarmet. Sprayed Gravel. Total. Gravel.

	Miles	Miles	Miles	Miles
Accra District	412	61	1231	172
Nsawam District	43	2	741	1191
Koforidua District	451	201	50 ;	116
Keta District		6	1	7
Winneba - Oda Dis-		-		
trict	541	61	2111	2721
Cape Coast District	621	9	151	223
Takoradi District	6	5	108 1	1191
Dunkwa District		2	249	251
Ashanti District	157	1#	250	409
Northern Territories	_		247	247
	4111	58	1,4671	1,936
	-			-

The mileage of metal and tarred roads now amounts to 469]. In addition to the 1,936? miles of motor roads which are under the control of the Public Works Department, there are some 3,900 miles of motorable roads which have been constructed and are maintained by the Chiefs. These roads are all motorable during the dry season and have opened up the country in all directions to motor traffic, and ferries have been installed and bridges built whenever Decessary.

The Black Volta rises in the hills near Soukouraba. and the White Volta rises near Quahigouga, both in the French province of Haute Volta. These two rivers converge some 280 miles from the sea on the Ashanti-Northern Territories border and become the River Volta which flows into the sea at Ada. This river is navigable for light draught launches as far as Akuse, and, with the exception of the Krachi rapids, can be used for canoe traffic during certain seasons of the year as far as Yeji. The Ankobra River is navigable for many months of the year by surf-boats and light draught launches for a distance of 50 miles. The Tano, connected with Half Assini, by the main lagoon, and by a tramway, three miles in length, is navigable for light draught launches and canoes as far as Tanoso, a distance of about 60 miles.

Rapids at Sutri prevent this river being further utilised Digitized by GOOGIC

The ferry over the River Volta at Senkye is capable of taking the largest oars and lorries, and is now worked by an endless chain driven by a petrol motor placed on the ferry boat. A similar ferry is in

operation over the same river at Yeji.

The Government maintains a Motor Transport Service, which operates in centres where vehicles provided by private enterprise are unobtainable or more costly than a Government-owned fleet. The headquarters is at Acors, with branches at Kumasi and Tamale. The department also handles Government cargo and officials' baggage and stores arriving by sea and arranges the coastwise shipping of Government personnel and stores between ports within the Colony.

In addition to their departmental duties, the officers of the Transport Department assist in carrying out the provisions of the Motor Traffic Ordinance by acting as Testing and Certifying

Officers.

Medical Facilities.

Medical officers are stationed at all the principal contres of the Colony and its dependencies. Many of these officers travel in their districts and give treatment in village dispensaries.

There are seven European hospitals in the Gold Coast; five in the Colony, one in Ashanti and one in

the Northern Territories.

There are also thirty-two African hospitals; twenty in the Colony, six in the Northern Territories, four in Ashanti and two in the British Sphere of

Togoland.

The Gold Coast Hospital was opened at Acera in October, 1923, and does excellent work. It continues to grow in popularity with the African community. It contains 212 beds and eighteen cots which are nearly always occupied.

In the year 1933-34 the hospital dealt with 13,473 out- and 3,020 in-patients, and 704 major operations were performed. At the African hospital, Kumasi, 13,645 out- and 2,204 in-patients were treated during

the same period.

An up-to-date maternity hospital in charge of a woman medical officer, now containing thirty-eight beds and twenty-eight cots, was opened in 1928 at Kawli Bu in the immediate vicinity of the Gold Coast Hospital and is highly appreciated. The training of midwives is carried on here.

In addition to the above there is a Laboratory Services Branch consisting of a central Medical Research Institute situated at Acra close to the Gold Coast Hospital. Valuable work in research, clinical pathology, etc., is carried on by this Branch.

Health.

The Health Branch of the Medical Department is controlled by a Deputy Director of Health Service who is responsible to the Director of Medical and Sanitary Service. Medical officers of health are stationed in five of the most important towns in the Colony and in Kumasi in Ashanti. All Medical officers are charged with public health duties in their respective districts and in the more populous areas are assisted by European Sanitary superintendents.

Public health activities are extended into rural areas as far as the available staff will allow. As close a watch as possible is kept on the smaller towns and villages along the main trade routes. Every encouragement is given to the people to lay-out their villages on open lines and improve the type of

houses erected.

Particular stress is laid on the protection and improvement of village water supplies. Progress in rural sanitation which previously was marked, particularly in Ashanti, has in the last year or two suffered a severe set-back owing to considerations of financial stringency.

Birth and death registration is in force in thirtyone recognised registration areas, but cannot be applied yet to the Colony as a whole. For the year 1933 a birth rate of 34-0 and a crude death rate of 22-2 were returned. The infantile mortality rate is somewhat high; the rate for the registration areas for the year 1933 was 100. The maternal mortality figures for the year 1933 are still regrettably high, the returns per 1,000 live births varying between 8 and 22 in the five largest centres, where most facilities for aid at childbirth are in existence.

Infant welfare and ante-natal welfare centres, in charge of women medical officers, have been established at Kumasi, Acera and Koforidus. At the Acera and

Kumasi centres wards are attached.

At Cape Coast and Sekondi the centres are under the charge of a European woman medical officer and nursing sister, respectively, of the Gold Coast Branch of the British Red Cross Society.

Posts and Telegraphs.

The mails exchanged fortnightly between the Gold Coast and other British Colonies on the West Coast and the United Kingdom are carried by the steamers of the Elder Dempeter Lines, Limited. Mails are exchanged over and with Togoland under French Mandate and with the French Ivory Coast; and direct mails from Hamburg are received fortnightly.

There are 73 Post Offices and 209 Postal Agencies, the distribution being effected principally by rail and motor. When this is impossible a runner service is employed. The rate for letters (1 oz.) within the Empire is 2d., to the United States of America 3d.,

elsewhere 3d.

There are 4,657 miles of Telegraph Line Wire serving all the principal centres. The rate is 1s. for 12 words, and 1d. per word in excess of 12.

There are 5,454 miles of double wire line and underground cable circuits in use which link up 209 Exchanges and Call Offices throughout the country.

Any passenger or cargo boat entering Takoradi Harbour may be connected to the mainland telephone service and telegraph and phonogram system.

There are about 1,886 telephones, including those in Government Offices, in operation, and extensions

to the system are in progress.

Parcel Post despatches are exchanged direct with the United Kingdom and with other British Colonies in West Africa, and the United States of America. Parcels for other countries are forwarded through the United Kingdom. The C.O.D, service from the United Kingdom is extensive.

British Imperial Postal Orders are issued and paid, and an inland and foreign Money Order system is in

peration.

A coastal radio-telegraph station at Takoradi transmits radio-telegrams at 9d. per word.

The Eastern Telegraph Company transmits messages by cable to any part of the world from Accra.

Education.

Education in the Gold Coast has hitherto largely been, and is now to a still greater extent, aided and controlled by Government, and all schools are open to inspection by officers of the Education Department. All teachers are registered, and are paid according to an incrementally graded salary scale.

Apart from a large number of non-aided primary schools, there are twenty-four Government schools and 365 Assisted schools in the Colony, Ashania, and the Northern Territories. The latest figures show that these Government and Assisted Primary Schools have an enrolment of 43,360 pupils, of whom 10,878 are girls. The largest of the Missions working in these territories is the Presbyterian Church with 118 Assisted Schools followed next in order of size

Digitized by GOOQIC

by the Ewe Presbyterian Church with 81 Assisted Schools.

In addition to the Government Primary Schools there are the Acera Government Technical School and three Middle Boarding Schools in different parts of the country. They are all boarding schools established by Government for the purpose of giving instruction in the more common building and engineering trades with simple literary and technological training.

There are also training schools controlled by the departments concerned, e.g., Agriculture and Forestry, and Animal Health, where pupils are boarded and trained, being paid a salary while undergoing instruction.

Teachers intended for Government service and certain others receive free tuition in the Training Department of the Prince of Wales' College, Achimota.

Teachers are also trained at Wesley College, Kumasi, the Presbyterian Training College at Akropong, Akwapim, the Roman Catholic Training Colleges at Amisano, near Elmins.

The training of female teachers by Missions, under conditions of grant similar to those applying to male students at the Mission Colleges, has commenced.

There are two residential Secondary Schools at Cape Coast, both of which are Government aided, one being under the Wesleyan Mission and the other under the English Church Mission Local Authority.

The Roman Catholic, English Church, Wesleyan, and Presbyterian Missions each have residential Girls Schools in which literary and domestic training

The Prince of Wales' College, Achimota, near Acera, which was opened in January, 1927, is a boarding school open to pupils of all nationalities and religions. It is intended ultimately to provide a complete course of instruction for boys and girls from the Kindergarten stage up to the standard of the London Intermediate Examination. The College also trains teachers for Government and Assisted Schools.

The College is administered by a Council consisting partly of elected and partly of nominated members. It is subsidized by Government.

Currency and Banking.

Prior to 1912 and 1913 the currency consisted chiefly of British gold (comparatively rare), silver and copper. In 1912, subsidiary nickel-bronze coins (1d., 1d. and 70d. pieces) were introduced, and in 1913 a special silver currency common to all the British West African Colonies of the same weight and fineness as the corresponding British coins. The coins issued are 2s., 1s., 6d. and 3d. pieces. Owing to the great increase in the demand for currency and the difficulties in obtaining adequate supplies, it was found necessary in 1915 to make British Treasury Notes legal tender, and in 1916 special West African Currency Notes were introduced. 20s. and 10s. Notes are the only values now in circulation, 51., 2s. and ls. Notes having been withdrawn. In 1920, owing to the rapid disappearance of silver coms, an alloy coinage was introduced of the same denominations as the silver coins and silver has now practically been withdrawn from circulation. The special West Africa silver and alloy currency and the West African Currency Notes are under the management of the West African Currency Board and are secured by sterling securities held by the Board. Current British gold and silver coins, British 20s. and 10s. Treasury Notes, West Africa Currency silver and alloy coins, West African Currency Notes, and West Africa nickel-bronze coins are all legal tender.

The Bank of British West Africa, Limited, opened at Accra on the 1st January, 1897, and now has

branches at all the principal business centres in the Colony.

The Colonial Bank (now Barclay's Bank (Dominion, Colonial and Overseas) Ltd.) began business at Acera in 1917, and branches have now been opened at other centres. Both Banks have a savings department. In 1888, a Government Savings Bank was established which is now under Post Office management. On 31st December, 1933, the amount to the credit of depositors was 114,955.

Accounts are kept in sterling.

Population.

The first attempt to take a census was made in 1891, which, however, covered the Colony only. Since then a census has been made at ten-year intervals, viz.:—1901, 1911, 1921 and 1931. Except in 1901, the whole of Ashanti and the Northern Territories have been included. In a country such as the Gold Coast, imperfect communications and lack of education make the holding of a complete census a matter of great difficulty and even now the figures cannot be considered absolutely accurate.

At the mid-year 1933 the population of the Gold Coast, estimated on a numerical basis, numbered

3.357.950, as follows :-

Colony		Resident Africans. 1,661,155	Resident Non-Africans. 2.304	Mari- time. 172
Ashanti		616,752		
Northern Togoland		759 ,33 2	107	
British	Mandate)	317,461	43	_
		0.054.700		
		3,354,700	3,078	172

The estimated African population of some of the chief towns was as follows:—

 		65,136
 		11,691
 		18,307
 		18,630
 		38,559
 		14.975
 ••	••	3,467

Industries, Trade and Customs.

The chief products of the Colony are cocca, gold, diamonds and manganese. Palm oil, palm kernels, lumber, kola and copra are also shipped.

The cultivation of cocoa was started in Akwapim in 1879, and exports in 1891 realised 41. Coffee at that time fetched a fair price, and it was not until 1898, when the price for the latter article fell so low as to make its cultivation at any distance from the coast unremunerative, that attention was paid to cocoa. Since that year the cacao industry has made rapid strides. In 1900 the value exported was 27,280l., in 1918, 1,796,985l., and in 1920, 10,056,298l. in 1921, although the value fell considerably to 4,764,0671., the quantity of cocoa exported exceeded the 1920 exports by 8,422 tons. In 1928, 225,077 tons, valued at 11,229,5121., in 1929, 238,068 tons valued at 9,704,493l., in 1930, 190,580 tons, valued at 6,970,385l., in 1931, 244,097 tons, valued at 5,493,165l., in 1932, 233,745 tons valued at 5,511,360l., and in 1933, 236,117 tons valued at 4,971,4781., were exported respectively. There is a tax of a of a penny per lb. on cocoa exported.

Gold has been exported from the Gold Coast more or less continuously since the discovery of the country by Europeans in the fifteenth century. Up to 1874, however, the industry was almost entirely in the hands of the natives. The first company for gold mining in West Africa was founded in 1874, but did little beyond exploration.

A second company, formed in 1879, engaged in mining operations in the neighbourhood of Tarquah, and from that year the progress of mining enterprise is indicated by the rapid increase in the exports of gold bars, the result of Buropean operations, as compared with those of gold dust, the produce of native mining. In 1899 there was a very remarkable development of the mining industry, which, though checked for a while by the disturbances in Ashanti, received a fresh impetus from the passing of the Concessions Ordinance in 1900, the progress of the railway, and general improvement in means of transport.

Gold is widely diffused throughout the Colony, Ashanti, and some parts of the Northern Territories, in quartz and alluvial deposits, while in Wassaw there is good conglomerate or banket formation which is now reported to extend to the Birrim District in the Eastern Province. The rivers are said to be rich in alluvial deposits. From the year 1903 (the first in which reliable statistics of production were kept) to 1921, the gold produced in the colony and Ashanti amounted to 5,062,267 fine ozs., valued at 21,504,750. The highest annual production was in 1914, viz. : 428,881 bullion oz. valued at 1,659,435i. In 1928 the value of gold and gold dust exported was 684,8151.; in 1929, 869,863l.; in 1930, 1,055,634l.; in 1931, 1,069,581L; in 1932, 1,692,565L; and in 1933, 1,841,883/. Extensive deposits of Bauxite exist, the most important being situated near Mpraeso in the Kwahu district where a large quantity of high grade ore has been located. In the Eastern Province near Kibi diamonds have been found, and the alluvial is being worked. The diamond exports in 1925 were 77,313 carata, valued at 98,7601.; in 1928, 698,826 carats, valued at 584,279L; in 1929, 660,536 carats, valued at 584,613L; in 1930, 861,119 carats, valued at 658,9941.; in 1931, 880,479 carata, valued at 440,9241.; in 1932, 842,297 carata valued at 536,9461.; and in 1933, 803,985 carats valued at 518,400f. Small diamonds have also been found in other localities.

Manganese Ore exists in large quantities close to the railway line about 35 miles from the port of Takoradi. Shipments of the Ore reached 338,657 tons in 1925; 419,224 tons, valued at 748,2861. in 1929; 417,490 tons, valued at 823,3961. in 1930; 247,191 tons, valued at 388,9631. in 1931; in 1932, 50,688 tons, valued at 123,6271.; and 285,140 tons valued at 367,3661. in 1933.

Modern facilities at the port of Takoradi for shipping large quantities of manganese ore were completed early in 1930.

The trade in products of the oil-palm has suffered severely in the last quarter of a century from the competition of cacao, and except in certain localities, notably the Volta River District, the farming of this kind of produce is neglected.

Native manufactures are insignificant. Cloths are woven in many parts of the country, for the most part of English spun yarn, but in the morthern districts occasionally of thread manufactured from the indigenous cotton plant. Narrow strips of four to six inches are woven on a rough hand loom, and stitched together to make clothes of various sizes. Gold and brass are worked by native smiths; cances are made on the coast rivers; pottery for domestic purposes is made by hand, and wood-carving is done chiefly in Ashanti and Kwahu. Salt is roughly prepared from the lagoons between Acera and Keta and sent up country to the markets of the Northern Territories. Fishing is extensively carried on along the coast, and large quantities of sun-dried interior.

Quantities and values of the following exports for 1933 were:—

	Quantity.	Value.
Cocca	 236,117 toms	£4,971,478
Gold	 294,373 fine og.	1,841,863
Manganese Ore	 265,140 tons	357,366
Diamonds	 803,985 carats	518,400
	 245,105 cub, feet	30.319
*Kola Nuts	 4,987 owt.	4.331
Palm Kernels	 3,013 tons	23,340

The first in value of the imports in 1933 was contour manufactured piece goods, provisions—all kinds, eigarettes, machinery, motor spirit, artificial silk manufactures, apparel, iron and steel manufactures—other kinds, bags and sacks (empty), motor cars and lorries, iron and steel manufactures—corrugated iron sheets, illuminating cil.

The following tables give particulars of the total values and the percentages of the (1) Import and (2) Export (including Re-export) trade of the Gold Coast Colony according to countries for the year 1933:—

Exclusive of 61,147 cwt. of Kola Nuts valued at 71,272J. exported from the Northern Territories (including the Northern Section of Togoland under British Mandate).

Digitized by Google

The Customs Tariff is non-preferential. The principal cotton Manufactures, artificial silk piece goods, alcoholic liquors, tobacco, timber, certain articles of apparel, milk, cordage and twine, sugar, soap, petrol and kerosene, and a number of other articles are liable to specific duties.

All other articles, unless specifically exempted, are liable to an ad valorem duty of 20% except newsprint

which is dutiable at 10%.

There is a surtax of 5% of the rates of duty on all articles except cotton manufactures (excluding apparel, sewing cotton, and unenumerated cotton manufactures) and spirits.

ASHANTI.

Ashanti is inhabited by a large number of confederated tribes, the principal of which are the Bekwais, Adansis, Kokofus, Nkwantas, Kumasis, Agunas, Mampons, Nsutas, Kumawus, Bompatas, Juabins and Ejisus. Each tribe has its own Head Chief, but from time immemorial the King of Kumasi was recognised as the King paramount of the Confederation.

In 1873 the King of Ashanti invaded the British Protectorate with a large army, and reached Rimina, where he was entirely defeated by the British forces under Colonel (afterwards Sir) Francis Festing. Later in the year Captain (afterwards Sir) John Glover was sent to the eastern districts of the Protectorate to organise the tribes in that quarter, for a flank movement against the Ashanti territory. At the same time Sir Garnet, (afterwards Viscount) Wolseley was despatched to the Gold Coast, with British and West Indian troops, native levies, and some seamen and marines, to operate against the Ashantis, starting from Cape Coast. On the 31st of January, 1874, he came into general engagement with the enemy at Amoaful, where he drove them from their position after desperate resistance. The next four days were employed continuously in fighting, until, on the evening of the 4th of February, the British force entered Kumasi. The King had fled to the bush. A few days later Sir John Glover also reached Kumasi. On the 13th, messengers sent by the King concluded a peace with Sir Garnet Wolseley at Fomana, which was afterwards signed with a pencil cross by King Kofi. By the Treaty of Fomana, the King of Ashanti renounced all elaims on the Protectorate, promised to protect traders, to abandon human sacrifices, and to pay an indemnity of 50,000 ozs. of gold.

In 1894 Prempeh, who was then King of Kumasi, and had successfully fought against the Nkoranzas, who had revolted against his rule, threatened to attack the Atebubus. This attack was averted by the despatch of a force under Sir Francis Scott, and an ultimatum was then sent to Prempeh warning him not to enter British territory, and suggesting that he should acquiesce in the establishment of a Residency at Kumasi. No definite reply to this suggestion could be obtained, and a military expedition accordingly proceeded to Kumasi, to compel compliance with the demands of Her Majesty's Government. The expedition, under the command of Sir Francis Scott, entered Kumasi without resistance, January, 1896. Prempeh made submission, but, failing to comply with the terms dictated, was brought to the coast as a political prisoner and ledged in Elmina Castle, whence he was eventually

deported to the Seychelles. A Resident was at the same time installed at Kumasi, and thus commenced an entirely new departure in the relations of the Gold Coast Colony with Ashanti.

In 1900 the Governor visited Kumasi, and was there besieged by the Ashantis, the town being closely invested. Provisions ran short, and a part of the garrison, with the Governor, out their way out; the rest were relieved by Colonel (afterwards Sir J.) Willcocks, commanding the Ashanti Field Force, on 15th July, after severe fighting. The Ashantis were subsequently thoroughly routed at Abusen

An Order of the King in Council, dated September 26th, 1901, defined the boundaries of Ashanti, annexed it to His Majesty's Dominiona, and provided for its administration under the Governor of the Gold Coast. By a subsequent Order in Council of the 22nd of October, 1906, the boundaries between the Colony and Ashanti, and between Ashanti and the Northern Territories, were re-adjusted and defined, with due regard to tribal lands and natural features.

Ashanti is administered by a Chief Commissioner with an Assistant Chief Commissioner as relieving

Officer.

The dependency is divided into the following Districts, each under a District Commissioner with limited powers of jurisdiction:—

Ashanti Akim District. Kumasi District. Mampong District. Obuasi District. Sunyani District. Wenchi District.

In 1919 a Circuit Judge was appointed for Ashanti. This officer relieves the Chief Commissioner of practically all judicial work except civil cases and matters in which native customary law is applicable. A Police Magistrate exercises limited jurisdiction in the town of Kumasi.

The peaceful relations which, under the auspices of the Gold Coast Government, have existed for many years now between the Ashantis and the neighbouring tribes have been signified by not infrequent petitions emanating from the Gold Coast Colony as well as from Ashanti for the return from exile of Prempeh, the former Chief of Kumasi. The confidence felt by the Government of the Gold Coast in the loyalty of the Ashanti people led to the granting of this request in 1924, and to approval being given in 1926 of his election by his people as Omanhene or Head Chief of the Kumasi tribe.

Prempeh died on the 12th May, 1931 and was succeeded by his nephew Osei Agriman Prempeh II as Omanhene of Kumasi on the 7th July, 1931.

THE NORTHERN TERRITORIES.

In 1897 the territories to the north of Ashanti were constituted a separate district with the title of "The Northern Territories," and placed in charge of a Commissioner, and a grant-in-aid of the expenditure in the Northern Territories was voted by Parliament.

Major H. P. Northcott was appointed Commissioner and Commandant of these territories, with the rank of Lieutenant-Colonel. The negotiations between the British and French Governments for the settlement of territorial questions in West Africa, which had been suspended in 1896, were

resumed in October, 1897; and on 14th June, 1898, after a period of considerable tension in consequence of the proximity of the British and French forces in the disputed territories, a Convention was signed at Paris with a proviso that it should be ratified within six (subsequently extended to twelve) months. By this Convention the boundary between the Gold Coast and the French Colony of the Ivory Coast, which had only been settled in 1889, as far as the 9th parallel of north latitude. was continued northwards along the course of the Black Volta River to the 11th parallel, and it was then drawn along the 11th parallel with a deflection to the north in the neighbourhood of Mamprusi, until it met the Franco-German boundary of 1897. The effect of the Anglo-French Convention of 14th June, 1898, was to leave Bona, Lobi, and Moshi to France, while Dagati, Wa, Mamprusi, and the southern portion of Grunshi were included in the British sphere.

On 14th November, 1899, an agreement was concluded with Germany for the partition of the "neutral zone." This partition assigned Salaga to Great Britain, and Yendi to Germany, and to the north of the zone gave Mamprusi to the former and Chakosi to the latter.

Survey operations were undertaken by Anglo-French and Anglo-German Commissions during 1901-2, for the delimitation of those portions of the boundaries which had not yet been settled.

By the demarcation on the ground of the Anglo-German boundary between the Trans-Volta District and the adjoining Colony of Togo; of the Anglo-German boundary north of the 9th parallel of north latitude; and of the Anglo-French boundary along the 11th parallel of north latitude, all the frontiers of the Colony, Ashanti and the Northern Territories have now been exactly defined.

Provision was made for the administration of the Northern Territories under the Gold Coast Government by an Order of the King in Council of 26th September, 1901, and by an Administrative Ordinance of January 1st, 1902, the Northern Territories were placed under a Chief Commissioner, and divided into the White Volta, Black Volta, Kintampo and Gonja Districts with headquarters at Gambaga, Wa, Kintampo and Salaga.

The Northern Territories are administered by a Chief Commissioner with an Assistant Chief Commissioner as Relieving Officer.

The dependency is divided into two Provinces, Northern and Southern, comprising Mamprusi, Wa and Lawra-Tumu Districts, and Dagomba and Gonja Districts: and Kete-Krachi District within the Northern Section of Togoland under British Mandate, with the Headquarters of the Protectorate at Tamale in the Southern Province, 237 miles north of Kumasi.

By Order in Council, of the 22nd of October, 1906, the boundaries between the Northern Territories and Ashanti were re-adjusted and defined.

An important step was taken with regard to the Government of this Protectorate by replacing, with effect from the lat of January, 1907, the former semi-military administration by a staff of Civil District and Assistant District Commissioners, and by establishing new stations. Simultaneously, the 2nd Battalion of the Gold Coast Regiment was disbanded and a force of armed constabulary substituted therefor. In 1929, the Northern Territories Constabulary was disbanded and their duties taken over by the Gold Coast Police.

In 1920 the Circuit Judge, Ashanti, was appointed to exercise in the Northern Territories powers similar to those which he exercises in Ashanti.

TOGOLAND UNDER BRITISH MANDATR.

The former German protectorate of Togoland is situated on the Gulf of Guines, bounded on the east by Dahomey and on the west by the Gold Coast and its Protectorates. The actual coast-line lies between 1° 45′ and 1° 14′ W. longitude, the frontiers, however, especially on the west, opening out considerably. The total area is about 36,500 square miles.

Until 1884-85 the majority of the tribes along the littoral and its immediate hinterland, also those adjoining the Northern Territories of the Gold Coast regarded themselves as being under the suzerainty of Great Britain, but by agreements made with the French on the 24th December, 1885, and with the British on the 14th and 28th July, 1886, when provisional frontiers were fixed, German influence was formally recognized by those Powers. Subsequent agreements dated the 23rd July, 1897, and the 14th November, 1894, between Germany and the Governments of France and Great Britain respectively defined the Lorthern frontiers of Togoland.

Immediately upon the outbreak of war between Great Britain and Germany Togoland was invaded by the Gold Coast forces. On the 6th August, 1914, Captain E. B. Barker entered the capital, Lome, under a flag of truce and on the following day that town and the hinterland for a distance of 120 kilometers from the sea were surrendered. On the 8th August Anecho (Petit Popo) was occupied by the French. Operations on a larger scale commenced on the 11th August when Temporary Lieutenant-Colonel F. C. Bryant landed at Lome. After engagements at Agbeluíoe and Chra River on the 16th and 24th August respectively the enemy retired on the great wireless station at Kamina, which they destroyed. On the 26th August the Acting-Governor surrendered the Colony unconditionally

Pour pariers then took place between Sir Hugh Clifford, governor of the Gold Coast, and M. Noufflard, governor of Dahomey, as the result of which an agreement, subsequently ratified by the governments concerned was drawn up. Under this agreement Togoland was provisionally divided into British and French spheres. To the British were allotted the western administrative areas of Lome and Lomeland, Misahohe, Kete-Krachi and Yendi, and to the French Anecho, Atakpame, Sokode and Sansanne Mangu.

By proclamation dated the 30th September, 1914, envil courts were established under the presidency of political officers seconded from the Gold Coast, appeal lying from the district courts to that of a senior political officer. In the absence of a local criminal code, that of the Gold Coast was infroduced as a basis of procedure.

In June, 1915, the office of senior political officer was merged in that of the senior military commander, without prejudice, however, to the civil nature of the court concerned.

Boundary adjustments with the French took place in 1920 in accordance with an agreement signed by Lord Milner and M. Simon on 10th July, 1919. Lome and the whole of the coast were given over to the French, and the British

Digitized by GOOGI

received additional territory in the interior. area of the British sphere is 13,041 square miles.

In October, 1921, the Council of the League of Nations approved in principle the arrangements made between the British and French Governments for the division of Togoland in accordance with the agreement of 10th July, 1919, and the application to the territories of the Mandate system; and on 20th July, 1922, after a delay due to negotiations between the United States Government and the Mandatory Powers, Council confirmed the mandates and defined their terms.

Togoland under British Mandate is now administered under the provisions of the British Sphere of Togoland Order in Council, 1923, which was issued on the 11th of October, 1923.

Under this instrument, the British Sphere is divided into the Northern Section and the Southern Section. The Northern Section is administered as if it formed part of the Northern Territories of the Gold Coast, and the Southern Section is administered as if it formed part of the Rastern Province of the Gold Coast Colony. The Chief Commissioner's Court of the Northern Territories of the Gold Coast exercises jurisdiction in the Northern Section; and the Supreme Court of the Gold Coast Colony exercises the jurisdiction in the Southern Section.

Subject to the terms of the Mandate, the law for the time being in force in the Northern Territories of the Gold Coast is the law in force in the Northern Section, and the law for the time being inforce in the Gold Coast Colony is the law in force in the Southern Section. The Governor of the Gold Coast Colony is empowered to enact Ordinances with respect to the British Sphere as a whole, or with respect to either Section thereof separately. Togoland under British Mendate is not distinguished from the Gold Coast in the statistical returns, but it is beyond question that the revenue which it brings to the Gold Coast is inconsiderable compared with the money expended upon it. It contains no part of the old German railway system, which retains most of the export and import trade of the Southern and richest Section. The towns of Ho and Kpandu are joined to the Gold Coast road system by a road which meets the Volta River at Senchi where there is a ower ferry. There is also a direct road from Yendi to Tamale, but the Gold Coast cannot offer prices sufficiently attractive to induce the people to abandon their accustomed market centres on the Lome Railway.

Education Department.

Director of Education, G. Power, 1,350l., duty allowance 2701.

Assistant Director of Education, T. D. Cranston, 1,050%, duty allowance 210%.

Provincial Inspectors and Inspectors of Schools, Captain H. D. Harrison, V. A. Tettey, W. J. D. Wadley, Miss L. M. Tucker, J. S. Dunn, M. G. Smith, H. H. Spafford, Miss E. M. Allen, J. A. Addo, T. Barton, J. B. Flynn, W. R. Allen, K. J. Dickens, J. Wilson and M. F. G. Wentworth. 13 at scale C and 2 at 400l, by 25l, to 600l, by 36l. to 780l.

Accra Technical School—

Principal, H. C. Weston, 960l., duty allowance 96l. European Masters, G. Sutton, T. M. Ritchie. Scale C.

Middle Boarding Schools-

Capt. H. G. Hendrie, R. Horsley, Scale C.

Government Schools

Headmistress, Miss M. K. Quartey-Papafio, 4001. by 25l, to 600l.

DEPARTMENT OF AGRICULTURE. Headquarters Staff.

Director, G. G. Auchinleck, M.Sc. (McGill), F.I.C., 1,200l. and 240l. duty allowance.

Deputy Director, A. C. Miles, 1,000l. and 200l. duty allowance.

Assistant Director (vacant), 960l. and 96l. duty allowance.

Accoun ant and Office Superintendent, J. M. Dunbar, 400l. by 15l. to 430l., 450l. by 30l. to 720l.

Agricultural Staff.

Superintendents and Assistant Superintendents, A. W. Paterson, N.D.A., N.D.D., James Steele, M.C., N.D.A., N.D.D., A.I.C.T.A., W. H. Beckett, M.A., B.Sc., Dip. Agric., J. C. Muir, B.Sc., N.D.A., N.D.D., F. A. Robb, B.Sc., N.D.D., B. T. Steemson, B.A., E. M. Cook, Dip. Agric., J. E. Symond, A.I.C.T.A., J. M. Wingate, A.I.C.T.A., J. L. Scott, B.Sc., C. W. J. Line, B.A., A.R.C.S.I., L. J. Packham, A.R.C.S.I., N.D.A., G. Cowan, N.D.A., C.D.A., A.I.C.T.A., C. L. Skidmore, B.Sc., Dip. Agric., A.I.C.T.A., J. T. H. Stein, B.Sc., J. M. Ward, N.D.A., N.D.D., C. W. Lynn, Dip. Agric., James Wright, B.Sc., A.I.C.T.A., Arthur Jones, B.Sc., C. L. Willding-Jones, B.A., A. E. Moss, B.Sc., Dip. Agric., A.I.C.T.A., 4804., 5104. by 304. to 7201. by 401. to 9201., with seniority allowance of 72l, from 720l,

African Assistant Superintendent, E. W. A. B. Sam. B.Sc., 400l. by 25l. to 600l. by 36l. to 780l. Senior Inspectors of Plants and Produce, W. R.

Hudson, E. D. Hill, 600l. by 30l. to 720l.

Inspectors of Plants and Produce, S. H. Phillips, H. E. Green, R. J. T. Hooke, B.A., F. R. B. Mullan, B.A., A. D. T. Montagu, D.P.S.A., E. L. Hay, B.Sc., R. J. W. Grimm, C.D.A., G. R. Spurrell, B.A., J. K. Cox, R.D.A., R.D.D., T. G. Strangeways, M.A., W. F. Gwilliam, C.D.A., N.D.A., J. H. Bowen, Dip. Agric., J. R. E. Hindson, B.A., A.I.C.T.A., vacant, 4804. by 304. to 6004.

African Inspectors of Plants and Produce, J. O. Torto, B.Sc., A.I.C.T.A., J. Coffe, B.Sc., 400l. by 251, to 5001.

Laboratory Staff.

Mycologiet, H. A. Dade, A.R.C.S., 600l. by 30l. to 7201. by 401. to 9201., with seniority allowance of 721. from 7201.

Entomologist, G. S. Cotterell, A.R.C.S., D.I.C., 600l. by 30l. to 720l. by 40l. to 920l., with seniority allowance of 72l. from 720l.

Chemist, M. Greenwood, M.Sc., 600l. by 30l. to 720l. by 40l. to 920l., with seniority allowance of 72l.

from 720L

Botanist, T. L. Williams, B.A., Dip. Agric., A.I.C.T.A., 600l. by 30l. to 720l. by 40l. to 920l., with seniority allowance of 721, from 7201.

Training Centre.

Superintendent, H. Nicholas, B.A., 480l. to 510l. by 30l. to 720l. by 40l. to 920l., with seniority allowance of 721, from 7201.

Assistant Superintendent, J. D. Broatch, B.Sc., 4801., 5101. by 301. to 7201 by 401 to 9201., with seniority allowance of 721. from 7201.

Forestry Department.

Conservator of Forests, Capt. R. C. Marshall, 1,2001. duty allowance 240i. Provincial Forest Officers, H. W. Moor, Capt. G. S.

Greene, J. A. Wills, Scale C.
Utilisation Officer, L. C. Rowney, Scale C.
Silverculturist, C. Vigne, Scale C.

Assistant Conservators of Forests, P. G. Arnold, D. Stevenson, A. J. Cox, G. M. Tolmie, W. T. S. Brown, F. E. Hughes, G. C. Beaven, I. A. Beveridge, F. G. Harper, D. Kinloch, G. S. Cansdale, G. W. St. Clair-Thompson, Scale C.

Mines Department.

Secretary for Mines, H. G. Mountain, Assoc.Inst.M.M., 1,200l. and 240l. duty allowance.

Inspector of Mines, Capt. R. P. Wild, F.G.S., M.Inst.M.M., Scale C.

Inspector of Machinery, P. V. R. Bray, A.M.I.Mech.E., A.M.I.Mar.E., Scale C.

Geological Survey.

Director of Geological Survey, Major N. R. Junner, M.C., D.Sc., D.I.C., M.I.M.M., 1,2001., and duty allowance 240l.

Assistant Director of Geological Survey (vacant), 9601., and duty allowance 961.

Geologists, W. G. G. Cooper, Ph.D., B.Sc. (Engineering), A.R.C.S., F.G.S., A.I.M.M., D. P. McGregor, B.Sc., T. Hirst, D.I.C., A.R.C.S., A.I.M.M., F.G.S., 540l. by 30l. to 720l. by 40l. to 920l., plus seniority allowance 72l. from 720l.

Superintendent of Records (London Office), W. T. James.

The Gold Coast Regiment, R.W.A.F.F. (2 Battalions). Regimental Commander and Inspector of the Local Forces, Colonel H. H. Beattie, 1,2001., and 10s. per day duty pay.

Staff Officer, Captain J. W. A. Hayes, 7501., and 5s. per day duty pay.

Staff Quartermaster, Captain W. M.C., M.M., 700l. by 25l. to 800l. Captain W. M. Harrington,

For Scales A to C, see footnote on page 310.

O.C. 1st Battalion, Major D. S. Marchant, M.C., 850%, and 5s. per day command pay.

HONG KONG.

Situation and Area.

Hong Kong is one of a number of Island situated off the south-eastern coast of China, the mouth of the Canton River, and lies about 4 miles east of Macao, 91 miles south of Canton between 22° 9′ and 22° 17′ N. lat., and 114° 5 and 114° 18′ E. long. The island is an irregular ridge, stretching nearly east and west; its broken and abrupt peaks rising to the height of nearly 2,000 feet above the sea level. Its length i about 11 miles, its breadth from 2 to 5 miles, its area about 32 square miles. It is separated from the mainland of China by a narrow strait, known as the Lveemun Pass, which does not exceed half a mile in width. The opposite peninsula of Kowloon (2% square miles) was ceded to Great Britain by a Treaty entered into by Lord Elgin in 1860 with the Government of China, and now forms part of the Colony; which also includes Stonecutter's, Green, Aplichau, Middle, Round, and other islets.

In 1898 an agreement was concluded with the Chinese Government for the extension of Hong Kong territory by an area adjacent to British Kowloon, in the province of Kwang-tung, including Mirs Bay and Deep Bay, this area to be leased for 99 years; a stipulation was included that within the walled city of Kowloon (which lies outside of British Kowloon) the Chinese officials then stationed there should continue to exercise jurisdiction except so far as might be inconsistent with the military requirements for the defence of Hong Kong, but that within the remainder of the newly-leased territory Great Britain should have In 1899 the Chinese officials sole jurisdiction. ceased to exercise jurisdiction within Kowloon City, which thereafter, by Her late Majesty's Order in Council, was incorporated in the leased territory and became subject to British rule. The area of the mainland and islands leased is about 359 square miles. A careful survey of the territory was completed in 1904. This New Territory is divided into two main districts—the Northern and the Southern—and is in charge of two District Officers, who perform the duties of land officers and magistrates, and are authorised to hold small debts courts. The District Officer of the Northern district has his headquarters at Tai Pó on an arm of Mirs Bay; the headquarters of the Southern district are in Victoria.

General Description.

The waterways of the Colony form one of the most magnificent harbours in the world, having an area of ten square miles. The granite hills which surround it rise between 2,000 and 3,000 feet high, the whole offering a coup d'ari/ which blends the wild scenery of Sootland with the classic beauty of Italy. The city of Victoria extends for four miles at the base of the hills which protect the south side of the harbour. Being built on the slope of the hills facing the sea, the general aspect of the town is perhaps more striking and picturesque from the water than that of any other city in the east, whilst many of the streets are shaded with wellgrown and handsome trees. Some large and handsome buildings stand on the Praya West Reclamation, which was completed in 1903.

Other important reclamation schemes completed in recent years are the Praya East. (2,249,000 sq. ft.), Tai Kok Tsui (1,868,500 sq. ft.),

Digitized by Google

Shamshuipo (2,842,000 sq. ft.), and Kowloon Bay (9,589,000 sq. ft.). On the reclaimed area Bay (9,539,000 sq. ft.). On the reclaimed area at the northern end of Kowloon Bay an aerodrome has been constructed at Kaitak.

Climate.

Though situated within the tropics Hong Kong enjoys a cool winter, the mean temperature falling from 82° in August to 59° in February. Temperatures of less than 40° and of greater than 90° occur occasionally.

The mean annual rainfall is 85 inches, of which

67 inches occurs from May to September.

The relative humidity is very high in the spring, frequently reaching 98%. In the winter it

occasionally fells as low as 20%.

The prevalent wind is from E. N. E. in the winter with a mean velocity of 15 m.p.h. in March, when the north-east monsoon is at its height. During the summer months the wind is very variable, both in direction and velocity. In some years a southwest monsoon is fairly persistent, in others intermittent and short-lived.

Typhoons occur occasionally from June to October. Very occasionally they occur before or

after this period.

The climate of Victoria is similar in its broad features to that of Kowloon and the New Territories, but at the higher levels, from 1,400 to 1,800 feet above sea level, the temperature is on the average about 3° lower than at the Observatory, Kowloon, in the winter, and 8° lower in the The humidity is usually greater than summer. in Kowloon and approaches saturation for several days at a time during March and April when mist is very prevalent. In summer the city of Victoria, and the rising terraces behind it, derive little or no benefit from the south-west monsoon, being sheltered by steep hills from south-east to southwest. In winter it is exposed to the north-east monsoon, which occasionally blows along the harbour through Lyeemun Pass with considerable violence. On the other hand the south-west side of the Island is protected from the north-east monsoon in winter and enjoys the benefit of the south-west monsoon in summer.

History.

The Colony, then a desolate island sparsely inhabited by fishermen, was ceded to Great Britain in January, 1841; the cession was confirmed by the Treaty of Nankin in August, 1842; and the charter bears date 5th April, 1843. additions subsequently obtained on the mainland have been noted above.

Hong Kong did not become of much com-mercial importance until the discovery of gold in Australia in 1851 and the consequent Chinese Its trade has gradually increased emigration. with the opening up of China to foreign trade.

Large local banking, dock, steamboat, and insurance companies were established between 1865 and 1872, and the trade was greatly increased by the opening of the Suez Canal.

The city is the depot for an incessant flow of Chinese emigration and immigration, the number in 1933 being: emigrants, 57,515; immigrants, 141,133, excluding to and from China ports.

Population.

Industry, Trade, and Customs.

Hong Kong is a free port except for an Import Tariff on all intoxicating liquors, on spirituous liquors containing more than two per cent. of pure alcohol by weight, on tobacco, and on light oils (including motor spirit) and on motor vehicles. There is no Export Tariff.

The position of the island has made it a distributing centre for trade in many kinds of goods. Amongst the principal commodities handled are coal, cotton, and cotton goods, hides, iron and steel, matches, nuts, oils, rice, sugar, silk, sandalwood, tea, tin, wolframite, etc.

Ship repairing and general engineering is a large industry, and there are also factories of very considerable importance engaged in the manufacture of cigarettes, rope, cement, rubber shoes, knitted goods,

and the refining of sugar.

Native industries such as the manufacture of vermilion, sauces, bamboo-ware, building of native craft, etc., are of large and increasing dimensions.

The natural products of Hong Kong are few and unimportant. There is little land suitable for tillage, and nothing is grown but a little rice and some vegetables near the outlying villages. There are large granite quarries both on the island and in Kowloon. A dairy farm supplies fresh meat, poultry, eggs, and milk. The fishing in the waters of the Colony is good and is a source of livelihood to a vast number of Chinese.

The New Territories have extensive cultivable land, on which are grown sugar, rice, vegetables, lychees, pineapples, etc. The cultivation is entirely in the hands of the Chinese villagers and it is doubtful whether European enterprise would be successful.

Shipping.

The total tonnage entering and clearing during the year 1933 amounted to 43,043,381 tons, a decrease of 781,525 tons compared with 1932.

There were 25,497 arrivals of 20,407,708 tons, and 25,995 departures of 20,454,875 tons.

Of British ocean-going tonnage, 6,010,308 tons entered, and 6,003,924 tons cleared. Of British river steamers, 3,758,118 tons entered,

and 3,781,112 tons cleared. Of foreign ocean-going tonnage, 8,660,661 tons

entered, and 8,693,984 tons cleared. Of foreign river steamers, 394,691 tons entered,

and 396,187 tons cleared. Of steamships under 60 tons trading to ports

outside the Colony, 101,454 tons entered and 102,182 tons cleared.

Of junks in foreign trade, 1,482,476 tons entered, and 1,477,486 tons cleared.

Of steamships under 60 tons plying within the waters of the Colony, 385,097 tons entered, and 385,192 tons cleared.

Of junks in local trade, 689,656 tons entered, and 720,853 tons cleared.

Docks.

Hong Kong is well provided with dock accommodation. The Hong Kong and Whampoa Dock Company has three dry docks, the larger one being re-constructed, and two slips at their Kowloon establishment, one dry dock at Mong Kok Tsui on the western side of the Kowloon Peninsula, and two at Aberdeen on the south side of the island. The Taikoo Dockyard and Engineering Company has one large dock and three slipways situated at Quarry Bay, just inside the Lycemun Pass. Digitized by GOOGLE

The Admiralty has built a large dook in the Naval Dockyard in the middle of the City of Victoria. Besides these, there are several building alips and repairing shops owned by Europeans and Chinese in various parts of the Colony.

Wharves.

The Hong Kong and Kowloon Wharf & Godown Co., situated on the mainland, has five wharves and can accommodate vessels of 550 ft. in length. No. 1 and No. 5 Wharves are capable of accommodating vessels up to 660 feet.

Alf. Holt & Co. have two wharves at the East Point of the Kowloon Peninsula and have accom-

modation for large vessels.

At North Point on the Hong Kong side of the Harbour, the Ching Siong Land Investment Co. has built about 1,700 feet of quay walling providing a depth of 30 feet of water alongside at L. W. E. S. T.

In addition, there are many wharves privately owned by shipping firms, situated in the Central district.

Government Harbour Moorings.

There are at present laid down in the Harbour for the use of vessels frequenting the Port fifty-six (56) complete sets of Government Harbour Moorings, classed as follows:—

A Class. Moorings for vessels of 450 feet to 600 feet in length O.A. ... 18 Class. Moorings for vessels of 300 feet to 450 feet in length O.A. ... 28 C Class. Moorings for vessels of less than 300 feet in length O.A. ... 7

Currency and Banking.

The currency of Hong Kong consists of the following coins (vide Order in Council, 2nd Feb., 1895):—

1. The silver dollar of Mexico.

2. British dollar.

 The Hong Kong dollar, half-dollar, and 20-cent, 10-cent, and 5-cent pieces, issued from the Hong Kong Mint (1866-68).

 Half-dollars, 20. 10-, and 5-cent pieces, imported from England, and coined at the Royal Mint and Birmingham Mint.

 Copper coins representing one-hundredth part of the dollar (called one cent), and one-thousandth part of the dollar (mil or cash), imported from England.

There were issued from the Hong Kong Mint 2,108,054 dollars and 58,587 half-dollars; and 20-, 10-, and 5-cent pieces to the nominal value of \$402,671. There were obtained from England, and there were in circulation on 31st Dec., 1933, subsidiary coins (which now include half dollars) to the nominal value of \$18,219,370.

The coins issued from the Hong Kong Mint are

never met with in the Colony now.

The principal Banks are the Hong Kong and Shanghai Banking Corporation. Ltd., the Chartered Bank of India, Australia and China, the Mercantile Bank of India, Australia and China, the Mercantile Bank of India, the P. & O. Banking Corporation, Ltd., the National City Bank of New York, the Yokohama Specie Bank, the Bank of Taiwan, the Netherlands India Commercial Bank, the Netherlands Trading Society, the Banque de Pindo-Chine, the Crédit-Foncier d'Extrème Orient. The first named bank conducts a Savings

Bank. There are also a large number of Chinese banks.

The Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, and the Mercantile Bank of India are authorised to issue notes in the Colony, the total circulation amounting to \$157,583,718 at the close of 1933.

Local weights and measures are the following: tael = 1\frac{1}{2} oz.; 1 picul = 133\frac{1}{2} lbs. (avoirdupois); oatties = 1 imperial gallon.

Revenue.

Revenue is derived from duties on intoxicating liquor, which in 1934 were expected to realize \$2,020,000, tobacco \$2,800,000, stamp revenue \$1,978,000. A considerable sum is also derived from the Opium monopoly, municipal rates for police, lighting, water, etc. (the rates according to the districts varying from 15 to 17 per cent. on the annual value of property), land revenue, stamp duties, and other fees. It was expected that land sales would realise \$590,000.

The total revenue for 1934 is estimated at

\$29,545,634.

There is a Public Debt of 1,485,7334. and \$4,838,000. The amount at credit of the Sinking Fund is £911,748.

Means of Communication.

Hong Kong is extremely well situated as regards telegraphic communication in all directions with all parts of the world. The Eastern Extension Telegraph Company (British) by means of three cables to Singapore, one direct and one each vid Labuan and Cape St. James respectively, provide good connections with Europe vid India, with Australasia, and with the other British Colonies and possessions. By their cable to Manila connection is made with the direct American cable, thence to San Francisco. Two cables to Shanghai, belonging respectively to the Eastern Extension and to the Great Northern (Danish) Companies, vid Foochow and Amoy respectively, give a good connection with Shanghai, North China, Japan, and Russia; and the system of the Great Northern Telegraph Company gives a good service to Europe, vid Asiatic Russia.

Commercial wireless telegraph services are maintained with ships at sea, Canton, Swatow, Shanghai, and North China via Shanghai, points in Kwangtung and Kwangsi Provinces, Yunnanfu, Macau, French Indo-China (direct to Saigon and Hanoi). Kwongchowau, North Borneo, Siam, Dutch East Indies, and via Dutch East Indies to Europe and American Continents, Manila and via Manila to Europe and American Continents. All services are operated and controlled from the Government Radio Office situated in the central district of Victoria. The transmitters

are grouped at Cape D'Aguilar Station, position lat. 22° 12'38'61" N.: long. 114° 15'18'94" E. Call signals:—V P S for ship services, Z B W for broadcasting, and the series Z C E to Z C K for commercial services. The main receiving station is situated at Victoria Peak, from which station received signals are passed by tone lines to the Radio Office.

In addition, meteorological and time signal services are carried on, the Police Department has its own communication system, and the Waglan and Gap Rock Lighthouses have installa-

tions for emergency communication.

A broadcasting service for the transmission of news items, speeches, music, etc., is maintained by a transmitter installed at Kowloon which is controlled from an up-to-date studio and control room situated on the second floor of the Gloucester Building. The broadcast wave length is 350 metres and the call signal Z B W.

Hong Kong possesses unrivalled steam communication. The P. & O. S. N. Co., M. M. Cie, Holt's Line, City Line, and N.Y.K. maintain a regular service with the United Kingdom and Burope. The Holt's line, O. S. K., N. Y. K., and Dollar Line maintain a regular service between Hong Kong and the United States of America. The Canadian Pacific S.S. Limited maintain a regular service with Vancouver, B.C.

The E. & A., Australian Oriental Line, and N. Y. K. and O. S. K. keep up a frequent service to Australian ports. In addition to these main lines of steamers, there are other lines which call at Hong Kong from various ports, such as the Shire, Glen, and Bank lines, and Lloyd Trestino.

Regular steam communication between Java and Hong Kong has been established by the Java-China-Japan Line. Between the ports on the east coast of China, Formosa, and Hong Kong the steamers of the Douglas S. S. Co. ply regularly twice a week, and those of the Osaka Shosen Kaisha weekly, and there is constant steam communication with Hoihow, Manila, Saigon, Haiphong, Tourane, Bangkok, Borneo, etc. With Shanghai, Tientsin, and the ports of Japan there is frequent communication by steamers of the Indo-China S. N. Co., China Navigation, and other lines, in addition to the English, French and American mail steamers. With Calcutta there are services by the Indo-China S. N. Co., O.S.K., N.Y.K., and the British India Line, about once a fortnight by each line. Between Hong Kong, Macao, and Canton there is a daily steam service, and numerous steamers as far as Wuchow on the West River.

A cable tramway connects the city with the higher levels. An electric tramway from Shaukiwan to Kennedy Town, along the whole extent of the city, was completed and opened in July, 1904. The island possesses roads available for vehicular traffic both in the town and outside from which unrivalled views can be obtained, especially from the wind-swept roads in the hill districts. There is also a fine motor road round the island.

There are excellent motor roads in Kowloon and the New Territory—the road to Fanling via Castle Peak and back via Taipo being

a panorama of views over a route of several miles. The usual means of transport is by motor, ricksha, chair, or boat. A railway was completed in 1910 from Kowloon to the Chinese frontier, where it joins the line from Canton. Telephonic communication is available to all parts of the Colony and to Canton.

Direct Money Orders are exchanged with Great Britain, China, Canada, United States of America, Union of South Africa, India, Ceylon, Mauritius, the Australian Commonwealth, the Dominion of New Zealand, Straits Settlements, Federated Malay States, State of North Borneo, Sarawak, Siam, Macao, Japan, French Indo-China, Netherland Indies, and the Philippine Islands. British Postal Orders are issued and paid in Hong Kong. Telegraphic Money Orders are exchanged with the United Kingdom only.

Education.

Since 1913 the schools in the Colony, with few exceptions, have been placed by Ordinance under the supervision and control of the Education Department. The total number of pupils is about 72,917, of whom, roughly speaking, one-third are in schools in which English is the medium of instruction, and two-thirds are in Vernacular Schools. There are four schools exclusively for children of British parentage, with an average attendance of 438. Queen's and King's Colleges are the principal schools for Chinese, with an average attendance of 582 and 905 respectively. Including the above, the average attendance at Government schools is 4,251. Most of the non-Government English schools are assisted by grants, which amounted in 1933 to \$194,160. Many of the vernacular schools are assisted by subsidies and grants, amounting in 1933 to \$129,363 50.

A technical institute supplies instruction in commercial and technical subjects. The enrol-

ment in 1933 was 809.

The University of Hong Kong, incorporated under the local University Ordinance, 1911, and opened in 1912, is a residential University, the object of which is declared by that Ordinance to be "the promision of higher education, the conferring of degrees, the development and formation of the character of students of all races, nationalities and creeds, and the maintenance of good understanding with the neighbouring country of China."

Instruction is provided in the three Faculties of Medicine, Engineering, and Arts and the following Degrees are awarded: Medicine, M.B.B.S., M.D., M.S.; Engineering, B.Sc. (Eng.), M.Sc. (Eng.); Arts: B.A., M.A. The standard aimed at is that of University degrees in Great Britain, and the Medical degrees of the University are recognized by the General Medical Council for registration in Great Britain.

The buildings, including instructional and residential accommodation, together with playing fields, occupy an area of about 36½ acres. The instructional buildings have accommodation for about 400 students; the residential buildings have accommodation for 360 students.

The endowment is divided into two funds, a sterling endowment fund of £298,400 and a dollar endowment fund of about HK \$4,400,000. The latter includes a

grant of HK\$750,000 from the Rockefeller Foundation for the establishment of full-time chairs in Surgery, Medicine and Obstetrics and Gynaecology. The Colonial Government has contributed land to the approximate value of \$175,000, together with capital sums amounting to \$1,700,000, and provides an annual grant of \$350,000.

The course is one of 4 years in Engineering and Arts, and of 6 years in Medicine. In January, 1934, 138 new students were admitted. Students are of various nationalities, but the great majority are Chinese drawn from China and other countries

of the Far East, notably Malaya.

The University is open to students of both sexes. In May, 1934, there were 45 women students out of a total of 431 students on the rolls.

Constitution.

The Government is administered under Letters Patent of 14th February, 1917, by a Governor, aided by an Executive Council, composed of six official and three unofficial members, besides the Governor. The Legislative Council is presided over by the Governor, and is composed of nine official and eight unofficial members, six of whom are nominated by the Crown on the recommendation of the Governor (three being Chinese), one is nominated by the Justices of the Peace from their body, and one by the Chamber of Commerce. The unofficial members of the Executive and Legislative Councils, appointed after receipt of the Additional Instructions passed under the Royal Sign Manual and Signet and dated 10th January, 1922, vacate their seats after five and four years respectively from date of appointment. The "Colonial Courts of Admiralty Act, 1890," regulates the jurisdiction of the Supreme Court in Admiralty cases. The English Common Law forms the basis of the legal system, modified by Colonial Ordinances, of which a revised edition to 1923 has been issued. The law as to civil procedure was codified by Ordinance No. 3 of 1901.

B.S. (Sydney), \$7,500.

Malariologist, R. B. Jackson, M.D., B.Ch., D.P.H. (Dublin), 920l. to 1,280l.

Bacteriologist, A. V. Greaves, M.B. (Tor.), M.C.P. & S. (Ont.), D.T.M. (Liverpool), 920%. to 1,280%. Assistant Bacteriologist, R. S. Begbie, M.D., D.P.H., D.T M. & H. (Edin.), 860l. to 1,220l. Radiologist, F. J. Farr. M.B., Ch.B., L.D.S.,

D.M.R. and E., 860l. to 1,220l.

Radiographers, J. Skinner, M.S.R., B.P.A., 370l. to 575l.; J. G. Robertson, 370l. to 575l.

Prin. Matron, Miss M. J. Wilson, 475l. to 600l. Apothecary, R. E. Cable, F.C.S., 600l. to 700l.

Accountant, Sung Teng Man, \$4,800 to \$5,600. Steward, F. P. Anslow, 400l. to 500l.

Head Attendant, J. Murray, 4751. to 5751. Government Laboratory.

Analyst, V. C. Branson, M.C., A.R.C.S., B.Sc., D.I.C., A.I.C., 850l. to 1,050l.

Assistant Analysts, A. Jackson, B.Sc., Ph.D., J. L. Tetley, B.A. (Cantab.), A.I.C., 500%. to 8001.

Tean Yuk Hospital. Secretary, J. I. Barnes, M.R.S.I., 250l. to 445l.

Sanitary Department.

Head of Sanitary Department, Cadet Officer. Assistant Head of Sanitary Department, Cadet Officer.

Secretary to the Sanitary Board, C. J. Roe, 600/. to 700/.

Assistant Secretary to the Sanitary Board, Im Ping Tseung.

Chief Inspector, A. K. Taylor, 600l. to 700l. Senior Inspectors, L. Brewer, W. Old, R. R. Wood, H. L. Lockhart, J. Reid, J. G. Hooper, 475l. to 5751.

Veterinary.

Veterinary Surgeon, Major W. J. E. Mackenzie, M.C., M.R.C.V.S., D.T.V.M., 1,000l. to 1,200l. Assistant Veterinary Surgeon, Captain M. J. Reidy, M.R.C.V.S., 650l. to 950l.

Botanical and Forestry Department. Superintendent, H. Green, 700l. to 950l. Assistant Superintendent, G. B. Twemlow, 50%. to 600%.

Education.

Department of Director of Education.

Director of Education, Cadet Officer. Inspectors of English Schools, A. R. Sutherland, M.A. (Abdn.), I.S.O., A. O. Brawn, 1,100% to 1,30%. Inspectors of Vernacular Schools, Y. P. Law, B.A. (Cantab.), W. Yu, B.A. (Oxon.), I. S. Wan, B.Sc. (Lond.), 600% to 1,000%.

Technical Institute Director.

Head Master, Queen's College, F. J. de Rome, M.B.E., 1,100l. to 1,300l.

Head Master, Central British School, J. Raiston, 1,050l. Head Master, Junior Technical School, G. White, 850l.

Mistress, Kowloon British Junior School, H ead E. M. Clarke, 360l. to 700l.

Head Mistress, Peak School, M. W. Newsholme, 360l. to 700l.

Head Mistress, Quarry Bay School, K. M. Anderson, 360% to 700%.

Head Master, Ellis Kadoorie School, W. L. Handyside, 500% to 950%.

Head Master, King's College, Wm. Kay, 1,100l. to 1,300l.

Head Master, Yaumati School, C. Mycock, 500l. to

Head Master, Wanchai School, G. W. Reeve, 500l. to 9501.

Head Mistress, Belilios Public School, P. Y. Stark, 800% to 900%.

Head Master, English School for Indians, A. T. Hamilton, 5001. to 9501.

Volunteers.

Commandant, Lieut.-Col. H. B. L. Dowbiggin, O.B.E., \$900 p.a., command allowance. Adjutant, Capt. P. S. M. Wilkinson, The Wiltshire Regiment, £1,020 p.s. Lieut. & Qmr., H. Westlake, D.C.M., 5401. to 600l. p.a.

Public Works Department.

Director of Public Works, R. M. Henderson, M. Inst. C.E., M.I. Mech. E., M. Inst. W.E., 1,500% to 1,800%.

Assistant Directors of Public Works, A. G. W. Tickle, F.R.I.B.A., F.S P.A.S.I., 1,300l. to 1,400l. F.S.I., E. Newhouse,

General Secretary to Director of Public Works, W. G. Fitz-Gibbon, B.A., 8201. to 1,0501.

Technical Sccretary to Director of Public Works, R. S. W. Paterson, M.C., M.I.M. & Cy. E., 550l. to 1,150l.

Superintendent of Accounts and Stores, W. J. Anderson, 700l. to 950l.

Deputy Superintendent of Accounts and Stores, C. E. Davis, 460l. to 700l.

Executive Engineers, 1,180l. to 1,300l., P. D. Wilson, M.Inst.C.E., H. C. Lowick, P.A.S.I., H. S. Rouse, A.M.I.C.E., A. B. Purves, M.Inst.C.E., H. J. Pearce, M.C., Adam Anderson, B.E., B.A., H. H. Pegg.

Chief Electrical Engineer, L. H. King, M.I.E.E., 1,180l. to 1,300l.

Electrical Engineer, R. Cryan, 550l. to 1,150l. Valuation and Resumption Officer, J. E. Richardson, P.A.S.I., 550l. to 1,150l.

Superintendent of Crown Lands and Surveys, E. B. Reed, P.A.S.I., 1,040l. to 1,240l.

Assistant Superintendent of Crown Lands, H. West, 900l. to 1,050l.

Assistant Superintendent of Surveys, E. B. Lambert, 900l. to 1,020l.

Land Surveyors, 480l. to 880l., B. H. C. Hallowes, B.A., B.A.I. (T.C.D.), F. W. Wood, J. Angwin, C. H. Douglas, O. C. Womack, B.A.S.I. (T.C.D.), F. W. Wood, J. Angwin, C. H. Douglas, O. C. Womack, B.A.S.I. P.A.S.I., C. H. Lamb, M.I. de Ville, P.A.S.I., Lt.-Com. G. H. Gandy, R.N. (retd.)

Mechanical Engineer, E. P. Fletcher, 6001. to 7501. Harbour Surveyor, vacant, 600l.

Kowloon-Canton Ruilway.

Manager and Chief Engineer, Capt. R. D. Walker, M.C., A.R.C.S., D.I.C., M.Inst. C.E., 1,400l. to 1,600l.

Chief Mechanical Engineer, C. D. Lambert, M.I. Mech. E., M. Inst.T., 730l. to 880l.

Assistant Mechanical Engineer, J. Smith, 550l. to 700l.

Chief Accountant, A. J. C. Taylor, 700l. to 825l. Traffic Manager and Storekeeper, I. B. Trevor, 7301. to 8801.

Traffic Assistant, A. E. Perry, 480l. to 700l.

Consuls.

Argentine, R. J. F. L. Ohl, Vice-Consul. Austria, Herr F. Winkler (Shanghai), Honorary Consul-General; Herr H. L. Ockermuller (Shanghai), Vice-Consul.

Belgium, H. Vander Straeten, Consul-General. Bolivia, C. H. Basto, Honorary Consul.

Brazil, N. T. de Oliveira, Consul; N. da Costa, and F. A. Xavier, Vice-Consuls.

Chile, P. Smart-Fabres, Consul. Costa Rica, J. M. da Rocha, Consul. Cuba, F. B. y Romero, Consul.

Denmark, Karsten Larssen, Honorary Consul. Finland, J. Manners, Honorary Vice-Consul. France, Soulange Teissier, Consul-General.

Germany, H. Gipperich, Consul. Guatemala, J. G. Gonzalez de Bernedo, Honorary Consul.

Honduras, P. V. Botelho, Honorary Consul. Italy, Signor A. Bianconi, Consul-General.

Japan, T. Kohri, Consul-General. Netherlands, M. J. Quist, Consul-General; Mr. D. G.

E. Middelburg, Vice-Consul. Nicaragua, T. E. Lacayo, Honorary Consul. Norway, Karsten Larssen. Consul-General.

Panama, F. Alegre, Consul-General.

Peru, M. R. Iglesias, Consul-General. Portugal, Lieut. F. de Melo Costa, Marques de Ficalho, Consul-General.

Salvador, T. E. Lecayo, Honorary-Consul. Siam, J. T. Bagram, Honorary Consul-General.

Spain, R. E. Farrell, Honorary Vice-Consul. Sweden, J. Lilliehook (Shanghai), Consul-General; G. Miskin, Vice-Consul.

United States of America, D. Jenkins, Consul-General; Consul, L. H. Gourley; Vice-Consuls, D. C. Dunham, H. B. Day, M. N. Cootes, and J. C. Pool.

M

*JAMAICA.

Situation and Area.

Jamaica is an island in the Caribbean Sea, the southward of the eastern extremity of the Island of Cuba, within N. lat. 17° 42′ 20″ and 18° 32′ 30″, and W. long. 76° 11′ 55″ and 78° 23′ 35″. It is the largest of the British 78° 23′ 35″. It is the largest of the British West Indies, being 144 miles in length, and 50 in extreme breadth, and containing about 4.4501 square miles, about half the size of Wales. The island is very mountainous, the main ridge running cast and west, with numerous subsidiary ridges, some parallel to the main ridge. others spreading out in a N.W. and S.E. direction from it, terminating in the famous Blue Mountains in the east, the highest peak being 7,388 ft. high. There are numerous rivers and streams, with a rapid fall for the most part, and not navigable. The largest are the Black River in the south-west, and the Rio Grande in the north-east. Kingston, the capital, with a population of 62,707 in 1921, is situated on the south coast of the Island, and has a fine harbour. In St. Ann's Parish, in the middle part of the island, on the north of the main ridge, is the Roaring River, so called on account of its many picturesque waterfalls.

The Cayman Islanda, lying between 19° 16' and 19° 45' N. lat., and 79° 83' and 81° 30' W. long, and the Turks and Caicos Islands, are dependencies of Jamaica, † as are also Pedro and Morant Cays (two guano islands in 17° N. lat.).

It is estimated that Jamaica contains 2,848,160 acres, from which may be deducted 80,000 acres as useless for agriculture, consisting chiefly of swamps, rocks, and inaccessible lands, leaving 2,768,160 acres available for cultivation. Of this 837,244 acres are returned as under cultivation in 1932-33.

The dependencies have an area of 89 sq. miles.

History.

The island was discovered by Columbus on the 3rd May, 1494. He called it St. Jago, after the patron saint of Spain, but the new name was soon dropped in favour of the native one of Jamaica (Xayınaca—well watered). The first settlement on it was effected on the shores of St. Ann's Bay, by Esquivel in 1509, under the direction of Diego,

† See account below.

the son of Columbus, the Governor of niola. It was raided by Sir Anthony & in 1596-7, and by Colonel Jackson in 1643, remained in the possession of the Spa for 161 years, when it was attacked force, sent by Cromwell, under Admiral and General Venables against Hispaniola capitulated, after a triffing resistance, da 11th May, 1655. Until the Restoration, Ja remained under military jurisdiction, but in a regular civil government was establish Charles II., who appointed General Edward I Governor-in-Chief, with an Elective Counc 1670 peace was made with Spain, and the England to Jamaica was recognised by the of Madrid. The colony grew fast, stimulate the wealth brought into it by the buccaneer made Port Royal their headquarters and house. Part of this town was engulfed in the earthquake of 1692. Kingston which the sisted of a few sheds, soon rose into a pl importance. During the 18th century the suffered from hurricanes, earthquakes, num slave insurrections, as well as wars wit maroons, or mountaineers, the descen of African slaves. These consisted primari the slaves the Spaniards left, who inha mainly the east of the island, among the Mountains, but before long runaway slaves English masters took refuge in the mountain the centre of the island and were only subju in 1738, when both classes of marcons were a in five reserves under their own leaders, and h forth gave little trouble except for a partial r in 1795, which was soon suppressed, the prise in 1795, which was soun support taken being sent to Sierra Leone. When Slave Trade was abolished, in 1807, there years of the trade, 86,821 slaves were impo On the abolition of slavery in 1833, Jan received 6,161,927l. of the 20,000,000l. grants the Imperial Government as compensation to slave-owners. A rebellion among the coloured lation in 1865 was suppressed by Governor with unnecessary violence, and he was reca In January, 1907, Kingston was devastated terrible earthquake, which caused great loss of and immense destruction of property. A Mar House Fund was opened, and contributions po in from all parts of the Empire for the reli distress. A free grant of 150,000l. was vote Parliament, and a loan of 800,000l., chiefs aid of re-building, was authorised from the H Exchequer.

Climate and Inhabitants.

There is great variety of climate; the stemperature of Kingston is 78.77, rising to in the day time, and falling to 71.0° in the emorning. As the temperature falls about I every 300 feet of ascent, it is possible, in a hours, to reach, in the central range of mount a cool and delightful climate. From King the capital, a change of 10° or 15° lower in ten ature can be attained by a ride of one hou motor car.

The rainv seasons occur, usually, over the wallsland, in May and June, and again in Septem October and November. Besides these heavy a periodical rainfalls, the ground is refreshed by occasional showers in other months. In the North-Easter portion of the Island, however, there is generally aimy season at the end of the year and light precipitation, as a rule, during the month of March.

The mean Annual rainfall varies in the several sections of the Island from 30 inches at Bull Bay in

Digitized by GOOS

^{*} For general map of the West Indies, see under Windward Islands.

the Southern Division to 208 inches at Moore Town, followed by 178 inches at Fellowship, both situated on the northern slope of the Blue Mountain Range in the North-Eastern Division. The sixty-year average is 74 inches.

Regions of the Island are visited by storms of hurricane force about 14 times in a century and disastrous earthquakes occurred in 1692 and 1907.

Under two per cent. of the inhabitants are white; the remainder are chiefly of African descent, somewhat over three-fourths being pure negroes. There are about 17,725 East Indians and about 3,700 Chinese (in 1921). English is universally spoken.

Constitution.

The original Constitution, granted by Charles IL in 1662, which, after existing for nearly 200 years, was surrendered in 1866, was a representative one, consisting of a Governor, a nominated Council, and an elected Assembly which on its first meeting in 1664, consisted of 30 members but which fluctuated in numbers from time to time. The depression caused by the abolition of slavery led to a grave constitutional crisis, the Assembly refusing to vote supplies, and endeavouring to enforce sweeping reductions in establishments, without compensation to the displaced officers. Lord Melbourne's Government, in 1839, actually introduced a Bill into Parliament for the suspension of the constitution, but was defeated, and it was not till 1854 that, by a change in the constitution of the Council, harmony was temporarily A separate Privy Council was set up and an Executive Committee was established. The latter was to act as a sort of Cabinet, especially as regards financial matters.

After the suppression of the rebellion in 1865, Governor Eyre, at the meeting of the Legislature, urged the unsuitability of the then existing form of Government to meet the circumstances of the community, and the necessity of making some sweeping change, by which a strong Government might be created. The Legislature responded by abrogating all the existing machinery of legislation, and left it to Her Majesty's Government to substitute any other form of Government which might be better suited to the altered circumstances of

the Colony.

Accordingly a Legislative Council was, by Orders in Council of the 11th June, 1866, and 11th November, 1869, established, consisting of such numbers of official and unofficial members as Her Majesty might think fit. The numbers of each were six until 1878, when they were enlarged to eight, and a ninth was added in 1881.

By Order in Council dated 19th May, 1884, and Amending Order of 3rd October, 1895, the constitution was fixed in the following manner:—

The Council to consist of the Governor (with only a casting vote) and five ex-officio members, viz.: the Senior Military Officer, the Colonial Secretary, Attorney-General, Director of Public Works and Collector-General, and such other persons, not exceeding ten in number, as Her Majesty may from time to time appoint, or as the Governor may from time to time provisionally appoint, and fourteen persons to be elected as therein provided. The Council shall be dissolved at the end of five years from the last preceding general election, if it shall not have been previously dissolved.

There is also a Privy Council, with the usual powers and functions of an executive council. It consists of the Lieutenant-Governor, if any, the Senior Military Officer in command, the Colonial Secretary, and Attorney-General and such other

persons as may be named by the King, or provisionally appointed by the Governor subject to the approval of His Majesty, but the number of members is not to exceed eight. The Governor is to preside at each meeting, and the Governor and two members form a quorum.

A special feature of this constitution is that nine elected members can veto any financial measure, while the unanimous vote of the whole fourteen elected members on other matters cannot be overridden by the other votes unless the governor declares that such a decision is of paramount importance in the public interest.

Adminstration.

The Colonial revenue is derived mainly from import duties, an excise duty on rum, and stamp and licence duties. A tax of 1s. (in Kingston 8d.) on every £10 of the gross value of property is levied.

There is a Supreme Court of Judicature together with Resident Magistrate Courts and Petty Sessions of Justices of the Peace throughout the island. The Resident Magistrates, besides holding courts of their own, preside in the courts of Petty Sessions.

An "Island medical service," under the control of a superintending medical officer, was established in 1870. The several medical practitioners, who receive a retaining fee or salary from the Government, are designated "district medical officers." They are located throughout the island, and for the fixed salary paid by Government they have to attend sick paupers, parochial hospitals and alms-houses, the constabulary officers and men, and prisons.

The parish is the unit of local government, and each parish has its own parochial institutions, viz., poorhouses, &c., &c., managed by the Parochial Board of the parish, the members of which are elected by the persons entitled to vote for the election of members of the Legislative Council. The administration of poor relief by the Parochial Boards is controlled by a Board of Supervision.

There is a Corporation of the amalgamated parishes of Kingston and St. Andrew with a Mayor, Council and Corporate officers.

In the 13 other parishes there are elective Parochial Boards under Laws 13 of 1900 and 17 of 1901, with jurisdiction over roads, markets, sanitation, poor relief, water works, and pounds. The chief towns are Kingston (population, in 1921, 62,707), Port Royal (population 1,004), Spanish Town (population 8,694), Port Antonio (population 6,272), Montego Bay (population 6,580), Falmouth (population 2,138), Port Maria (population 2,481), and Savanna la Mar (population 3,442).

The total revenue of all the local bodies in 1933-34 was 445,690l.; their expenditure £483,674l. Their debt at the end of the year was 984,300l.

Currency and Banking.

Accounts are kept in sterling, British silver coins of and above the denomination of 6d. are legal tender to any extent; coins below the denomination of 6d. are legal tender to the extent of 40s. in any one payment.

The coin in circulation is mostly British silver and bronze and Jamaica nickel pence, half-pence and farthings, but American half and quarter dollars circulate freely at the rate of 2s. and 1s. respectively.

Total estimated coin 200,000. Barclays Bank (Dominion, Colonial and Over-seas) Ltd., the Bank of Nova Scotia, the Royal Bank of Connada and the Canadian Bank of Commerce are the only private banking stablishments

in the Colony. Barclays Bank has one branch and 9 sub-branches; it had an average weekly note circulation in 1933 of 83,788l. Bank of Nova Scotia has 11 branches and 1 subbranch, and had an average note circulation in 1933 of 121,311*l*. The Royal Bank of Canada has two branches and had an average note circula-tion in 1933 of 40,715l. The Canadian Bank of Commerce has a branch in Kingston, and had an average note circulation in 1933 of 15,330l. Approximately 200,000l. of British currency notes formerly in circulation have been withdrawn and replaced by Bank of England Notes, in denominations of 10s. and £1.

Under Law 27 of 1904, local Currency Notes, which are made legal tender under section 5, have been issued to the extent of 212,500l. in denominations of 2s. 6d., 5s. and 10s.; 2s. 6d. notes, 31,250l.; 5e. notes, 106,250l.; 10e. notes, 75,000l. Estimated amount of local currency notes in circulation on 31st March, 1934, was 83,214. The 2s. 6d. notes have been recalled and nearly all have been with-

drawn from circulation.

Government savings banks were instituted in all the principal towns in 1871, the rate of interest allowed being at first 4 per cent., but this was reduced in 1881 to 3 per cent., and in 1897 to 22 per cent. In 1917 the rate of interest was again increased to 3 There are 114 branches now operating. The total deposits on 31st December, 1933, was 744,9251.

Co-Operative Loan Banks.

There are now 47 Loan Banks on the Register of Industrial and Provident Societies. Of these, 36 have obtained loans from the Agricultural Loan Societies Board appointed under Law 6 of 1912, "A Law for the encouragement of Agricultural Loan Societies." In 1930, Law 15 of 1930, was passed giving the Board more extensive powers of control. In 1933, Law 11 of 1933 was passed, to provide a simple means of winding up the affairs of a Bank.

The following is a summary of these transactions to 31st December, 1933: Loans made under Law 6 of 1912, 59,1821. 15s. 8d.

Hurricane or Special Loan

... 80,489l. 12s. 4d. Laws

139,672l, 8s, 0d.

Of this amount, 124,1671. 11s. 9d. has been repaid, leaving 15,504l. 16s. 3d. outstanding.

The 40 Banks from which returns were obtained also collected to 31st December, 1932, the sum of over 42,701l. share capital. These figures may be taken as an indication that the work of the Loan Banks has been successfully carried on and that they are likely to prove a permanent benefit to Small Holders and Peasant Proprietors.

In 1919 there was started a Land Settlement Scheme, whereby these Banks were expected to extend their sphere of usefulness by purchasing, with the aid of Government moneys, properties for re-sale in lots to small settlers. 59,641l. was lent to nine Banks for this purpose. One scheme proved a failure, owing to various causes, the principal being the state of the market for sugar, two have been taken over by the Surveyor General, as the local Committees found themselves unable to carry the schemes to a successful conclusion. Five of the other schemes have. on the other hand, proved very successful; and three have not yet been completed.

The Surveyor General now operates the Land Settlement Schemes; operations started in 1929.

There are at present 12 properties, apart from the two handed over by Loan Banks, under the administration of the Surveyor General. These Schemes have been very successful and the objects are being steadily achieved. Additional properties are in process of acquisition.

Education.

Elementary education is provided for from public funds. The number of recognised elementary schools is 653, of which 140 are Government Schools, and the remainder Denominational. There are 76.882 scholars in average attendance, and the grant-in-aid for 1933-34 was £159,879; no fees are charged. The Government maintains a system of inspection, and provides a training college for women teachers which is mainly supported from public funds, besides largely assisting the Mico undenominational training college for men. and two denominational colleges for women teachers. By a law passed in 1892 a Board of Education was constituted. Local School Boards manage the Government schools, some of which are held in Government buildings, others in rented buildings.

The Government maintains a Technical Continuation and Commercial School in Kingston and awards scholarships for trade instruction and apprenticeship. Two Continuation Schools for Girls

are aided from public funds.

Provision was made in 1892 for the opening of Government secondary schools where required; there are twenty secondary schools receiving aid from by endowed schools, under local governing bodies controlled by the Jamaica Schools Commission. and a number of private schools. There are three scholarships (one for girls) tenable at English universities or elsewhere within the British Empire and one scholarship tenable at the Imperial College Tropical Agriculture, Trinidad. One Rhodes Scholarship is annually awarded in Jamaica. The following examinations are held:—London University, Cambridge Locals, Associated Board of the Royal Academy of Music and the Royal College of Music, Royal Drawing Society.

In the Institute of Jamaica (in Kingston) is a Public Library with 30,000 books, of which 7,500 form a West India Reference Library; a Natural History Museum, with a small collection of live animals; and a Jamaica History Gallery with 450

portraits and 150 engravings of scenery.

Industry.

Fruit is the largest export, 10,557,369 stems of bananas of a value of £1,018,476 being exported in 1933, in which year citrus fruits (grape fruits and oranges) valued at £103,480 were also exported. Other exports were as under:-

1933.				£

2 oz.

1,500 acres of Government cinchona plantations. The cultivation of cotton has practically been abandoned.

The Island's import trade is divided as follows:-United States of America . . 16.3 per cent. .. 40.2 United Kingdom ٠. Canada .. 16.0 Other Countries . . 27.5

Means of Communication.

There is a daily postal service throughout the island.

The rates of postage are as follows:-

Letters. Newspapers. For the first oz. ld., and ld. for each additional oz. or fractional part of an oz. Within the Colony To places within the British Empire (Archive and Id. for each additional oz. or fractional part of an oz. d. per

2 oz. 2kd. and 1kd. To other Postal Union $\frac{1}{2}d$. per countries, per 1 oz.

† Parcels post with Enguand. Alipsopostage, up to 3 lbs. 1/7, up to 7 lbs. 2/10, up to 22 lbs. 6/6. B. W. I. postage, up to 5 los. 1/1, up to 1 los. 2/10, up to 11 lbs. 4/-; and, up to 22 lbs. 6/6. B. W. I. Colonies, up to 3 lbs. 1/-, up to 7 lbs. 2/-, up to 11 lbs. 3/-, and up to 22 lbs. 5/- only for Antigus, British Guiana, Grenada, Trinidad, St. Vincent and Bermuda; with United States and Canal Zone, 6d. per lb., maximum 11 lbs. Canada, 6d. per lb. up to 20 lbs. maximum. India, up to 20 lbs. maximum. There is a C.O.D. Parcel Post system in operation with the United Kingdom only. A regular air passenger and letter mail service, inaugurated 10th December, 1930, operates twice weekly between Miami (Florida, U.S.A.) and Cristobal, Canal Zone via Kingston, Jamaica. A similar air service inaugurated 15th June, 1933, operates between Kingston, Jamaica and Porto Rico via Port au Prince, Haiti, once weekly.

The estimated number of letters and post cards handled is as follows:

Year 1933.

Internal. External. Total. Outwards. Inwards. Letters [13,019,910] 1,219,204 | 3,991,070 | 18,230,134 Post Cards 412,000 135,400 80,900 628,300

There is regular and frequent communication between Europe and Jamaica via the United States. Messrs. Elder's and Fyffe's and the Jamaica Direct Fruit Line furnish frequent and regular Services for passengers and freight. The voyage takes 13 to 14 days. The Leyland Line steamers (West India and Pacific Branch) leave Liverpool on the 10th of each month, their average passage being 21 days. There is also frequent steam communication between the United States and Jamaica. The Canadian National Steamships also furnish regular Services to Canada and the other West Indian Islands.

Telegraphic communication with Europe is complete. The two cables from Cuba touch at Jamaica, from which they branch away via St. Thomas to Demerara, and in the opposite direction to the Isthmus of Panama. On 31st January, 1898, the Direct West India Cable Company established communication between Jamaica and Halifax via Bermuda and Turks Island-

† Every incoming parcel post packet and every packet containing dutiable matter bears a tax of 6d. which is collected from the addressee.

Telegraph lines connect all the principal towns, and there are 193 telegraph and telephone stations. The total mileage open is 1,839. 1,132 miles along roads, 172 miles P.O. lines on railway, and 231 along railway lines. The receipts in 1933 were 15,290.

The railway extends from Kingston to Montego Bay, in the parish of St. James, a distance of 112 miles 60 chains, and to Port Antonio, in the parish of Portland, in the other direction, by a branch line from Spanish Town of 63 miles; and to Ewarton. by a branch line from Bog Walk, on the Port Antonio branch, of 8 miles 40 chains, and by a branch line from May Pen to Frankfield, 23 miles; also from Linstead to New Works, 2 miles 40 chains. The total length of line open is 210 miles. The railway was purchased by an American syndicate, who, under agreement, extended it to Port Antonio on the northeast and to Montego Bay on the north-west, but the company having failed the Government resumed possession of the line on 16th August, 1900. The total railway debt charge for 1933-34, providing for interest and repayment, is 156,9241. The receipts in 1933-34 were less than the expenditure by 40,096l., leaving a deficiency of 197,0201. There is also a line of telegraph and telephone along the railway from Kingston to Montego Bay, 1124 miles; Spanish Town to Ewarton, 171 miles; from Bog Walk to Port Antonio, 541 miles; from May Pen to Frankfield, 23 miles; and from Linstead to New Works, 24 miles.

The island is intersected by an extensive system of tar-treated and metalled roads, suitable for motoring, the highest one passes over a gap at an elevation of a little over 4,000 feet. Owing to the configura-tion of the island there are many bridges and culverts and sharp turns; the maximum grades are generally 1 in 15. There are 2,430 miles of main roads, and about 4,402 miles of parochial roads.

A coastal service is run by the United Fruit Co., the Royal Mail Co. and the Webster Co. with motor vessels and sailing vessels whenever cargo is available.

The United Fruit Co., the Royal Mail Co., Jamaica Fruit and Shipping Co., the Jamaica Direct Line, the Standard Fruit & Steamship Corp., and Leyland Line maintain a weekly steamship service and also call at outports when necessary.

Kingston, Montego Bay, Falmouth and St. Ann's Bay are ports of registry. During the year ended 31st December, 1931, no ships were built.

CUSTOMS TARIFF.

The import duties are collected at both specific and ad valorem rates. The articles paying specific duties fall chiefly under the heads of Food, Drink and Tobacco. Provision is made for preferential rates on Empire Products. The general ad valorem duty is 20% and the preferential rate is 15%. There are slight variations in these rates on certain classes of goods.

The following table shows the percentage of trade with the United Kingdom, other parts of the Empire and the principal foreign countries during 1933.

Command Paymaster, Capt. H. O. Browning, M.C.

CAYMAN ISLANDS.

Description.

The Cayman Islands, which form a dependency of Jamaica, consist of three islands—Grand Cayman, Little Cayman and Cayman Brac-lying between 79° 83' and 81° 30' W. longitude and 19° 16' and 19° 45' N. latitude, and having a total area of about 104 square miles. There were discovered by Columbus on his return voyage from Porto Bello to Hispaniola, but were never occupied by the Spaniards. The English took possession soon after the conquest of Jamaica in the middle of the seventeenth century and the islands were mainly colonised from Jamaica, though many English and Scottish mariners, shipwrecked on the coast of Cuba, settled on the islands,

The proportion of white inhabitants in the Cayman ! Islands is considerably larger than in other parts of

the West Indies.

The principal island, Grand Cayman, is distant about 178 miles from the nearest point of Jamaica. It is 17 miles in length, with a varying breadth from 4 to 7 miles, and has an area of 85 square miles. The total population of the islands is about 6,200 of which some 4.600 live in Grand Cayman, where Georgetown, the capital town, with a population of 1,600, is situated.

The coasts are for the most part rock-bound, protected by coral reefs and enclosing some fair-sized

deep-water harbours.

Industries, Trade and Customs.

The chief industry of the inhabitants is catching turtle—or "turtling," as it is called. These turtle are brought to the island and placed in "crawls" to recover and fatten before export. The demand for turtle has, however, declined and at present attention is being given more to "sharking," at there is a ready market for sharkskins in America.

The people are first-class shipbuilders and many fine schooners are built in these islands for local use

and sale abroad.

Georgetown is a Port of Registry and 53 sailing vessels and 11 motor vessels, with an aggregate net tonnage of 4,556, are on the registry of shipping

The islands are in some parts fruitful and the usual tropical products are grown, but a considerable acreage is traversed by honeycombed limestone and unfit for cultivation. Mahogany, cedar and other valuable timber and some dye-woods are found. Agricultural pursuits are fostered and encouraged by

an Agricultural Society.

Many of the islanders find employment on the mainland of America and in foreign vessels, supporting their families in Cayman by remittances from abroad.

An ad valorem customs duty of 121 % is levied on most imported commodities, with specific duties on alcoholic liquors and tobacco. The revenue derived from these duties amounted to 4.348l. in 1933.

Climate

The climate from November to March is cool, the prevailing winds being from the north, but during the summer months, it is hot, with southerly winds. Mosquitoes abound in the summer. The rainfall at Georgetown during 1931 was 102 inches which was abnormally high, the average annual rainfall being about 55 inches.

The more recent hurricanes at the islands occurred in November, 1932, September, 1917, August, 1909, and August, 1903—previous to this there was a severe hurricane in October, 1876.

Communications.

Two regular motor-schooner services are maintained from Georgetown-one with Kingston, Jamaica, and the other with Isle of Pines, Cuba, and Tampa, Florida. There is also communication by sailing vessels with the ports of Central America.

Education.

Education is in charge of a Board of Education which receives an annual grant of 1,425l. from the public revenue. Fourteen public elementary schools are maintained, with a roll of 868 pupils and an average attendance of 676.

Constitution.

The Government is administered by a Commissioner who is also Judge of the Grand Court. Justices of the Peace (at present 26) are appointed by the Governor of Jamaica and these, with 27 elected members, known as Vestrymen, constitute the Legislative Assembly under the presidency of the Commissioner. Elections are held biennially.

The present constitution of this Assembly of Justices and Vestry is 100 years old and the centenary has recently been commemorated by a special issue of postage stamps.

Year. Revenue, Expenditure, Imports. 1932 ... 8.1411. 6.5471. 21.4601.* 5,1207.* 1933 .. 7,2981. 6.5381. 31,7501.* 8.548/.*

There is no Public Debt. but a loan of 3,660%. was made by the Government of Jamaica in 1933 to the Dependency to assist it in repairing the damage caused by the hurricane of 1932.

Civil Establishment.

Commissioner and Judge, A. W. Cardinal, furnished

house, 500l. to 600l. and fees.

Government Medical Officer, Dr. G. N. Overton, M.D., partly furnished house, 65l. for drugs and travelling, private practice and 300l.

Clerk of Courts, Clerk of the Vestry, and Auditor, A. E. Panton, 150l.

Assistant Treasurer, Collector of Customs and Postmaster, Georgetown, A. C. Panton, 180l. Collector, Postmaster, etc., Lesser Cayman Islands,

A. S. Rutty, 160l., and fees. Inspector of Police, Bailiff, Grand Court, etc., J. R. Watler, 150l. and fees.

TURKS AND CAICOS ISLANDS.

Situation and Area

The Turks and Caicos Islands lie between 21° and 22° N. lat., and 71° and 72° 37' W. long. Their area is about 166 square miles. The most important island, Grand Turk, is 64 miles long and 14 miles broad. According to the census of 1921 Grand Turk contains 1,568 inhabitants, being onethird of the total population which in 1921 was 5,612. The inhabitants are of mixed European and African extraction. The majority of the people are connected with the Bermudas, from which these islands were first settled. They all speak English. Cockburn Harbour in S. Caicos, immediately opposite Grand Turk, is the principal settlement in the Caicos group.

History.

These Islands were discovered in 1512 by Ponce de Leon, but the group remained uninhabited till the end of the 17th century, when it began to be annually visited by salt rakers from Bermuda. These were expelled by the Spaniards in 1710, but soon returned, and for some 40 years continued this industry with more or less frequent interruption by attacks from the Spaniards. It was not, however, till 1799 that, for the purposes of government, they were included in the Colony of the Bahamas, to which group they geographically belong. In 1848 they were made independent of the Bahamas. In 1873 they were annexed to Jamaica and still remain one of its dependencies.

Two hurricanes passed over these Islands in 1926. on July 24th and September 16th respectively, and did great damage. The second one was the most disastrous, as regards damage to property, in the history of the Dependency.

Another hurricane passed over these Islands on September 14th, 1928, which did considerable damage and caused the loss of 17 lives.

For Grand Caymatronly. Records for the other Digiti Islands are not avatlable.

Industries, Trade and Customs.

Salt raking is the only industry of any importance, the average quantity annually gathered being about 1,600,000 bushels, equal to 56,000 tons, 687,841 bushels were exported in 1933 valued at 13,489l. Sponges are found on the Caicos Bank, and there is a sponge-curing establishment at Cockburn Harbour, South Caicos. The export of sponge in 1933, 27,961 lbs., was valued at 2,031/. 1,196,600 dried conchs (shell fish), valued at 1,197l. 150 lbs. turtle shell valued at 150l. 111 tons lignumvitae valued at 2424. 2,392 lbs. shark skins valued at 50%

Practically the whole of the food and household necessaries are imported. Grand Turk is a port of registry, and had, on the 31st Dec., 1933, 55 vessels registered, of a total tonnage of 1,204 tons. Salt Cay and Cockburn Harbour are ports

of entry, possessing good anchorage.

The bulk of the imports (11,873/. in 1933 out of a total of 21,900/.) are from the U.S. of America. The exports are chiefly to Canada and the United States.

An ad valorem customs duty of 15% is levied on most imports and specific duties on alcoholic liquors, tobacco, flour and a few other articles.

The British preferential tariff is 10%.

Climate.

The climate is equable and healthy, and rarely unpleasantly hot, owing to the constant sea breezes, but there is a scarcity of fresh provisions and good water, owing to the low lying barren nature of the soil.

The mean temperature (day) is 78°, the extreme range being from 60° to 93°. The rainfall at Grand Turk during 1933 amounted to 34 22 inches, the average rainfall during the five years 1929-1933 was 37 29 inches.

Means of Communication.

There is a mail, passenger, and freight service between New York and Grand Turk about twice a month by steamers of the Royal Netherlands West India Mail, and also between Jamaica and Turks Islands once a month by sailing vessel.

The Elders and Fysics Line make occasional calls on their way to Jamaica when passengers offer and on such occasions take mails to Jamaica.

The rate of letter postage is 2d. per ounce to all British Possessions; 21d. to the U.S.A., and to all other countries 3d. per ounce.

There are no railways in these Islands.

Internal mails are carried between the several islands by small sailing-craft engaged in local trade

Mails to and from England and other parts of the world are dispatched and received via New York

Grand Turk is an important cable junction, there being cables to Jamaica, to Barbados and to Bermuda.

The Government radio-telegraph system provides service between Grand Turk, Cockburn Harbour, and Salt Cay, and with ships at sea within short range.

There is a public telephone service at Grand Turk.

Education.

There are eleven elementary schools supported by Government, with 800 pupils enrolled in 1933 and an average attendance of 519. The schools are entirely unsectarian and free.

There is a Government Secondary School at Grand Turk.

Cambridge Local Examinations are held annually at Grand Turk.

Currency and Banking.

The coins in circulation, all of them being legal tender under Bahama Acts, 2 Vict. cap. 4, and 8 Vict. cap. 49, also Jamaica Law 10 of 1880, consist of British sterling, United States gold and silver, and Jamaica nickel tokens. There is no limit to the legal tender of silver. There is a local Government paper currency of five shillings, ten shillings and one pound notes. Commercial accounts are usually kept in dollars, and Government accounts in sterling. A Government savings bank was established on 1st Jan., 1890, and had, on 31st Dec., 1933, 846 depositors, with 13,364l. deposits.

Constitution.

By Jamaica Law No. 6 of 1926 which came into operation on the 1st day of August 1926, the Legislature consists of a Legislative Board comprising the Commissioner, who by virtue of his office is President, and seven other persons, three of whom are holders of offices under the Crown, appointed by the Governor of Jamaica. Taxation and expenditure and all local matters, are regulated by this board. Laws passed by the Legislative Council of Jamaica which are in express terms made applicable to Turks Islands take effect there. The subjects of currency, bills of exchange, patents, and the custody of prisoners and lunatics have been so dealt with.

KENYA COLONY AND PROTECTORATE.

Extent and Administration.

The territories comprised under the name of "Kenya Colony and Protectorate," previously known as the East Africa Protectorate, include the whole of the East African coast line from Umba River to Dick's Head, and territories in the interior bounded in part by international convention lines. The eastern boundary was defined along the Juba and north-east by an agreement with Italy (1891). and on the north by an agreement with Abyssinia in 1908, but upon the cession of Jubaland to Italy in 1925, a Commission was appointed to adjust the eastern and north-eastern boundaries. On the west, the Colony adjoins the Uganda Protectorate, and on the south the mandated Tanganyiks Territory. The British East Africa Protectoral was proclaimed on November 19th, 1890. March, 1891, the Imperial British East Afri Company undertook the administration of country, from which they withdrew in 1893.

The Kenya Protectorate consists of the mainlan dominions of the Sultan of Zanzibar-viz., a str extending 10 miles inland along the coast from the Tanganyika mandated Territory frontier Kipini and the islands of the Lamu Archipelage In respect of these territories Kenya pays a reof 10,000l. per annum to the Sultan of Zanzibar.

The original concession was made to a compan subsequently called the Imperial British Ea Africa Company, but the territory was transferr in 1895 to His Majesty's Government, and th whole Protectorate was placed under the control of a Commissioner and Commander in Chief. was transferred in 1905, from the authority the Foreign Office to that of the Colonial Office

By an Order in Council dated 9th November 1906, the Protectorate was placed under a Governor and Commander-in-Chief, and the Order in Council of 22nd October, 1906, constitute Executive and Legislative Councils. The front iers were defined by agreements with German (1890 and 1893) and Italy (1891), but the latte has now been varied by the cession of Jubaland to Italy under the Treaty with the Italian Governo

ment dated 24th July, 1924. All Foreign Consular

Jurisdiction was, during the year 1908, transferred to the British Court.

By the "Kenya Annexation Order in Council, 1920." the territories outside the mainland dominions of the Sultan of Zanzibar were recognised as a Colony. This Order in Council came into operation on the 23rd July, 1920, and the Sultan's mainland dominions are now styled the Protectorate of Kenya, whilst the remaining territory is known as the Colony of Kenya. The area of the Protectorate and Colony of Kenya is about 224,960 square miles.

The Colony and Protectorate is divided into four Provinces, and three extra-provincial districts.

1. The Nyanza Province, comprising the districts of North Kavirondo, South Kavirondo, Central Kavirondo, Kericho, and Kisumu-Londiani.

2. The Rift Valley Province comprising the districts of Nakuru, Ravine, Baringo, Naivasha, Laikipia, Nandi, Uasin Giahu, Elgeyo, and Trans-Uzois.

3. The Central Province comprising the districts of Nairobi, Kyambu, Fort Hall, South Nyeri, North Nyeri, Embu, Meru, Machakos, and Kitui.

4. The Coast Province comprising the districts of Digo, Mombasa, Kilifi, Tana River, and Lamu.

- 5. The Northern Frontier District comprising the districts of Isiolo, Marsabit, Moyale, Wajir, and Telemugger.
- 6. The Turkana District, comprising the districts of Turkana and West Suk.
- 7. The Massi District, comprising the districts of Ngong and Kajiado.

The Capital of the Colony is Nairobi, which is also the largest centre in the Colony. A Municipality has been established here in respect of a population estimated as under:—

		19	33.		
		• •		••	7,090
Asiatics	• •	• •	• •	• •	17,270
Natives	••	• •	• •	••	46,600*
Total		••	••	••	70,960

Mombasa is the principal port; the inhabitants number about 52,700, of whom about 981 are Europeans. Mombasa is an island of about seven square miles in area and has two harbours, Mombasa harbour on the eastern side and Kilindini harbour to the south-west. There is a lighthouse and signal station at the entrance to the port. A Municipality was established at Mombasa in 1928.

Population.

The total population is estimated at 3,091,243. A census of the non-native population taken in March, 1931, showed a population as follows:—

European					16,812
Indians		• •			39,644
Arabs	••		••		12,166
Goans	• •				3,979
Other nor	1-nat	ives	••	••	1,346
					73,947
Africans (estin	nated)	••		3,017.117
Total					3.091.064

On the coast the Arabs and Swahills predominate; further inland are races speaking Bantu languages, and non-Bantu tribes, such as the Nilotic Kavirondo, the Nandi, the Lumbwa, the Suk, the Turkana, the Masai, the Somalis, and the Gallas.

The prevailing religious beliefs are Pagan, but on the coast Mohammedanism has made some progress. There are in the Colony and Protectorate many Christian mission stations, representing thirteen different societies—British, French, Italian, Swedish and American, two of them being Roman Catholic. At these stations are schools for elementary instruction and handicrafts.

Constitution.

Under the Royal Instructions dated the 29th March, 1934, the Executive Council of the Colony consists of the Colonial Secretary, Attorney-General, Treasurer, Chief Native Commissioner, Commissioner for Local Government, Lands and Settlement, Director of Medical Services, the Director of Agriculture, and Director of Education (ex-officio members), such other persons holding office in the public service of the Colony as the Governor may appoint (official

members), and such persons (if any) not holding such office as the Governor may appoint (mofficial members), with the Governor as President. It is further provided that the Legislative Council of the Colony shall consist of the Governor as President, eleven ex-officio members, not more than nine nominated official members, eleven European elected members, five Indian elected members, one Arab elected members, and two nominated unofficial members to represent the interests of the African community. The ex-officio members are the ex-officio members of the Executive Council, with the General Manager of the Kenya and Uganda Railways and Harbours, Director of Public Works, and Commissioner of Customs.

By the "Kenya Protectorate Order in Council 1920," it was provided that the Governor of the Colony should be Governor of the Protectorate, that the Executive Council of the Colony should be deemed to be the Executive Council of the Protectorate, and that it should be lawful for the Legislative Council of the Colony to legislate for the Protectorate. The Supreme Court is situated at Nairobi, and sessions are also held at Mombasa, Nakuru, Eldoret, Kisumu, and various other places. In all cases to which natives are parties local ideas and customs are considered. The legal status of slavery has been abolished throughout the Colony and Protectorate.

By local ordinance in January, 1924, provision was made for the election of the Indian and Arab members. The Indian franchise (like the European franchise) is adult (over 21) suffrage and the whole Colony and Protectorate forms one five-member constituency. The Arab franchise is adult (over 21) male suffrage subject to ability to write Arabic or Swahili in Arabic characters. Here too the whole country forms one constituency.

By the enactment in 1924 of the Native Authority Amendment Ordinance a considerable measure of local self-government was conferred on the various Native Councils in Kenya in regard to the social welfare of the tribes and the management of communal matters such as land, forests, veterinary services, etc., as well as the local control of health, education, agriculture, trade and labour recruitment. Ordinances passed in 1928 aim at the extension of local government in municipalities and settled areas.

East Africa Governors' Conference.

In pursuance of a recommendation of the Parliamentary Commission which visited E. Africa in 1924, a first Conference of Governors of the British East African Dependencies was held in Nairobi in January and February, 1926, for the discussion of matters of mutual concern. It was then decided that a permanent Secretariat for the Conference should be established at Nairobi and conferences held as and when necessary. Subsequently the Joint Select Committee on Closer Union in East Africa recom-mended that the machinery of the Governors' Conference should be increasingly utilised for the purpose of ensuring continuous and effective cooperation and co-ordination in all matters of common interest to East Africa. As a result of this, it was decided that the Conference should be deemed to be in permanent session with a view to its being convened at any time when necessary, and that there should in any case be an annual meeting of the Governors of Kenya, Tanganyika Territory and Uganda, attended, if desired, by the Governors of Northern Rhodesia, Nyasaland, and the British Resident, Zanzibar. The cost of the Secretariat is contributed in varying proportions by the East

^{*} Includes part of Kyambu and Fort Hall.

African Governments and by the Kenya and Uganda The Secretary of the Railway Administration. The Secretary of the Conference is Colonel C. W. G. Walker, C.M.G., D.S.O., who is also Secretary to the High Commissioner for Transport, Kenya and Uganda. Salary 1.500l.

Climate.

For purposes of rainfall Kenya may be divided into three parts .-

- (1) Northern Desert area where there is usually less than 20 inches a year.
- (2) The coastal strip and the Nyanza and Kikuyu Provinces where there may be from 40 to 80 inches a year, and
- (3) The remainder of Kenya where rainfall is from 20 to 40 inches a year. On the Coast there is usually a single rainy season from April to November, but up-country there are generally "long" rains from April to June, and "short" rains from October to December. The Coastal regions have a tropical climate though nights are cool except during the hottest months from December to April. In the Highlands the climate is invigorating with cool breezes; at Nairobi the mean maximum shade temperature in 1931 was 73.1°F., and the mean minimum 54.9°F. The rainfall at Nairobi was 45.59 inches.

Currency and Banks.

The currency originally consisted of the Indian rupee as the standard coin, with smaller local coins and notes of higher denominations, all expressed in terms of the rupee; the British sovereign was also legal tender at Rs. 15. The exchange value of the rupee, after being maintained for many years by the Government of India at 1s. 4d., began to rise in 1917 and early in 1920 reached 2s. 9d. It was then decided to fix the rate in the East Africa Protectorate, the Uganda Protectorate, and the Tanganvika Territory at 2s. sterling to the rupee, and to issue a new currency in local rupee coin and notes, but subsequently it was decided that the new coinage should be expressed in terms of florins, instead of rupees, the 50 cent piece being alternatively termed a shilling. Some rupee notes were introduced but no rupee coins. Later the shilling was made the standard coin instead of the florin, and arrangements were made to withdraw from circulation the Indian rupee, which was demonetised from July, 1921. The nickelbronze coins (1, 5 and 10 cents of a rupee) have been withdrawn from circulation, and new copper-bronze coins (1, 5 and 10 cents of a shilling) have been intro-

The old Local Board of Currency Commissioners has been abolished, and the Currency of the Colony and Protectorate is now in the hands of the East Africa Currency Board in London, represented locally by the Treasurer.

The National Bank of India Ltd. (Head Office:-26, Bishopsgate Street, London) are bankers to the Government of Kenva, with branches in the Colony and Protectorate of Kenya at Mombasa, Nairobi, Nakuru, Eldoret, and Kisumu, and at Kampala, Entebbe, and Jinja in the Uganda Protectorate.

The Standard Bank of South Africa Ltd. (Head Office:-10, Clement's Lane, Lombard Street, London) have branches at Mombasa, Nairobi, Eldoret, Nakuru, Kisumu, Nyeri. Nanyuki, Kitale in the Colony and Protectorate of Kenva, and at Kampala

South Africa Ltd., has branches at Mombasa, Nairobi, Nakuru, Kitale and Eldoret, and at Kampala and Jinja in the Uganda Protectorate.

Land and Products.

As the pursuit of agriculture is possible from sea level to altitudes of over 9,000 feet, climatic conditions are extremely varied and tropical, sub-tropical and temperate crops are grown.

Considerable quantities of hides are exported from all parts of the Colony, but the principal producing areas developed at present are at elevations of 4,000 feet and over.

In the highlands coffee, maize, wattle, tea, wheat and potatoes are the principal crops and in the lower parts of the Colony, including the Coast, sisal, maize, coconuts, cotton, sugar cane and miscellaneous grains and oil seeds are grown.

Exports of agricultural commodities in 1933 were

valued at £1,902,743.

Whereas considerable quantities of foodstuffs for the non-native population were imported in former years most of these have now been replaced by homegrown supplies.

Extensive pasture grounds exist throughout the highlands and maintain considerable herds of grade and native stock. Butter and cheese are prepared and supplies of the former are being exported.

Fishing industries are established on the Coast and Lake Victoria and provide valuable supplies

for local consumption.

The forest products of the Coast are mangrove poles and bark, timber, ebony, and gum copal. The highland forests contain large quantities of pencil Cedar and several other good timbers such as Podocarpus, Olive, and East African Camphor, also large areas of bamboo suitable for the manufacture of high quality paper pulp.

The following minerals have been located :-Gold has been found throughout the Nyanza Province

and in the southern part of the Masai Reserve. Silver is commonly associated with the gold dis-

Copper occurs in the north-eastern part of the

Ukamba Reserve. Lead and Zinc are found in the Coastal Province. Asbestos is being exploited near Sultan Hamud and a

local industry developed. Arsenic occurs in the form of arsenical pyrites in the

Nvanza Province. Barite is found in the Coastal Province.

Diatonite is found near Gilgil and in many other parts where lacustrine beds occur.

Gypsum has been discovered near Simba.

Iron Magnetite-quartzites occur in the Basement Complex and form a possible ore for the future.

Ilmenite (Titanium). The sand is abundantly concentrated in the rivers of the Nyanza Province.

Limestone. Abundant supplies are found near Voi, Kajiado, Loldaika and in the Suk country.

Mica. "Kunkar" is worked south of the Kavirondo Gulf, Suk and Ukamba Reserve. Olivine is concentrated in the rivers draining the

Aberdares. Potash and Soda. These salts are being exploited

at Lake Magadi.

Tin. Cassiterite has been discovered in the Trans Nzoia. Zircon is an abundant constituent in the river beds

of Nyanza but is particularly plentiful in the streams draining the Coastal ranges.

The total area of land alienated as at December, and Jinja in the Uganda Protectorate.

with which is amalgamated The National Bank of Reserves. Digitized by

Trade, Customs and Excise.

Under the terms of the Congo Basin Treaties equality of treatment in respect of imported goods irrespective of origin is ensured, and the grant of Imperial Preference is therefore inadmissible. Goods declared as in transit are allowed to be imported and forwarded under Customs control on payment of expenses of administration (6d. per package).

For purposes of Customs, Kenya and Uganda form a single unit and by agreement with the Tanganyika Territory Government a common Tariff has been accepted by the three territories, the free and unrestricted movement within the territories of both imported goods and local products being thus secured. The Common Tariff, however, includes a small number of "suspended duties" which are of a protective nature and may be imposed by Proclamation either in part or in full in any or all of the territories.

The general duty rating under the Common Tariff is 20 per cent. ad valorem based on the landed value at the port of entry, building materials, artisans' tools, and vehicles and parts being admitted at lower ratings. Specific duties are imposed on such articles as readily lend themselves to this form of assessment and in certain cases alternative specific or ad valorem charges are levied. Exemption from duty is allowed on drugs and medicines, packing materials, disin-fectants, germicides and vermin killers, machinery, and many articles necessary for road construction, sanitation, irrigation and drainage purposes, and for the agricultural, industrial, and educational development of the territories.

The Customs Tariff (Amendment) Ordinance of the 26th June, 1933, introduced the following major alterations in duty ratings for the reasons elaborated in the preceding paragraph, viz. :-

(a) the general 20 per cent. ad valorem rating was replaced as under-

Singlets.

Socks and Stockings.

Piece goods, made of artificial silk or admixtures of artificial silk and other material.

Bicycles and tricycles.

Shs. 8 each or 20 per cent. ad valorem whichever is higher. Umbrellas and Parasols. Cents 40 each or 20 per cent. ad valorem which-

ever is higher.

(b) the rating of cents 30 per lb. gross or 20 per cent. ad valorem whichever is the greater for cottonpiece goods, grey, unbleached, imported in the piece, was deleted and advantage was taken to clarify the position by sub-dividing the heading in order to introduce alternative rates of duty for certain classes of other piece goods previously rated at 20 per cent. ad valorem.

The ratings introduced were as follows, viz. :--

Article.

Duty.

PIECE GOODS-

(i) Cotton, grey and un-bleached, including including cloths having a drawn thread effect by the omission of warp threads or with the addition of coloured yarn to form a heading or with coloured yarn in the selvedge.

(ii) Other (including scarves, shukas, chadders, khangas, and the like) made of cotton or admixtures of cotton and other material not elsewhere specified.

Cents 9 per square yard or 20 per cent. ad valorem whichever is higher.

Cents 10 per square yard or 20 per cent. ad valorem whichever is higher.

The Customs Tariff (Amendment) Ordinance of the 26th June, 1933, enacted the following alterations of secondary importance, the opportunity also being taken to rectify various anomalies observed in the course of administration, viz. :-

(i) The tariff rating for ghee, viz., 30 cents per lb. (plus a suspended duty of 15 cents per pound), was made applicable to ghee substitutes.

(ii) Filter pulp, metal licence plates and badges imported by or on behalf of a municipality or other public body, and the following preparations for pest destruction or prevention purposes, viz., calcium carbide, whale oil soap and fish oil soap, were added to the list of exemptions.

(iii) Wireless equipment, apparatus and accessories imported privately or commercially as distinct from imports for use by a public utility company were made leviable with duty at the rate of 20 per cent. ad valorem.

(iv) An ambiguity in the tariff classification of brass and other metal taps was removed by a rewording of the appropriate section.

In so far as Customs and Excise Management Laws are concerned, in Rule 6 of the Excise Duties Rules. 1931, the period of grace for rendering monthly returns of deliveries from licensed factories was extended from fourteen to twenty-eight days in order to give amply sufficient time to enable export documents to be produced and rebates granted in respect of the month covered by the periodical returns without affecting the month in which payment is due, and Regulation 84 of the Customs Regulations, 1926, was amended in order to permit of the payment of drawback on petrol and kerosene originally imported in bulk and re-exported after repacking at up-country bulk installations.

The Customs Revenue Allocation Ordinance, 1927, that is, the legislation governing the division of the revenue and expenditure of the Joint Service between Kenya and Uganda, was amended during the year to become the Customs and Excise Revenue Allocation Ordinance and to provide for the division of Excise as well as Customs revenue and expenditure between the two territories.

Excise duties are imposed on locally manufactured sugar (£1 per ton), tea (10 cents per lb.), cigarettes and citars (75 cents per lb.) tobacco (50 cents per lb.), and beer (£2 per standard barrel), the revenue derived from these duties being allocated to the consuming territory as is the case with Customs collections. Digitized by GOOGLE

For Kenya and Uganda, the value of Trade Imports (excluding imports on Government Account, railway material and goods in transit and transhipment) and of exports (domestic and foreign) and the net amount of Customs receipts from all sources and the tonnage entered at Kenya Ports, were as follows:—

Years.	Trade Imports.	Trade Exports.	Customs Receipts	Tonnage entered
		•	•	Net.

Communications.

The Union Castle Line and the British India Steam Navigation Co. maintain a monthly service of passenger steamers from and to London. The Union Castle vessels run either via the Cape or Suez.

The Messageries Maritimes from Marsetiles to Madagascar call fortnightly at Mombasa, home-

wards and outwards.

The Tirrenia have two lines calling monthly; one steamer running as far as Zanzibar, and back to Genoa, and the other as far as Durban, and also back to Genoa, calling at the principal ports as route, including those of Italian Somaliland.

including those of Italian Somaliland.

The Navigazione Libera Triestina Line also maintains a north and south service with Italian ports.

The Clan Effermen Harrison Line maintains a three-weekly service of fast cargo steamers from Liverpool; also a service from the U.S.A. and Canada.

The Holland Afrika Line maintains a fortnightly service from London and continental ports to South and East Africa calling at this Port.

The Deutsche Ost Afrika Line maintains a threeweekly passenger and eargo service between Mombasa, Continental ports and Southampton.

The Osaka Shosen Kaisha Line connect mouthly

with Japan.

A fortnightly Mail Service to Bombay and Durban is maintained by the British India Steam Navigation Company's passenger and sargo steamers. The North bound ships connect at Bombay with the

P. & O. mail steamers to England.

A monthly passenger service is maintained with
Batavia via southern ports by the Royal Packet
Company of Holland.

Communication between the coastal ports of the Protectorate is maintained by steamers belonging to the B.I.S.N. Co. & Messrs. Cowasjee Dinshaw Bros.

The Kenya and Uganda Railway was formerly worked as a State Railway of Kenya Colony, but in 1921 it was decided that from 1st April this line together with all branch lines and steamer survious both in Kenya and Uganda should be controlled by an Inter-Colonial Railway Council, consisting of a chairman and one official and one unofficial member from each Territory (Kenya and Uganda), and that railway surpluses should not be available

for general colonial revenue purposes.
On the 3rd February, 1926, the Kenya and Uganda (Transport) Order-in-Council, 1925, came into force, by which was established the office of High Com-missioner for Transport for the Colony and Protectorate of Kenya and the Protectorate of Uganda. It provided that this office should be held by the Officer administering the Government of Kenya, and that he should have the control of the transport services owned, controlled, or managed, by the Governments of either of the two Territories, including railways, ports, wharves and steamships; the services were to be known as the Kenya and Uganda Railway. The Order-in-Council further provided for the constitution of a Kenya and Uganda Railway Advisory Council to consist of not more than two official and two unofficial members representing Kenya, and not more than two official and two unofficial members representing Uganda, each territory's representatives, KENYA. 339

official and unofficial, to be appointed by the respective Governors; and it directed that a Railway and Harbour Fund should be formed, into which was to be paid all revenue derived from the administration of the services, and from which all disbursements were to be made.

The length of the line, which is metre gauge, including branches open to traffic at the end of 1933, is 1,625 miles, excluding loops and industrial sidings.

The Railway Marine consists of the Lake Victoria, Lake Kioga, Lake Albert, and River Nile flotilles. Their respective strengths are as follows:—

Lake Victoria, 5 Steamers, total displacement 5346 tons.

5 Tugs and 1 Launch.

1 motor vessel (Kagera River Service).

32 Lighters, total capacity 3740 tons.

Lake Kioga, 3 Sternwheel Steamers.

1 Launch.
18 Lighters, total capacity 1900 tons.

Lake Albert and River Nile 4 Steamers, total displacement 1256

tons.

1 Launch.
4 Lighters, total capacity 270 tons.

The following figures include all services both in Kenya and Uganda:—

Total Expen	diture the end	on C of 1933	apital	22,317,590/.

Railways	990,0541.
Harbours	131,090%
No. of Passengers carried	512,9997.
Goods carried (Revenue earning) Tons	771,7141.
Total Steamer Mileages (all three	153.8721.

In 1927 the title of the Kenya and Uganda Railway was changed to that of Kenya and Uganda Railways and Harbours, and the Administration assumed control of the working of the Port of Mombasa and coastal ports.

The old harbour at Mombasa is now entirely used by dhows. Kilimdini Harbour has been the scene of intensive development during recent years, and some 3½ million pounds sterling have been expended there. There is now, in addition to the former lighterage quay, a deep-water quay having a length of approximately 3,000 feet. This quay can accommodate six ships alongside of the normal type using the port. The quay is served by 25 electric level-luffing cranes and there are five transit sheds, three of which are double storey. The total number of quay, shed and stacking ground cranes are 32 up to date. A jetty at which bulk oil ships discharge to tanks ashore is now in use. A Harbour Advisory Board advises the High Commissioner for Transport on Port Matters.

Kilindini Harbour, at the Port of Mombasa is the finest land-locked and sheltered harbour on the East coast of Africa; it possesses an ample water supply.

The principal river flowing into the Indian Ocean is the Tans, which is navigable for about 400 miles by small shallow draft steamers. The bar at Kipini is an obstacle to navigation from the sea.

The Port of Kilifi consists of a land-locked Harbour, 30 miles North-East of Mombasa. It offers good

anchorage for small vessels, and opens out into the Bandari Ya Wali, a bay about one-and-half miles wide, with shallow anchorage.

There is a District Commissioner in residence at Kilifi.

The Port of Malindi is an open Harbour, 60 miles North East of Mombasa. Ships of any size can anchor off Malindi, but the anchorage is very exposed to the Monsoons. Cotton, Sim sim, and Copra are exported.

A District Officer resides at Malindi.

About three miles North of Malindi is the mouth of the Sabaki River. This river, which has recently been bridged about a mile from its mouth, passes through a country of great fertility, but is ahallow and only navigable by cances.

The Port of Lamu lies between Lamu and Manda Islands, 140 miles North-East of Mombass. The town of Lamu, the most important Coast town North of Mombass, is situated on Lamu Island. There is a good anchorage for vessels of moderate draught, but the bar carries only 15 feet at low water. The exports are eccesants, copra, rope, mat bags, and some cattle.

There is a District Commissioner in residence at Lamu.

Posts and Telegraphs.

The Post Office of the Colony (exclusive of Uganda and Tanganyika, which is worked by the Kenya Post Office) received and despatched during 1933, 12,992,962 letters, packets, etc., and 349,609 tele-

The Telegraph and Telephone system has 15,927 miles of wire (exclusive of Uganda and Tanganyika). The lines connect Mombasa with Lamu (171 miles), Kipini with Witu (13 miles), Mombasa to Tanganyika Border (61 miles), Mombasa with Nairobi (336 miles), Voi to Tanganyika Border (81 miles), Konza with Magadi (91 miles), Konza with Machakos (22 miles), Nairobi with Thika (35 miles), Thika with Makuyu (19 miles), Makuyu with Nyeri (58 miles), Nyeri with Nanyuki (32 miles), Nanyuki with Isiolo and Archer's Post (123 miles), Nairobi with Kiambu (10 miles), Nairobi with Kijabe (43 miles), Kijabe with Narok (61 miles), Kijabe with Gilgil (39 miles), Gilgil with Thomsons Falls (45 miles), Thomsons Falls with Rumuruti (34 miles), Gilgil with Nakuru (40 miles), Nakuru with Nakuru Junction (5 miles), Nakuru Junction with Kisumu (132 miles), Lumbwa with Kericho (19 miles), Kericho with Chemagel (32 miles), Muhoroni with Songhor (10 miles), Kibigori with Eldoret (49 miles), Kisumu to Uganda Border (89 miles), Nakuru Junction with Eldoret (122 miles), Rongai with Lake Solai (27 miles), Maji Mazuri with Eldama Ravine (6 miles), Eldoret with Moiben, Eldoret to Uganda Border (98 miles), Leseru with Kitale (43 miles), Kitale with Endebess (11 miles), Kitale with Kiminini (10 miles), Kapsabet with Kakamega (29 miles). Lines follow all Railway routes. Communication between Mombasa and ships at sea and Italian Somaliland is maintained by means of radio-telegraphy. A cable connects Mombasa with Zanzibar. A shortwave wireless station, owned and maintained, under licence from Government, by Cable and Wireless Limited, is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain.

Telegraph communication exists with Uganda and Tanganyika Territory. The Kenya telegraph system is also linked up via the Tanganyika Territory, Nyassaland and Rhodesian systems with the South African service. Communication with the Belgian Congo is maintained through Uganda with which the Belgian Congo ayatem is linked up.

Telephone Exchanges are worked at Nairobi, Mombasa, Nakuru, Eldoret, Kisumu, Kitale, Kiambu, Koru, Ruiru, Kabete, Meru, Molo, Nyeri, Thika, Kericho, Kikuyu, Lumbwa, Limuru, Njoro, Sotik, Soy and Turbo. There is telephone communication between Nairobi-Dar-es-salaam and intermediate

2,757 telephones were in use in Kenya at the end

of 1933.

Civil Aviation.

Civil aviation has shown rapid development in the Colony. Aerodromes have been established and are maintained by Government as Customs Aerodromes at Mombasa, Nairobi and Kisumu. Landing grounds are also maintained at Nakuru, Naivasha, Voi and Makindu by Government. An aerodrome at Eldoret has been licenced and is controlled by the Municipality. Other landing grounds exist, though unlicenced at present.

Imperial Airways (Africa) Limited operate a

regular weekly service for the transport of passengers, mails and freights, between Cairo and Cape Town. The aircraft of this service call at Nairobi and at Kisumu, which place has developed as an important air port. At Cairo the service connects with a similar service to England.

Wilson Airways Limited operate a weekly coastal air mail and passenger service linking Nairobi and the Cairo-Cape Town route with Mombasa, Tanga, Zanzibar and Dar es Salaam.

An experimental passenger and freight air service linking Entebbe, Jinja, Tororo, Eldoret and Kisumu is being started by the Air Survey Company.

Posts and Telegraphs Department.

(Common to Kenya, Uganda, and Tanganyika). Postmaster General, T. Fitzgerald, O.B.E., 1,600l. Senior Deputy Postmaster General, (vacant), 1,1201. Deputy Postmaster General (vacant).

Assistant Postmasters-General, H. Hudson, J. J.

Rowswell (one vacant), 7204. to 8404.

Senior Postmasters, G. G. Kellie, L. E. Graves, H. C. Willbourn, M.C., E. A. Sadler, C. H. Terry, R. M. Douglas, 600L-720l.

Postmasters, A. Carriline, F. W. Hale, D. Cormack, D.C.M., F. J. Woodcock, J. C. Grierson, A. W. Drury, A. J. Davenport, J. D. Gray, G. F. Ball, S. T. Collins, A. E. Hill, F. S. Mackrell, D.C.M., M.M., A. B. Condie, E. W. Ferrett, J. Meredith, A. V. Groves, W. S. Walter, D.C.M., 500t.-600t.

Junior Postmaster and Postal Clerks and Telegraphists, J. Robson, C. W. A. Waters, A. E. Couser, C. Gill, H. Taylor, A. J. Borland, C. E. Alcook, C. J. Tilt, J. T. Marland, W. J. Mathews, W. Ross, F. J. Baker, C. A. Kay, A. N. Skelton, J. Evans, R. J. Brimblecombe, H. B. Senior, K. G. W. McArthur, P. G. Carmichael, J. Ogg, G. Rawsthorne, J. Thomas, 372l. to 500l.

Supervisor (Female) Telephones, Miss A. MacVey, 3721 to 5001.

Postmistresses, Miss G. E. Low, Miss J. E. Lamont, 3721. to 500L

Chief Accountant, F. E. Balmer, 1,000%. Deputy Chief Accountant, H. E. A. Durham, 650L

to 750l.

Accountant, R. J. Field, 500L to 600L

Accounts Clerk, F. C. Oxford, 300l. to 500l.

Chief Telegraph Engineer, G. P. Willoughby,
M.Sc.Tech. (Vict.), M.So. (Cape), M.I.E.E., 1,1201.

Telegraph Engineers, G. L. Carter, E. Jessop, 7201. to 840% (one vacancy).

Assistant Telegraph Engineers, W. A. Atterbury, M.I.R.S.E., G. C. Pocock, A.M.I.E.E., C. R. Minns, S. M. Jack, A. O'Mears, B.Sc. (Lond.),

A.M.I.E.E., 600l. to 720l. Electrical Engineer, J. E. Brunnen, 720l. to 840l. Electrical Inspector, A. O. Cosgrove, B.So., A.M.I.E.E., 600l. to 840l.

Assistant Telephone Engineer, W. E. Smith, A.M.I.E.E., 500l. to 600l.

Sub-Engineers and Telegraph Inspectors, F. L. Stevens, S. B. Stredwick, A.I.E.E., W. G. Edwards, A. E. Faithfull, D.C.M., J. H. Owen, C. H. Pook, D.C.M., W. H. Thompson, M.M., W. Hargrave, S. J. W. McKone, N. R. Jolley, G. Scott, M. Sinclair, P. S. Naude, F. S. Gale, A. W. Dennier, B. W. Friend. V. F. Wood, A. W. Weaver, A. Bryant, E. Nicolson, A. C. Hobbs, W. A. Carman, A. J. Mason, 400l. to 600l.

Chief Electrical Mechanicians. Capt. E. Tarlton. B.Sc. (Eng.), G. H. J. White, 500L to 600L

Senior Wireless Telegraph Engineer Operator, G. E. Hughes, Grad. I.E.E., 500l. to 600l.

Electrical Mechanicians, J. J. Curran, A. Brayshaw. J. N. Johnson, E. G. Hitch, 372l. to 500l.

European Clerk (grade A), J. A. Young, 300l. to 500l. Wireless Officers, A. G. Stickland, R. C. Stead, D. Dalrymple, R. T. K. Vinson, 390l. to 480l. Chief Storekeeper, E. A. Armstrong, 480l. to 600l. Storekeeper, H. C. Frank, 500l. to 600l.

Railways and Harbours.

General Manager, Brig.-Gen. Sir G. D. Rhodes. C.B.E., D.S.O. (R.E., retired), M.E.I.C., M.Inst.T., Assoc. Inst.C.E., 2,500l.

London Representative, W. McHardy, O.B.E., M.A., ROOJ

Chief Assistant to General Manager, J. S. Conev. 1.250L Administrative Assistant, C. H. Bloomfield, 7201.to

Legal Adviser, H. F. Hawes (Solicitor of the Supreme Court of England), 950l. to 1.150l.

Estates Officer (vacant), 8401, to 9201. Office Assistant to Estates Officer, H. Dewhurst. 5001. to 720L

Assistant Land Surveyor, C. W. K. Tucker, 480l, to 6004.

Superintendent of the Line, F. Browning, 1.500l.

Assistant Superintendent of the Line, R. E. Robins, O.B.E., A.M., Inst.T., 1,000l. to 1.200l.

Assistant Superintendents, A. G. Higgins, H. Vanhegan, 720l. to 840l.

District Traffic Superintendents, Henry W. Gauld, J. W. Terrington, 600l, to 720l.

Motor Transport Officer, W. S. Godfrey, 600l. to 720l. Senior Marine Officer, Commdr. J. O. Buckler. R.D. R.N.R. (retired), 1,000%.

Senior Marine Engineer, A. A. Conn. M.I.Mar.E., 720l. to 840l.

Commanders, R. D. Hoskins, J. Lochhead, 7201. to

Marine Hydrographie Officer, Lt.-Commdr. G. Brown, R.D., R.N.R., F.R.G.S., 600l. to 840l. Chief Officers, Lt.-Comdr. T. A. Burnett, R.N. (retired), Lt. Comdr. J. S. Sharp, R.D., R.N.R., 600l. to 720L

Second Officers, R. D. Phimister, A. J. Booth, D.S.C.,

I. P. Stevenson, O. K. Holmes, 390l. to 600l. Chief Engineers, J. Clark, Engineer-Lieut. G. F. Fisher, late R.N.R., 600l. to 720l.

Second Engineers, D. S. Sweeney, W. C. Barton, T. R. Cullen, M.I.Mar.E., S. F. Gray, M.I.Mar.E., B. F. Clayden, F. Craig, M.I.Mar.E., W. Lockie, R. Johnstone, 3901. to 6001.

Chief Engineer, A. E. Hamp, M.Inst.C.E., 1,6001. Assistant Chief Engineer, V. B. Atkinson, A.M. Inst. C. E., 1.250l.

District Engineer, P. Macfarlane, J. G. Nisbet, E. J. B. Gahan, B.A., B.A.I., 840l. to 920l.

Senior Assistant Engineers, R. C. Gowthorpe, B.Sc. (Hons.), A.M.Inst.C.E., J. R. Farquharson, B.Sc. (Eng.), Dipl. R.T.C. , A.M.Inst.C.E., M.A.R.E.A. (U.S.A.), 720l. to 840l.

Chief Draughtsman, T. H. Stone, M.B.E., B.Sc. (Eng.). M.I.R.Sig.E., F.P.W.I. (Lond.), 840l. to 920l. ssistant Engineers, H. M. Kirkland, B.S. Assistant Engineers, A.M Inst.C.E., W. Urquhart, B.Sc., A.M.Inst.C.E., A. Johnston, A.M.Inst.C.E., K.B. Cockle, B.A., B.A.I. (Dubl.), A.M.Inst.C.E., F. Buckley, B.Sc. A.M.Inst.C.E., P. L. Shingler, (Hons.) (Eng.), A.M.Inst C.E., R. Cockrane, B.Sc., A.C.G.I., C. G. B. Wale, A.M.Inst C.E., F. A. Railton, B Sc. (Wales), A.M.Inst.C.E., F.R.G.S., 480l. to 720l. B.Sc.

Office Assistant to Chief Engineer, H. J. Walker. M.B.E., 600l, to 720.

M.B.E., 700s. to 120.

Senior Draughtsman (Engineering), G. C. Beath,
M.I.R.Sig.E., R. C. Wontner, 480l. to 600s.

Senior Draughtsman (Architectural), J. Ward,
A.M.I.Struct.E., L.R.I.B.A., 480l. to 600s.

Chief Accountant, R. P. Walker, 1,350l.

Assistant Chief Accountant, H. A. Bailey, 950L to 1.100%

Senior Assistant Accountants, B. B. Thornton, H. W. Cox. J. H. Baldwin, 7201, to 8401.

Chief Mechanical Engineer, K. C. Strahan, M.I.M.R. M.Inst.T., 1.350.

Locomotive Superintendent, H. B. Stoyle, 9501, to 1.150%.

Works Manager, R. I. Kirkland, 8401, to 9201. Assistant Accountant, P. le Cheminant, 480l. to 720l. Chief Locomotive Draughteman (Mechanical), C. A. G. Jouanno, 600l, to 720l.

District Locomotive Superintendent, Class I, H. Storar, M.I.Loco.E., A.M.Inst.T., 7201. to 8401.

District Locomotive Superintendent, Class II, P. S. A. Newhook, A.M.I.Loco.E., 600l. to 720l.

Assistant Locomotive Superintendent, H. Wood, 4801. to 720l.

Senior Foreman, F. C. Howell, 480l, to 600l. Stores Superintendent, W. Welch, 1,000l.

Assistant Stores Superintendent, W. J. Young, 7201. to 840%.

District Stores Superintendent, F. W. Tovec, 4801. to 720l.

Port Manager and District Traffic Superintendent, Lieut.-Comdr. N. J. Stacy Marks, R.D., R.N.R., Asst. Inst.N.A., A.M.Inst.T., 1,0001.

Port Captain, Capt. R. G. Sargeant, M.B.E., A.Inst.,

N.A., F.R.G.S., 840l. to 920l. Pilots, Lt.-Comdr. C. B. Hoggan, R.N.R., N. H. Blake, H. E. Brown, Sub.-Lt. A. M. Smith, R.N.R., 480l. to 600l.

Local Government, Lands and Settlement.

Commissioner for Local Government, Lands and Settlement, W. M. Logan, O.B.E., 1,350l. Local Government Inspector, E. V. Shilton, 7201. to

9201.

Lands Secretary, C. E. Mortimer, 720l. to 920l. Office Assistant, H. R. Harris, 425l. to 720l. Surveyor General, C. O. Gilbert, 1,000l.

Office Superintendent, W. White, 500l. to 800l.

District Surveyors, F. B. Ballenden, 840l. to 920l.; C. G. Fannin, M.C., Assoc. Inst. C.E., W. Woods, R. H. Tyrwhitt-Drake, 720l. to 840l.

Staff Surveyors, L. G. Chambers, B. J. Ratoliffe, 480l. to 720l.

Forest Surveyors, H. R. H. Edgeombe, J. Brushwood. 3721. to 5001.

Computers. H. C. Long, J. H. Nield, C. A. A. Hime, M. J. MacKay, M. L. T. Maingay, 480l. to 720l. Draughtsmen, F. J. E. Wood, A. P. Best, H. Shields,

G. B. Norman, 372l. to 600l. Survey Records Office, F. G. Robinson, 3721. to 6001.

Principal Registrar of Titles, H. J. Snelgar, 720l. to 840%

Registrars of Titles. E. B. Lloyd, G. J. Robbins, R. A. Hawkins, 360l. to 720l.

Mining and Geological.

Commissioner of Mines, E. B. Hosking, O.B.E. (seconded from Administration), 1,150%. Geologist and Mining Engineer, R. Murray-Hughes,

840l. to 920l. Assistant Geologist, W. D. Harverson, 600l. to 720l. Senior Inspector of Mines, C. T. Cogle, 840l. to 920l. Inspectors of Mines, F. C. Carbis, F. R. H. Green, 6001. to 7201.

KENYA. 345

Chemist and Assayer, Mies A. F. R. Hitchins, 4801. to 600L

Agricultural Department.

Director of Agriculture, H. B. Waters, B.A. (Oxon.), 1,500%.

Agricultural Economist, V. Liversage, 600l. to 840l. Accountant, A. Walker, 5001. to 6001.

Office Superintendent, E. J. Kelly, 500l. to 600l.

Division of Plant Industry.
Deputy Director, H. Wolfe, M.Sc. (Agric.), 1,200. Senior Coffee Officer, A. D. le Poer Trench, 600l, to 9201.

Agricultural Officers, A. G. Bailey, M.A., D. C. Rdwards, B.So. (Agric.), A. C. Maher, M.A. (Dip. Agric.) (Cantab.), A.I.C.T.A. (Trinidad), 3721. to 7204.

Plant Inspectors, T. L. McClelland, M.C., H. Naismith-Jones, C. D. Knight, E. Cottington, A. T. Cooper, 300l. to 500l.

Cooper, 300l. to 500l.

Sub-Division of Native Agriculture.

Agricultural Officers, W. L. Watt, Cert. H.A.S.

Forestry, C. O. Oates, N.D.A., W. G. Leckie,
B.Sc., N. Humphrey, W. O. Sunman, B.Sc.
(Agric.) (Lond.), E. W. Gaddum, B.Sc. (Agric.),
(Lond.), A.I.C.T.A., M. H. Grieve, B.Sc. (Agric.),
T. Y. Watson, B.Sc. (Agric.) (Aberdeen), Dip.

Agric. S.C. (Cantab.), J. E. P. Booth, B.Sc. (Agric.),
A.I.C.T.A., R. E. T. Hobbs, U.D.A. (Reading),
A.I.C.T.A., P. C. Chambers, B.A. (Agric.) (Cantab.),
A.I.C.T.A., M. D. Graham, R. S. Ball, Dip. Agric.
(Cantab.), A.I.C.T.A., E. L. Bradford, Dip.Agric.
(Cantab.), A.I.C.T.A., E. L. Bradford, Dip.Agric.
(Cedara), R. J. Benstead, N.D.A., 372l. to 720l. (Cedara), R. J. Benstead, N.D.A., 3721, to 7201. Scott Agricultura Laboratories.

Senior Entomologist, T. J. Anderson, M.A., B.Sc. (Hons. Edin.), F.Z.S., F.E.S., 600l. to 840l. Entomologiste, H. Wilkinson, A.R.C.Sc., F.E.S., 8000. to 8404.

Butomologiste, H. Wilkinson, A.R.C.Sc., F.E.S., R.L.S., R. H. Le Pelley, Ph.D., D.I.C., B.Sc. (Hons.), A.R.C.Sc., F.E.S., F. B. Notley, B.Sc. (Hons.), 4804 to 7204.

Senior Mycologist, J. McDonald, D.F.C., B.Sc.

(Hons.), F.L.S., 600l. to 840l.

Mycologist, C. A. Thorold, B.A. (Oxon.), A.I.C.T.A., 480l. to 720l.

Agricultural Chemist, V. A. Beckley, M.C., M.A. (Cantab.), A.I.C., 600% to 840%.

Soil Chemist, G. H. G. Jones, M.Sc., 600l. to 840l. Agricultural Officer, S. Gillett, Dip. Agric. Hons. (Wye), 372l. to 720l.

Plant Breeding Services.

Senior Plant Breeder and Experimentalist, G. J. L.

Burton, M.C., B.A., 600l. to 840l.

Plant Breeder, R. J. Lathbury, M.A., 480l. to 720. Agricultural Officer, N. D. Spranger, 372l. to 720l. Grading and Inspection (Exports and Imports);
Grain Conditioning and Cool Stores Services.

Chief Grader and Inspector, and Manager Cool Stores, F. B. L. Butler, F.L.S., 600l. to 720l.

Superintendent, Maize Conditioning Plant and Cool Stores, D. F. Sargent, 500l. to 600l.

Division of Animal Industry.

Deputy Director and Chief Veterinary Officer, H. H. Brassey-Edwards, M.R.C.V.S., 1,2001.

Veterinary. Assistant Chief Veterinary Officer, O. Dixon, M.C., M.R.C.V.S., 1,000l.

Senior Veterinary Officers, E. J. Mulligan, M.R.C.V.S., 7201. to 8401.

Veterinary Officers, R. S. Little, M.R.C.V.S., D.V.S.M., R. L. Creery, M.R.C.V.S., W. G. Emerson, M.R.C.V.S., F. R. Hale, M.R.C.V.S., E. Beaumont, M.R.C.V.S., T. B. McClure, M.R.C.V.S., H. Hay Barelay, M.R.C.V.S., D. F. Macpherson, M.R.C.V.S. W. M. McKay, M.R.C.V.S., F. W. Aston, M.R.C.V.S., R. A. Hammond, M.R.C.V.S., J. Anderson, M.R.C.V.S., 600l. to 840l.

Stock Inspectors, D. Wyartt, W. L. Lewis, G. White, L. E. Smith, T. Harris, C. B. Jolley, P. H. Poolman, J. Denwett, J. H. Ward, R. H. Cameron, F. J. O'Hara, G. L. Murray, C. G. Norman, C. D. Henderson, G. Alcock, G. W. Low, J. S. Nimmo, 300% to 500%.

Veterinary Research.

Chief Veterinary Research Officer, R. Daubney, M.Sc. (Washington), M.R.C.V.S., 1,1001.

Assistant Chief Veterinary Research Officer (vacant), 1,000%

Veterinary Research Officers, J. R. Hudson, B.Sc., M.R.C.V.S., W. B. C. Danks, B.Sc., M.R.C.V.S.,

M.R.C.V.S., W. B. C. Danks, B.Sc., M.R.C.V.S., W. Fotheringham, M.R.C.V.S., 6004. to 8404.

Entomologist, E. A. Lewis, M.Sc., Ph.D., 4804. to 7204.

Laboratory Superintendent, A. J. Kemp, 5004. to 6004.

Laboratory Assistants, J. T. Schultz, J. R. McQueen, H. J. Gray, E. J. Hall, W. P. Bruce, F. Lyons, S. R. Pelling, J. Forsyth, 3544. to 5004.

Animal Husbandry.

Finestock Officer, W. D. D. Jardine, B.So. (Edin.), N.D.D. (Hons.), 480l. to 840l.

Instructors in Stock, J. Anderson, A. Lambie, N.D.A., H. C. W. Guy, C. G. Bishop, 300l. to 500l.

Forestry Department.

Conservator of Forests, H. M. Gardner, B.A., Forestry Diploma (Oxon.), 1,200L

Senior Assistant Conservator of Forests, J. C. Rammell, M.A., Forestry Diploma (Oxon.), 720l. to 840l.

Assistant Conservators of Forests, C. W. Elliott, M.C.,

Forestry Diploma (Edin.), R. M. Graham, Forestry

Diploma (Oxon.), S. H. Wimbush, B.A., Forestry (Oxon.), E. J. Honoré, B.A., Forestry (Oxon.), I. R. Dale, B.A., Forestry (Oxon.), R. V. H. Porter, B.A., Forestry (Oxon.), G. MacNaughtan, B.So. (Edin.), D. G. B. Leakey, 4804. to 7204. Foresters, A. M. Cooper, W. Munro, G. Fairbairn, H. H. G. Deakin, T. A. Angus, H. McIntyre, H.

J. Galt, A. C. Sprunt, E. A. Holyoak, H. H. Anstey, G. R. Gibbons, B. M. Fuller, F. T. Machin, H.

T. Afford, 300l. to 500l. Accountant, J. L. Byrne, M.C., 426l. to 600l.

Game Department.

Game Warden, Capt. A. T. A. Ritchie, 840l. Assistant Game Wardens, F. H. Clarke, R. E. Dent, Capt. R. Whittet, M.C., C. G. MacArthur, 500l. to 600%.

Temporary Game and Vermin Control Officer, Capt. J. T. Oulton, 500%.

Public Works Department.

Director of Public Works, H. L. Sikes, B.A., B.E., M.Inst.C.E., F.G.S., 1,350l.

Superintending Engineer, J. C. Stronach, B.A., B.A.I., 1,000l. 300l. personal and pensionable. Hydrographic Surveyor, A. E. M. Tetley, B.Sc., 7201. to 840l.

Architect, P. Dangerfield, M.C., Chev. Legion d'Honneur, A.R.I.B.A., 720l. to 840l.

Draughtsman, P. J. M. J. Foubister, A.R.I.B.A., 480l. to 600l.

Senior Assistant Quantity Surveyors, G. R. Thomas, P.A.S.I., 600l. to 720l., H. A. Bock, P.A.S.I., M.C.Q.S. (S.A.), 480l. to 720l.

Chief Accountant, H. J. Webster, 840l. to 920l. Deputy Chief Accountant (vacant), 600l. to 720l. Assistant Accountants, R. F. Dalziel-Armstrong, 4251. to 6001., E. A. Friend, J. A. Ellis, W. M. Allen, J. B. Witherick, 426l. to 600l.

Chief Storekeeper, J. W. Johnson.

Senior Storekeeper, J. C. Green, D.F.C., 390l. to 600l. Divisional Staff.

Executive Engineers, C. H. Walmaley, M.C., Assoc.M. Inst.C.E., M.I.Mun. & Cty.E., M.Inst.W.E., W. Fairley, B.A., Assoc.M.Inst.C.E., H. A. Campbell, A.M.Inst.C.E., J. E. M. Noad, A.M.Inst.C.E., 8401. to 920%.

Senior Assistant Engineers, Major J. R. Saidler, M.C., C. de G., B.Sc., A.M.Inst.C.E., M.I.Mun. & Cty.E., F.S.L., H. W. Lane, A.M.Inst.C.E., 720l. to 840l.

Assistant Engineers, H. C. H. Jones, B.Sc., M.R.S.I., M.I.Mun. & Cty.E., H. G. Walby, E. H. Robins, M.I.Mun. & Cty.E., H. G. Walby, E. H. Robins, B. L. A. Jones, B.Sc., S.M.I.C.E., Assoc.M.Inst.Mun. & Cty.E., H. H. Facey, A.M.Inst.C.E., C. T. Henfrey, Assoc.M.Inst.C.E., Assoc.M.Inst.C.E., C. T. Cty.E., S. B. Boyd, B.A., B.A., I. A.M.Inst.C.E., C. M.C. Assoc.M.Inst.C.E., Assoc.M.Inst.C.E. S. McConnel, B.Sc., A.M.Inst.C.E., 480l. to 720l.
Senior Overseer, A. W. Burgess, M.B.E., 500l. to 600l.
Overseers, W. G. Usher, C. G. J. White, T. S. Paterson,

H. S. Dalley, 372l. to 500l. Surveyors, R. C. Bird, C. D. Graham, 600l.

Water Supplies.

Inspectors, T. R. Ginger, M.B.E., M.C., F. Turner, M.B.E., J. W. Collins, 372l. to 500l.

Timber Seasoning.

Assistant Engineer in Charge, W. D. Arnot, B.So., 480% to 600%.

Government Transport.
Transport Officer, E. Brady, 600l. to 720l.

Loan Staff.

Senior Assistant Architect, A. J. S. Hutton, A.R.I.B.A. 8007.

*THE LEEWARD ISLANDS.

Situation and Area

The Colony of the Leeward Islands, with a total area of 708 square miles, consists of a number of islands belonging partly to the chain of the Lesser Antilles and partly (the Virgin Islands Group) to the eastern extremity of the Greater Antilles. The islands of Antigua, Barbuda, St. Christopher (St. Kitts), Nevis and Montserrat form a fairly compact group between the 61st and 63rd degree of west longitude and around the 17th degree of north latitude; but Dominica lies about 100 miles to the south, separated by the French island of Guadeloupe from the rest of the Colony, while Anguilla, Sombrero, and still more the Virgins group (Tortola, Virgin Gorda, Aneg da, etc.), lie apart to the north and north-west.

St. Kitts, Nevis, Montserrat and Dominica form part of the volcanic chain of the Lesser Antilles, whilst Antigua and Barbuda form part of the eastern sedimentary series of the same

Politically the Colony is divided into five Presidencies :- Antigua (with Barbuda), Christopher and Nevis (with Anguilla), Dominica, Montserrat and the Virgin Islands. These have been united and separated at various times in their history, and were finally federated in 1871 by Imperial Act 34 and 35 Vict., cap. 107. Sombrero was added to the Colony by Order in Council under the Colonial Boundaries Act on the 10th August, 1904, being attached to the Virgin Islands Presidency.

History.

The islands were discovered by Columbus on his second voyage, in 1493, and became British during the 17th century. Particulars of their subsequent history will be found in the separate articles, but it may here be mentioned, that with the exception of Dominics, they have been from the first associated politically as well as geographically. They were all colonised from St. Kitts as centre, all included in the Carlisle grant, and possessed a common Legislature as far back as the reign of William and Mary. The General Legislature met for the last time in 1798. when it passed a highly humane slave amelioration Act, which was allowed; a Catholic Emancipation Act, and an Act repealing the duty on exports of 44 per cent. for the benefit of the English exchequer-both which were disallowed. An attempt was made by Sir William Colebrook in 1837 to revive the General Legislature, and though the attempt was regarded unfavourably in some quarters. and the Legislature never actually met, yet the right to revive it was clear, and there is no doubt that the Act of 1871, the passing of which was largely due to the energy and activity of Sir Benjamin Pine, is no more than a revival of the ancient constitution of the islands. The Presidencies of St. Kitts and Nevis, with Anguilla and their respective dependencies, were united into one Presidency by the Federal Act No. 2 of 1882.

Climate.

The climate of the islands varies, but is usually dry (except in Dominica) and fairly healthy. Antigua is subject to drought, and has an average rainfall of about 45 inches; St. Kitts, Nevis and Montserrat have average rainfalls of from 50 to 60 inches; the rainfall of Dominica averages about 120 inches. The mean temperature is about 80°, with but a slight range. The Virgin Islands The hot season is from May to are cooler. October; the rainy season from August to January.

Constitution.

By "The Leeward Islands Act, 1871," one Executive and one Legislative Council, under one Governor, were constituted for the six (now five) presidencies. The Legislative Council now consists of ten official and ten elected members. Three elected members are chosen by the unofficial members of the Legislative Council of Antigua, two by those of the Legislative Council of Dominica, three by those of the Legislative Council of St. Kitts and Nevis, and one by those of the Legislative Council of Montserrat. They must be and continue members of their respective island councils. As there is no Legislative Council in the Virgin Islands, one member is appointed by the Governor to represent that The official members are the Presidency. Governor, the Colonial Secretary, the Attorney-General, the Federal Treasurer, the Administrators of St. Kitts-Nevis, and Dominica. and the Commissioners of Montserrat and the

For general map of the West Indies, see under Windward Islands,

Virgin Islands, and such other person holding office under the Government of the Colony of the Leeward Islands as the Governor with the approval of the Secretary of State may appoint.

The Legislative Council has concurrent legislative powers with the local legislatures on certain subjects specified in the Act, such as matters of property, mercantile and criminal law, the law relating to status, the maintenance of a general police force and a common convict establishment. quarantine, postal and telegraph affairs, currency, audit, weights and measures, education and the care of lunatics, all matters relating to immigration. copyright and patents, and its own constitution and procedure. Any island legislature is, in addition. competent to declare other matters to be within the competency of the general legislature. Any island enactment on such subjects is void if repugnant to an enactment of the general legislature, or may at any time be repealed or altered by one.

The Council meets at least once a year, at a place notified by proclamation, and no Council lasts more than three years. The session usually

lasts for about one week.

The expenses of the federal establishments are voted by the Council, and apportioned among the

Presidencies.

The Council has power to alter its constitution by an ordinary Act, to be reserved for the King's pleasure, and the King has power, by Order in Council, at any time to include any other West Indian Island in the federation, upon joint addresses from the Legislative Body of such island, and from the Council, on such terms and conditions in each case as are in the addresses This power has not actually been expressed. exercised, and the inclusion in the Colony of Sombrero, which had no legislative body, was effected as above mentioned under a different

Currency and Banking.

The usual currency is British silver, a few British and United States gold coins being occasionally met with. Barclays Bank (Dominion, Colonial and Overseas) Ltd. and the Royal Bank of Canada have branches in Antigua, St. Kitts, and Dominica, and the latter bank has a branch in Montserrat. In Nevis and the Virgin Islands there are no banks.

Government savings banks have been established in all the Presidencies.

Means of Communication.

The following Steamship Lines serve the Colony :-

Canadian National Steamships (from Canada and Bermuda) and Ocean Dominion Line (from Canada) call fortnightly at the chief ports in the Colony, proceeding to Windward Islands, Barbados, Trinidad and British Guiana. Furness-Bermuda Line (Br.), Ocean Dominion Line (U.S.) and Downie S.S. Corp. (U.S.) about

once every two weeks from New York and St. Thomas call at St. Kitte, Antigua, Montserrat and Dominica, proceeding to French West Indies, Windward Is., Barbados, Trinidad, etc.

Passenger steamers to and from London (Harrison Line) proceed direct to Antigua every month.

Passengers travelling between England and the Leeward Islands can travel direct between England and Barbados by the Elders & Fyffes Line, or Harrison Line, or the Royal Dutch West India Line, etc., and between Barbados and the Leeward Islands by Canadian National Steamships or by the Furness Bermuda Line.

Passengers may also travel to or from England via New York or Canada by the Lines mentioned. An Air Mail service operated by Pan American Airways calls weekly at Antigua from Miami Altways calls weekly at Antigua from Miami (U.S.A.) via Cuba, Haiti, Santo Domingo Porto Rico and St. Thomas, proceeding to St. Lucia, Trinidad, Georgetown (Br. Guiana) and Paramaribo (Dutch Guiana) and returns, also weekly, in the opposite direction.

Air Mails are also conveyed by the Company to Jamaica, Central America and South America

(see below).

Posts and Telegraphs.

Mails with Great Britain are exchanged via New York, occasionally via Barbados, and sometimes direct from Autigua, and direct with Canada, the United States and the British West Indies.

Mails are also exchanged by Air with the places served by the Pan American Airways, and with Great Britain and Canada via Miami, U.S.A.

There are 53 Post Offices in the Colony and the rates of postage are as follows:

Inland.—Letters, 1d. for the first 2 oz., 1d. per

additional 2 oz.; Post cards, id.

British Empire, Egypt and Tanger —Letters, 11d. for the first oz., 1d. per additional oz.;

Post cards, 1d. Other places.—Letters, 2jd. for the first oz., 1jd.

per additional os.; Post cards, 1d. All places.-Printed matter, 1d. per 2 oz.; "small

packets," 6d. up to 8 oz.; 1 d. per additional os. Parcel post despatches are exchanged with Great Britain vid Barbados, Canada and New York and direct with Canada, the United States and British West Indies, Bermuda, Br. Guiana,

Guadeloupe and Dependencies and the Dutch West Indies, and vid London or New York to other countries.

British Imperial Postal Orders are issued and paid in the Colony and Money Orders are exchanged direct with Great Britain, Canada, the United States and British West Indian Colonies.

Telephone Systems are maintained by the Government in Antigua, St. Kitts, Nevis,

Dominica, and Montserrat.

Telegraph communication is maintained by means of Wireless operated by Imperial and International Communications, Ltd., there being stations at Antigua, Dominica and St. Kitts, all of which communicate with one another and with Barbados for telegrams to the United Kingdom, Canada, North America, etc. There is also a wireless station in Montserrat maintained by the Colonial Government but operated by the Company.

The principal tariffs are: -To England 2/4d. per word. To Eastern Canada 1/6d. " To Western Canada 1/83d...

There are also cheap rates at one half and one third of the ordinary tariff, the latter being subject to a minimum charge.

There are cable stations at Antigua, Dominica and St. Kitts, which have been taken over by

the existing Wireless Company.

General Statistics of the Leeward Islands.

Total population, census 1921, 122,242, being a decrease of 4,951 on that of 1911.

Estimated total population on 31st Dec., 1932, 132,973.

Chief Towns.

The most important towns are St. John (Antigua), 6,997; Basseterre (St. Kitts), 7,736; and Roseau (Dominica), 6,803, all 1921 census.

Education.

The system of elementary education is denominational in Montserrat and the Virgin Islands, the various denominations being Anglicans, Wesleyans and Roman Catholics. In the other Presidencies elementary education is provided by the Government. On 31st December, 1932, there were 112 aided and Government schools in the Colony. The clergy of the various denominations are granted facilities for giving religious instruc-tion during school hours to the children of their During the year 1933, the respective churches. Government grants to all the elementary schools in the Colony amounted to £19,690.

School fees have now been abolished in all public elementary schools throughout the colony. The schools are required to receive all children applying for admission. Grants-in-aid are refused to superfluous or inefficient schools. In the 112 aided and Government schools there were en-rolled on 31st Dec., 1933, 25,873 children, with a daily average attendance of 17,746. For secondary education there are government grammar schools for boys in St. Kitts, Dominica and Montserrat, a private grammar school for boys in Antigua, private girls' high schools in Antigua and St. Kitts, and private mixed schools in Antigua, Nevis, St. Kitts (convent) and Dominica (convent).

The standard of the secondary schools is the Cambridge School Certificate.

There is a training college for female teachers in Antigua (under the control of the Moravian Church).

Civil Service.

A system of grading civil service clerks has been established throughout the Colony. The pay assigned to the several grades is as follows:-

Assistant Clerks (Men) £65-£5-£90. £60-£5-£90. (Women) Junior Clerks (Men) £100-£10-£200. (Women) £100-£10-£160. Senior Clerks £200-£10-£250. £250-£10-£350. Principals.

ANTIGUA.

Antigua is situated in W. long. 61° 45′, and N. lat. 17° 6′. It is about 54 miles in circumference, and its area is 108 square miles, about half the size of Middlesex.

The islands of Barbuda (population 902) and Redonda are dependencies of Antigua. They have a total area of 62½ square Barbuda lies about 25 miles due north miles. of the main island, with an area of 62 miles, is very flat, with a large lagoon on the west side, separated from the sea by a spit of sand. It was long owned by the Codrington family. It produces some salt and phosphates of lime, and is well adapted for cattle grazing and horse rearing. Cotton is being grown with favourable results. Deer were introduced by the Codringtons. island has communication with Antigua by a sailing boat service. Redonda, lying between Montserrat and Nevis. 25 miles S.W. of Autigua, in 25° 6′ N. lat., 61° 35′ W. long., 1 mile by 1 mile, 1,000 feet high, is valuable for its phosphate of alumina mines, discovered in 1865, formerly worked by the Redonda PhosphateCompany under license and subject to an annual rental of 50l.

Antigua was discovered by Columbus in 1493, who named it after a church in Seville, called Santa Maria La Antigua. It was first inhabited by a few English from St. Kitts in 1632. In 1663 Charles II. made a formal grant of the island to Lord Willoughby, who sent out a large number of colonists. After an interval of French occupation, it was declared a British possession by the Treaty of Breda, 1666. There are no rivers, and few springs in the island, and consequently it is exposed to frequent droughts. The island is in the main low-lying and has no forests. Rainfall:—

1933	44:30

On the 22nd March, 1898, the Legislative Council, which was previously partly elected and partly nominated by the Governor, passed an Act abrogating itself and substituting the Crown Colony system. The new Council consists of sixteen members, eight official and eight nonofficial, all nominated by the Governor under Royal Letters Patent. The Governor presides. By Ordinance No. 7 of 1910, the duration of the Council is limited to three years.

The chief products are sugar and cotton. In 1933, 12.134 acres were under sugar-cane, 200 under cotton, 1,229 under provisions, and 55,417 were uncultivated.

St. John, the chief town, has a population of 6,997 (census of 1921), and is a port of registry, having on 31st December, 1933, 23 sailing vessels registered, with a total tonnage of 401.

BARBUDA.

Warden, H. D. C. Moore (Senior Clerk), 2501., and quarters valued at 50%, per annum.

ST. CHRISTOPHER AND NEVIS.

This Presidency consists of the Islands of St. Christopher (St. Kitts), Nevis and Anguilla. These were united to form one Presidency by the Federal Act No. 2 of 1882.

The total population on 31st December, 1932, was estimated at 36,730, as compared with 38,214 at the census of 1921. The total area is about 152 square miles.

Constitution and Government.

In 1625 Mr. (afterwards Sir Thomas) Warner landed in St. Christopher, bearing a Royal Commission to the Earl of Carlisle, by which the islands of St. Christopher (or Merwar's Hope), Nevis, Barbados and Montserrat were taken under royal protection, and given over to his custody as the King's Lieutenant.

In 1671 St. Christopher, Nevis, Montserrat. Antigua, Barbuda, Anguilla "and all other the Leeward Islands" were separated from Barbados and created the "Leeward Caribbee Islands Government," and Sir Charles Wheler was appointed "Captain-General" of the same. The chief seat of government was then at Nevis, but afterwards transferred to Antigua, and the government of each island, in the absence of the Captain-General, was administered by a or, when none such Lieutenant-Governor, was appointed, by the President of the Council.

In 1689 Colonel Christopher Codrington was appointed Governor-in-Chief, and his Commission, granted by William III., and dated 20th October, 1689, authorised him to call assemblies of freeholders and planters within any of the islands jointly and severally to make laws for the public peace, welfare and good government of the said islands," thus providing for separate and federal legislatures. The Legislature in St. Christopher and in Nevis, as in the other islands of the government, consisted of two houses, a nominated Council and an elected Assembly, and had secured to it its own peculiar laws and local jurisdiction.

By Letters Patent, dated 26th April, 1816, the Commission originally granted to Sir William Stapleton was revoked, and the Leeward Caribbee Islands formed into two distinct governments, the first comprising Antigua, Montserrat and Barbuda, and the other St. Christopher, Nevis. Anguilla and the Virgin Islanda.

By Letters Patent, dated 23rd November, 1832, the General Government was restored, Dominica being for the first time included, and a Governor and Commander-in-Chief, with two Lieutenant-Governors for St. Christopher, Nevis and Anguilla, and for Dominica respectively, were appointed. each island possessing a Legislative Council and House of Assembly, which continued, under the supervision of the Governor-in-Chief, to legislate for local interests.

In 1866 measures were introduced in each island to alter the constitution, and the two houses then existing were replaced by a single Legislative Assembly, consisting of ex-officio members, nominees of the Crown, and representatives of the people elected under a limited franchise.

In 1878 the single chamber constitution was repealed in St. Kitts and in Nevis, and the Crown Colony form of government adopted in its stead, and in 1882 these two islands, with Anguilla, were united into one Presidency

The office of Lieutenant-Governor, which existed until 1870, has been abolished, and the Presidency, in the absence therefrom of the Governor, is under the immediate supervision of an Administrator.

There is one Executive Council for the Presidency, consisting of the Governor, the Administrator, certain ex-oficio members, and such other persons as His Majesty may from time to time appoint. The Legislative Council consists of seven official and seven nominated unofficial members, besides the Governor and the Administrator. Of the unofficial members not more than six shall be from among the people of St. Kitts and Anguilla, and one at least from among the people of Nevis. The Governor, or, in his absence, the Administrator, or, in the absence of both of them, a member of the Council appointed in writing, presides, and the President of the Council enjoys an original and a casting vote. The Council meets at the town of Basseterre in St. Kitts.

Industry, Trade and Customs.

Sugar is the principal crop in St. Kitts (204,349 tons of cane in 1934 crop, from 7,630 acres, 28,320 tons of sugar manufactured). It is grown in the Basseterre Valley and on the lower slopes round the island (the northern side showing the best average yield), and the cane is crushed and sugar produced at a central factory a mile from Basseterre. A light railway for haulage of canes encircles the island. The sugar industry is at present suffering severe depression.

The only other important crop in St. Kitts is cotton, the lint produced in 1932 being 126,403 lbs. on 600 acres. Successful efforts are being made to encourage the growing of tomatoes and other vegetables for export to Canada, 3,160 crates being shipped in 1932.

Cotton and coconuts are the chief products exported from Nevis.

Vegetables and cattle, chiefly for export to St. Kitts and for local consumption, are also produced in Nevis.

Salt is the chief product of Anguilla, and is also produced from ponds at the south eastern part of St. Kitts, the combined quantity in 1932 being 759 tons valued at 645l.

Anguilla also produces cotton in small quantities.

There are no manufacturing industries (other than the manufacture of sugar) in the Presidency.

The Customs import tariff is mainly on an ad valorem basis with a surtax of 25%. A preferential reduction varying in amount, but in most cases equal to one third of the general rate, is accorded to Empire products.

The percentage of trade in 1933 is as follows:—

United Kingdom			45
Other British countries		••	33
U.S. of America			13
Other foreign countries	• •	• •	9
			100

Education.

There are four secondary schools:—a Government grammar school for boys in St. Kitts, a girls' high school in St. Kitts and a mixed school in Nevis, both state-aided, and a school by the Roman Catholic Sisters.

There are 31 Government primary schools (16 in St. Kitts, including 4 in Basseterre, 10 in Nevis and 5 in Anguilla) and also a Roman Catholic school and a few small private schools.

St. Kitta.

The island lies in latitude 17° 18′ N., and longitude 62° 48′ W. The area of the main body of it presents a long oval, from the south-eastern end of which runs a narrow neck, gradually expanding into a small knob of land, within which are the salt ponds.

The total length of the island is about 23 miles.

The total area is 68 square miles.

The central part of the main body consists of a range of lofty rugged mountains, which traverses it from south-east to north-west, attaining its greatest height at Mount Misery, which is about 3,711 feet above the sea. A branch of this range encloses the spacious and fertile valley or plain, on the seaboard of which lies Basseterre, the principal town, with a population of about 8,000. Near the town of Sandy Point is Brimstone Hill, strongly fortified and fiercely besieged during the French wars. It is quite isolated, and about 750 feet in height.

The circle of land formed by the skirts and lower slopes of the mountain-range of the main body of the island, and the valley of Basseterz, constitute nearly the whole of the arabis and cultivated portion of the island. The higher slopes of the mountains are covered with short grass, affording excellent pasturage, while their summits are crowned with dense wood. The island is of volcanic formation, and the soil, save in the mountains (where it is clayey) is peculiarly light and porous, sandy yet fertile.

The climate, for a tropical one, is decidedly healthy. The highest temperature in the shade is about 88°, the lowest 66°, and the mean average about 76°.

The average rainfall in St. Kitts for the year

1932 was 73 01 inches.

St. Christopher or St. Kitts, the Carib name of which was Liamuigs, "The Fertile Isle," was the first settled of the British West Indies, the settlement having been founded by Mr. Thomas Warner and other settlers, who landed on the 28th January, 1623, at the present village of Old Road. Later, French settlements were formed at the two ends of the island. The whole island was finally assigned to England under the Treaty of Versailles in 1783.

Nevis.

The island of Nevis is situated in 17° 40′ N. lat., and 62° 33′ W. long. It was discovered in 1498 by Columbus, and was colonised by the English from St. Kitts in 1628. Charlestown, the principal town, has a population of about 1,100. The population of Nevis largely consists of peasant proprietors.

The island, which is divided into five parishes, is nearly of a circular form: its area is about 50 square miles, or about 32,000 acres, of which about 15,000 acres are fit for cultivation; its greatest elevation 3,596 feet above the sea.

The soil is very different from that of St. Kitta, being of stiff clay, encumbered everywhere with

volcanic boulders.

There are hot mineral springs adjoining the Bath House Hotel near Charlestown. These springs have valuable medicinal properties.

The climate is very similar to that of St. Kitts, from which place it is separated by a strait of about two incles in breadth at its narrowest

part, which, however, lies out of the direct course for boats plying between the two islands. The distance between Basseterre (St. Kitts) and Charlestown (Nevis) is about twelve miles.

A navilla

Anguilla is situated in 18° 12' N. lat., and 63° 5' W. long., about 60 miles N.W. of St. Kitts, and is sixteen miles in length, and varies in breadth from three to one and a half miles, containing an area of thirty-five square miles. The "Dogs" and neighbouring islands are dependencies of Anguilla.

Unlike the mountainous volcanic islands of St. Kitts and Nevis, Anguilla consists of Oligocene limestone and clay and its highest

point is 213 ft. above sea level.

The inhabitants are peasant proprietors under the jurisdiction of a medical officer who is also magistrate.

The island is healthy, but suffers from want of an adequate water supply.

Besides sheep and goats the chief product is malt. See Island cotton is cultivated.

DOMINICA.

Dominica is situated between 15° 10' and 158 40' N. lat., and 618 14' and 61° 30' W. long.; 29 miles long and 16 broad. It lies between the French Islands of Guadeloupe and Martinique, being distant from each about thirty miles, and

has an area of 3043 square miles.

The island is very mountainous and picturesque, rising at Imray's View, the culminating point of Morne Diablotin to 4,747 feet. It was discovered by Christopher Columbus on Sunday (hence its name), the 3rd of November, 1493, in the course of his second voyage. It was included in the grant made of sundry islands in the Caribbean Sea to the Earl of Carlisle, by a patent, dated 2nd June, 1627; but several attempts to bring the place under subjection to the English proved abortive. By the treaty signed at Aix-la-Chapelle, in 1748, it was stipulated between the English and French that Dominica and some other islands should remain neutral, and that the original proprietors, the Caribs, should be left in possession. During the time that Dominica was thus professedly regarded by the English and by the French as a "neutral" island, many French planters and adventurers settled on it and established plantations.

Dominica was captured by the English in 1756, and by the ninth article of the peace of Paris, in 1763, was assigned to Great Britain. Commissioners were sent out for the purpose of surveying and selling lands capable of cultivation, which yielded to the British Crown the sum of 312,0921. 11s. 1d. sterling. The French settlers were generously secured in their possessions, on condition of taking the oath of allegiance and paying a small quit rent. Dominica at this time formed a unit of a General Government, which comprised Grenada and the Grenadines, St.

Vincent, and Tobago.

In 1771, the island was constituted a separate Government, under the administration of Sir Wm. Young, Bart. On the 21st June, 1775, a Royal Proclamation was issued, establishing a House of Representatives, fixing a new qualification for candidates and electors, and regulating

proceedings at elections.

In 1778, the French, attracted by the fertility of the place, and invited over from Martinique by some of their countrymen, prepared a military and naval expedition against the island, under the Marquis de Bouillé, Governor of Martinique, and became masters of it on the 7th of September. after an obstinate resistance. Marquis Duchilleau, a cruel and tyrannical officer, was appointed Trade failed, and great distress Governor, followed.

In 1783 the island was again restored to the English, and Sir John Ord, Bart., was appointed

Governor.

In 1795 another invasion of the island was attempted by Victor Hugues, the French Republican leader, who had previously forced the British The brave troops to evacuate Guadeloupe. and well-directed resistance of the inhabitants, under the command of Governor Hamilton, forced part of the enemy to fly, and the rest to surrender.

In 1805, now referred to in the island for marking the time of events, by the name of La Grange (the name of the invading General), the French again landed at each flank of Roseau. The regular troops and the militia fought gallantly, but unfortunately Roseau, the capital, was set on fire accidentally, and was obliged to

capitulate, paying the enemy 12,000l. to quit; whilst the Governor, Sir George Prévost, and the troops (regular and militia) proceeded across the island to the superior position of Prince Ruperts, near the town of Portsmouth.

In 1833 the island was, with Antigua and the other Leeward Islands, formed into a General Government, under a Governor-in-Chief, resident

at Antigua.

Riots occurred in 1893, in the district of La Plaine on the Windward Coast of the island, in connection with the collection of taxes. The police and a party of marines and blue jackets, landed from H.M.S. Mohawk, were stoned, and compelled to fire on the rioters, with fatal results. An inquiry into the administration was ordered by the Secretary of State, and entrusted to Sir R. Hamilton, formerly Governor of Tasmania, who visited the island, and made a report (vide H. L. 280, 1893, and C-7447, 1894). Dominica, in common with other West Indian

islands, was visited in 1897 by the Royal Commission appointed to inquire into the condition of the West Indian colonies; and an important outcome of their recommendations was the grant. in 1898, of 15,000%, by the Imperial Parliament

for road construction in the Island.

Considerable areas in the island are at present uncultivated. Much of this was at one time under coffee, but "blight" and the marauding of the Maroons led to the abandonment of many estates, while the depreciation of sugar still further reduced the area of cultivation. The soil is good and the climate healthy. Limes and cocoa flourish throughout the coastal zone. The former, however, are being rapidly wiped out by root disease, but this critical situation is being combated by planting limes budded on resistant stocks on a considerable scale. The higher slopes in the centre of the island are well adapted to the cultivation of coffee, nutmegs, spices and such tropical fruits as require humid conditions.

There are many thermal, chalvbeate, sulphur, and other medicinal springs in the island, which is volcanic, and on the Grand Soufrière Hills there is a geyser or boiling lake at an elevation of 2,300 feet.

An eruption in the great crater took place on 4th January, 1880, volcanic ash covering the roofs of the houses in Roseau to a depth of two or three inches

The island abounds in rivers, with fish in some, and there is a plentiful supply of water power.

Lime juice, cocoa, coconuts, copra, rumand fruit (including green limes, grape fruit, oranges, mangoes, bananas and pears), are the chief products; sugar, formerly the staple industry, has now ceased to be made. A considerable trade is carried on also in spices, oils, and timber. 1933: cocoa, 2,550L; essential oils, 14,964/.; limes. 4,893/.; Conc. lime juice, 1,817l.; raw lime juice, 1,889l.; rum, 3,811l.; coconuts, 223l.; bananas, 889l.; oranges, 3,268l.; mangoes, 931l.; pears, 567l.

The rainfall in Roseau for 1933 was 82:22 inches; the average for the whole island was 131.12 inches; the mean temperature 80° Fahr.

(Roseau).

The chief town is Roseau, with a population of 6,803 according to the census of April, 1921: it is a port of registry, and had registered on 31st December, 1933, 11 vessels, of a total tonnage of 210 tons. The other town is Portsmouth, to the north-west of the island, in Prince Rupert's Bay. There is a branch of Barclays Bank (Dominions, Colonial and Overseas) at Roseau, and one of the Royal Bank of Canada, established in April, 1915.

There is a Government telephone system of 570 miles, with 5 exchanges, and a Government electric light service for the town of Roseau.

The Local Government is administered by an Administrator, aided by an Executive Council. In July, 1898, the Legislative Assembly, which was previously partly elected and partly nominated, passed an Act abrogating itself, and substituting the Crown Colony system. A Legislative council was created, consisting of twelve members, six officials and six non-officials, all nominated by the Governor under Royal Letters Patent. Ordinance No. 21 of 1924, provides for the election of four of the unofficial members of the council. The Administrator presides in the absence of the Governor from the Presidency.

A considerable number of the inhabitants speak a French patois, but the use of English is becoming

general.

A remnant of the original Carib inhabitants of the Island is still in existence (vide Cd. 1298, 1902).

According to the Census of 1921 there are about 420 Caribs in the Island, of whom about 141 are estimated as of pure blood.

Customs Tariff.

The rates of duty under the Customs Tariff are mainly specific. A preferential reduction varying in amount, but in most cases amounting to one-third of the general rate is accorded to

Empire products.

The ad valorem duty on most articles is 10 % and 15 %. Perfumery, Jewellery and Plate and Plated Ware 20 % and 30 %.

Percentage of Trade. 1933 With the United Kingdom-97'49%, , , , British Possessions-37'98% Foreign Countries-24.53%

Administrator, H. B. Popham, M.B.E., 1,000% and 200% duty allowance and Residence (Government House). Chief Clerk and Clerk of Councils, L. Cools-Lartigue (acting), 250l. by 10l. to 350l.

Treasury and Customs.

Treasurer and Comptroller of Customs, 450l. by 25l. to 500l., H. E. Dean.

Accountant, E. E. Harney, 250l. by 10l. to 350l.

Senior Clerks, 200l. by 10l. to 250l, R.H. Shillingford (with personal of 20l.), J. J. Daway, 200l. by 10l. to 250l.

by 10l. to 250l.

Sub-Treasurer, Warden, Northern District, and
Magistrate, District "G," S. E. Moir, 150l. by
25l. to 200l. as Warden, and 300l. as Magistrate.

Judicial Establishment.

(For Judges of the Supreme Court and Attorney General, see Leeward Islands Federal Establishment.)

First Puisne Judge, Leeward Islands, B. H. A. F. Berlyn, 800l.

Crown Attorney and Magistrate, District "E," G. E. F. Richards, 450l. by 25l. to 500l.

Registrar and Provost - Marshal, Registrar-General, P. I. Boyd, 250l. by 10l. to 350l. Senior Clerk, F. A. Piper (acting), 200l. by 10l.

to 250l.

Magistrate, District "E," G. E. F. Richards; is

also Crown Attorney, see above.

Additional Magistrate, District "E," T. Cools-

Lartigue (acting); is also Escheator General.

Magistrate, District "F," E. A. Evelyn (acting),
250l. House and travelling allowance 50l.

Govt. Officer, Eastern District, E. A. Rvelyn, Senior Clerk, 2001. by 101. to 2501.; is also Clerk to Magistrate, District "F," and Education Officer, Eastern District.

Magistrate, District "G," S. E. Moir (see Sub-Treasurer, Warden, etc.).

Medical Establishment.

Chief Medical Officer and Medical Officer of the Public Institutions, Dr. C. N. Griffin, M.D., C.M. (McGill), M.R.C.S., L.R.C.P., 700l. by 25t. to 750l., with travelling allowance of 50l.

25l. to 750l., with travelling allowance of 50l.
Medical Officer, District "A," L. P. Younglao,
M.D., 400l. by 25l. to 450l. 50l. travelling
allowance, private practice and 35l. in respect
of commuted fees.

Medical Officer, District "B," R. F. Armour, 400. by 25l. to 450l., free quarters, 50l. travelling allowance, private practice and 35l. in respect of commuted fees.

Medical Officer, District "C," N. L. Joynt, 400l. by 25l. to 450l., quarters, 50l. travelling allow-

ance, and private practice.

Medical Officer, District "D," C. E. S. Bailey
(acting), 400l., 50l. allowance in lieu of quarters,
50l. travelling allowance, and private practice.

501. travelling allowance, and private practice.

Port Health Officers, Roseau, Medical Officer,
District "A."; Portsmouth, Medical Officer,
District "B."

Quarantine Officers, C. A. H. Dupigny, J. N. Macintyre, and R. H. Shillingford (as Treasury Officers)

Public Works Department.

Colonial Engineer and Surveyor-General, Captain E. C. Patrickson, 500l.

Road Surveyor, Northern District, Principal, W. A. Knight, 250l. by 10l. to 350l., 50l. horse and travelling allowance.

Road Surveyor, Western District, Senior Clerk.
Austin Winston, 200l. by 10l. to 250l., 50l.
horse and travelling allowance.

Senior Clerk, H. E. Letang (acting), 200l. by 10l.

to 250l.
Superintendent of Telephones, Senior Clerk, L.
Deschamps, 200l. by 10l. to 250l.

Agriculture.

Curator of Botanical Gardens and Agricultural Superintendent, F. G. Harcourt, 450l. by 25l. to 600l. and 60l. allowance in lieu of quarters.

Assistant Agricultural Officers, W. E. Bassett, H. B. Pidduck and S. A. Schouten, 250l. by 12l. 10s. to 400l., 30l. house allowance.

Officer-in-Charge, Government Marketing Depot and Peasants' Adviser, E. E. Taylor, 300l. by 25l. to 350l. House allowance 30l.

Police.

Inspector of Police, Captain J. R. A. Branch, 400l. and quarters; horse allowance, 72l.; Keeper of Powder Magazine, is also Officer Instructor to Local Forces and Officer Commanding Local Forces.

Sub-Inspector, F. Wigley, 2251., free quarters and 361. horse allowance.

Inspector of Weights and Measures, Captain J. R. A. Branch.
Surgeon, The Chief Medical Officer ex-officio.

Prison.

Officer in Charge of Prison Discipline, Captain J. R. A. Branch.

Keeper of Prison, N. A. Clarke, 1251., and quarters.

Post Office.

Postmaster, R. S. Merrill (acting).
Deputy-postmaster, Portsmouth, The Warden, ex-officio.

Education.

Head Master, Dominica Grammar School, Principal, H. W. Stokes, B.A. (Cantab), 250l. by 10l. to 350l., and quarters.

Assistant Master, Senior Clerk, N. A. Jeffers, 200l. by 10l. to 250l.

Inspector of Schools, Senior Clerk, J. E. T. Roberts, 2001 by 101. to 2501. and 721. travelling allowance.

The Inspector of Schools performs the duties of Educational Officer.

There are Government Schools in the districts

of the Island under the charge of:—
6 First Class Head Teachers, 90l. by 5l. to 120t.
22 Second Class Head Teachers, 65l. by 3l. to 80l.,
with result grants and allowances for quarters.

Chief Ministers of Religion.

Anglican Church, The Rev. Canon P. K. P. Bolton.

Roman Catholic Church Bishop, The Right
Reverend James Moris, C.Ss.R.

Vicar-General, The Very Reverend Father C. De Vos, C.Ss. R.

Wesleyan Church, The Reverend D. S. Mac-Donald, Superintendent.

Foreign Consuls.

France, A. R. Cools-Lartigue, Consular Agent. Belgium, A. R. Cools-Lartigue, Vice-Consul.

MONTSERRAT.

This Island, discovered by Columbus in 1493, was named by him after a famous mountain in Spain, where is situated the monastery in which Ignatius Loyola conceived the project of founding the Society of Jesus.

It is situated 27 miles from Antigua in 16°46' N. lat., and 61° W. long., and is about 11 miles in length, and 7 in the broadest part. Its total area

Year. From U.K.

is 32½ square miles. It is of volcanic formation and very rugged and mountainous. The hills are covered with forest, the highest elevation being Chance's Mtn. (3,000 feet) in the southern part of the island. Plymouth, the chief town, with a population of 1,730, is on an open roadstead on the south-west coast. It is a port of registry, and had, on 31st December, 1933, 5 sailing vessels, total tonnage 91 tons net.

Montserrat was colonised by the Irish in 1632: the French took it in 1664, and levied heavy imposts on the inhabitants; it was restored to England in 1668. It capitulated to the French in 1782, but was restored to the English in 1783.

Montserrat possessed a Legislative Council and Assembly as early as 1668. In 1861, these were replaced by a single Chamber of eight elected and four nominated members.

By an Act of the Legislative Assembly, dated 24th Dec., 1866, and confirmed by Order in Council 26th Feb., 1867, this Chamber was replaced by a Legislative Council of not more than six nominated members. By Act No. 2, of 1902, which rescinded these Acts, the number of members was limited to four. Ordinance No. 4 of 1909 repealed No. 2 of 1902 and limited the tenure of office of the members of the Council to three Ordinance No. 2 of 1911 amended No. 4 of 1909 and increased the number of members to six. Ordinance No. 18 of 1922 amended No. 4 of 1909 and increased the number to eight. Unofficial representation on the General Legislative Council of the L.I. has now been provided for.

The cultivation of sugar, once the staple industry of the island, has declined, and Sea Island cotton, tomatoes, onions and limes are now the principal products.

Among the other exports may be mentioned a drug known as "papain," essential oils, lime juice, cotton-seed oil, cattle and green vegetables.

There are eight Anglican schools with 1,638 scholars, three Methodist with 741, one Roman Catholic with 342, and one undenominational with 248 scholars.

The roads of the island have of late years been much improved, and drained by masonry culverts and surface drains; and every year progress is made in these respects.

On 7th August, 1899, the island was devastated by a hurricane; and again on 28th August, 1924, and 12th September, 1928,

There is telephonic communication throughout the Island; a Wireless Station was erected in 1925.

The island is considered to be one of the most healthy of the Antilles.

The rainfall in 1933 averaged 61.79 inches and the mean temperature was 69.8° minimum and 84 7° maximum.

Roman Catholic Vicar, Rev. Father A. Moris. Wesleyan Minister, Rev. W. A. Beckett.

VIRGIN ISLANDS.

The Virgin Islands were discovered by Columbus in 1493; they consist of a cluster of islands to eastward of and adjacent to Porto Rico; the largest in the group belonging to Great Britain is Tortola, which is situated in 18° 27' N. lat., and 64° 39' W. long. These islands, so far as they are British, became so in 1666.

The British islands (about 32 in number) include Tortola, Virgin Gorda, Anegada, Jost van Dykes, Peter Island, Salt Island, and all others not in

the possession of the United States of America. The total area of the British colony is about 58 square miles. A lighthouse is maintained by the Board of Trade on Sombrero, which was first ncluded in the Colony in 1904.

The Americans possess St. Thomas, St. John,

and St. Croix.

A civil government and courts of justice were established in the Virgin Islands in 1773.

In April, 1867, an Ordinance was passed to amend the Constitution of the Virgin Islands. was enacted that a Legislative Council should be constituted, to consist of the Colonial Secretary and the Colonial Treasurer, and not more than three unofficial members, to be nominated by the Administrator of the Government. This Ordinance was repealed May 1st, 1902, since when the Governor of the Leeward Islands ordains the laws. There is also an Executive Council.

The chief town is Road Town, Tortola, population (1921) 437, which is a port of registry, having, on 31st December, 1933, 8 vessels, registered total

tonnage, 77.

Road Town, which is well built and clean, is provided with well stocked shops and stores. There is a small modern Hospital with a

European Matron in charge.

The cultivation of sea island cotton, once the principal industry of the Virgin Islands, has been abandoned in consequence of the low prices. A small quantity of sugar is made for local

consumption, also rum.

The percentage of trade with the United Kingdom and other parts of the British Empire and the principal Foreign countries is 15 %, 5 % and 80% respectively. Under the Customs Tariff the preferential rate charged on imports from Empire countries is in general two-thirds of the general rate.

A large area of land in the Virgin Islands is well adapted to coconut cultivation, and the existing trees are quite free from any serious insect

or fungoid pests.

The peasants own and cultivate most of the land in small plots for subsistence. They also raise cattle, and catch fish. They take their produce in small boats to St. Thomas, and this constant sailing among the reefs and currents which surround the Virgin Islands, makes them the finest seamen in the West Indies. They are a hardy, intelligent race, remarkably distinct from the inhabitants of the neighbouring islands. Their trade and intercourse is with the Virgin Islands of the U.S., and to a smaller extent with San Domingo and St. Martin.

The currency consists largely of foreign money, which circulates at the varying rates of exchange.

The climate is more healthy than that of the other West Indies, and the heat not so great. The average annual rainfall at Road Town is about 54 inches.

The birth and death rates per 1,000 in 1933 were

34.57 and 18.37 respectively.

Large quantities of fibrous plants (agaves and bromelias) grow wild everywhere in Tortola.

The mail communication is weekly by Government motor launch to St. Thomas. Mails are also despatched to St. Thomas nearly every day, letters for Europe being usually sent via Porto Rico and New York weekly.

MALAYA:

STRAITS SETTLEMENTS

Malaya comprises the Colony of the Straits Settlements, the Federated Malay States of Persk, Selangor, Negri Sembilan, Pahang, and the Unfederated States of Johore, Kedah, Kelantan, Trengganu and Perlis. Malaya is also regarded as including the State of Brunei, in the island of Borneo, of which the Governor of the Straits Settlements is High Commissioner and which like the Malay States in the Peninsula is in treaty relationship with Great Britain.

The Straits Settlements comprise Singapore, Penang, Malacca, and Labuan. The first three were transferred from the control of the Indian Government to that of the Secretary of State for the Colonies on the 1st April, 1867, by an Order in Council, issued under the authority of an Act of the Imperial Parliament (29 & 30 Vict. c. 115). Labuan, a separate Colony since 1848, was incorporated with the Straits Settlements as part of the Settlement of Singapore in 1907, and became a separate Settlement in 1912.

Situation and Area.

Singapore is an island of which the greatest length is about 26 miles by 14 wide, containing an area of 220 square miles, situated at the southern extremity of the Malay Peninsula, to which it is joined by a causeway across the Straits of Johore, which are about three-quarters of a mile in width. There are a number of small islands adjacent to it which are included in the Settlement, which now comprises also Christmas Island and the Coces Islands.

The seat of Government is the town of Singapore, at the southern point of the island, in lat. 1° 17' north,

and long. 103° 50' east.

Penang comprises the island of Penang and Province Welleslev. Penang island is about 15 miles long and 11 broad, containing an area of 110 square miles, situated off the west coast of the Malay Peninsula in 5° N. latitude, and at the northern extremity or entrance to the Straits of Malacca. On the opposite shore of the mainland, from which the island is separated by a strait about 2 miles broad, is Province Wellesley, a strip of territory forming part of the Settlement, averaging 8 miles in width, and extending 45 miles along the coast, including 10 miles of territory to the south of the Krian river (vide infra), the whole containing an area of 280 square miles.

The chief town is George Town, in 5° 24' north lat. and 100° 21' east long., on Penang island.

Malacca is situated on the western coast of the peninsula between Singapore and Penang, about 110 miles from the former and 240 miles from the latter, and consists of a strip of territory about 42 miles in length, and from 8 to 25 miles in breadth, containing an area of 640 square miles. The town, called Malacca, is in 2° 10′ north lat. and 102° 14′ east long.

The Cocos or Keeling Islands, which were declared a British possession in 1857, were placed by Letters

Patent of 13th October, 1878, under the control of the Governor of Cevion, and by Letters Patent dated the 1st of February, 1886, under the Governor of the Straits Settlements. In 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. The islands lie between lat. 11° 50′ to 12° 45′ S., long 96° 50′ E., 700 miles S.W. of Batavia. The largest is 5 miles by ½ mile. There are large coconut plantations, and copra, oil and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island, in the north-eastern part of the group. The population numbers (1931), 1,142.

Christmas Island, situated in the Indian Ocean, 190 miles S. of Java, lat. 10° 30' S., long. 105° 40' E., was annexed in June. 1888, and placed under the administration of the Governor of the Straits Settlements by Letters Patent of 8th Jan., 1889. In 1900 it was annexed to the Straits Settlements, and incorporated with the Settlement of Singapore. The island, which is densely wooded, has an area of about 60 square miles. In shape it is a rough parallelogram with deeply indented sides, its greatest length being about 11 miles, and its greatest breadth about 11 miles. The inhabitants, who number (1931) 1,059, are all, with the exception of the District Officer and his staff, employees of the Christmas Island Phosphate Company, which was formed in 1897 to work the extensive deposits of phosphate of lime, to which the island owes its importance. An account of Labuar will be found below, page 373.

The total area of the Colony with these dependencies

is about 1,531 square miles.

By Letters Patent issued at the end of 1906, provision was made for the incorporation of the Colony of Labuan in that of the Straits Settlements. The provision came into effect from the 1st of January, 1907, and in 1912 the island became a separate Settlement.

The Colony became associated with the administration of Brunes from about the same time. A Commission as High Commissioner for Brunei was issued in 1906 to the Governor of the Straits Settlements, and a subsequent Commission of the same year vested the post in the officer for the time being administering the government of the Straits Settlements. An account of Brunei will be found below, page 395.

History.

Malacca, said to have been founded by fugitives from the sack of Singapore, and known as an important independent State from early in the fifteenth century, is one of the oldest European settlements in the East, having been captured by the Portuguese under Albuquerque in 1511, and held by them till 1641, when the Dutch, after frequent attempts, succeeded in driving them out. The settlement remained in the possession of the Dutch till 1795, when it was taken by the English, who held it till 1818. It was then restored to Holland, but was again transferred to British rule as a consequence of the Treaty of London (17 March, 1824), being exchanged for the British settlements in Sumatra.

When Malacca was captured by the Portuguese in 1611. it was one of the grand entrepôts for the commerce of the East, but as the Portuguese pushed their operations further to the east, in the archipelago and neighbouring countries, the trade of Malacca gradually declined and it ceased to be of consequence as a collecting centre, except for the trade of the Malay Peninsula and the Island of Sumatra. This trade it retained under Dutch rule till the establishment of Penang in 1786. In a few years from that date its trade almost ceased, and it became a place of reduced commercial importance, but possessing

great agricultural resources. The trade of the Malay Peninsula and Sumatra passed to Penang, which also carried on a large traffic with China, Siam, Borneo, the Celebes, and other places in the archipelago not under Dutch control; but as soon as Singapore was established Penang in its turn had to yield the first place to Singapore, and came to depend chiefly on the local trade. Although at first unimportant Penang's trade has now assumed large proportions, owing to the development of the rich tin-mining areas and rubber-bearing lands of the Malay Peninsula. The trade of Malacca as an entrepôt port for central Malaya has recently revived.

Penang, or Prince of Wales' Island, was the first British settlement in the Malay Peninsula, having been ceded to the East India Company by the Raja of Kedah in 1786, with the proviso that the sum of \$6,000 (Straits) should be paid annually to the Raja of Kedah so long as the British occupied the island. In 1800, in consequence of the prevalence of piracy, a strip of the coast of the mainland, now called Province Wellesley, was acquired from the Raja, the annual payment being in return increased to \$10,000 (Straits). This acquisition has been sub-sequently enlarged from time to time, until it now extends from the Muda River to 10 miles south of the Krian River, a distance of 45 miles, containing in all 280 square miles. This province is in an advanced state of cultivation, the chief articles cultivated being sugar, paddy, coconuts, and rubber. In 1805 Penang was made a separate Presidency, of equal rank with Madras and Bombay. In 1826 Singapore and Malacca were incorporated with it under one government, Penang still remaining the seat of government. In 1836 the seat of government was transferred to Singapore.

The island of Pangkor and the Sembilan Islands were ceded to the British by Perak in 1826, with a view to the suppression of piracy, but no use was made of the cession at the time. In 1874 the cession of these islands was confirmed by the Treaty of Pangkor (to which reference is made in dealing with the relations of the Colony with the Malay States), by which a strip of territory in the mainland opposite also became British. The whole formed, under the name of the Dindings Territory, an outlying portion of the Settlement of Penang. By an agreement dated, at Singapore, the 6th June, 1934, the Dindings were retroceded to Perak in February, 1935.

The original city of Singapore is said to have been founded by immigrants from Sumatra. It rose into prominence in the fourteenth century. Its greatness came to a sudden end about 1377, when it was sacked and destroyed by the Javanese, and thenceforth the island was scarcely inhabited until Sir Stamford Raffles took possession of it in 1819 by virtue of a treaty with the Johore princes. The new settlement was at first subordinate to Bencoolen (Fort Marlborough) in Sumatra, but in 1823 it was placed under the Government of Bengal; in 1826 it was, as above stated, united with Penang and Malacca under the Governor and Council of the Incorporated Settlements.

Constitution, Law and Justice.

The Government consists of a Governor aided by an Executive and a Legislative Council. Executive Council consists of 6 official members. excluding the Governor who presides, such other official members as the Governor may nominate, at present 3 in number, and 3 unofficial members. The Legislative Council consists of 13 official members and 13 unofficial members, of whom 2 are nominated by the Chambers of Commerce of Singapore and Penang.

The law in force is contained in local Ordinances, and in such English and Indian Acts and Orders in Council as have been made applicable to the Colony. The Indian Penal Code, with slight alterations, has been adopted, and there is a Civil Procedure Code based on the English Judicature Acts, and a Criminal Procedure Code based on that in India.

There is a Supreme Court which holds assizes at Singapore and Penang every two months and quarterly at Malacca and civil sittings monthly at Singapore and Penang and once a quarter at Malacca. Ordinance 5/1931 provides for the institution of a Court of Criminal Appeal.

Climate.

'emperatures	varied	as follows:-

The extremes of temperature (Highest Maximum and Lowest Minimum) recorded were:—

Highest °F. Lowest °F.
Singapore .. 93 on several days 68 on March 12th
Penang .. 95 on May 26th 70 on several days
There are no well marked dry and wet seasons,

rain falling throughout the year.

Records for 64 years at Singapore show that the average annual rainfall is 95 inches. December is the wettest month with a little over 10 inches while February, May, June, July and September the dry months with between 6½ and 7 inches. Rain falls, on the average, on half the days in the year.

The wettest year recorded was 1913 with 135.92 inches and the driest 1888 with 63.21 inches.

Records of 50 years at Penang show an annual rainfall of 107½ inches, October being the wettest month with nearly 17 inches and February the driest with three inches. Rain falling on the average on about 165 days in the year.

The force of the monsoons is not much felt though the prevailing winds are generally in the direction of the monsoon blowing at the time viz.:—

S.W. from May to October. N.E. from November to April.

but at the coastal stations, the diurnal land and

sea breezes are often stronger than the prevailing monsoons.

The rainfall recorded was as follows :--No. of Rainfall days in 1931 1932 1933 1933 Singapore ... 100.67 77.49 82.52 200 109-11 Penang 103.97 97.37 174 . . 180 Malacca 107-19 71.60 95-91 **Province** 79.87 108.77 88.33 179 Wellesley 138.73 Labuan 155.58 121.93 169

Population.

The population of the Straits Settlements as estimated at mid-year 1933, from the formula, census 1931 + births - deaths + migrational surplus, was as follows:—

Singapore Island			514,500
Penang Island	••	• •	182,613
Malacca			180,892
Province Wellesle	y		135,287
Labuan	•••		7,405
Cocos Island	• •		1,142
Christmas Island	••		741
•	Total		1.022.580

Commerce.

The foreign trade of the Colony of the Straits Settlements is not separately distinguished, having since 1922 been merged in that of the Malayan Registration area which includes the Colony, the Federated Malay States, and the Unfederated Malay States of Johore, Kedah, Perlis, Kelantan, and Trengganu. This trade passes principally through the ports of Singapore and Penang in the Colony, and Port Swettenham in the F.M.S.

The principal agricultural products are rubber, coconuts, pineapples, palm oil, and rice. Tobacco

is a crop of growing importance.

The principal imports comprise foodstuffs, petroleum products, tin ore, rubber, clothing, and machinery; the chief exports, raw materials, particularly rubber, smelted tin, copra, palm oil, and tinned pineapples, with a few manufactured articles. There is an important transit trade in the ports of Singapore and Penang.

The ports of the Straits Settlements are free ports and are subject to no import or export duties. There are excise duties on liquors, tobacco, and petroleum, and a tax on first registration of motor vehicles not manufactured in the British Empire.

The following shew the total imports and exports for the six years up to 1933 and the values of some

of the principal articles in 1933.

Foreign Trade, Malaya, 1928-1933.

Shipping.

10,350

Singapore and George Town (Penang) are ports of registry; Singapore had on the 31st December, 1933, 819 steam, motor, and sailing vessels registered, of a total gross tornage of 134,700 tons.

The ports of Singapore and Penang are administered under Ordinance No. 125 (Merchant Shipping) by the Marine Department, and by Harbour Boards under Ordinance No. 130 (Ports) in each Settlement (Singapore and Penang) for the management of the wharves. Malacca is also a port at which ocean-steamers call. The number of merchant steamers of over 75 tons net register with cargo and in ballast, and the aggregate tonnage arriving at the ports in 1933 were :--

Port.		Nos.	Tons.
Singapore		6,428	14,224,585
Penang	• •	2,333	6,337,893
Malacca		567	784,935

The following table shows the comparison between British tonnage and the total tonnage of merchant steamers of over 75 tons net register with cargo and in ballast, arrived and departed at the ports of the Straits Settlements, Singapore, Penang, Malacca,

The values of some of the principal imports and | Labuan, and Christmas Island, for each of the years from 1929 to 1933 :-

SHIPPING ARRIVED AND DEPARTED. EXCLUSIVE OF NATIVE CRAFT.

		British	Total.
Year		Tonnage.	Tonnage.
1929	 	21,081,873	45,117,347
1930	 	21,334,366	46,262,734
1931	 	19,387,071	43,640,442
1932	 	18,919,617	43,353,043
1933	 	18.275.789	43.011.782

NOTE.—The definition of merchant steamers was altered, with effect from January, 1931, from vessels 75 tons net register and over, to vessels of over 75 tons net register. The figures for the years 1929-1930 have thus been altered on this basis, i.e., decreased by 770, so as to afford a more accurate comparison with those of 1931.

COMMUNICATIONS.

(i) Steamship Lines.

Over 50 lines of sea-going steamers touch at Singapore. The following table shows the main lines of communication :-

Line.	Service.
EUROPE. 1. Holt (Blue Funnel) 2. Peninsular and Oriental	Weekly. Fortnightly.
Steam Navigation Co. 3. Messageries Maritimes 4. Rotterdam Lloyd and Stoomvaart Maats- chappij "Nederland,"	Fortnightly. Fortnightly.
and Glen and Shire 5. Chargeurs Réunis, Japanese and other lines	Frequent intervals.
CHINA AND JAPAN. 1. Peninsular and Oriental Steam Navigation Co. Messageries Maritimes,	Fortnightly.

except that the rate of postage on a newspaper

(a) printed and published within the Straits Settlements, the Federated Malay States, or in any British Possession or Protected State in Malaya, or

(b) registered as a newspaper at the General Post Office, London, if posted in the Straits Settlements or Federated Malay States addressed to any place in the Straits Settlements, Federated Malay States, Johore, Kedah, Kelantan, Perlis, Trengganu, North Borneo. Sarawak or Brunei, is 2 cents. for any weight not exceeding 5 ounces, and 2 cents. for each additional 5 ounces or fraction thereof provided that no enclosure which is not part of the newspaper or a supplement thereto is enclosed with the newspaper. If two or more copies are sent in a single packet, each newspaper shall be liable to the same postage as if posted separately. But in no case shall a packet of such newspapers be chargeable with a higher rate than that chargeable on a packet of printed papers of the same weight.

The operations of the Money Order Branch amounted in 1933 to \$4,496,744, the principal business done being with India, the Federated Maisy States, the United Kingdom, The Netherlands Indies, Ceylon, and the United States of America.

Air Mail Services.

At present the Imperial Airways and the Royal Netherlands Airways provide between them a fast, regular and reliable twice-weekly air mail service, the former from Singapore to London and vice versa and the latter from Singapore—Amsterdam to London and vice versa. The aircraft of both London and vice versa. companies call at Alor Star (Kedah) en route. The time taken in transit between Singapore and London varies from 8 to 9 days.

(iii) Telegraphs and Telephones.

Telegraph Offices are maintained by the Eastern Extension Australasia & China Telegraph Co. Ltd. at Singapore and Penang and this company also owns and operates eleven submarine cables radiating from Singapore:—

5 to Penang, thence to Madras (2), Colombo (2), Deli Sumatra (1), 2 to Batavia of which one thence to Cocos, 1 to Banjoewangi (Java) thence to Port Darwin (2), 1 to Hong Kong, thence to Manila (1), North China (1), Macao (1), 1 to Cochin China, thence to Hong Kong (1) and 1 to Labuan, thence

to Hong Kong (1).

The Public Telegraph and Telephone Systems of the Straits Settlements are, apart from the telephone exchange systems on Singapore Island, provided, maintained and operated by the P. & T. Department. Excluding the Singapore Telephone System, these consisted on 31st December 1933 of 558 miles of overhead lines, carrying 3,970 miles of wire and 90 miles of underground and submarine cables with 8,791 miles of wire. There were at that date with 8,791 miles of wire. There were at that date 44 telegraph offces and 17 telephone exchanges, with 1525 telephones connected thereto.

The Postal Telegraph System connects the three Settlements of Singapors Penang and Malacca and is also interconnected with the corresponding systems in the Federated and Unfederated Malay States of the Peninsula, forming with these the Malayan Telegraph System. Flat rates per word are charged throughout this system.

A Telephone Trunk network, provided and maintained by the P. & T. Department inter-connects Singapore, Penang and Malacca and all telephone exchanges in the Federated and Unfederated Malay States except a few of the more remote exchanges.

The Telephone Exchange System of Singapore is owned and operated by the Oriental Telephone and Electric Company Ltd. under licence from the Straits Settlements Government.

(iv) Railways and Roads.

The Federated Malay States Railways system connects with the Royal State Railways of Siam, the distance between Singapore and Bangkok being 1,195 miles, the journey taking 50 hours. Sections connect the main line with ports on the West Coast. A line from Gemas in Negri Sembilan, through Pahang and Kelantan, connects with the Royal State Railways of Siam on the East Coast.

There are \$66 miles of roads which were maintained in good order at a cost of \$439,318 or \$507.3 per mile. The figures for 1932 were \$28.4 miles maintained at a cost of \$462,139 or \$558 per mile.

In addition to normal maintenance a sum of \$283,093 was spent on improvements and reconstruction work. The corresponding figure for last year being \$363,029.

The mileage of asphalted roads maintained is 558.6 which is made up as follows:—

Singapore			 129-15
Penang			 69· 4 6
Province V	Velles	ley	 144-04
Malacca		• • • • • • • • • • • • • • • • • • • •	 163-65

Education.

The control of all Government schools is vested in the Director of Education, Straits Settlements and Federated Malay States.

By an Ordinance passed in 1909, an Education Board has been established, consisting of official and unofficial members, under the chairmanship of the Director of Education. Provision has been made by the same Ordinance for the levying of an Education Rate, the expenditure of which is under the control of the Board.

Vernacular instruction is provided for Malays free of charge. Attendance at these schools is compulsory for Malay children. The Government assists Chinese vernacular education by grants-in-aid to such schools as apply for them and are satisfactorily conducted. Instruction in English for all nationalities is provided in Government or grant-in-aid schools, and fees are charged. All the schools established by Government are secular. Raffles College was opened in Singapore in 1929 for a higher education in English. There is a Reformatory in Singapore for juvenile offenders and vagrants in which technical instruction is provided.

The number of schools and scholars in 1933 was

The number of schools and scholars in 1933 was so follows:—

Currency and Banking.

The standard coin of the Colony, by an Order of the Queen in Council dated 2nd February, 1895, was the silver Mexican dollar, the British dollar

and the old Hong Kong dollar being also at that time legal tender.

A Committee to consider the currency question was appointed in England in 1902, and reported in favour of a change to the gold standard, if the local Government so desired. In accordance with the Committee's recommendations, a new Straits Settlements dollar was coined in India and introduced into the Colony and the adjoining Malay States. This coin was of the same weight and fineness as the British dollar. Under Order of the King in Council of 25th June, 1903, the Government declared this dollar to be the standard coin on 5th October, 1903. The Mexican and British dollars were demonstised from 1st September, 1904.

Under Order of the Governor in Council dated 29th January, 1906, the Currency Commissioners were empowered to issue notes in exchange for gold at the rate of \$60 for £7 sterling, thus fixing the sterling value of the dollar at 2s. 4d. In November, 1906, gold sovereigns were declared legal tender at this rate under an Order of the King in Council of the 22nd October, 1906. In view of the great rise in the value of silver, an Order of the King in Council of the Straits Settlements dollar and fifty cent piece was reduced in order to preserve the fixed ratio gold and by an order of the King in Council, dated the 17th day of May, 1920, the fineness of the Straits Settlements dollar and fifty cent piece was reduced.

Local silver and nickel coins representing fractional parts of the dollar are legal tender up to \$2 and copper coins are legal tender up to \$1. The half-dollar is unlimited legal tender. Under an Ordinance passed in 1917 currency notes of denominations 25 cents and ten cents were issued to the public owing to shortage of subsidiary silver. These notes were legal tender to the extent of \$2, and have since been withdrawn from circulation.

By the Currency Ordinance passed in 1923 the various funds controlled by the Currency Commissioners were amalgamated into one fund styled the Currency Guarantee Fund.

The following banks have establishments in the Colony: the Chartered Bank of India, Australia, and China; the Hong Kong and Shanghai Banking Corporation; the Mercantile Bank of India, Limited; the P. & O. Banking Corporation; Eastern Bank Limited; the Netherlands Trading Society; the National City Bank of New York; the Banque de l'Indo-Chine; the Netherlands India Commercial Bank; and Sze Hai Tong Banking and Insurance Company, Bank of Taiwan, The Yokohama Specie Bank, Oversea-Chinese Banking Corporation Limited, the China and Southern Bank, Lee Wah Bank, Thomas Cook & Son (Bankers) Limited and Kwong Lee Banking Company.

The first-mentioned Bank is allowed under its Charter to issue notes, but none have been issued since 1909. The amount of notes of local banks in circulation at the end of 1933 was \$136,045 only.

In addition to bank-notes a Government Currency Note issue was introduced in 1899. The amount of notes in circulation at the end of 1933 was \$66,964,286. These notes circulate freely within the Colony and the Malay States, and are largely used in North Borneo.

There is a Post Office Savings Bank at each Settlement.

Finance.

The following figures show the Revenue and Expenditure of the Straits Settlements, including transfers from the Currency Guarantee Fund and

to the Opium Revenue Replacement Fund, for the ten years up to 1933.

Year.		Revenue.	Expenditure.
1924		28,639,161	26,706,316
1925		53,850,960	57,593,959
1926		36,465,213	36,955,640
1927		37,602,081	39,253,272
1928		38,092,221	35,007,608
1929		54,888,291	35,711,997
1930		32,408,305	39,240,314
1931		26,601,528	46,802,558
1932	••	44,562,295	34,196,483
1933		31.585.190	30.476.291

Local Government.

There are Municipalities at Singapore, Penang and Malacca, administered by Boards of Commissioners, appointed by the Governor. Their revenue and expenditure in 1933 were as follows:—

1933.	1	Revenue.	Expenditure.
Singapore		11,767,419	11,378,179
Penang		3,805,863	3,806,684
Malacca		409.517	400,891

THE SETTLEMENT OF LABUAN.

The Island of Labuan is situated on the northwest coast of Borneo, in 5° 16' N. lat., and 115° 15' E. long. Its area is about 40 square miles. It is distant from the coast at the nearest point, about six miles; from Brunei, the capital of the Protected State of that name, about forty miles; and from Singapore 725 miles, or three days' steam.

• Consul de Carrière.

(d) The Italian Consul is in charge of the protection of Hungarian interests in Straits Settlements.

(e) The Italian Consul at Singapore is under the superintendence of the Italian Minister at Bangkok. (f) Consul-General for the whole Colony with jurisdiction extending to all States under British Protection in the Malay Peninsula and Borneo.

(g) Señor Don José Salas is the Peruvian Consul-General

at Hong Kong with jurisdiction in the Straits Settle-

ments.

(A) Señor Manuel Rivera Inglesias is the Peruvian Consul at Hong Kong with jurisdiction in Ceylon and the Straits Settlements.

(i) With jurisdiction over Straits Settlements, the Federated and Unfederated Malay States, Brunel and the State of North Borneo.

(a) Consul of Belgium at Penang with jurisdiction covering Penang, Province Wellesley, Dindings, and the States of Perlis, Kedah, Kelantan and Trengganu. † Consul for United States of America at Penang with jurisdiction covering the Malay States of Perak, Kedah, and Perlis.

Consul-General at Singapore with jurisdiction

Consul-deneral at Singapore with jurisdiction over the Straits Settlements, the Federated and Unfederated Malay States, Brunel, Sarawak and the State of North Borneo.

The Chinese Consul at Penang with jurisdiction over Province Wellesley, Dindings and Unfederated Malay States of Kedah and Perlis.

The average annual rainfall is about 130 inches. and the thermometer ranges from 71° to 93°.

An attempt was made by the East India Company's servants, who were expelled from Balambangan by Sulu pirates in 1775, to establish a trading station in Labuan, but the project was soon abandoned, and for practical purposes the history of the island begins with its cession to Great Britain in 1846 by the Sultan of Brunei. It was then uninhabited. The reason for the cession, given in the treaty by which the island was handed over to Great Britain, was that it was "desirable that British Ships shall have some port where they may careen and refit, and deposit such stores and merchandise as shall be necessary for the carrying on of the trade with the dominions of and the consideration given by Great Britain Brunei,' was an undertaking to suppress piracy and protect lawful trade.

The island was first occupied only as a naval station under the control of a naval officer, and the formal establishment of a Crown Colony was deferred until 1848. From that date until the end of 1889 Labuan was governed as a separate Colony. Until 1889 it was assisted by grants-in-aid from the Imperial Exchequer, but this help was then withdrawn, and the Colony supported itself, though with difficulty, for the next twenty years. In 1889, the financial troubles came to a head, and, as it was thought that the island could be more economically governed in connection with the territories of the British North Borneo Company, the administration was entrusted, from the 1st January, 1890, to the care of the Company, whose principal representative in Borneo was given a commission as Governor of Labuan. This arrangement was terminated at the end of 1905, when Sir J. Anderson, Governor of the Straits Settlements. was appointed also Governor of Labuan, the island still remaining a separate Colony. On the 1st of January, 1907, Labuan was annexed to the Straits Settlements, and declared part of the settlement of Singapore. On the 1st of December, 1912, the island was constituted a separate Settlement.

When the Colony of Labuan was first founded. great hopes of the success of the new settlement were based upon the existence of rich coal deposits in the island, but hitherto the companies formed to develop these coal resources have not met with great success. In 1893, the Central Borneo Company was re-constructed under the name of the New Central Borneo Company, who transferred their undertaking to the Labuan and Borneo Company. This Company, in its turn, was succeeded on the 8th December. 1902, by the Labuan Coalfields Company, Limited. The mines have been closed since the beginning of 1911.

Labuan has a fine port (Victoria Harbour), perfectly safe, and easy of access. Vessels drawing 15 feet can go alongside the various jetties.

Ships are supplied with water at \$1 per ton. Labuan is a market for much of the produce of the neighbouring coasts of Borneo and the Sulu Archipelago, such as sago, rice, sugar, cigarettes, para rubber, jelutong, copra, fresh vegetables, fresh fruits, cattle and pigs, which are forwarded by the Labuan traders to Singapore. Cattle and goats are reared, and over 10,000 acres are estimated to be under

There is a branch of the Government Post Office Savings Bank in Labuan. Harrisons and Crosfield (Borneo) Ltd. are the local Sub-Agents of the Hong Kong and Shanghai Banking Corporation. currency is that of the Straits Settlements.

The inhabitants are chiefly Malays and other natives from Brunei and the mainland of Borneo, and Chinese, the latter being mostly petty traders.

There are four Government schools, viz:—The Government English School, the Vernacular School for boys, the Vernacular School for Girls in Victoria, and the Vernacular School in Bukit Kallam. In addition there are six private schools, viz.:—St. Anne's School (Roman Catholic Mission), Mrs. Fell's Private School, Chung Hwa School, Chi Win School, Phin Min School, and Chung Hwa Girls' School.

A reservoir owned by the Government supplies the town of Victoria and shipping with drinking

water.

The Eastern Extension, Australasian and China Telegraph Company has a station on the island connected by cable with Singapore, Hong Kong, and North Borneo. The nearest point in telegraphic communication with Europe is Singapore.

The Brunei Government maintains a Wireless Station which communicates with the Stations erected in the neighbouring countries of Brunei,

Sarawak, and North Borneo.

A weekly service of steamers plying between Singapore, North Borneo Ports, and the Philippines provides Labuan with regular communication with these places; there are, in addition, local coasting steamers.

A rifle range affords facilities for H.M. Ships exercising their crews.

The chief sources of revenue are harbour dues, land rents and licences.

The public revenue and expenditure for the last three years were respectively:—

	Kevenue.	Expenditure.
1931	 \$100,435.00	\$145,457.00
1932	 \$ 95,420.00	\$142,831.00

CHRISTMAS ISLAND.

Christmas Island with an area of 60 sq. miles lies in the Indian Ocean, latitude 10° 30' and longitude 105° 40' E. 233 miles S. 8 E. of Java Head, and 529 miles N. 79 E. from the Cocos Island. It is densely wooded and of irregular shape, about 121 miles long (at the longest point) and about 41 miles wide (at the narrowest point). The climate is healthy with average maximum and minimum temperatures 84° F. and 75° F. There is a prevalent E.S.E. trade wind. The Island has been known to navigators since about the middle of the 17th century. It was formally annexed on the 6th June, 1889. In 1900 it was placed under the administration of the Governor of the Straits Settlements and incorporated with the settlement of Singapore. The Island is administered by a District Officer, who is a member of the Malayan There is a small force of Sikh Civil Service. Police drafted from the S.S. police force. All the inhabitants (mainly Chinese and Malays), with the exception of the District Officer and his staff, are employed by the Christmas Island Phosphate Company, Ltd., registered in London, which works the large natural deposits of phosphate of lime to

which the Island owes its importance. In 1923 a wireless station was installed, and the Island is now in direct communication with Singapore. A school was established in 1931, and a teacher supplied Government. Population 1933, 31st Decems 872 (makes 720, adult females 81, children Expenditure 1933, \$25,323.07 (including sala of D.O. and Sikh Police Force \$19,825.66). Impt in 1933, chiefly machinery and engineering states \$32,986.67. Exports consisted solely of phospha, of lime. Tonnage entered and cleared in 1896,474 tons, and in 1933, 86,477. Of the late 7,409 were for British ports, and 79,068 were 1,322

MALAYA:

FEDERATED MALAY STATES.,

The Federated Malay States comprise four States, Perak, Selangor, Negri Sembilan, and Pahang.

Perak.

B

Perak is ruled by a dynasty that claims descent from the last Malay Sultan of Malacca. In the 17th century it was overrun by the Achenese, and at some time after 1636 a Johore prince, the husband of a Perak princess, was sent by Acheh to rule it under the title of Sultan Mudzaffar Shah. From 1659 onwards, the Dutch endeavoured to get a monopoly of the tin exported from Perak, establishing near the mouth of the Perak river several factories, which the Malays, from time to time, cut off and destroyed. In 1765 the Sultan made a treaty with the Dutch.

British influence began early in the 19th century. A treaty with Penang in 1818 secured to British subjects the right to free trade in Perak. In 1825 a British arbitrator settled the boundary between Perak and Selangor. By the Burney Treaty with Siam, in 1826, the independence of Perak and Selangor was recognised, though the Sultan of Perak was permitted to send tribute to Siam if he desired. In the same year the Sultan ceded to the British the Dindings and the island of Pangkor as poets for the suppression of piracy, and agreed to rely solely on the protection of Great Britain. From 1872 to 1874 there was almost continous fighting of more or less severity between rival factions of Chinese in the Larut district where valuable tin deposits had been found.

Having regard to the anarchy which prevailed, Sir Andrew Clarke, in 1874, induced the Perak chiefs, to sign the Pangkor Treaty (20th January, 1874), and to accept thereby a Resident whose advice should be "asked and acted upon on all questions other than those touching Malay religion and customs." The murder of the first British Resident (Mr. J. W. Birch in 1875 led to a military expedition and the banishment of the Sultan and some chiefs implicated in the affair. The country soon settled; and the Malay constitution was restored under a Sultan protected by the British Government.

Selangor.

In the 14th century, Klang, which is now a district of Selangor, is said to have been subject to the Javanese Empire of Majapahit. In the next century it was given to a Penghulu of the family of the Bendsharas of old Malacca, and a son of Sultan Mansur Shah (1458–1477 a.D.) of Malacca was maderuler of Jeram, near Langat. During the period of Portuguese ascendency, little is known of the Selangor

coast. The Dutch opened factories for the purchase of tin at Kuala Selangor and at Kuala Linggi. In 1718 Daeng Chelak, a Bugis chief, who had married a Johore princess, settled at Kuala Selangor, and about 1780 their descendant was recognised as Sultan Salehu'ddin by the Sultan of Perak. The throne has remained in the same family ever since. In 1783, the Dutch blockaded Kuala Selangor and forced the Sultan to acknowledge the suzerainty of Holland.

In 1818 the Sultan of Selangor made a commercial treaty with the East India Company at Penang. In 1874 anarchy prevailed amongst the Malay chiefs of Selangor, and pirates ravaged the coastal trade. The Sultan's difficulties were such that he was glad to accept a British Resident and to come under the

protection of Great Britian.

Negri Sembilan.

This federation of "Nine States" consists of the four major States of Sungei Ujong, Jelebu, Johol, and Rembau, and the five minor States of Ulu Muar, Jempul, Terachi, Gunong Pasir, and Inas. Sungai Ujong is mentioned in a Javanese poem in 1365 as being subject to the Javanese Empire of Majapahit. In the 15th century it was ruled by Chiefs of the old kingdom of Malacca. Nearly all the Malay inhabitants of the "Nine States" are descended from immigrants from Menangkabau in Sumatra. Portuguese accounts prove that this immigration had begun in the 16th century. The original Malay federation consisted of Sungei Ujong, Klang (now a district of Selangor), Jelebu, Rembau, Naning (now part of Malacca), Segamat (now in Johore), Pasir Besar (also in Johore, its place having been taken by Johol), Jelai (now Inas), and Ulu Pahang, the region between the Ulu Serting and Temerloh. After the wresting of Malacca from the Portuguese by the Dutch and the Johore Malays in 1641, Johore took a leading part in Negri Sembilan politics until 1773, when the chiefs of the four major States brought from Sumatra a Yam Tuan named Raja Melewar, ancestor of the present Yang di-pertuan Besar.

In 1874, the Dato' Klana, Chief of Sungei Ujong, the most important of the "Nine States," invited and obtained the assistance of the British Government to maintain his rule and the appointment of a British Resident. In 1883, Jelebu applied for a British Officer; and Rembau agreed to refer all its disputes to the British Government, and in 1887 accepted a British adviser. In 1889, the Yam Tuan of Sri Menanti and the Rulers of Tampin and Rembau asked for a Resident, and agreed to a confederation known as "the Old Negri Sembilan." In 1895, the Resident of this confederation took charge of Sungei Ujong and of Jelebu, and the modern Negri Sembilan was constituted. Finally, in 1898, the Yam Tuan of Sri Menanti was elected titular Ruler of the whole

State.

Pahang.

Chao Ju Kua, a Chinese, writing about 1225, mentions Pahang as being subject to the old Sumatran Buddhist Kingdom of Sri Vijaya. Later, Pahang and Tioman are claimed as conquests of Majapahit. In the 15th century, Sultan Mansur Shah of Malacca captured the Ruler of Pahang, and married his daughter. Before the Malacca royal house died out, in 1699, its Pahang branch provided several Rulers for the senior throne of Johore, which directly represented the Malacca dynasty. Later, Pahang fell under the suzerainty of the new Sultans of Johore, who, when they removed to Lingga, left a Dato' Bendahara in charge of Pahang.

In 1887 Sir Frederick Weld negotiated a treaty

In 1887 Sir Frederick Weld negotiated a treaty with the Bendahara of Pahang, promising British help in the event of external attack, and arranging for a British agent to be stationed at his capital.

At the same time, the title of Sultan was substituted for that of Dato' Bendshara. In 1888, the Sultan applied for and obtained British protection, and the appointment of a Resident.

Constitution of the States.

The supreme authority in each State is vested in the Sultan, or the Ruler, in State Council. His Highness the Sultan or Ruler presides over the State Council. In 1932, the State Councils were reconstituted on the wider basis. In each of the four States they now include besides the British Resident, Malay chiefs and officials of the State, a number of unofficial members representative of Malay, European, Chinese, and Indian interests.

In Perak and Negri Sembilan there are second chambers which are concerned principally with matters of Malay customs and religion.

The Federation.

In 1895 a treaty was signed by the rulers of the four States, by which they agreed to constitute their countries into a Federation (to be known as the Federated Malay States), to be administered under the advice of the British Government, while all existing treaties and arrangements were to stand. The States agreed to the appointment of an officer. to be styled Resident-General of the Malay States* as the agent and representative of the British Government under the Governor of the Straits Settlements. They agreed to follow the Resident-General's advice in all matters of administration other than those touching Islam. Subject to the authority created by the appointment of the Resident-General, the system of administration under the advice of British Residents remained unchanged.

The States undertook to give each other material assistance in men and money, the wealthier States assisting those in want of help, and all moneys so advanced being considered as loans; and also undertook to raise and equip a force of Indian troops for service throughout the States, and to supply a portion of these troops on requisition for the defence of the Colony of the Straits Settlements, should Great Britain be at war with any foreign Power.

It was also provided by the Treaty of 1895 that the rulers of the Federated States should meet periodically in one of the States, under the presidency of the High Commissioner, to discuss affairs of mutual interest. The first of these meetings was held at Kuala Kangsar, Pérak, in July, 1897, and was attended by the High Commissioner, the rulers of all the four States, with their most important chiefs, the Resident-General, and all the British Residents. At this meeting many important matters were discussed and arrangements made to deal with them in the councils of the various States.

In 1909, a Federal Council was created by an agreement between the High Commissioner and the four native rulers. The object in view, as stated in the preamble to the agreement, was to provide means "for the joint arrangement of all matters of common interest to the Federation or affecting more than one State and for the proper enactment of all laws intended to have force throughout the Federation or in more than one State." Under an Agreement concluded in 1927 the Federal Council was reconstituted with the High Commissioner as President, twelve official, and eleven unofficial members to be nominated by the High Commissioner with the approval of the King. At least four of the unofficial members are, if possible, to be Malays.

Since the reconstitution of the council in 1927, the number of members has been increased by the

[•] The title of this post was later altered to Chief Secretary to Government.

addition of three officials and one unofficial. The Federal Council generally meets three times a year and considers the drafts of laws, which are to apply to more than one State, but such legislation is enacted by the Rulers of the Federated Malay States by and with the advice and consent of the Federal Council. It still retains the supreme financial control within the Federation, but each State Council now appropriates in a State Supply Enactment the expenditure in respect of purely State services up to a definite sum allocated to the State beforehand by resolution of the Federal Council. The first meeting of the Council was opened on the 11th of December, 1909, at Kuala Kangsar.

Climate.

The temperature of the West Coast of the Malay Peninsula has but a small annual range. East Coast, however, the North-East Monsoon, lasting from November until March, causes a distinct contrast with the rest of the year with regard to temperature, wind and rainfall. At Jelebu, in Negri Sembilan, the driest station where records have been kept, the average rainfall for 1891-1933 was 65 inches, but in the mountains the average yearly rainfall is very high, being nearly 250 inches near Taiping. The heat is at times oppressive, but the nights generally are cool. On some of the higher mountains (5,000 feet) the night temperature has been known to fall to 42°F. In the day time there is almost always a breeze to modify the heat. The Peninsula lies within the region of the South-West and North-East Monsoons, but the only really strong regular wind is the North-East Monsoon, which strikes the East Coast from the China Sea. Violent squalls, known as "Sumatras," are not infrequent on the West Coast of the Peninsula between April and October. Generally they are of short duration and occur during the night.

Population.

The result of the census taken in 1931, show that the population of the Federated Malay States has increased during the decade from 1,324,890 to 1,713,096 or by 29.3%.

The population as estimated at mid-year 1933, from the formula, census 1931 + births-deaths + migrational surplus, was as follows:—

					Estimated
				Census	Mid-year
				1931.	1933.
Malays of I	3ritis	h Malaya		443,618	
	ples				615,651
	•	Archipel	ago	150,113	
Chinese			٠.	711,540	644,120
Indians		• •		3 79,996	310,752
Europeans				6,350	5,988
Eurasians				4,251	4,393
Others	• •	••	••	17,228	16,566
		Total		1,713,096	1,597,770

The decrease in the population was due to the large excess of emigration of Chinese, Indian, and Javanese labourers owing to repatriation as a result of the general depression of trade, especially rubber and tin.

Railways.

The Federated Malay States Government owns the railways both in the Federated Malay States and the Colony of the Straits Settlements (Singapore Island, Malacea, and Province Wellesley) and also in the Unfederated States of Kedah, Perlis, and Kelantan. It has leased the Johore State Railway (121 miles), extending from Johore Bahru at the Southern extremity of the Peninsula and opposite Singapore, to Gemas on the boundary between Johore and the Federated Malay States. At Gemas

the line branches into the West Coast and the East Coast Lines; the West Coast Line runs North-North-West through Negri Sembilan, Malacca, Selangor, Perak, and Province Wellesley to Praithe port opposite Penang Harbour—488 miles from Singapore. From Bukit Mertajam near Prai, the line proceeds northwards through Province Wellesley and the Unfederated States of Kedah and Peris, to the Siamese frontier station of Padang Besar, 580 miles from Singapore. Through traffic with the Royal State Railways of Siam was opened on July 1st, 1918, the distance between Singapore and Bangkok being 1,195 miles. Through services are in operation between Penang and Bangkok, the journey occupying 26 hours.

The East Coast Line proceeds northward from Gemas through Negri Sembilan, Pahang and Kelantan to Tumpat on the North-East Coast of the Unfederated State of Kelantan, 328 miles from Gemas. At 141 miles the line passes through Kuala Lipis, the Capital of Pahang and at 1872 miles crosses the Pahang-Kelantan Border. Guillemard Bridge across the Kelantan River at 292 miles is the largest bridge in Malaya. It is 2,166 feet long and consists of 5 spans of 250 feet and 5 spans of 150 feet. The East Coast Line provides an alternative route to

iam.

An extension from Pasir Mas in Kelantan runs in a westerly direction for 11½ miles to the Golok River at the Siamese Boundary, where it joins with the Siamese line running to Haad Yai Junction, where connection is made with the main Bangkok-Penang line

Through working between the Federated Malay States and Kelantan via the Royal State Railways of Siam commenced in 1921, and via the East Coast

Railway in 1931.

Branch lines connect the main line with the ports on the West Coast at Malacca, Port Dickson, Port Swettenham, Teluk Anson Wharf and Port Weld.

A causeway carrying two lines of rails and a roadway has been built across the Johore Strait, connections the Johore Strait Connections the Jo

ing the Island of Singapore with the Peninsula.

The total length of line now open to traffic under the Federated Malay States Railway Administration

is 1.067 miles.

The line is of metre gauge. On the mail trains on the West Coast main line there are sleeping saloons and restaurant or Buffet cars, and on the East Coast Line sleeping saloons run from Tumpat to Singapore and rice versa on the Through Weekly Express, an observation coach being attached to the rear of the trains between Tumpat and Gemas.

The expenditure on the capital account (including lines not open for traffic), was \$233,399,876 up to 31st December, 1933, which, with the exception of \$49,720,045 contributed from Loan Funds, has been met from the general revenues of the Federated Malay States.

In addition \$2,032,801 has been expended on Capital Improvements from the Railway Renewals Fund.

Roads.

The mileage of metalled roads maintained by the Public Works Department is 2,845, of which approximately 1,862 miles or 65-8 per cent. have been bituminously treated, and is made up as follows:—

Perak				966	miles.
Selangor				921	
Negri Sem	bilan			513	••
Pahang, is	cluding	Cam	eron		••
Highlan			••	445	**

Total . 2,845 ,,

Digitized by Google

These roads connect up every township of importance throughout the whole of the Federated Malay States.

The total expenditure on the maintenance of metalled roads in 1933 amounted to \$1,607,512 and the average cost of upkeep per mile was \$565 compared with \$577 in 1932.

In addition to metalled roads 150 miles of unmetalled roads and 1.535 miles of bridal paths were

maintained.

Posts, Savings Bank, Telegraphs and Telephones.

A well organised system of Posts extends throughout the Federated Malay States by rail, motor car, cycle, runner, sea, and river. All towns and villages of any size have their regular deliveries and collections of mail matter and these facilities are being extended se circumstances require. The external mail services are frequent to all other ports of the world through Port Swettenham and through the Straits Settlements ports of Singapore and Penang. The postal services include Parcel Post, Cash on Delivery (or Value Payable Post), Insurance, Money Orders, British Postal Orders; all these services extend to a great many different countries. They are operated at 98 Post Offices by officers of the Posts and Telegraphs Department and at 69 other places by station-masters and others. Savings business is transacted at all Post Offices at all hours at which they are open, the Bank being controlled by the Department. The interest payable on deposits is 3 per cent. per annum.

The Public Telegraph and Telephone System of the Federated Malay States is provided and maintained by the P. & T. Department and consisted at 31st December, 1933, of 2,918 miles of overhead lines carrying 26,811 miles of wire. In addition, there were 176 miles of underground cables with 15,751 miles of wire. This included 121 miles of overhead line through Johore, connecting the F.M.S. and

Singapore.

The Postal Telegraph System extends throughout the Federated Malay States and is interconnected with the Railway Telegraph System; Railway Telegraph Offices being available for public telegrams where no Postal Telegraph Office exists. At the smaller offices telegrams are transmitted by telephone. Telegraph Lines connect the more important offices to one another, to Singapore, Penang and Malacca in the Straits Settlements, and to various offices in Johore, Kedah, Kelantan and Trengganu; the whole forming the Malayan Telegraph System. There are flat rates for telegrams throughout this ystem. International telegraphic communication is through Singapore and Penang.

The Telephone system extends throughout the Federated Malay States. There are at present 72 public exchanges, maintaining a continuous night and day service and 32 other places at which Call Offices are maintained, giving a service restricted to the hours during which the local Post Office is open for the transaction of public business. Of the Post Offices in the Federated Malay States, 104, therefore, are provided with public telephone facilities. Public Call Office facilities are also available at a number of Railway Stations. At most of the remaining places, calls, including trunk calls, can in case of emergency be made from the local Police Stations.

All the exchanges are connected by means of trunk lines and trunk communication (which may also be obtained from Call Offices) is possible between all exchanges. In case of emergency, trunk calls may be made from the local Police Stations when the Call Offices are closed.

The Federated Malay States telephone system is connected to the telephone system in Singapore, Malacca, Johore, Penang, Province Wellesley, and Kedah.

Trade and Customs.

The trade of the Federated Malay States is principally an export trade in raw materials and produce agricultural, forest, marine and mineral in exchange for imports of food, tobacco, fuel oils, clothing and machinery. The export trade was principally with the Colony of the Straits Settlements, the United States of America, and the United Kingdom, while the import trade was principally with the Colony of the Straits Settlements, the United Kingdom, British India and Burma, Netherlands India, and Siam.

In 1933 the aggregate value of trade was \$179 million, an increase of 13 per cent. as compared

with the previous year.

The four Federated Malay States form a single customs unit. The tariff list covers a wide range of dutiable articles and makes provision for a preferential rate of duty on certain goods produced or manufactured in the British Empire. The principal articles subject to duty are as follows:principal articles subject to duty are as lolows:—
Imports:—Tobacco, liquors, petroleum, sugar,
matches, edible oils and fats, cement, cosmetics
and perfumery, textiles and wearing apparel,
leather, cycles, tyres, milk, jam and preserved
fruits, coffee, tea, rice, linoleum, brassware, printing
paper and electric batteries. Exports:—Tin and tin-ore, tungsten and other metalliferous ores, and gold.

Rubber is subject to a cess of 1 cent per lb. upon

export.

Details of the tariff can be obtained in London at the Malayan Information Agency, Malaya House, Charing Cross, S.W.1.

STATISTICS. (a) Revenue and Expenditure of the Federation. The total annual Revenue and Expenditure during the last ten years have been as follows:-

			Revenue.	Expenditure.
1924			\$70,715,407	\$54,161,2 34
1925			86,564,279	69,550,382
1926			102,541,400	87,663,747

Perak.

His Highness Paduka Sri Sultan Iskandar Shah, G.C.M.G., K.C.V.O., ibni al-Marhum al-Sultan Idric.

Perak is the most northerly of the Federated States on the west coast, touching Province Wellesley on the north and Selangor on the south and having an area of 7,800 square miles. About 1850 the discovery of tin in Larut was followed by the immigration of Chinese in great numbers. Since the appointment of a British Resident in 1874, the record of the State has been one of remarkable progress.

The State is well watered, the Perak (with its tributaries, the Singor, the Temengor, the Rui, the Plus, the Kinta, Batang Padang, Bidor and Sungkai), being the most important rivers. Other rivers of importance are the Krian, the Kurau, and the Bernam (with its tributary, the Slim). The mountains on the east boundary which are part of the main range of the Peninsula, rise to a height of over 7,000 feet.

Sanatoria have been established on the Larut Hills and on Gunong Kledang, at heights varying from 3,300 to 4,500 feet. Experimental gardens with English flowers and vegetables are to be found on the Larut Hills.

The chief exports are tin and rubber. Coconuts and rice are extensively grown. In the Krian district the Government has completed an extensive scheme for the irrigation of more than 74,102 acres of land, the larger proportion of which is already under cultivation for rice. A similar scheme is in course of development in the Sungei Manik area in Lower Perak District.

Larut, Kinta, Batang Padang, and Klian Intan are the chief mining districts. The district of Batang Padang lies between the Kinta Valley and the Selangor boundary, and contains a little gold and wolfram mixed with its tin.

The total mileage of completed roads in Perak is (a) 966 of metalled and (b) 69 of unmetalled cart roads, 950 miles of bridle and other paths.

The British Resident has residencies at Taiping, the Headquarters of Government, and at Ipoh, the chief commercial centre. The chief towns are Ipoh, Taiping, Kuala Kangsar, Kampar, and Tapah. The chief port is Teluk Anson.

Since the Anglo-Siamese treaty of 1909 the territory claimed by Perak for many years, and held by Patani since 1826, has been formally ceded to Perak, and the State now includes the whole watershed of the river that gives it its name. The new territory which was taken over in 1909 and incorporated in the Upper Perak District, exceeds 1,000 square miles of area. It extends from Kedah on the West to Legeh on the East, and contains the tin mines of Klian Intan and much good stanniferous country. This territory is well watered, and the rolling plains of the Kroh plateau, 1,000 feet above the sea, afford a healthy Government station. At Tasek on the Kedah border there is a small natural lake. At the time when the territory was taken over the population was about 3,000 of various nationalities.

Selangor.

His Highness Ala'idin Suleiman Shah, G.C.M.G., ibni Al-Merhum Raja Muda Musa, Sultan, Selangor, situated on the Western side of the Peninsula, is bounded on the North by Perak, on the East and South-east by Pahang and Negri Sembilat, and on the West by the Straits of Malacca, and has an area of 3,150 square miles.

Its coast line extends for about 125 miles. Where the State touches the central range of the Peninsua there are several peaks of over 5,000 feet and one of 5,812 feet.

The state is drained by four rivers: The Bernam forming the boundary between Perak and Selangor; the Selangor, the Klang and the Langat. The natives are said to be the descendants of a Colony from the Celebes.

For administrative purposes the State is divided into six districts, viz., Kuala Lumpur and Uiu Langat, Klang, Ulu Selangor, Kuala Langat and Kuala Selangor, each under a District Officer.

The capital of the State is Kuala Lumpur, which is also the headquarters of the administration of the Federated Malay States. It is the largest town on the mainland of the Peninsula, with a population of 120,300 (1933 mid-year). It has a water supply from an impounding reservoir 7 miles distant, and is also lighted by electricity. There are 140 miles of town streets. It also possesses a picturesque public garden covering about 180 acres, and several imposing Government buildings, the principal being the Government offices of modern Saracenio design, with a clock tower 130 feet high, town hall, museum, courts, prison, railway station and offices, and post office. There are also branches of the Chartered Bank of India, Australia and China; the Hong Kong and Shanghai Banking Corporation; and the Mercantie Bank of India. The currency is the Straits Settlements dollar, with a fixed exchange at two shillings and fourpence.

There were 422 Schools in the State in 1933, including 48 English Schools, 88 Malay Schools, 157 Tamil Schools and 129 Chinese Schools.

Port Swettenham, situated at the mouth of the Klang River, and 27 miles by rail from Kuala Lumpur, is the chief port, and is regularly visited by oceangoing steamers. The aggregate tonnage of vessels, exclusive of native craft, which called at the port in 1933 was 5,358,614.

The total revenue of the State in 1933 was \$18,629,302, and the expenditure \$18,596.824. There is no public debt except such as is included in the public debt of the Federation.

The principal sources of revenue are customs, excise, and Land Import duties are charged on spirituous liquors, wines, beers, petroleum, tobacco, matches and alum. In 1933 the gross total value of imports was \$35,482,423 and the exports \$41,390,591.

The chief industry of the State is tin mining, the amount of tin exported in 1933 was 158,733 pikula valued at \$11,351,415. The area alienated for mining is 49,839 acres. The area under coffee has increased from 6,026 acres in 1932 to 6,600 acres. Although coffee prices have been low, far more interest was taken in this crop during the year. In 1933 there were 111,900 acres under coconuts. Rice, gambier, pepper and other products are grown with success. The rubber industry which has made great progress has met with a set back owing to the recent severe fall in the price of rubber. At the end of 1933 the area under rubber cultivation was 503,000 acres. The value of cultivated rubber exported during 1933 was \$22,827,666.

The length of roads upkept in 1933 was 917 miles as against 921 miles in 1932. The total number of miles remetalled during the year 1933 was 35. 39 miles of road were treated with bituminous materials. The average cost of maintenance of metalled and gravelled roads was \$595 per mile.

Negri Sembilan (The Nine States).

His Highness Tuanku Abdulrahman, K.C.M.G. ibni al-Marhum Tuanku Muhammad, Yang Di-pertuan Besar.

The Federation of States known as Negri Sembilan lies on the Western side of the Peninsula and is bounded on the North-west by Selangor, on the North-east by Pahang, on the East by Johore, on the South by Malacca, and on the South-west by the

The headquarters of the Resident are at Seremban in Sungei Ujong, where the principal Government offices are situated. District Officers are stationed at Port Dickson, at Kuala Klawang in Jelebu, at Ulu Muar in Kuala Pilah, at Tampin, and at Seremban.

The value of imports amounted to \$5,835,737 in 1933 and that of exports to \$13,539,557. The revenue of the State, which in 1933 amounted to \$6,418,625, is derived mainly from tin mining and

agriculture.

At the end of 1933, 8,497 acres of land were in occupation for mining, and 538,352 acres for building and agriculture. The alluvial tin fields are worked and owned by Chinese, whilst the hydraulic and other workings requiring the installation of expensive machinerv are supervised and financed by Europeans. Gold reefs exist in Gemencheh and on the Muar River, but have not up to the present proved remunerative. The Malay population is almost entirely agricultural. By far the larger portion of this population inhabits the Kuala Pilah and Tampin districts, where there are extensive and fertile rice fields.

A great part of the State is mountainous, the rest consisting of undulating country suitable for agriculture. The whole State is well watered, the chief rivers being the Muar and the Linggi, the latter of which forms, for some distance, the boundary between the State and the Settlement of Malacca.

Much valuable timber is found in the forests of the State, and the areas of reserved forests are being considerably extended with a view to its

preservation.

The chief agricultural products are rubber, rice, and ecconuts. During 1933 the areas under cultivation with these products were approximately as follows:—

Rubber				356,358 acres
Rice				34,390 ,,
Coconuts				5,966 ,,
Other cultive	tion c	overed	:	
Oil palm				1,199 .,
Fruit trees				6.356 ,,

Educational facilities comprise 80 Malay Vernacular Schools, 7 English Schools, and 34 Tamil Schools.

The State is provided with a good system of roads, connecting the centres of each district with head-quarters and each other. The total mileage is 533 miles of metalled roads, of which 363 miles were bituminously treated.

Pahang.

His Highness al-Sultan Abu Bakar Ri'ayatu'd-Din Mu'adzdzam Shah, C.M.G., ibni al-Marhum al-Mu'tasim Bi'llah al-Sultan Abdu'llah, Sultan.

Pahang occupies a large portion of that part of the Malay Peninsula which lies on the eastern side of the central mountain range. It is bounded on the North by the States of Kelantan and Trengganu, on the South by the territory of Johore, on the West and South-west by Perak, Selangor, and Negri Sembilan, and on the East by the China Sea. It is the largest of the States of the Federation, with an area of 14,000 square miles. Several peaks of the main range of mountains forming the western boundary exceed 6,000 feet, the highest being Gunong Kerbau, which is 7,160 feet. Gunong Tahan, in the centre of the Pahang-Kelantan boundary, has been found to be 7,186 feet high, and is therefore the highest elevation in the Federated Malay States, and probably in the Malay Peninsula.

The State is drained by one of the largest rivers in the Peninsula, if not the largest, the Pahang River, which is fed by the Lipis, Jelai, Tembeling, Semantan, Triang, Bera, Luit, Lepar and other rivers. To the north the Kuantan and to the south the Rompin and Endau also debouch into the China Sea, the last named forming part of the boundary between Pahang and Johore.

The total length of the Pahang River is about 285 miles, of which 232 are navigable for houseboats and other small craft. The bars at the mouth of all rivers, with the exception of the Kuantan, prevent the ingress of vessels except those of very shallow draft.

The chief industry of the State, after agriculture, is tin mining, the principal mines being in the Bentong, Raub and Kuantan districts. Gold has been worked for many years by the Raub Australian Gold Mining Company. Limited. Gold-bearing lodes have also been worked by Europeans at Penjum, Selensing, Kechau, and other places in the State; the mines have been closed for some years. From the reports of old travellers it is clear that in the eighteenth and previous centuries very large quantities of alluvial gold were exported from Pahang. The European mines mentioned above were all on the sites of extensive native workings.

The administrative headquarters of the State are at Kuala Lipis, 209 miles up stream from the mouth of the Pahang River.

The Sultan, however, resides at Pekan, the old capital which is near the mouth of the Pahang River.

The East Coast Line of the Federated Malay States Railways runs through Pahang and is now open for traffic as far as Tumpat, Kelantan.

There is a motor car service both ways from Kuala Lumpur to Kuala Lipis, 119 miles; also from Jerantut Station on the Railway to Kuantan, a distance of 109 miles.

The total mileage of metalled roads in Pahang is 447 miles. A road from Batu Talam to Kuala Medang has been completed up to the 22nd mile post and it is hoped to link this road with Kuala Linis, when funds are made available.

Lipis, when funds are made available.

The total revenue of the State during 1933 amounted to \$3,881,559 and the expenditure to

\$4,741,621.

There are 5 Government English Schools, 2 private English Schools, 80 Malay Boys' Schools, 5 Malay Girls' Schools, 7 Tamil Schools, 24 Chinese Schools, and 1 Javanese School in the State.

Technical Adviser on Piece Goods, A. Boyd, \$600 to 700 p.m.

Central Trade Registry. Assistant Registrar of Imports and Exports, R. Matthews, \$500 to 650 p.m.

Laboratory.

Chemist, H. Marsden, \$400 to 800 p.m. Excise.

Distillery Officer (vacant), \$300 p.m.

MALAY STATES NOT INCLUDED IN THE FEDERATION.

In addition to the territories comprised in the Federated Malay States, the British sphere in the Malay Peninsula includes the States of Johore, Kedah, Perlis, Kelantan, and Trengganu.

JOHORE.

His Highness Sir Ibrahim, G.C.M.G., K.B.E., etc., etc., Sultan and Sovereign Ruler of the State and Territories of Johore.

The State of Johore lies at the southern extremity of the Malay Peninsula, and is bounded on the North by Pahang, on the North-west by Negri Sembilan and Malacca, on the West by the Straits of Malacca, on the South by the Strait North of Singapore, and on the East by the China Sea.

The area of the State is approximately 7,320 square miles. The interior is in great part covered with jungle. The country is, as a whole, less mountainous than any other part of the Peninsula. The most important mountain group is formed by the Blumut Hills, which lie near the centre of the State. Mount Ophir, or Gunong Ledang, the highest peak in Johore (4,186 feet), is situated near the border of Malacca.

The principal river is the Muar, in the North-west running through the district on the same name. which was formerly a separate State, but was united to Johore in 1877. The only other rivers of im portance are the Endau, in the North, which, during part of its course forms the boundary with Pahang and Johore; and the Johore river which flows into the Straits opposite to the eastern end of the island of Singapore.

The only towns of any importance are Johore Bahru, the capital, situated on the Straits, opposite to Singapore, Bandar Maharani in Muar, and Bandar Penggaram in Batu Pahat.

The climate approximates to that of Singapore and the Federated Malay States, the highest maximum and the lowest minimum temperature in 1933 being 97° and 64° respectively.

The population estimated at mid 1933 was 580,020, of whom the Malay inhabitants comprised 268,806 or 47 per cent. The population of Johore Bahru town was estimated as 112,100.

In area, Johore approximates to Wales; in population to Cyprus.

History.

Of Johore history little is known prior to the advent of the Portuguese. A number of semi-wild proto-Malay" tribes exist chiefly along the coasts: while the civilised occupants of the country are the descendants of the Malays who brought their civilization from Palembang in Sumatra.

As the Buddhist State of Palembang grew in power, colonies of Malays commenced to settle on the Peninsula. Singapore, founded under the name of Tamasek about this time, was ruled by its own kings, A Siamese law of 1360 includes Ujong Tanah (or Johore), Malaka, and Malayu among tributary states.

About 1365 A.D. Javanese from Majapahit conquered the country and destroyed Singapore.

Malacca then grew to be the first trading centre of the East, and after its conquest by the Portuguese in 1511, a son of the conquered King settled at Johore Lama and founded the historic Sultanate of Johore.

The history of the next 300 years, however, is an almost uninterrupted record of wars. Persistent hostilities with the Portuguese continued nearly until the arrival of the Dutch in 1602. The State bears no small part in Dutch Colonial history; relations were friendly, despite a diplomatic struggle for commercial privileges. But, after violent attacks by the Achinese, Johore had become by 1637 practically an appanage of the Achinese Kingdom. In return for assistance rendered at the successful attack on Malacca in 1641, the Dutch tried to restore Johore to its former position as the premier Malay State. A port with a customs officer existed at Singapore. But the capital was plundered and burnt by Jambi in 1673, in 1699 the Sultan was assassinated, and in 1717 the throne was seized by a Sumatran adventurer, Raja Kechil. Then the Bugis ships appeared. subsequent process, partly conquest, partly assimilation, while disturbing to Johore, resulted in a wide extension of its sovereignty, which now spread to Pahang, Siak, Riau, Linggi and part of Selangor.

After 60 years of continuous intrigues between the Malay and Bugis chiefs the Dutch in 1784 recognised the Malay Sultan as ruler of Johore, drove the Bugis from Riau and stationed there a Resident with a garrison; after some further fighting the Malay Sultan and the Bugis viceroy accepted the position of dependent princes, but the old empire of Johore (Linggi and Klang had been ceded to the Dutch in 1757) was in a state of dissolution, the Bendahara and Temenggong being virtually territorial chiefs in Pahang and Johore respectively. This was the position when the English, by virtue of treaties made in 1819 and 1824, obtained a complete cession of the island of Singapore.

Contemporary visitors emphasize the deserted character of the country; in 1847 the capital consisted merely of 25 huts. (In 1855 the capital was moved to its present situation at Johore Bahru.) But the extension of the Pax Britannica and the assistance rendered by the Governor of the Straits Settlements "helped Johore to grow populous again," moreover, the country has been governed since 1862 by two enlightened and progressive rulers, Sultan Abubakar, who died in 1895, and Sultan Ibrahim

the present ruler.

In 1895 the Sultan undertook to receive a British Agent having the functions of a Consular Officer; in 1910, the Sultan having had an unofficial adviser for some years, reorganised his Government with the assistance of the Governor of the Straits Settlements; in 1914 a General Adviser with enlarged powers was appointed. The recent history of the State has been a record of continued prosperity. Telephonic communication was established between Johore and Singapore in 1883; a postal service was inaugurated in 1884, letters being transported by coach till the opening of the railway across Singapore Island in 1903; in 1909 the Johore State railway, linking up with the Federated Malay States Railway system, was completed; finally, in 1924, the completion of the causeway across the Straits permits uninterrupted railway connection between Singapore and Bangkok.

Constitution.

In 1895 the Sultan promulgated a written constitution, to which supplements have been added.

His Highness has a Council of Ministers, consisting entirely of high Malay Officers of State, together with an Executive Council consisting of certain Malay and British officers.

The Orders of the Executive Council are carried out by a Civil Service containing Malay and European Officers.

The Legislature consists of a Council of State, to which Asiatic and European official and unofficial members are appointed.

The Judicial system resembles that of the Federated Malay States, minor cases being decided by Magistrates with appeal to the Supreme Court, and major ceases by the Supreme Court, with appeal to the Court of Appeal, and thence in special cases to the Privy Council.

Cases involving matters regulated by Muhamadan law are decided in the Court of Kathi, with appeal

to the Sultan in Executive Council.

Judges of the Supreme Court of the Straits Settlements and of the Federated Malay States are ex-officir Judges of the State of Johore, and vice versa.

There is no Public Debt.

Economic Conditions.

Johore recovered more quickly than the Federated Malay States from the trade depression which began in 1920, and an era of rapid development commenced.

Johore is primarily an agricultural State. Forest Reserves amount to 616,491 acres and are being largely increased.

The total area of alienated land on 1st Jan., 1933. was 1,220,935 acres.

The chief agricultural exports in 1933 were :-

	Area.	Value	of Exports.
Rubber	854,373	acres	\$22,622,970
Coconuts and Copra	165,050	**	3,193,515
Tapioca	12,045		681,373
Pineapples .	42,800	99	3,855,311
Areca nuts .	39,225	••	542,169
African oil palm	30,067	**	_

Mining titles cover some 9,307 acres.

The principal minerals exported in 1933 were:-Tin-ore, 306 tons,

Iron-ore, 408,644 tons.

China clay, 30 tons,

the total value of mineral exports amounting to \$2,411,860.

The chief imports comprise rice, wines and spirits, tobacco, wood and timber (largely Johore Prodore-imported from Singapore), cotton-goods and petroleum products.

A branch of the Hong Kong and Shangai Banking Corporation is established at Johore Bahru and at Muar, and a Chinese bank at Batu Pahat.

Manufacturing industries are in their infancy. being confined to 8 pineapple factories, 17 tapixa factories, and a few saw-mills, brickworks, and similar undertakings.

Electric power stations have been erected at John Bahru, Muar, and Segamat.

Communications.

Sea.-Regular steamship services run between the various coast ports and Singapore.

During 1933, 71 ocean-going steamers with a tonnage of 236,790; 2,522 coasting steamers with a tonnage of 100,050; and 10,853 sailing vessels with a tonnage of 224,093 entered ports in the State.

There was a decrease in the number and tonnage of Japanese ocean-going steamers calling at Batu Pahat to load iron-ore. The total weight of ore so cleared was 408,644 tons in 1933.

Railway.—The Johore State Railway runs for 120 miles through the middle of the State from Gemas on the northern boundary to Johore Bahru on the southern boundary; it is connected on each boundary with the system of the Federated Malay States Railway administration, by whom it was built and to whom it is leased.

Road.—At the end of 1932 the State possessed 732 miles of metalled, 65 miles of gravelled and 12 miles of earth roads as well as 50 miles of approach road and back lanes. All the principal towns are now connected by a road-system which is being continually extended.

Hired cars provide a cheap, constant, and rapid means of communication. About 1,200 motor vehicles a day cross the causeway connecting the main land with Singapore Island.

main land with Singapore Island.

Posts, Telegraphs, Telephones.—In addition to the General Post Office at Johore Bahru, 27 branch

offices are established.

42 telephone exchanges are in operation, and the number will be increased. Communication is established between Johore Bahru and Singapore, and between Muar and the Malacca and Federated Malay States systems.

Accommodation.—The Johore Station Hotel at Johore Bahru provides the usual accommodation for travellers. The Government also maintains Rest Houses at Muar, Batu Pahat, Kota Tinggi, Segamat, Batu Anam, Mersing, and Kluang.

General.

Health.—Government Hospitals are established in the principal townships, besides a Mental Hospital and Leper Asylum at Johore Bahru. Permanent anti-malarial measures are being undertaken in Johore Bahru and other townships, and oiling operations are in force in all towns.

Travelling dispensaries have been provided.

Education.—The Government has established six English Schools and 120 Vernacular Schools.

Grants-in-aid are made to estate Tamil Schools.

Military Forces.—The total strength of the Johore
Military Forces in 1933 amounted to 646. There are
English and Malay Volunteer contingents.

Police.—The force numbers 1,322, all ranks: the rank and file consist of Malays and Sikhs under Malay

and English Officers.

Municipal.—Town Boards are established at Johore Bahru, Muar, Batu Pahat, Segamat, Kota Tinggi and Endau, supervising sanitary work in 27 Town Board Areas and many village areas.

Sport.—Subject to the regulations for the protection of wild animals, special permits may be obtained to shoot elephant, guar, rhinoceros, tapir, deer, tiger panther, crocodile, and pig.

ADMINISTRATION.

Sultan, His Highness Sir Ibrahim, G.C.M.G., K.B.E., etc., etc.

Chief Minister (vacant).

President Religious Affairs, Dato Abdullah bin A. Rahman.

General Adviser, R. O. Winstedt, C.M.G., D.Litt., M.C.S.

State Secretary, Dato Mohamed Salleh bin Ali.

State Commissioner, Muar, H.H. Tengku Ahmad. State Commissioner, Batu Pahat, Engku Mohamed bin Mohd. Khalid.

State Commissioner, Segamat, Dato Abdullah bin Esa. Assistant Adviser, Muar, G. M. Kidd, M.C.S. Assistant Adviser, Batu Pahat, J. Falconer, M.C.S. (acting).

Assistant Adviser, Segamat, R. W. Grant, M.C.S. Assistant Adviser, Kota Tinggi, N. Ward, M.C.S. (acting).

Assistant Adviser, Kukup, J. A. A. Faith, M.C.S.

(acting)
Assistant Adviser, Kluang, H. G. Turner, M.C.S.
(acting).

Agriculture.

Principal Agricultural Officer, J. Fairweather (offtg.). Agricultural Officer, B. A. Lowe.

Chandu Monopoly.

Superintendent, E. T. Williams, M.C.S. (acting).

Chinese Protectorate.

Protector of Chinese, E. D. Fleming, M.C.S.

Courts.

Judge, W. H. Thorne.

Legal Adviser, M. C. Hay (acting).
Deputy Public Prosecutor, I. A. Hamid bin Mustapha.
Magistrates, N. Jones, M.C.S., Sheikh A. Bakar
and Inche Almad bin Prang.

Customs.

Commissioner of Trade and Customs, E. T. Williams, M.C.S. (acting).

District Offices.

District Officer, Cholong, Inche Hassan bin Abdullah District Officer, Kota Tinggi, Inche A Rahim bin Daud. District Officer, Kukup, Engku Sulaiman bin Mohd. Khalid.

District Officer, Mersing, Inche Othman bin Buang.

Education.

Superintendent of Education, J. M. Meade.

European Volunteer Force.

Officer Commanding, Major C. H. F. Pierrepont. Adjutant, Capt. H. E. Pike.

Financial.

Financial Commissioner and Auditor-General, N. A. Sodwick, M.C.S.

State Treasurer, Inche Ibrahim bin Abu Bakar. Auditor, Wan Jusoh bin Ali.

Revenue Auditor, Inche Ja'afar bin Hj. Abdu Abdullah.

Foresta.

Conservator of Forests, C. Smith.

Assistant Conservator, C. Cairn.

Game Warden.

Game Warden, Captain Ahmad bin Mohameddon.

Labour.

Controller of Labour, F. V. Duckworth, M.C.S. (acting).

Lands.

Commissioner of Lands and Mines, L. A. Allen, M.C.S. (officiating).

Collector of Land Revenue, Dato Abdul Rahman bin Mohamed Yasin.

Marine.

Superintendent of Marine, H. H. Brown.

Medical.

Principal Medical-Officer, G. H. Garlick.

Medical Officers, M. Edwards, R. Walkingshaw,
J. M. A. Lowson.

Senior Health Officer, F. Jacques.

Military Forces.

Colonel-Commandant, His Highness Sir Ibrahim, G.C.M.G., K.B.E., etc., etc.

Lieut.-Col. and Second-in-Charge, Dato Yahya bin Abu Talib. Digitized by OOQ Military Adviser and Chief Instructor, Major D. M. Noves-Lewis.

Majors, Mohamed Tahir bin Mohamed Doon and Akil bin Awang.

Major and Staff Öfficer, Dato Haji Mohamed Said bin Haji Suleiman.

Mines.

Warden of Mines, C. F. S. Jameson.

Police.

Commissioner, E. Bagot.

Deputy Commissioners, C. G. E. Baughan, L. H. Pearce, R. Kingsley Bell and Dato Abu Bakar bin Buang.

Assistant Commissioners, Musa bin Yusof, Wan Mohamed bin Uda and Ahmad bin Haji Tahir, H. P. Armstrong and F. Wallace.

Posts and Telegraphs.

Postmaster-General, K. MacLennan. Chief Telegraph Engineer, A. H. Carson.

Public Works.

State Engineer, H. F. Waters, M.C., V.D. Senior Executive Engineer, F. J. Button. Government Architect, T. W. V. May. Chief Electrical Engineer, A. L. Birch. Mechanical Engineer, R. Eves.

Surveys.

Superintendent of Surreys, H. H. Cobon (acting). Assistant Superintendents, G. M. R. Jackson, A. G. Billing, R. B. Horner, C. C. Best and J. W. Morphett.

Veterinary.

Government Veterinary Surgeon, H. H. Tengku Abu Bakar.

KEDAH.

His Highness Sir Abdul Hamid Halimshah ibni Ahmad Tajudin, K.C.M.G., Sultan: His Highness Tunku Mahmud, K.B.E., C.M.G., Regent.

Kedah is a State on the West coast of the Malay Peninsula, situated between the parallels of 5° 5° and 6° 35′ N. lat. and the meridians of 99° 35′ and 101′ 10° E. long. It is bordered on the interior (North and East) by the States of Singgora and Patani (Siamese) and by the State of Perak (F.M.S.), and extends along the sea coast from the River Sanglang, its boundary with its northern neighbour the State of Perlis (under British protection), to the Muda River, its boundary with Province Wellesley. Thence it extends behind the narrow strip of coast which forms Province Wellesley, down to the northern bank of the Krian River, its boundary with the State of Perak.

Both the island of Penang and the territory of Province Wellesley were originally part of Kedah. Penang was acquired from the "King of Quedah" by Captain Light on behalf of the East India Company by the treaty of 1786, and Province Wellesley was ceded by Kedah to Sir George Leith, on behalf of the Company, by the treaty of 1800, to enable the Company to check the piracies on the coast. A sum of \$10,000 is, under the treaty of 1869, paid annually by the Government of the Straits Settlements to the Kedah Government in respect of Penang and Province Wellesley.

The State includes the island of Langkawi and a number of smaller islands to the South. It formerly included the island of Terutau to the North of Langkawi, but this island and a small area in the interior of the State, in the eastern water-shed, were ceded to Siam in the treaty of 1909. The mainland of Kedah is about 105 miles in length and about 65 miles in width at its widest part. Its area is, including the Langkawi groups, about 3,648 square miles. The two highest peaks on the mainland are Gunong Jersi (3,986 feet) and Bukit Perak (2,823 feet). Gunong Raia, on Langkawi Island, is 2,880 feet high.

History.

There are no authentic records of the early history of the State, and little is known except that the country was converted to Muhammadanism in the 15th or 16th century, and that, like the other States in the Peninsula, it was at various times under the domination of Burmah, Acheen, Malseca, and Siam. Like the other States, too, it depended upon the personality of its ruler. Under a strong raja me boundaries extended to include Setul, Perlis, and part of Singgora on the North, and Krian on the South, and under a weaker man, or upon the rising of a stronger raja beyond the borders its boundaries contracted.

There is no record of the Portuguese, during their occupation of Malacca (A.D. 1511 to 1641), having had any intercourse with Kedah. The Dutch, however, after they had wrested Malacca from the Portuguese, established Opperhodden (commandants) in Kedah from 1654 to 1711.

From that date until 1786, when Captain Light acquired Penang from the Sultan for the East India Company, little is known of the history of the State. In 1821, a Siamese fleet appeared off the mouth of

In 1821, a Siamese fleet appeared off the mouth of the Kedah River, and, by a sudden descent upon the unexpectant Malays, took possession of the fort, and later of the river. The Sultan, who was in the Merbox district at the time, fled to Province Wellesley, where he was afforded protection by the British Government. He was later afforded an asylum in Malacca.

In 1831, Tunku Kudin, a nephew of the Sultan, made a desperate attempt to recover Kedah from the Siamese. He succeeded in driving out the Siamese, and held the country from April until October, but was later conquered by a combined force of British and Siamese. In 1838, the Malays made another attempt under Tunku Muhammad Saad, and again succeeded in expelling the Siamese. Again, however, they were worsted by the combination of a Siamese army and a blockade by British gunboata.

In 1841 the Siamese allowed the Sultan to return to Kedah and re-assume the government. The Sultan was, however, only allowed to exercise authority over part of the territory that formerly was subject to him. Setul, Perlis, and Kubang Pasu were given to other rajas independent of him. Setul, under the treaty of 1909, is now part of Siam (Monthon Puket); Perlis is still independent and is now under British protection. Kubang Pasu was some years ago again made part of Kedah.

General Description.

The language line between Siamese and Malay runs through Kedah and Perlis, and in the interior parts of these States the Malays speak Siamese as freely as their own language. There is a larre number of Sam-sams—a mixed race of Siamese and Malays—who are Muhammadans. Only a few families of the aborigines (Semang) are left in the forest at the source of the Muda River; 209 "nomadic aboriginals" were counted at the 1931 census.

South Kedah, the area lying South of the mountain known as Kedah Peak (Gunong Jerai), is for the most part populated with Europeans, Chinese and Tamis planting rubber, coconuts and tapioca. There is also a Malay population planting rice along the banks of the Muda River and in the low lying land along the coast. Kulimewas formerly a tin-mining centre of

some importance, but the alluvial deposits are now said to be worked out.

North Kedah is almost entirely populated by Malay cultivators of rice. The soil is generally a heavy fertile clay. A quantity of rice is exported annually to Penang and to the Federated Malay States.

The population of Kedah was 338,558 at the 1921 census and 429,691 at the 1931 census. At mid 1933 the population was estimated to be 453,366, of whom 298,270 were Malays, 441 Europeans, 117 Eurasians, 83,470 Chinese, 56,009 Indians, and 15,029 "other races."

Galena has been found in Langkaws, and indications of coal and oil have been reported; nothing of commercial value has, however, yet been discovered, with the exception of a deposit of marble which is described as the equal of any in Europe.

Climate.

The climate resembles that of Perak. Meteorological returns kept in ten places record an average shade temperature in the day-time rising to over 93° F. and falling to nearly 70° F. at night. The driest months are January to March and the wettest August to October, when half the annual rainfall occurs, averaging from 100 to 130 inches a year. Cholera has sometimes broken out in prolonged droughts, but the provision of a good water supply which is now completed, should prevent this. The health on rubber and other estates is good.

Communications.

Steamers ply between Penang and Sungei Patani (Central Kedah), and between Penang and Alor Star (the capital, six miles up the Kedah River) in North Kedah. There is a bi-weekly steamer communication between Penang and Langkawi Island.

A metalled road connects Alor Star with Province Wellesley, a distance of 45 miles. A metalled road extends to the Perlis boundary (25 miles), and a road which branches off at the 12th mile connects the State with Singgora. Another road extends to Kuala Nerang at the 23rd mile from Alor Star. A metalled road has been made to Baling and North Perak, and other metalled roads have been completed or are under construction. There are a number of earth roads connecting the tapioca and rubber estates in South Kedah with the towns; 225 miles of canals are maintained by the Public Works Department.

The Federated Malay States railway administration has extended its railway service through Kedah into Perlis. The line leaves the main line at Bukit Mertajam, in Province Wellesley and is 98 miles in length to the Siamese frontier, trains have been running regularly since October, 1915. A connection through Perlis with the Siamese railway system has been completed, establishing railway communication between Bangkok and Singapore.

There is an aerodrome at Alor Star, where the Dutch Air Mail make regular weekly landings.

Telegraphic and telephonic communication extends throughout the State.

Education.

There are English schools in Alor Star (618 pupils) and Sungei Patani (193 pupils) and a Malay Girls' school in Alor Star. There are 89 Malay schools, including 5 Girls' schools, and a Trade school.

Constitution.

Until the beginning of this century the Siamese Government interfered but little in the government of the country, only requiring the Sultan to refer to Bangkok matters of importance, and applications for land by foreign subjects. In 1905, however, the

finances of the country had reached such a state that the Sultan was compelled to negotiate with Siam for a loan in order to avoid bankruptcy. With the loan the Siamese Government sent an adviser to advise the Sultan in the general management of the country, and more particularly in its finances.

more particularly in its finances.

In 1905, the Sultan by an edict appointed a State Council to assist him in the administration of the country. The first President was H.H. the Raja Muda, Tunku Abdul Aziz, who died in 1907. He

was succeeded by H. H. Tunku Mahmud.

In 1913, the Sultan's health became such that it was necessary to appoint a Regent. His Highness' eldest son, H. H. Tunku Ibrahim, C.M.G., C.V.O., remained Regent for the rest of his life. He was succeeded in 1934 by the present Regent.

With the transfer of the suzerainty of Kedah from Siam to Great Britain under the treaty of 1909, the adviser appointed by Siam has been replaced by an

adviser appointed by Great Britain.

Under the terms of the agreement between His Britannic Majesty's Government and the State of Kedah dated the 1st November, 1923 the supreme authority in the State is vested in the Sultan in Council, which Council consists of His Highness the Sultan as President, three other Malay members selected by name or office by His Highness with the approval of His Excellency the High Commissioner for the Malay States, and the British Advisor.

Finance.

The amount of the loan obtained in 1905 from Siam was of \$2,600,000 at the rate of 6 per cent. This loan was, with the transfer of the suzerainty of the State from Siam to Great Britain under the treaty of 1909, taken over by the Federated Malay States Government at 4 per cent, but the whole amount has been paid off and the State is now free from debt. Accumulated surplus funds (excess of Assets over Liabilities) amounted to \$3,964,396 at the end of 1352, in addition to an "Opium Revenue Replacement Fund" with investments valued at \$6,282,919.

Public revenue and expenditure :-

Year. Revenue. Expenditure. \$
A.H. 1352 (A.D. 1933-1934) 5,601,761 5,127,156

Trade.

The following are the principal exports from Kedah:—Padi and rice, rubber, copra, arecanuta, tapioca and sago, forest produce, tin-ore, fish, bricks, cattle, hides and horns, pigs and poultry.

The value of the Kedah trade with the Straits Settlements during 1933 was as follows:—Exports,

\$13,831,186; imports, \$7.180.552.

The value of Kedah trade with the F.M.S. during 1933 was: Exports, \$1,085,516; imports, \$59,769.

Administration.

His Highness the Sultan, Sir Abdul Hamid Halimshah ibni Sultan Ahmad Tajudin Mukarramshab, K.C.M.G.

President State Council, His Highness the Regent, Tunku Mahmud, K.B.E., C.M.G., ibni Sultan Ahmad Tajudin Mukarram Shah.

PERLIS.

His Highness, Syed Alwi, C.M.G., C.B.E., Raja.
Perlis is a small State on the West coast of the Malay
Peninsula, North of Kedah. Its area is 310 square

Until 1821 it was subject to Kedah, but when the Siamese, in 1841, allowed the Sultan of Kedah to re-assume the government, they made Peris an independent State under Syed Hussein, who was given the title of Raja. The present ruler is the great-great-grandson of Syed Hussein and is the fourth raja.

The country, like Kedah, is a rich alluvial plain, which is devoted to rice cultivation. A little tin is exported from the interior, and some of the limestone

hills are rich in guano.

The Federated Malay States Railway runs through the State and connects with the Siamese railway system at Padang Besar. H.H. the Raja resides at Arau which is on the railway. The main Government Offices are at Kangar, about six miles from Arao. There is a Post and Telegraph Office at Kangar and a telephone system exists between the police stations in the State. There are 36½ miles of metalled roads and 26½ miles of gravelled roads and paths kept up by Government.

The population is 51,644 (mid 1933) of whom 41,078 are Malays. Public revenue and expenditure:—

Year. Revenue. Expenditure.

A.H. 1352 (A.D. 1933-4) 530,709 464,457

The State, by loans made in 1905 and 1907, incurred a debt of \$443,000 to the Siamese Government. These loans, with the transfer of suzerainty from Siam to Great Britain, were taken over by the Federated Malay States. Repayment of these loans was completed in 1929, and the State is now free from debt. When the loans were contracted the Siamese Government sent an Adviser to advise the Raja in the general management of the country, and more particularly in its finances. With the transfer of the suzerainty of Perlis from Siam to Great Britain under the treaty of 1909, the Adviser appointed by Great Britain.

The relations between Perlis and Great Britain are defined in a Treaty signed at Arau on 28th April, 1930.

The Raja is assisted by a State Council in the government of the country, and is himself President of the Council. There are five other members of the Council, one of them being the Adviser.

Members of the State Council.

President, His Highness The Raja, Syed Alwi, C.M.G., C.B.E.

Vice-President, Syod Hamzah,

British Adviser, O.E. Venables, M.C.S. Syed Idrus. Haji Mohamed Nor.

H. Ahmad.

Government Officials. British Adviser, O. E. Venables, M.C.S. Engineer, F. E. B. Murphy. Commissioner of Lands (vacant). Treasurer, Haji Ismail. Collector of Customs, Syed Bakar. Judges, Haji Ahmad, Syed Hussein and Syed Hassan.

KRYANTAN.

His Highness the Sultan Ismail ibni Almarhum Sultan Mohamed IV., K.C.M.G.

The State of Kelantan is situated on the eastern side of the Malay Peninsula, and lies between latitudes 4° 35' and 6° 15' North, and between longitudes 101° 22' and 102° 37 East. It is bounded on the North by the China Sea; on the East by Trengganu and the China Sea; on the South by Pahang; and on the West by Perak and Siamese territory. The area of the State is estimated to be 5,713 square miles.

As in the case of Kedah, the Government of Siam claimed rights of suzerainty over Kelantan for many years before any attempt was made to direct the administration of the State. Towards the end of the nineteenth century, at the time when the affairs of Kelantan were involved in much confusion owing to a disputed succession, a Siamese Commissioner was appointed to reside at Kota Bharu, the capital, but in spite of this fact the exact rights of Siam were a subject of constant dispute, until matters were placed on a stable footing at the end of 1902 by an agreement under which the Raja undertook to receive a British Officer in the Siamese service as his Adviser, and to administer the State according to his advice. The Adviser took up his post in 1903, and since that date great improvements have been effected in the Government of the State. transfer to the protection of Great Britain was formally effected on July 15th, 1909.

About a sixth part of the area of Kelantan consists of a fertile plain, extending from ten to twenty-five miles from the shore; the greater part of this plain is under cultivation with padi and coconuts. From this plain the land rises gradually into mountain ranges, which reach their greatest height in the South. Gunong Tahan, on the southern boundary, is 7,186 feet high, and is the highest peak in the

Malay Peninsula. The principal river is the Kelantan, which enters the China Sea about ten miles from the western boundary of the State. The Kelantan River is a fine river some 150 miles long, navigable for launches for 80 miles. The basin of the Kelantan River, with those of its tributaries, comprises the greater part of the State. Of the other rivers, the most important are the Golok and the Semerak. By the Anglo-Siamese treaty of 1909, the Golok forms the boundary between Kelantan and the Siamese territory from its source to Kuala Tabal, where it debouches into the China Sea. The Semerak, like the Golok, is a deep river with a shallow bar at its mouth; it enters the sea near the border of Trengganu.

Kelantan possesses a larger Malay population than any other State in the Peninsula. The total population at the 1931 census was 362,517, including 327,097 Malays, 17,612 Chinese, 6,752 Indians, 124 Europeans, 32 Eurasians, and 7,223 others.

Kota Bharu, the capital, which lies on the right bank of the Kelantan River, about eight miles from its mouth, has a population of about 14,843 people.

It is a clean, well laid-out town with good metalled roads. It contains the Sultan's Palace and the British Residency. It has 65 schools attended by some 5,706 scholars. Kota Bharu is connected by telegraph with the Siamese Administration. A telegraph line connecting Kota Bharu with Pahang has been completed. Kots Bharu is also connected by telephone with Tumpat, the port of Kelantan, Pasir Puteh, Kuala Krai, Pasir Mas, Bachok and Plekbang. Of the smaller towns the principal are Tumpat (population 3,431), Bachok (population 776), on the coast, Pasir Putch (population 1,308) and Kuala Krai, the headquarters of the southern district of the State. The trunk road from Kota Bharu to Kuala Krai is open for traffic.

Pasir Putch is connected with Kota Bharu by a road which is practicable in all weathers. The East Coast Railway, connecting Kelantan with Singapore, has been completed. There is also a daily train service between Tumpat and Penang

via the Royal Siamese Railway.

The main industries of the State are agricultural. The soil is exceedingly fertile. The chief product is padi, the last harvest of which amounted to 45,376.50 tons. Coconuts and betelnuts are also extensively grown in the coastal plain. The coconut palms are remarkably free from disease. As elsewhere in the Malay Peninsula, Para rubber has been largely planted in recent years; in addition to several small properties owned by Malays, there are twenty large estates owned by Europeans. area under rubber is about 75,491 acres, of which rather more than one half comprises Asiatic holdings. Fishing and fish drying provide occupation for a large number of Coast Malays. Cattle breeding is also a large industry, though it is necessary periodically to restrict the export in order to maintain sufficient cattle for agricultural purposes. The women throughout the State are expert weavers. and a large number of sarongs are annually exported to neighbouring States.

Some 2,288 acres are held on mining titles. Though both tin and gold are found in Kelantan, yet very little mining is being done for either metal. Much prospecting for gold is being done in the Ulu Kelantan district, but is not yet sufficiently advanced to enable any forecast to be made as to its ultimate results. The amount of tin-ore exported in 1933 was only 47 tons, gold ore 1,543 tahils, and manganese 2,866 tons.

The chief exports of Kelantan are copra, rubber, cattle, betelnuts, fish, and silk manufactured goods. The chief imports are rice, tobacco, cotton goods, provisions, kerosene oil, gambier, sugar, timber, salt, and machinery.

The climate of the State is equable, and may be described as hot and dry compared with the rest of the Peninsula (except in the monsoon), but both temperature and rainfall vary a little during each half of the year. In the plain the temperature in the shade rarely exceeds 90°F., or goes below 69°F., except in January and February, when 64°F. is not unknown. The nights are cool; the land breezes in the mornings and the sea breezes in the afternoons keep the air pleasant.

In the interior the range of temperature is slightly higher, the days being hotter and the nights cooler. The rainfall averages 126.74 inches a year.

The currency is the Straits Settlements dollar. Regular steamship communication is maintained between Singapore and Kelantan.

Finance and Trade. Revenue. Expenditure. Imports. 1933 **-- \$1,801,418** \$1,563,782 \$4,057,602 Exports, · 3,454,038 Public Debt. \$5,589,010.

TRENGGANU.

His Highness Sulaiman Badaru'l-'alam Shah ibni Almarhum Zainu'l-'abidin, K.C.M.G., Sultan.

The State of Trengganu lies on the eastern seaboard of the Malay Peninsula roughly between latitude 4° 0' and 5° 55' North, and longitude 102° 20' and 103° 30' East. The area of the State is estimated to be about 5,050 square miles.

The total population of the State, at the 1931 Census was 179,789, made up as follows:-

Malaya		 	164.564
Chinese	• •	 	13.254
Indians	• •	 	1,371
European	18	 	3 5
Eurasian	.8	 	15
Others		 	550

There are 146 miles of road open to traffic, including a road of 66 miles length from Kuala Trengganu which connects with the Kelantan road system at the boundary between Trengganu and Kelantan. There are no railways (except light railways on mines) and communication with the interior is mainly by means of rivers and paths. Telegraphic communication was established between the State, the Federated Malay States, and the Straits Settlements in 1922. There are telephone exchanges at Kuala Trengganu, Kemaman and Besut.

The chief town is Kuala Trengganu, situated on both banks of the mouth of the Trennganu river,

with a population of 13,972.

Other navigable rivers with considerable settlements at their mouths are the Kemaman Kretir, Dungun, Paka, Marang, Ibai, Setiyu, and Besut.

The public revenue and expenditure for the year 1933 were \$1,165,578 and \$1,060,306 respectively.

The total value of exports from Trengganu in 1933 was \$4,570,747 and of imports \$2,693,951. principal exports and imports were:-

	Exports.		vaiw.
Tin ore			\$403.596
Para rubber	• •	٠.	577.715
Haematite			1,510.867
Dried Fish	• •		702,266
Copra	••		159,730
Manganese	• •		82 500
Areca-nuts	• •		92,588
Silk sarongs	• •		38,714
	Imports.		
Rice	•		\$110,213

Tobacco, cigars and cigarettes 150,783 Cotton and silk stuffs ... 257,469 Sugar .. 72.021 . . Petroleum 154.611 Tinned milk 49.879 . .

The rainfall is heavy and well distributed throughout the year, though excessive during the North-east monsoon from November to February. The annual The temperature average is about 115 inches. ranges between 73° and 92°F. Soil and climate are suitable for the cultivation of Para rubber, coconuts, coffee, and pepper. During part of the N.E. monsoon season the coast is difficult of access,

though seldom quite unapproachable.

British protection dates only from the 14th July, 1909. The suzerainty of Siam, transferred on that date to Great Britain, was merely a nominal overlordship, of which practically the only token was the triennial despatch of the bunga mas (golden leaves and flowers) to Bangkok. An agreement between His Majesty's Government and His Highness Sultan Zainu'l-'abidin was made on 22nd April, 1910, and a further Agreement was made on 24th May, 1919. Under these Agreements His Majesty's Government guarantees protection of the State from foreign aggression, and the Trengganu Government accepts a British Adviser whose advice must be asked and acted upon in all matters affecting the general administration of the country and the collection and disbursement of all revenues; the cost of this Adviser and his cetablishment to be determined by the High Commissioner and to be charged on the revenues of the State.

The ruling of Sultans dates from the seventeenth century, as there is unbroken succession from Sultan Zainu'l-'abidin through ten intermediary Sultans

to the present ruler.

The Public debt at the end of 1933 amounted to \$4,177,966. It consists of loans by the Government of the Straits Settlements for the purpose of resumption of Ruling House Land Concessions, Surveys, road construction and other development

BRUNEI.

Sultan, His Highness Ahmed Tajudin.

Ministers of State, Pengiran Bendahara Seri Maharaja Permeisuara Anak Abdulrahman Pengiran Pemancha Sahibul Raya Almeshuara Haji Mohamed Yasin.

Brunei is a State lying between North Borneo and Sarawak between 114° and 116° E. long., and touching the sea at Brunei Bay, in which lies the island of Labuan. It is 770 nautical miles distant from Singapore.

The Sultanate of Brunei was formerly a great and powerful State, and in the early years of the 16th century the authority of its Rulers appears to have extended, not only over the Northern part of the Island of Borneo, but over the Sulu Islands and some part of the Philippines. Its wealth and importance at this period are shown by the description given by Pigafetta of the Sultan's Court, and by the fact that the early European navigators extended the name of the Sultanate to the whole of the island, "Borneo" being a corruption of Brunei. The power of the State appears to have begun to decline about the end of the 16th century, and by the middle of the 19th century it had fallen hopelessly into decay. The cession of the District of Sarawak to Sir James Brooke in 1841 was followed by many similar cessions to Sarawak and to the British North Borneo Company, and the State of Brunei has now been reduced to about 2,230 square miles, containing a population (1931 census) of 30,135, and consisting of the town and district of Brunei and some outlying districts, of which the most important are Tutong, Belait and Temburong. Estimated population on 31-12-33 was

in 1888, an agreement was concluded with the Sultan under which the control of foreign relations was placed in the hands of H.M.'s Government, whilst internal affairs were left to the Sultan, and a further agreement was made at the end of 1905, under the terms of which a British Resident has been appointed to advise and assist in the administration of the State. Until 1915 the Resident combined these duties with those of Resident of Lobuan, while an Assistant Resident was stationed in Brunei. In 1915 a separate Resident was appointed for Brunei and the appointment of Assistant Resident discontinued. At the beginning of 1931, however, the rapid development of the Belait district owing to the discovery of oil in commercial quantities necessitated the appointment of an additional officer of the Malayan Civil Service and the title of Assistant Resident was revived.

The chief town is Brunei, with a population of 10,453.

Besides the old Malay town which is built over the water on the Brunei River there is a new township on the mainland, which has steadily developed since 1910. There are vernacular schools at Brunei and in the out-districts. The climate resembles that of the Federated Malay States. The average annual rainfall at Brunei is a little over 100 inches.

Trade is chiefly in the hands of Chinese, of whom there are about 4,280 in the State. Native industries include fishing, cloth weaving, brass foundries, and the manufacture of silversmith's ware. The principal imports are rice, cloth, tobacco, sugar and petroleum, and the principal exports oil, cutch (mangrove extract), wild and plantation rubber, sago and dried prawns. The trade, to which an impetus was given by the inauguration of the new system of administration, passes through Labuan.

Concessions and monopolies of all kinds were recklessly granted in the past. Many of these have now lapsed and others have been redeemed.

In 1924 the British Malayan Petroleum Company, Limited, commenced prospecting and drilling operations for petroleum in the Belait District. In 1930 it became definitely established that an oil-field of considerable commercial value had been found at Seria, 10 miles North-west of Kuala Belait. The Company is now developing and testing this field for production and the export of oil by pipe-line from Seria to the Refinery at Lutong in Sarawak territory has already begun.

Several companies are engaged in planting Para

Rubber.

A cutch factory, established by a London syndicate, is at work at Brunei. The output of cutch in 1933 was 1,788 tons, valued at \$123,757.

There are two native industries of importance, the manufacture of brassware and silverware, and these are more or less restricted to certain families or guilds. Weaving is done by Brunei women, and the natives are excellent fishermen.

The revenue of the State is derived principally from the land and mining rents, from an opium monopoly under Government control, from the collection of Customs duties, and from purchased Cession moneys. About half of the original Cession moneys have now been purchased by the Government.

FINANCES.

Year Revenue. Expenditure. \$ \$ 1933 .. 580,756 .. 514.812

The Public Debt on the 31st December, 1933, was \$383,000.

Communications.

There is regular communication with Labuan by steam launch and so with Singapore by the Straits Steamship Company, which maintains a weekly service.

A Central Wireless Telegraph Station was opened in 1921 at Brunei with a subsidiary station at Labuan which enables telegraphic communication to be maintained with Labuan and thence by cable with Singapore and Europe. There are other Wireless Stations in the Belait and Temburong Districts.

The currency is the Straits Settlements dollar.

Administration.

British Resident, R. E. Turnbull, M.C.S.

MALTA.

Situation and Area.

The Maltese Islands form a group in the Mediterranean Sea, about 58 miles from the nearest point of Sicily, 80 miles from Syracuse, and 142 from Reggio, and about 180 from the nearest point of the mainland of Africa. The length of Malta is about 17 miles, by 9 miles in breadth; its area is 94.870 square miles; that of Gozo, 25.899 square miles, and that of Comino about one square mile. Filffa and Cominotto are mere islets. The whole group is about half the area of the Isle of Man.

History.

The Maltese Islands were inhabited as early as the beginning of the Mousterian cultural period, about 40,000 B.c., by Neanderthal man, of whom remains were discovered in a cave to the southeast of Malta. Traces of paleolithic civilization are not wanting in the islands, and evidence of a neolithic civilization, in the shape of cave dwellings, stone circles, menhirs and dolmens, is found all over the islands. The Phoenicians probably

took possession of Malta as soon as they made themselves masters of the Mediterranean Sea. Phoenician remains are few, but there are numerous rock-cut graves of Phoenician type.

At the beginning of the Punic wars the islands were held by Carthage. In the course of the first Punic war they changed hands more than once, but at its conclusion they were still in the possession of the Carthaginians. In 218 B.C., they passed finally to Rome. Under the Romans Malta appears to have enjoyed great prosperity. Diodorus Siculus speaks of the excellence of its harbours, the wealth of its inhabitants, and its many skilful artificers, and refers to its fertility, and Cicero, in the Verrine orations, speaks of it as abounding in riches and famous for its textile manufactures. Inscriptions show that it enjoyed municipal rights in the time of Hadrian, and an interesting fact in its recorded history is that it was the scene of St. Paul's shipwreck (Acts xxviii.). On the final division of the Empire in 395 A.D., Malta fell to the share of the Byzantine Emperor, and for the next four centuries its history is almost a blank. In the 9th century it was three times invaded by the Arabs, who finally conquered it in 870, the Byzantine garrison being massacred in an insurrection of the inhabitants.

In 1090, Count Roger the Norman, with a handful of men, subjected the islands to Sicily. The Sicilian domination lasted for four hundred years, Norman, Angevin, Aragonese and Castilian ruling in turn. During this time, Malta had Sicilian governors and laws, but there is no record of any extensive Sicilian immigration, and the persistence of the old Semitic names in the parish registers, instituted at this period, stands as further evidence that no great ethnographic changes occurred.

The connexion with Sicily was broken in 1530, when the Emperor Charles V gave Malta to the Knights of St. John of Jerusalem, who had been driven from Rhodes by the Turks, and who held Malta until 1798. The loyalty of the Maltese to their new sovereigns, who for the first time were resident in the island, was put to a severe test on several occasions, the most notable being the great siege of 1565, when the Order of St. John, under Grand Master Jean de la Valette, resisted the attacks of the land and sea forces of Solyman the Magnificent. It was after this great feat of arms that the city of Valletta was built, strong enough to defy the Turkish attacks threatened yearly by the Sultan.

Napoleon Bonaparte invested the island on his way to Egypt, having prepared the ground by intrigue and revolutionary propaganda, and, on the 12th July, 1798, Ferdinand de Hompesch, the last Grand Master in Malta, capitulated without any resistance, and the Order was dispersed.

The French installed themselves in the islands,

The French installed themselves in the islands, but their interference with Maltese laws and customs brought about a sharp reaction, and the Maltese drove the French troops within the fortified towns and, with the help of the British fleet, held them closely blockaded for two years, after which the French, reduced to extremities, surrendered to the British.

In 1800 the government was placed in the hands of Great Britain. The Treaty of Amiens provided that the islands should be restored to the knights, but this was prevented by the re-commencement of the war, and they were finally annexed to the British Crown by the Treaty of Paris in 1814.

Climate.

The climate of Malta is equable and very healthy in winter. In July the heat at the sea level approaches that experienced in sub-tropical countries. The nights, however, are pleasant and cool, except during the prevalence of the scirocco wind. The mean maximum temperature during the three coldest months (December, January, February) is 65.5° Fahr., and the mean minimum 44.6°; but during the four hottest months (June, July, August, and September) the mean maximum is 89.6° Fahr., and the mean minimum 65.5°. The mean temperature is 64.5°, and the mean annual rainfall is 21.5 inches. There is no river or rivulet in the island, the water drainage becoming absorbed in the porous sandstone beds and finding its way through underground channels and aqueducts.

Industry.

The island is highly cultivated. Besides products for home consumption, early potatoes, onious, sumin seed and oranges are exported. A large number of the inhabitants are employed in connection with the trade of Valletta as a coaling station and an eutrepôt and port of call. It is a port of registry, having, on 31st December, 1933, 33 vessels, 6,119 gross tonnage.

Chief Towns.

The chief town and capital is Valletta, having, with its suburbs of Floriana, Sliema, and St. Julian's, a population which, in April, 1931, when a census was last taken, was 51,898. The "Three Cities" (Senglea, Cospicua, and Vittoriosa) have a population of 27,149. Cita Vecchia (or Notabile, in Maltese Mdina), the old capital, is in the interior of the island, and, with its suburbs, had a population of 10,032. The chief town of Gozo is Victoria (formerly called Rabat), with a population of about 5,351.

Inhabitants and Language.

The Maltese language, which is universally spoken, is of Semitic origin, and is akin to Arabic. The educated and commercial classes also speak English, and some Italian. The Maltese are remarkably thrifty, and industrious. They are excellent seamen and mechanics; large numbers of them are to be found in Algeria, Gibraltar, the Regency of Tunis, Egypt, Canada, Australia, and the United States

Currency and Banking.

The legal tender currency is, under Order in Council of September 24th, 1886, and Ordinance I of 1929, exclusively British. There are two local banks (Banco di Malta and Anglo-Maltese Bank), and branches of Barclays Bank (Dominion, Colonial and Overseas), the Banco di Roma, and the Crédit Foncier d'Algérie et de Tunisie. There is also Scicluna's Bank which is a private bank. The amount of British Treasury currency notes and Bank of England notes in circulation on 31st March, 1934, was roughly estimated at 650,000t. The Government savings bank was established in 1833. On 31st March, 1934, the deposits amounted to 1,318,279t. with 12,956 depositors.

Means of Communication.

Motor char-a-hancs services run between all the towns and villages. The telephone service is now under Government control with an exchange at No. 3 Strada Forni, Valletta, and with 896 miles of wires. Malta is a station of the Eastern Telegraph Company, with direct cables

MALTA.

to Alexandria (3), Gibraltar (3), Bone (2), Messina (1), Tripoli (1), Sicily (1), and Zante (1).

Malta is a port of call for nearly all the Mediterranean lines of steamers, and is an important coaling station, facilities being given for coaling at any hour, day and night. There is direct mail communication with several Mediterranean ports and with England. The rates of postage are as follows:—

Letters:

To the United Kingdom, British Dominions,
Protectorates and Colonies, the U.S.
America, Tangier and H.M.'s Forces

First oz., 11d.; every additional oz., 1d.

To other countries and places

Local $\ddagger d$. for each 2 ozs. In the case of a local newspaper exceeding in weight 2 ozs., the rate will not be more than $\ddagger d$. Foreign $\ddagger d$. for each 2 ozs.

Public Works.

The drainage of the fortified towns, which was commenced in 1876 at the joint charge of the Colonial and Imperial Treasuries, was completed in 1885, and greatly improved their sanitary condition. New drainage works were commenced in 1899, and Cottonera, Sliema, St. Julian's, Misida, Pietà, Calcara, Zabbar, Hamrun, Curmi, Notabile, Rabat, Tarxien, Paula, Zeitun, Birchircara, Balzan and Attard, parts of Casal Lia, and Luca and other places have been drained. Small extensions are also being continually made in new streets as they are opened in the towns and villages. The intercepting sewers to C. Axiak, Musta and Zebbug have also been started. The drainage of Gozo has also been commenced and Victoria, Sda. Fontana and Ghainsielem have been drained. Considerable progress has been made in improving the roads and streets in accordance with the exigencies of modern traffic. The main roads are being asphalted. So far 47 miles have been surfaced with sheet asphalt and 60 miles with full grouting, semi-grouting and surface asphalt dressing.

The water supply is now extended to all the villages in Malta and Gozo, and works of considerable importance are carried out each year to augment

and improve it.

Electric current for lighting and power has been extended to all the towns in Malta, and to all the villages, with the exception of a few of the smaller ones situated at a distance from the supply area. In Gozo current is available only in the chief town, Victoria, which has its own generating station.

Constitution.

A Council of Government, partly elected, was constituted by Letters Patent in 1849, and reconstituted in 1887, the Letters Patent being amended in

1898 and again in 1903.

By Letters Patent dated April 14th, 1921, responsible government was established in Malta. The Letters Patent were proclaimed by the Governor at Valletta on 30th April, 1921, and became fully effective when, elections for the Senate and Legislative Assembly having been held, the newly constituted Legislature was formally, on 1st November, 1921, declared open in His Majesty's name by H.R.H. the Prince of Wales.

The previously existing Council of Government gave place to a Legislature composed of two Houses—the Senate and Legislative Assembly.

397

This constitution was suspended from 1930 to 1932 and again on the 2nd November, 1933, the Senate and Legislative Assembly being dissolved from the same date.

According to the Letter Patent of the 16th August, 1934, the English language, as the official language of the British Empire, and the Maltese language as the language of the people of Malta, and the Italian language, shall be the official languages of Malta. The English language shall be the official language of administration, and all official records and public documents shall be in that language, without prejudice to Maltese and Italian being used in addition to the English text where desirable and convenient. No legislative or administrative act may be done which will diminish or detract from the position of the English or Maltese languages, or tend to restrict their use in education or the public service. The English and Italian languages are recognised as equal languages of culture in Malta at the University and the Secondary Schools as subjects of study.

Maltese is now the official language of the Courts, but English-speaking persons and Italian-speaking persons charged with a criminal offence have the right to apply for the proceedings to be held in English

or Italian.

English and the Maltese language, which is the language of general intercourse among all classes in the Islands, are the languages of instruction and study in the Elementary Schools.

Finance.—The revenue from all sources is paid into a Consolidated Fund, out of which the Public Service is supplied.

Appointments to Public Offices in Malta are made by the Governor. The Crown reserves power at any time to revoke or amend all or any of the provisions relating to reserved matters, religious toleration, language generally, and the Reserved Civil List.

The Reserved Civil List covers the charges for the Maltese Imperial Government (that is for the Governor's salary and establishment, and the salaries and establishments of the Lieutenant-Governor and Legal Adviser), and also the Judges' salaries.

Education and Religion.

Elementary education is carried on principally in Government schools, which are Roman Catholic and free. There are two secondary schools with 249 scholars, 4 central schools and 90 elementary schools and 62 night schools with an average enrolment of 29,564 pupils, and an average attendance of 25,611. There is a public Lyceum with 680 day scholars, and 310 who attend evening classes, and a university (founded in 1769) with an average attendance of about 180 students. At these two latter institutions the fees are comparatively low, ranging from 80s. to 120s. per annum in the Lyceum and 6l., exclusive of laboratory and other fees, per annum for all lectures in the University. There are numerous private, elementary and secondary schools. The total number of these schools is about 43, with an approximate attendance of 3,627 pupils. Education is not compulsory, but attendance is obligatory for all pupils on the registers of a Government Elementary School.

The Roman Catholic Religion is by law the religion of the country, but full liberty of conscience and freedom of worship are guaranteed, and persons of any faith may hold any office.

Customs Tariff.

Until 1917, only specific duties were levied, the main headings being Grain, Wine, Beer, Spirits,

Cattle, Petroleum, Sugar and Tobacco.

In January, 1917, ad valorem duties, varying from 5 per cent. to 20 per cent. were introduced, embracing all commodities not already affected by specific duties, and not included in a list of exempted articles which :-

- (a) Under Food and Drink shows Butter, Cheese, Coffee, Milk (fresh or preserved), Eggs in the shell, Tea and Cocoa, and certain other articles;
- (b) under Raw Materials and Articles mainly unmanufactured shows Coal, Coke, Patent Fuel and Fuel Oil, Sponges, Vegetables and Flower Seeds and certain other articles
- (c) under Manufactured Articles, includes Agri-cultural Machines, Books, Cinema Films, wrapping and printing paper, Laundry Soap of British Empire origin, Yarns for lace-making and weaving, Twines for industrial purposes, certain materials used for capmaking, shoemaking, and bag-making, and certain articles used for divine worship;
- (d) under Miscellaneous and Unclassified Articles includes articles imported by Government Departments—Bran not containing more than 5 per cent. Flour—Bullion and Specie, and Engravings, Drawings and Paintings representing Maltese views and subjects of local interest.

In 1934 Empire Preferential duties were adopted. These duties affect boots and shoes, spirits, leaf tobacco, arms and ammunition, articles of gold, silver and platinum and plated goods, confectionery and chocolate, furniture and cabinetware, motor vehicles, pianos and organs, and a number of articles falling under the designation of "Goods un-enumerated." The preference in the case of motorvehicles is 20 per cent., the remainder of the ad-valorem goods enjoying a preference of 10 per cent. as against the rates for the General Tariff.

The general tariff shows an addition over the Empire Preferential Tariff of 50 per cent. in the case of boots and shoes, is. per litre for spirits, and 6d. per kilo for leaf tobacco.

The amount of duty collected in 1933-34 from specific duties was 407,905l. and from ad valorem

duties was 123,6951.

The value of imports in 1933 from the United Kingdom was 991,7771., from other parts of the British Empire 196,1711., and from foreign countries 2,269,9901. the respective percentages of imports being:—United Kingdom 28-7 per cent., other parts of the British Empire 5-7 per cent. and Foreign

Countries 45.6 per cent.

The value of domestic exports in 1933 to the United Kingdom was 11,590t., to other parts of the British Empire 7,875l., to Foreign Countries 118,434l., and as Ships' Stores 5,546l. The respective percentages were to United Kingdom 8-1 per cent., to other parts of the British Empire 5-4 per cent., to Foreign Countries 82-6 per cent., Ships' Stores 3.9 per cent.

The value of re-exports in 1933 to the United Kingdom was 13,607L, to other parts of the British Empire 483L, to Foreign Countries 72,442L, as Ships' Stores 30,648L, and as Bunkers 74,754L

The respective percentages for re-exports were, United Kingdom 7-0 per cent., other parts of the British Empire 0-3 per cent., Foreign Countries 37-8 per cent., Ships Stores 16-0 per cent. and as Fundam 28-0 per cent. Bunkers 38-9 per cent.

All the foregoing figures are exclusive of Bullion

and Specie.

The total percentages of trade compared with the whole import and export trade of the Island (Imports,

Domestic Exports and Re-exports), for the respective destinations are as follows:-

United Kingdom		••		26.8%
Other parts of the	Britis	h Em	pire	5.40
Foreign Countries		••	٠.	64-8%
Ships' Stores				1-0%
Bunker Coaling				2.00

Revenue.

The most important sources of revenue are the Customs duties, licences, stamp duties, succession and donation duties, fees of office and reimbursements, post office, water and electricity receipts. land revenue, interest, and Public Lotto profit.

Public Debt.

There is, strictly speaking, no public debt in Malta, but interest at 2½% is paid by the Government on 79,081*l*. outstanding balance on 31st March, 1934, of the debt known as "Massa Frumentaria," incurred by the Municipality of Valletta under the Government of the Order of St. John of Jerusslem, in connection with the monopoly of the trade of wheat. The funds of the "Massa Frumentaria" were, in 1798, appropriated by the French Government, then in occupation of the Island.

Governors since 1834.

- 1884 Field-Marshal Sir John Lintorn Arabin Simmons, G.C.B., G.C.M.G.
- 1888 Lieut.-Gen. Sir H. D'O. Torrens, K.C.B., K.C.M.G.
- 1890 Lieut.-Gen. Sir Henry Augustus Smyth, K.C.M.G., R.A.
- 1893 Gen. Sir Arthur James Lyon Fremantle, G.C.M.G., C.B.
- 1899 Lt.-Gen. Sir Francis W. Grenfell, G.C.B., G.C.M.G.

L.; C. J. Flore. Psaila Cumbo, D.D.; P. Busuttil; C. J. Flores; Rev. G. Lubrano, D.D.; R. Cachia; J. P. Vassalio, 2501, to 3501, each; V. Frendo Azopardi, LL.D.; G. Tonna Barthet; Rev. A. E. Mattocks, Ph.D.; G. Curmi, LL.D., F. Caruana Galizia, A. & C.E.; G. de Zuccoli, B.Litt., 1901. to 2901. each; Rev. G. Aquilina, D.C.L., D.D.; R. Bisazza; G. Xuercb; A. Cavarra; S. Mizzi; E. Craig, Ph.C.; O. Rizzo, A. & C.E., R. Gauci, A. Buttigieg: J. Grima; G. Zammit, B.Litt; C. Vassallo, B.So., Ph.C.; G. V. Parker, 1501. to 2001.

Lecturer on Marine and Electrical Engineering, Prof. W. F. Nixon, B.Sc., A.R.C.Sc., Wh. Exh., 190/. to 220l.†

Secondary Schools.

Secondary School for Girls, Malla.

Head Mistress, Miss L. Caruana, 1901. to 2501.

Secondary School for Boys, Gozo.

Master-in-Charge, Mr. V. Calleja, L.P., 2201. to 2501

• Receives also 1951, to 2601, p.a. as Professor of Physics.

† Receives also 2001. to 2401. as Professor in the University. Digitized by GOOGIC

School of Art and Technical School.

Director of the School and Teacher of Painting, E Caruana Dingli, 260l.

Elementary Schools.

Inspector of Elem. Schools, G. A. Sapiano, 2201. to 3201.

Inspectresses of Elem. Schools, Miss M. Gatt, Miss Y. Vassallo, Miss C. Busuttil, 1901. to 2301.
Inspectress of Method, Miss E. Wootton, 1901. to 2301.

Public Library (Malta).

Librarian, H. P. Scieluna, M.B.E., L.P., 4001. Assistant Librarian, Rt. Rev. Mgr. C. Psails, 2301. Writer, Miss H. Castaldi, 1501.

Museum.

Director of the Museum, The Hon. Prof. Sir Themistocles Zammit, Kt., C.M.G., M.D., D.Litt. (Oxon.), 180l.

Curator of the Arts Section and Works of Art, V. Bonello, 2901.

Curator of the Mineralogical Section, Lowis F. Mizzi, C.M.G., LL.D., 1201.

Curator of the Archaeological Section, C. Zammit, 2001. Curator of the Natural History Section, J. G. Baldacchino, M.D., 701.

Public Health Department.

Office.

Chief Government Medical Officer and Superintendent Public Health, The Hon. A. Critien, O.B.E., M.D.,

D.P.H., D.T.M., 620l. Chief Clerk, (Clerk, 1st Class), A. Cesareo, 320l. to 3601.

Clerk, 1st Class, Major R. G. Micallef, 320l. to 360l. Clerks, 2nd Class, Capt. E. A. Gatt, A. Arrigo, A. Pizzuto, 180l. to 290l.

Sanitary Branch.

Medical Officer of Health and Asst. Supt. of Public Health, Prof. A. V. Bernard, O.B.E., D.P.H., M.D., 430l. to 500l. (a)

Medical Officers of Health, Malta, A. Briffa, M.D., 360l. to 430l.; G. Busuttil, M.D., 250l. to 350l. Ditto, Gozo, J. Micallef, M.D., 250l. to 300l.

Sanitary Engineer, L. Agius, A. & C.E., 2401. to 430l.

Government Analyst, Prof. Alex. Sultana, M.D., 3901. to 430l. (b)

Assistant Ditto, Victor J. Mifsud, M.D., P. Farrugia, B.Sc., M.D., 320l. to 360l.

Quarantine Branch.

Quarantine Medical Officer, J. Anastasi, M.B.E., B.Sc., M.D., 3201.*

Assistant Quarantine Medical Officers, G. Galea, M.D., L. Gulia, M.D., 3201.

Veterinary Branch and Slaughterhouses.

Principal Veterinary Surgeon, Malta, T. Mercieca, M.R.C.V.S., F.E.V.M.A., Ed., 4351. Veterinary Surgeon, Malta (vacant). Veterinary Surgeon, Gozo (vacant).

Charitable Institutions.

Comptroller, F. Mercieca, 540l. Chief Clerk, R. E. Peralta, 4101.

Clerk, 1st Class, J. Pace, 320l. to 360l.

Clerks, 2nd Class, A. Salomone, W. Xuereb, 180l. to 290l.

MAURITIUS.

Situation and Area.

Mauritius is an island in the Indian Ocean, between 57° 18′ and 57° 48′ E. long., and 19° 50′ and 20° 31′ S. lat., distant 115 miles from Réunion, 934 miles from Seychelles, 1,300 miles from Natal, 2,000 miles from Cape Comorin, 11,000 miles from England, 2,300 from the Cape of Good Hope, and 500 from Madagascar. It comprises an area of about 720 square miles (nearly equal to Surrey), having an extreme length of 39 miles from north to south, and an extreme breadth of 29 miles from east to west.

The island is chiefly of volcanic formation but is almost entirely surrounded by coral reefs. There are several small chains of mountains but none of great height. The principal peaks are the Piton de la Rivière Noire (2,711 ft.), Pieter Both (2,690 ft.), and the Pouce (2,661 ft.). There are numerous rivers and streams; they flow generally through deep ravines and their course is broken by many small waterfalls and rapids. None of them are navigable beyond a short distance from the sea. The land rises gradually from the coasts, and the centre of the island is composed chiefly of a fertile and picturesque plateau varying in altitude from 1,000 to 1,800 feet. On this high and healthy tableland the temperature and climate are excellent.

History.

The Mascarene Archipelago was probably known to Arab navigators at an early date. A Dutch map copied from Arab sources shows the islands now known as Mauritius, Rodrigues and Reunion under the names of Dinarobin, Dinanora and Margabin, and it is possible that certain islands marked on Idrisi's map (1153) are intended to indicate them also.

There can be little doubt too that the island was visited by the Malays who colonised Madagascar in the 15th-16th century.

But Mauritius history really begins with its discovery by the Portuguese in the beginning of the sixteenth century—probably between 1507 and 1512, but not later than 1527, when the

island is shown on an official map under the name of Santa Appollonia, borne in common with the other islands known later as the Mascarenes (Reunion and Rodrigues) after the great navigator

Dom Pedro Mascarenhas.

The Portuguese named the island Ilha da Cirnos, or Swan Island, from the big birds resembling swans found on shore. They merely used the island as a port of call, without making any settlement. The first settlers were the Dutch. In 1598 a Dutch fleet landed in the South-Eastern harbour of the island, to which its commander, Admiral Wybrandt Van Warwyk, gave the name of Mauritius, in honour of the Statholder, Prince Maurice of Nassau. For many years no attempt was made at colonisation, but from 1638 downwards petty settlements were established at various points, the seat of government being at the place known as Old Grand Port. The colony did not prosper, and was finally abandoned by the Dutch in 1710.

In 1715 the Island was formally taken possession of by the French, but was not actually occupied till 1721, when a small party of colonists were sent out on behalf of the French The island was then East India Company. The island was then named Isle de France. This name was retained until the landing of the English in 1810, when the former name of Mauritius was restored. Of all the Governors of the island, the most celebrated was Mahé de Labourdonnais (1735-1746), "a man of eminent talents" (in the words of Lord Macaulay), who encouraged the cultivation of sugar-cane and introduced many other valuable plants. He was the real founder of the

prosperity of the Isle de France.

In 1767, the French East India Company, having gone into liquidation, handed over the island to the Crown, Jean Daniel Dumas being appointed Governor General for the King, and Pierre Poivre, Intendant. Poivre was a man of great ability; he introduced into the colony cloves and nutmegs secretly obtained from the Dutch Sunda Archipelago. Having purchased the ancient residence of the Company's Governors at Monplaisir, he converted the grounds into a nursery where many useful plants introduced by him were cultivated. On his departure this property was sold to Government, the garden being entrusted to Poivre's friend, Nicolas Céré, under whose able management it became famous under the name of King's Gardens. It is now the Royal Botanical Gardens, Pamplemousses.

In 1771 an epidemic of small pox caused many

deaths among the slave population.

In 1790, at the outbreak of the French Revolution, a Colonial Assembly was elected, which for

13 years governed the island de facto.

In 1792 another very able Governor was sent out from France, Comte de Malartic, who during this troubled period managed to gain the affection of the whole community. In 1803, the Isle de France was taken charge of by General Decaen, appointed Captain General by Napoleon Bonaparte, then First Consul, with instructions to suspend the Colonial Assembly and the Isle de

France's constitution for a period of ten years,
During the long war between England and
France, the Isle de France was a source of great mischief to our merchant vessels, owing to the facility with which sorties were made from its harbour by French men-of-war and privateers; and in 1809 the British Government determined on its capture. The neighbouring islands of Rodrigues and Reunion were taken possession of and several

naval engagements were fought to the credit of both navies. The most famous of these was the battle of the Isle de la Passe, fought in the bay of Grand Port on the 23rd and 24th August, 1810, between four English frigates and two French frigates, a corvette and a captured East Indiaman. The English lost the day, two of their ships having gone on shoals early in the engagement, but the great gallantry shown by both sides has rendered the fight memorable in the annals of the two navies.

A strong expeditionary force was then sent out from the three presidencies of India and the Cape. Twelve thousand troops under General Abercromby were landed, and the island finally surrendered to Great Britain on December 3rd, 1810, the laws, religion, and customs of the inhabitants being guaranteed in the instrument of capitulation.

The possession of the island was confirmed to

England by the Treaty of Paris, 1814.

The first English Governor, Mr. (later Sir) R. T. Farquhar (1810-1823) gained a well-deserved popularity. During his tenure of office, on 25th September, 1816, the fourth part of the town of Port Louis was destroyed by a conflagration. On 28th February, 1818, the island was laid waste by a terrific cyclone, causing immense destruction to property.

In the year 1832, the Council of Government which was established on the 19th August, 1825, was abolished, and a Legislative Council, with half the members official, created. The oaths of office were taken by the new members on the

23rd January, 1832.

On the 1st April, 1835, the emancipation of slaves took place without disorder; but as this new class of free men refused employment as labourers the planters were obliged to resort to this introduction of labour from India which was finally authorised in 1842, under the supervision of an agent residing in India, and which continued, with temporary interruptions, until 1910.

In 1849, the Legislative Council voted the law constituting a municipal corporation for the town

of Port Louis.

During the years 1854, 1856, 1861-62, epidemics of cholera prevailed, of which that of 1854 was the most severe, causing 7,650 deaths.

The year 1864 saw the opening of the North Railway Line from Port Louis to Pamplemousses, the Midland Line being inaugurated two years after.

In December, 1866, malaria broke out with great severity. During the year 1867, 31,758 persons died from fever, including 18,308 in Port Louis. In 1868 and 1874, Mauritius was visited by

In 1868 and 1874, Mauritius was visited by severe cyclones. During the former two spans of the Grand River Railway Viaduct were brought down by the force of the wind. On the 29th April, 1892, one of the most violent cyclones ever recorded ruined a considerable portion of Port Louis, besides causing infinite havoc to buildings and crops. The death roll amounted to 1,232. In order to assist the planters and other owners of immovable property affected by the calamity, a loan of £5000,000 was guaranteed by the Imperial Government.

On the 23rd of July, 1893, part of Port Louis was again destroyed by fire. At the end of the same year ocean telegraphic communication was opened.

In 1902, an outbreak of Surra caused great loss of draught animals, and mechanical means of transport had to be resorted to for the sugar plantations. A number of locomotives and traction engines were introduced, and a loan was raised to enable the planters to lay down tranways, and take other steps to provide for transport.

In 1909, a Royal Commission visited the Island to enquire into the administration and finances

of the Colony.

During the Great War Mauritius suffered in no way by direct action on the part of the enemy. A number of volunteers proceeded to Europe for military service and a "Labour Battalion" was supplied for Mesopotamia.

The enormous rise in the price of sugar brought great prosperity to the Colony, and the gross value of the crop of 1920-1921 is estimated to have been approximately Rs. 250,000,000.

In 1921 investigations of the sanitary and health conditions were made by Dr. Andrew Balfour, C.B., C.M.G., M.D. Many of the works recommended have been carried out.

In 1923 the Indian Government consented to the resumption of immigration of labourers from India consequent on the repeal of the penal clauses of the Labour Law of 1878 affecting

labour.

Immigration was accordingly resumed for a period of 12 months ending on 31st May, 1924, but with disappointing results, most of the immigrants having returned to India by the end of the same year.

In March, 1931, a cyclone lasted three days and caused considerable damage to property. In the same year a Financial Commission visited the Island to enquire into the public finances.

General Description.

The permanent settled population of European race is greater in Mauritius than in any other tropical colony of its size. Many of the inhabitants are descendants of the ancient French noblesse. The higher and middle classes possess much intellectual culture.

Six daily newspapers and twenty other periodicals are published in the capital. The French language and a creole patois are spoken all over the island, English being used in the supreme court of justice. Debates in the Council of Government may take place in either language.

Mauritius is divided into nine districts, Port Louis, Pamplemousses, Rivière du Rempart, Flacq, Grand Port, Savanie, Moka, Plaines

Wilhems, and Black River.

The City of Port Louis is the capital, and seat of Government, and contained, with its suburbs, an estimated population of 54,290 on 31st December, 1931. The harbour is one of the best in the East, and is sufficiently spacious to receive a large number of vessels. It possesses three graving docks.

Works for the reconditioning of the Harbour and improvements thereto have been carried out. The Harbour is defended by Fort Adelaide (the citadel) and by Fort George. There are large barracks and military stores. The trade of the island passes almost entirely through Port Louis. The city has an elected municipal corporation, and raised in 1933 a revenue of Rs. 625,820.57, against an expenditure of Rs. 671,204.73. Its debt amounts to 36,3307, and 442,4007, at 31st Dec., 1933.

The principal public edifices of Port Louis are the Government House, the Institute, the Roman Catholic and Anglican cathedrals, the Civil Hospital, the Town Hall, the theatre, and the public offices. There is a racecourse most beautifully situated in the Champ de Mars.

A sewage scheme, designed by Messrs. James | Mansergh & Sons, provides for the disposal of the sewage of the central part of the town.

After Port Louis, the largest town is Curepipe, incorporated in 1890 (population 19,421, census of 1931), situated on the uplands in the Plaines Wilhems district.

In the district of Grand Port is the small town of Mahebourg (population 7,698, census of 1931), so called in honour of Mahé de Labourdonnais.

Population.

At the Census of 1931 the population of Mauritius (exclusive of the Dependencies and Military) was found to consist of :-

Persons of European, African, or mixed

descent		•				115,666
Indian po	pulat	ion	•••	•••	•••	268,649*
Chinese	•••	•••	•••	•••	•••	8,923

393,238

The total number of Indians was 68.3 per cent. of the total population.

At the Census of 26th April, 1931, the Civil

population numbered 393,238.

The descendants of the immigrants from India -the Indo-Mauritians-now form the largest section of the population; they are steadily increasing in numbers. They are predominant in the domestic, commercial, and still more in the agricultural callings, and the amount of land held by them as small planters is rapidly growing.

Constitution.

The constitution of Mauritius was altered in 1884-85 and in 1933. It now consists of a Governor, with an Executive Council of four ex-officio and two un official members, and a Legislative Council of twenty-seven members, eight being ex-officio, nine nominated by the Governor, and ten elected-two for the town of Port Louis, and one for each of the eight rural districts. At least two-thirds of the nominated members must be persons not holding any public office. Under the revised Constitution of 1933 the Governor is empowered to override a majority vote of the Council for the enforcement of any measure which he considers necessary in the interest of public order, public faith or other essentials of good government. Members are not paid; they may speak either in French or English. The number of registered electors on 31st December, 1933, was 10,303; the franchise qualification is ownership of immovables of annual value of Rs. 300, or movables worth Rs. 3,000, or payment of rent of Rs. 25 monthly, or of license duty of Rs. 200 annually, or receipt of salary of Rs. 50 monthly. The session usually lasts from April to December.

The law is based on the Code Napoleon, and other French laws modified by Colonial Ordinances.

Climate and Rainfall.

From December to April is the hottest season in Mauritius, but it is comparatively cool during the remainder of the year. The mean temperature of Port Louis is 25.1° C., the mean annual rainfall 40 inches and the mean relative humidity 72 per cent. The mean temperature of Curepipe, at about 1,800 feet above sea level, is 19.7° C., the

mean annual rainfall 122 inches, and the mean relative humidity 87 per cent. The official cyclone season extends from November to the middle of May, but cyclones have occurred in the South Indian Ocean in every month of the year except August.

During cyclones over 30 inches of rain have occasionally been registered in 24 hours.

Water Supply.

The Town of Port Louis is supplied by the River, N.W. This source is not Grand Two reservoirs have altogether satisfactory. been constructed by the Government to ensure a better supply to the town. The erection of a chlorination plant with filter beds at Grand River, N.W., to purify the water, has been completed. Besides this supply of about 5,000,000 gallons per 24 hours, Port Louis has been provided with a supply of Mare-aux-Vacoas water. 1,000,000 gallons per 24 dours is available for supply.

The Mare aux Vacoas works were started by the Government in 1895, and were extended by the addition of a filtering plant. The whole of the district of Plaines Wilhems, a part of Moka, and a part of Black River and Port Louis are now supplied with pure water from these works.

The water supply of other districts is under the control of Local Boards and with the cooperation of the Government, works have been undertaken to distribute water from upland springs to the villages in the country districts; these works are now completed.

Irrigation.

Important schemes have been in progress in recent years. A reservoir, with an area of 562 acres and a capacity of 416 million cubic feet has been constructed at "La Ferme," in the District of Black River, and about 4,000 acres of land are now under irrigation.

Another reservoir of an extent of 273 acres and a capacity of 204 million cubic feet has also been constructed at Nicoliere in the District of Pamplemousses and has been connected to high rainfall region by a canal 17 miles long.

Railways.

There are seven lines of railway, all owned and worked by Government, viz.: (1) The North line, from Port Louis to the sea coast village of Grand River South-east. Its length is 331 miles, and its course is approximately parallel to the northern coast line of the island. (2) The Montagne Longue branch from Terre Rouge station on the North Line to the village of Montagne Longue; its length is 31 miles. (3) The Midland line, beginning at Port Louis and running across the island to the sea coast town of Mahebourg on the other side; its length is 35½ miles, with a summit level of 1,822 feet at Curepipe; the gradient in many places is 1 in 26. Four miles of this line have been doubled and opened for traffic. (4) The Moka-Flacq line from the Rose Hill station on the Midland line to Montagne Blanche, length 147 miles. (5) Savanne branch from Rosebelle station on the Midland line to the sea coast town of Souillac at the southern extremity of the island; its length is 11 miles. (6) Black River branch, from Richelieu on the Midland line to Tamarin, distance 124 miles. (7) Rivière du Poste to Mexico and Richebois, length 134 miles. All the above are of standard gauge, 4' 81", except the 7th which is 75 centimetres (2 6"). The total

[.] The Indian section comprises those members of the population following the customs and religions of India.

number of miles of railway now open is 1103 of standard gauge and 133 of 2' 6" gauge, the total cost up to date being about 2,082,2457. The receipts in 1933-34 were Rs. 1,936,870 and Working Expenditure Rs. 1,774,935.

Religion.

The Christian Churches are assisted by State grants. According to the census of 1931, the Roman Catholics numbered 126,153, and the Protestants about 4,466, including Dependencies and Military. The Roman Catholics receive an annual grant from Government amounting to Rs. 146,743, the Protestants Rs. 46,659, and the Church of Scotland Rs. 9 528.

Education.

The system of education had been remodelled by Ordinance No. 33 of 1899, which repealed all former enactments. This Ordinance was amended in some important respects by Ordinance No. 35 of 1913.

Under the Education Ordinance of 1899, a Department of Public Instruction was created under a "Director of Public Instruction."

This system remained in force until it was superseded by the Education Consolidation Ordnance of 1919, under which the Department of Public Instruction was replaced by a Royal College Department and a Schools Department, the post of Director of Public Instruction being abolished. The Rector is the Head of the Royal College Department; and the Superintendent of Schools of the Schools' Department.

The Royal College, which has now a branch in Port Louis called "The Royal College School, Port Louis," provides for the Secondary Education of Boys. A Committee styled the "Royal College Committee," is annually appointed by the Governor to advise in the framing of Regulations and to act as a consultative body. It consists of the Rector as Chairman, and of six members chosen by the Governor. Twenty Scholarships and Exhibitions tenable at the Royal College are competed for annually by Primary School pupils; fourteen Scholarships and Exhibitions are open each year to College pupils, and there are awarded annually two Scholarships tenable at a British University, of a total value of about £1,300.

The Schools' Department provides for Primary, Secondary, and Technical and Industrial Education:—

- Primary Education is carried on through a system of Government Schools and of Grant-in-aid Denominational Schools, the latter under the immediate control of local managers.
- (2) Secondary Education is provided by means of a system of Grant-in-aid schools for boys and girls.
- (3) As regards Technical and Industrial Education, provision is made for the training of students in Engineering (Mechanical and Civil). A consultative committee styled the "Schools Conmittee," similar to that of the Royal College, is annually appointed by the Governor. It consists of 10 members: five members are nominated by the Primary and Secondary Grant-in-aid Schools and four are chosen by the Governor, with the Superintendent of Schools as Chairman.
- (4) A sum of Rs. 500,000 has been set aside from the Colony's Surplus Balances as a "Scholar-

ship Fund." The interest on this amount is devoted annually to provide furtier facilities, in the shape of scholarships and educational grants, for young Mauritian in the Government service and on leaving school to pursue their studies and obtain higher technical qualifications.

Higher Education.

On the books of the Royal College and its Branch on the 31st December, 1933, there were 397 pupils.

Primary Education.

Government schools			51	14,867
Grant schools	•	•	75	23,500
			_	

Total . . 126

38,767

The total expenditure on education in 1932-33 amounted to Rs. 1,301,041. There are more than 1,000 masters, mistresses, assistants, and monitors and monitoresses employed in Government and Grant Schools. Of the pupils in the aided schools 47:0 per cent. are Roman Catholics, 1:5 per cent. belong to the Church of England, and 1:0 per cent to other Christian denominations. Four Hindoo and two Moslem schools are also assisted.

Agricultural Education.

To facilitate higher agricultural education, a small Agricultural College has been established. Lectures on Agricultural Science are occasionally made to Primary School Teachers by the Department of Agriculture.

Communications.

Postal communication with Europe is chiefly maintained vid Suez, by the Indian Ocean Line of the Messageries Maritimes, which provides a regular fortnightly service.

Mails are otherwise sent or received through South Africa. The only regular service by this route is being provided by the Koninklijke Paketvaart Maatschappij (K.P.M.) Java-Mauritius-Africa Line. Other opportunities through South Africa are irregular, though not infrequent and are provided by tramp steamers and occasionally by a Union Castle, or Clan Line vessel.

Air mails for Europe are sent by steamer to Mombasa, for inclusion at Nairobi in the Kenya air mail, and also to Durban for inclusion at Johannesburg in the S.A. air mail, and service through Madagascar is contemplated.

With India and Ceylon communication is also maintained regularly by the Massageries Maritimes Packets, vid Mombasa or Aden. This is also the usual route for Australia with transit at Colombo.

The British India Steam Navigation Company also runs an occasional steamer between Colombo and Mauritius and vice versa.

With the neighbouring islands of Réunion and Madagascar communication is frequent by trading vessels, apart from the regular M.M. Packets.

Wireless communication is maintained with ships at sea within a range of 2,800 miles and with the Reunion land station.

Cable communication with every part of the world is provided by the local station of the Eastern and South African Telegraph Company.

Government land telegraphs and telephones (including Railway Block Telegraph and Railway Traffic Control Telephone) extend to 545 miles of telegraph and 386 fniles of telegraph and 386 fniles of telegraph.

Private telephone communication is provided by the Oriental Telephone Company in the capital, Port Louis, and the two most important rural districts, Plaines Wilhems and Moka.

There are in Mauritius the General Post Office in the city of Port Louis, and 59 branch post offices in the rural districts, 59 money order offices, 49 telegraph and 10 telephone offices. In the island of Rodrigues there is one post office at Port Mathurin and also a station of the Eastern and South African Telegraph Co. There is no post office in any other of the Dependencies.

The rates of postage are :-

Commerce.

The island produces barely one-tenth of the food required for its inhabitants and almost all agricultural enterprise is devoted to the production of exports.

The chief exports are sugar, copra, aloe-fibre, raw hides, &c. Food-stuffs are principally imported from India; manufactured articles from

England, oxen from Madagascar.

The imports consist mainly of grain (rice, wheat flour, &c.), sotton manufactures, motor spirits and coal, iron and steel goods and fertilizers. Considerable progress has been made in the tobacco industry; factories have been opened in Port-Louis and efforts are being made to establish an export trade. Other new industries include a textile industry for providing bags for sugar, fruit canning, and the manufacture of matches. About 95% of the value of the exports consists of shipments of sugar. In 1933, the weight of sugar exported was 226,651 metric tons with an estimated value of Rs. 30,811,638. The value of copra or poonac exported was Rs. 201,393; aloe-fibre, Rs. 87,802; fruits, preserved, Rs. 46,412.

The Customs Tariff is mainly on a specific basis, but important classes of goods pay ad valorem duties. It includes provisions for preference on numerous items of Imports from the British

Empire.

The trade percentages were as follows :-

	1932,	1933.
United Kingdom Other parts of British Empire Foreign Countries	61.0 23.4 15.6	66·2 18·6 15·2
	100.0	100.0

The number of vessels registered at Port-Louis is now 11 of a total tonnage of 1,305.

Currency and Banking.

The Mauritius Commercial Bank has establishments in the Colony, the total amount of deposits on 30th June, 1934, being Rs. 8, 101, 967-29 with paid up capital of Rs. 2, 000, 000.

The Bank of Mauritius (Limited) was established in October, 1894, with paid up capital of 125,550..., and opened in Mauritius in Dec., 1894. The business of that bank was taken over by the Mercantile Bank of India Limited on the 3rd May, 1916. Total deposits on 30th June, 1934, Rs. 2,707,275 20. The total paid up capital is now 1,050,000.

The National Bank of South Africa, now Barclays Bank (Dominion, Colonial and Overseas), has opened branches in the Island since 1919. The paid up capital being 4,975,500\(\ell\), and the total amount of deposits on 30th June, 1934, Rs. 2.588.318.

A Government savings bank was established in 1837. The total deposits during the year ended 30th June, 1934, amounted to Rs. 1,486,308-29. The sum standing to the credit of depositors at the end of June, 1934, was Rs. 5,401,710-09.

All accounts are kept in rupees and cents of a rupee, which is the currency of the island. A new Government note issue was established in 1934, the notes being legal tender to any amount. The average circulation for the year 1933-34 was Rs. 7,300,000.

Weights and Measures.—The Metric System, as regards weights and measures, came into force on the 1st May. 1878.

DEPENDENCIES.

The dependencies of Mauritius comprise a large number of islands scattered over the Indian Ocean. Rodrigues, the most important, is situated in latitude S. 19° 44' and longitude E. 63° 34', and

latitude S. 19° 44′ and longitude E. 63° 34′, and is 344 nautical miles from Mauritius. The island which has an area of 42 sq. miles, about 26,000 acres, is 18 miles long by 7 miles broad, and is surrounded by coral reefs, extending in some places 5 or 6 miles from the shore. It is under the administration of a magistrate, who takes his instructions from the Governor of Mauritius. Laws for the island are made in the form of regulations framed by the Governor of Mauritius in Executive Council. The estimated population at 31st December, 1933, was 8,950. The birth rate in 1933 was 43°7 and the death rate 12 per 1,000. Cable communication, through a branch of the Eastern and South African Telegraph Company, was opened on 16th May, 1902.

The island, which is volcanic, mountainous, and in some parts well wooded, is beautiful and picturesque in the extreme. The highest land is 1,760 feet above the level of the sea, and may be seen in clear weather at a distance of 10 or 12 leagues. The temperature differs little from that of Mauritius, although the breezes are stronger and hurricanes more frequent and severe. The

climate is healthy. The principal industries are fishing and the rearing of cattle and goats, for which latter the pasturage is excellent. The soil is good: cetton, coffee, tobacco, maize, beans, and vanilla grow luxuriantly; a trained officer has of late (1921) been appointed Agricultural Superintendent in view of the agricultural development of Rodrigues. The wild guinea fowl and partridges, likewise the deer and wild pigs, which used to be plentiful, have almost disappeared.

The value of the imports in 1933 was Rs. 266,734. The exports of the island produce in 1933 were valued at Rs. 254,414. The people are all peasant proprietors and there is abundance of food.

The principal exports are beans, maize, salt-fish, cattle, goats, pigs, poultry, tobacco-leaf and acacia seeds.

Communication with Rodrigues is maintained by a chartered steamer and occasional sailing vessels.

Diego Garcia (population, 455, census 1931), the most important of the Oil Islands group, consists of four islands, at four days' steaming from Mauritius, the chief one being about 30 miles in length, extending in an irregular horseshoe shape, and embracing between its extremities three minor islets. It is a coral atoll, fifteen miles by six and a half, nowhere over ten feet high, but forming a spacious bay, roomy enough for large vessels to enter, being fifteen miles in length from end to end, and from two to five miles in breadth.

Diego Garcia is situated at 7° 20' latitude S. and 72° 26' longitude E., on the straight line between the entrance to the Red Sea and Cape Leeuwin. In 1885 it was placed under the jurisdiction of a magistrate, with a small force of police from Mauritius, which was, however, withdrawn in 1888.

The population of the smaller Dependencies, according to the 1931 census, was 1,457 and is estimated at 1,360 on 31st December, 1933.

Treasurer, C. H. Watts, Rs. 15,000.

General Branch.

Assistant Treasurer, G. B. Stooke, Rs. 9,000. Head Accountant and Chief Examiner, N. Decotter, Rs. 8,000.

Revenue Surveyor, E. Lagoarde, Rs. 9,000.

AUDIT OFFICE.

Auditor, J. C. A. Jenks, Rs. 12,000. Assistant Auditor, J. L. Tadman, Rs. 8,000.

PUBLIC WORKS AND SURVEYS. Director of Public Works and Surveys, Major F. Régnard, R.E., Rs. 15,000. Deputy Director, A. Vallet, Rs. 13,500. Executive Engineer, X. Koenig, Rs. 9.000. Water Works Engineer and Surveyor, L. S.

Pelte, Rs. 10,000. Chief Clerk and Accountant, R. Toureau, Rs. 7,500.

CUSTOMS DEPARTMENT.

Collector of Customs and Registrar of Shipping, Capt. B. A. Francis, O.B.E., Rs. 15.000. Deputy Collector, T. F. Doyle, Rs. 11,000. Supervisor of Customs, A. T. Shill, Rs. 9,000.

HARBOUR DEPARTMENT.

Harbour Master and Superintendent of Mercantile Marine and Collector of Customs, Capt. B. A. Francis, O.B.E. (see under Customs Department).

Port Captain, V. R. Morin, Rs. 8,000 and quarters. Pilot, G. Bétuel, Rs. 5,000.

REGISTRAR GENERAL'S DEPARTMENT. Registrar General, L. R. Giraud, Rs. 12,500.

Registration and Mortgage Branch. Assistant Registrar General, (vacant) Rs. 8,000, personal allowance, Rs. 1,000.

Archives Branch.

Custodian of Archives, E. Perdrau, Rs. 4,000-Rs. 5,000.

POSTAL AND TELEGRAPH DEPARTMENT.

General Postmaster and Superintendent of Telegraphs, H. W. Lavers, Rs. 10,000. Assistant General Postmaster and Superintendent of Telegraphs, (vacant), Rs. 8,000.

IMMIGRATION AND POOR RELIEF DEPARTMENT. Protector of Immigrants and Poor Law Commissioner, L. Collet, Rs. 12,000.

MEDICAL AND HEALTH DEPARTMENT.

Director, J. Balfour Kirk, Rs. 20,250.

Deputy Director of Medical Services A. C.

Labauve d'Arifat, Rs. 14,000 and house rent.

Medical Officer of Health and Port Health
Officer, Dr. L. M. J. R. Pilot, Rs. 9,500-12,000. Pathologist, Dr. A. R. D. Adams, Rs. 9,000-12,000 and quarters.

Superintendent, Mental Hospital, Dr. D. Dyson, Rs. 12,000.

Superintendent, Civil Hospital, Y. Cantin, Rs. 12,000.

Superintendent, Victo Duverge, Rs. 12,000. Victoria Hospital, Dr. L. R.

Medical Officers, Drs. H. Andre and J. Maingard, Rs. 7,000-10,000 (plus an allowance of Rs. 2,000); W. Dupré, Rs. 9,000-10,000; S. H. Piarroux, R. Laventure, Roger Pilot, J. Cantin, R. Lavoipierre, Rs. 7,000-10,000 and two va-cancies; V. P. Goupille, L. N. R. Comty, F. Pierre, F. Bouloux and E. Brunel, Rs. 7,000-8,500 and one vacancy.

Accountant, L. Besson, Rs. 7,500.

DEPARTMENT OF AGRICULTURE.

Director, G. E. Bodkin, Rs. 16,665 and quarters. Senior Geneticist, A. G. Hill, Rs. 12,000 and quarters.

Bio Chemist, N. Craig, Rs. 10,000.

Physiological Botanist, H. Evans, Rs. 9,000-10,000 and quarters.

Senior Agricultural Officer and Instructor and Inspector, Co-operative Societies, C.A. O'Connor, Rs. 7,000.

Issistant Registrar Co-operative Credit-Societies,

M. Burrenchobay, Rs. 5,000-6,000. Assistant Entomologist, A. Moutia, Rs. 5,000-

6,000. Botanist and Mycologist, E. S. Shepherd, Rs.

7,500-8,500. Veterinary Surgeon, F. E. Lionnet, Rs. 7,500-Digitized by GOOGIC

[†] Of which Rs. 10,000 is drawn by the O.A.G. when the Governor is absent on full pay leave.

Assistant Chemist, R. Lincoln, Rs. 5,175-5,500. per allowance Rs. 1.500. Irrigation Officer, E. Lesur, Rs. 5,000-6,000. Statistican, M. Koenig, Rs. 8,000.

Sugar Technologist and Lecturer in Sugar Technology, L. Baissac, Rs. 9,000.

Government Tobacco Officer, G. Corbett, Rs. 9,000.

DEPARTMENT OF FORESTS.

Director, G. N. Sale, Rs. 12,000.
Assistant Director, P. de Carcenac, Rs. 7,000-9,000.

MUSEUM AND PUBLIC LIBRARY. Librarian and Curator, R. E. Hart, Rs. 4,485.

ROYAL ALFRED OBSERVATORY. Director, N. R. McCurdy, Rs. 12,000-15,000. Assistant Director, M. Herchenroder, Rs. 6,000-7,500.

JUDICIAL ESTABLISHMENT.

Supreme Court.

Chief Judge, P. B. Petrides, Rs. 24,000. Puisne Judges, L. Leconte, and G. T. Watts, Rs. 15,000.

Master and Registrar's Office and Curator Accountant's Office.

Master and Registrar, G. Espitalier-Noël, Rs. 12,000.

Registrar in Bankruptcy and Chief Clerk, L. Delafaye, Rs. 6,000. Curator Accountant, G. Koenig, Rs. 7,500.

Procureur-General's Department.

Procureur and Advocate General, G. E. Nairac, K.C., Rs. 20,000.

Substitute Procureur and Advocate General, M. de Commarmond, Rs. 13,500.

Additional Substitute Procureur and Advocate General F. Herchenroder, Rs. 11,000. Crown Attorney, C. Grégoire, Rs. 11,000.

District and Stipendiary Magistracies.

E. Duvivier, L. Ulcoq, M. Vigier de Latour, A. Legras, P. K/Vern, J. B. Colin, W. J. Hanning, and one vacancy, Rs. 9,000-12,000.

POLICE DEPARTMENT.

Inspector-General and Superintendent of Prisons, R. Deane, O.B.E., Rs. 13,500.

Deputy Inspector-General, H. Coombes, Rs. 9,000. Inspectors, E. E. Cesar, H. C. F. Rodda, P. D. Julien, H. R. Old, L. S. Parke, L. S. Gerald J. E. Guichard, and Major J. P. Magrane, Rs. 5,200-7,200, and quarters, or lodging allowances,

and H. S. Rolfe, Rs. 6,000.

Sub-Inspectors, G. Bagoban, C. A. Lavictoire, C. Mason, J. V. Mullin, M. T. Williams, R. Venchard, J. E. Moussie and M. Hitié, Rs. 3,600-4,800, with quarters, or lodging allowance, and travelling allowance. Pay and Quarter Master, T. Lagaité, Rs. 4,000-

5,000, and house rent.

PRISONS DEPARTMENT.

Superintendent of Prisons and Reformatory.* Chief Warders, J. F. Henry Rs. 5,500-6,600; and H. Newlands, Rs. 4,600-5,500 and quarters. Assistant Chief Warders, J. H. Beadles and W. Pyemont, Rs. 3,450-Rs. 4,140, and quarters.

ECCLESIASTICAL.

Church of England.

Bishop of Mauritius, Right Rev. H. Otter-Barry, Rs. 10,000, and travelling allowance, Rs. 1,000. Archdeacon, H. Rolph, Rs. 4,500.

Civil Chaplain, Port Louis and Curepipe, C. Rodgers, Rs. 3,900. Civil Chaplain, Vacoas and Black River, C. G. Kerslake, Rs. 3,900.

Civil Chaplain, Beau Bassin, Rev. J. H. Duff. Rs. 3,900; and Rose Hill, Rev. D. Dalv. Rs. 3,900.

Civil Chaplain, Moka and Quatre Bornes, Archdeacon, H. Rolph, Rs. 3,900.

Roman Catholic Church.

Bishop of Port Louis, The Rt. Rev. J. Leen. Rs. 10,000, and travelling allowance Rs. 1.000.

Vicar-General, Rev. R. M. Lee, Rs. 3,900, and travelling allowance Rs. 500.

1st Class Priests at Rs. 2,600, Revds. J. Trottet, P. O'Carroll, L. Fressa, J. Mamet, A. Charpiat, J. Fitzpatrick, E. Dabdoub, M. Guerin, C. Streicher, A. Canning, P. Keenan, D. Casev. T. Eckert, F. Durr, M. de Boucherville.

Church of Scotland.

Minister and Chaplain, R. Mackinnon, Rs. 5,200.

EDUCATION.

Rector, Royal College, T. B. Barnes, Rs. 15,000. Masters, R. B. Vaughan, P. Bacon, P. L. Dumas, V. F. Lempriere, H. W. B. Lloyd, J. S. R. Cole, A. D. Porter, J. R. de Lingen Kilburn, E. M. F. Payne, J. Young, Rs. 7,000-9,000.

Gymnastics and Games Instructor (vacant), Rs. 4,000, and personal allowance of Rs. 1,500.

Royal College School.

Headmaster, J. J. Castelain, M.Sc., Rs. 10,000. Master, L. R. A. Glover, Rs. 7,000-9,000.

Government Schools.

Superintendent of Schools, P. Henri, Rs. 11,000.

RAILWAY DEPARTMENT.

General Manager and Engineer of Railways and Docks and Harbour Engineer, H. C. M. Austen, C.B.E., Rs. 22,500 (a).

Assistant Engineer P. Cantin, Rs. 7,500. Chief Accountant, H. W. Winson, Rs. 8,000-

NIGERIA.

Situation, Area and Population. The British Colony and Protectorate of Nigeria

situated on the north-eastern shore of that deep adentation in the western coast of the African tontinent known as the Gulf of Guinea, and is aclosed roughly by parallels of latitude 4° and 14° N. and by meridians of longitude 3° and 14° E. ! It is bounded on the north and north-west by the military territories of the French Sudan, on the the Cameroons, on he east and south-east by the Cameroons, on he south and south-west by the waters of the Julf of Guines, and on the west by the French slony of Dahomey. Its greatest length from to west is 700 miles and greatest breadth rom north to south 650 miles.

Great Britain has received a mandate over a mall portion (amounting to 34,136 square miles) if the former German territory of the Cameroons, which portion has been placed, for purposes of

administration, under the Nigerian Government.

The area of Nigeria, including the area of Ameroons under British Mandate, is approxinately 372,674 square miles (Southern Provinces and Colony 90,896 square miles, Northern Pro-rinces 281,778 square miles. The country is rinces 281,778 square miles. herefore a little less in area than the United Kingdom, France and Belgium together, or about me-third that of British India. The population of Nigeria, excluding the Mandated Territory, on lat April, 1934, was estimated at 19,322,168, and of the Mandated Territory at 780,811.

Physiography.

Topographically speaking, Nigeria consists of the following four main zones or areas :-

(1) An area of swamp and mangrove forest with almost impenetrable undergrowth, running parallel to the coast-line and varying in depth from 20 to 60 miles. This area, which includes the deltaic region of the River Niger, is covered by a network of creeks and traversed by numerous rivers, the most important of which are the Rivers Benin, Forcados (branch of the River Niger), Nun (branch of the River Niger), Som-

breiro, Bonny, Imo, Kwa-Ibo, and Cross.

(2) A belt of dense forest with thick undergrowth extending from the western to the eastern boundary and from 50 to 100 miles in width. The southern border of this area is some 20 miles from the coast-line in the west and thence follows the northern limit of the swamp and mangrove area. Its northern edge is difficult to determine exactly, as the belt gradually changes to patches of forest alternating with thick scrub and grass plains running approximately along a line drawn in a general east-south-easterly direction from about 7° 30' N. on the western border to 6° N. on the extreme east. The country is generally undulating with scattered hills, and an extensive view can seldom be obtained; there are, however, hills rising to over 3,000 feet, and the region becomes mountainous as the Cameroons frontier is approached. The zone is well watered by numerous rivers, which with few exceptions run from north to south, and contains extremely rich oil-palm areas. There are no open spaces, except around villages and clearings for farms.

(3) A zone of comparatively open country gradually developing into park-like land and thence into open expanses covered with high grass as the watershed of the River Benue and that of the Niger (above its confluence with the Benue) are neared. The zone is generally hilly and mountainous on the Cameroons frontier, where heights above 6,000 feet are to be found.

(4) A plateau occupying the greater portion of Nigeria north of the Rivers Niger and Benue. East of longitude 7° the southern limits of this plateau are determined by a zone of hills which succeeds the undulating grass country to the south. The features of the plateau are generally similar, and although many rivers take their rise in this tableland, it is broken to no great extent by their valleys, except in the cases of those of the Rivers Niger and Benue on the south and west. In elevation it does not exceed an altitude of much over 2,000 feet, except in the mountainous parts of Bauchi, where heights of 6,000 feet and more occur, and in the south-west of Yola, which is occupied by a part of the Cameroons mountain system. The surface is generally undulating, marked here and there by hills of granite and sandstone, which rise abruptly from the surrounding land. The country is clothed to a large extent with thin forests which become more and more scanty as the Western Sudan is entered and the arid "steppes" of the Sahara Desert are approached.

Climate.

West Africa formerly had the reputation of being so unhealthy that almost certain death would be the fate of the white man who endeavoured to make it his permanent home. And in this general condemnation Nigeria has been included. Though it cannot be claimed, even at the present day, that the country is a healthy one for the European except to a moderate extent on the plateau, the conditions of living have been so greatly improved during recent years that the possibilities of good health during temporary residence have been enormously increased. Medical and sanitary efforts have effected much by anti-malaria precautions, such as the use of quinine, and, around Lagos, the reclamation of considerable areas of swamp lands at great expense to Government. In spite, however, of this undoubted improvement in the conditions of life, Nigeria is not a land which can be colonised in the proper sense of the term by Europeans.

The "dry season," characterised by the "Harmattan," a dry north-easterly wind accompanied by a thick haze composed chiefly of dust, and the "rainy season" are the predominating features in the climate of Nigeria. The former begins in the north in October, extending its influence gradually southward until it is perceptible at Lagos early in November. There it appears intermittently up to the beginning of March, but in the north the dust and haze are more continuous and last until April. this period the maximum diurnal variations of temperature occur. The wind blows generally from the north-east, and both diurnal variation and humidity vary with the severity of the Harmattan. Even in Lagos, where hourly observations are taken, during December and January the humidity has been known to fall to 28 per cent. This season is ushered in and out by short periods of tornados and the rainy season fills the remainder of the year. A prevailing south-west wind supplies on the coast a copious precipitation which decreases rapidly as it travels inland. Bonny, on the coast, the rainfall recorded in 1923 was 150 99 inches, rain falling on 151 days; at Kaduna, in the middle of the country, 43.55 inches, rain falling on 112 days; while the lowest recorded was 25 05 inches at Sokoto, rain falling on 44 days.

History.

As far back as the 17th century British traders have had mercantile depots on the mouths of the Niger and adjacent rivers and creeks, known as the Oil rivers, and in those early times the trade was mainly confined to the traffic in slaves. At this epoch the French attempted a settlement at the mouth of the Niger, but were unsuccessful, and during the 18th century British interests preponderated.

At the beginning of the 19th century the exploration of the upper river, which had hitherto been supposed to be identical with the Nile or Congo, began, and Mungo Park traced its course from Banako to Bussa, where he lost his life in the rapids. Lander in 1830 demonstrated the identity of Mungo Park's river at Bussa with the lower Niger, and followed its course to the sea.

In the next two decades, 1840-60, efforts were made, both by the British Government and private individuals, including French and German merchants, to develop the trade of the Niger, while our knowledge of the interior was greatly enlarged by the travels of Clapperton and Allen, both British, and of Barth and others, all at British instigation. A consulate was founded at Lokoja, and, at the cost of much money and many lives, some progress seemed to have been made, only to result in failure. The pioneer of these efforts was McGregor Laird, who in 1852 began to establish stations and to endeavour to secure the country for England, but the stations were destroyed by natives, or removed after Laird's

death in 1861. The good results of his work were not, however, entirely lost.

The situation in the early seventies was that there were numerous trading firms-English. French, and German-on the Oil rivers, where the export trade in palm oil had begun to assume importance, the imports being chiefly confined to spirits, guns and powder. The expeditions sent by the British Government to the higher river, and the subsidies voted by Parliament, had been withdrawn, and European intercourse with the Niger would have ceased had it not been for the perseverance of a few British firms, who during the four months of high water each sent a trading steamer up the river, and soon established a few primitive stations, where the white population of Nigeria lived. These bold pioneers were at the mercy of powerful chiefs, and gross outrages were from time to time avenged by the despatch of a light draught gunboat.

At the close of 1877, Mr. Goldie-Taubman—afterwards Sir G. Taubman Goldie—visited the Niger and recognised that amalgamation of interests and a settled government must replace the chaotic rivalry of traders. With this object in view he determined to secure a charter for a British Company. After much negotiation the small British interests, which were the only one existent on the Niger at that date, were amalgamated in the United African Company in 1879, and in 1881 a charter was applied for. The objection was raised that the capital of the Company was too small, and hence the National African Company was formed with a capital of a million sterling, with the object of opening up direct relations with the great chiefs of the interior.

With great energy the new company founded stations, sent out a river flotilla, and pushed up the Niger and Benue, but meanwhile the fore-sight of Gambetta had prompted the establishment of two French Companies, which, being backed by the French Government, acquired a great influence on the lower Niger. Of these the Compagnie du Senegal had a capital of 600,000%. and some thirty French stations were formed, and while the French flag remained the charter sould not, of course, be granted. The energy of Sir George Goldie, however, secured the dis-appearance of the French flag just in time to announce at the Berlin Conference in 1885 that the British flag alone flew on the Niger, and to secure to Great Britain the guardianship of the international navigation rights on the Niger while the French companies and rival British interests which had meantime grown up were absorbed in the National African Company.

In April, 1885, a new danger arose from the mission of Herr Flegel to secure treaties with Sokoto and Gando on behalf of Germany, but he was anticipated by the British Company, who concluded treaties with those powerful emirs. Great Britain was, therefore, able to conclude the Agreement of 1886 with Germany, which settled the frontiers between Nigeria and the Cameroons as far north as Yola, and in July, 1886, the long-delayed charter was granted, and the Company changed its title to that of the Royal Niger Company. Meanwhile, the territories adjacent to the river had been placed under British protection.

The first decade was spent in founding a number of commercial and quasi-administrative stations on the Niger and Benue Rivers, and in making treaties with the native tribes, and consolidating the commercial organisation on which the Company was dependent for its revenue. The expedi-

Digitized by COOST

tions of Monteil to Lake Chad from the west, of Crampnel from the south-east, and of Mizon by way of the Niger and Benue, were checkmated, and finally, in 1890, an agreement was arrived at with France by which the line dividing the French Sudan on the north from Nigeria was drawn with certain deflections from Say, on the Niger, to Barua, on Lake Chad, and in 1893 the Cameroons boundary was extended from Yola to the south of the same lake.

In 1897 the growing hostility of the great Fulah Power culminated in a plan to drive the white men out of the country. The Company were not unprepared, and they took the field with some 500 or 600 soldiers, led by about 30 British officers, against many thousands of the enemy, of whom a large proportion were mounted. a dependency of Sokoto, which had thus challenged the Company's existence, was divided by the Niger into two nearly equal portions. The southern portion was first conquered, and then northern Nupe after a two days' fight before Ilorin, a smaller de-bdued. Prior to this the capital at Bida. pendency, was next subdued. Prior to this southern Nupe had been partially cleared of the Fulah slave raiders, and on the 20th June, 1897. the legal status of slavery in the Niger Territories was declared abolished by the Company.

Simultaneously with this crisis another, which was to have far-reaching effects, arose. The only indeterminate frontier remaining was that to the west. The Company perceiving, in 1894, that French enterprise contemplated the annexation to Senegal and Dahomey of the Borgu country, sent out Captain Lugard (now Lord Lugard) to negotiate treaties with the king or chiefs of that country. Anticipating the powerful French expeditions by only a few days, he succeeded in making treaties at the capital of Nikki, and with other semi-independent chiefs of districts. Disregarding these prior British treaties, a swarm of French expeditions spread over Borgu, and having obtained a pledge from our Government that Sir George Goldie's powerful expedition, then in the field against the Fulani, should not advance north of latitude 9°, they invaded Bussa, with which we had a specific treaty of many years' standing, and established themselves on the Niger at several points.

At the end of 1897, in view of this situation, the British Government decided to raise an Imperial local force, and the task was confided to Colonel Lugard, who left England in March, 1898. After a period of great tension, during which the British and French troops faced each other, and a conflict was daily imminent, a convention was signed laying down a boundary line from the intersection of the 9th parallel with the frontier of Dahomey to Illo on the Niger, and thence to the northern frontier, which was more accurately defined, to Lake Chad, and to its junction with the Cameroons frontier. Meanwhile, the Emir installed at Bida by the Company was ousted, and the Nupes were again in arms, while the army of Rabeh, which had penetrated from the Nile Valley to Lake Chad, conquered and laid waste the territory of Bornu, but eventually returned to the south of Lake Chad.

The Imperial force, called the West African Frontier Force, with a "Commissioner and Commandant" at its head, and independent of the Company, was rapidly being formed, with its headquarters at Jebba, and with numerous detachments holding the posts evacuated by the

French throughout Borgu, and a strong garrison at Lokoia.

The Imperial Government having decided that the charter of the Royal Niger Company should be revoked, and that its administrative rights and powers should be transferred to the Crown, steps to this end were taken at the end of 1898, when the convention with the French Government had been signed. The actual transfer of the Company's rights and possessions to the Crown took place on the 1st of January, 1900, when the territories north of a line extending, with deflections, from approximately latitude 9° on the Dahomey frontier to Idah on the River Niger, thence to Takum on the Cameroons border, were formed into the Protectorate of Northern Nigeria under Colonel Lugard as High Commissioner.

During the first years of the protectorate of Northern Nigeria, the Government was engaged in bringing under control the powerful Emirates of the Hausa States and the Kanuri Kingdom of Bornu. These Emirs, who maintained large standing armies, a large proportion of which was mounted, annually took the field and devastated vast tracts of country in slave-raiding expeditions. Despite the treaty with Sokoto, under which the Royal Niger Company paid him an annual subsidy, the Fulani Emirates now defied the Government. The Emirs of Nupe and Kontagora were brought under control in 1901; Yola, Bauchi and Bornu in 1902; and the work of pacification was practically completed in 1903 with the taking of Kano and Sokoto, and the action at Birmi. Since that date the Hausa States have maintained a record of peaceful progress, with the exception of a rising by a so-called "Mahdi" in 1906 at Satiru in the Sokoto Province, which was, however, quickly suppressed with the loyal assistance of the Emir of Sokoto. The minor Emirate of Hadeija in the extreme north, which had not previously been brought under control, assumed an aggressive attitude in 1906 which, however, was suppressed. It was necessary also to send minor expeditions against various unruly and truculent pagan tribes, of which the more important were the Munshis on both banks of the Benue, the Okpotos in the Bassa Province, and various hill tribes in the Bauchi and Nassarawa Provinces.

In addition to the pacification of these vast areas-hitherto largely unexplored-the early years of the Protectorate were devoted to creating a Civil Government in all its departments, and to the housing of the civil and military officials, and the erection of public offices; the building of the first light railway from Barijuko (on the navi-gable Kaduna) to Zungeru (22 miles), to which place the seat of Government was transferred in 1902 from the temporary capital at Jebba; and the opening up of communications both by land and by the navigable waterways of the Niger, Benue, Kaduna and Gongola Rivers. In 1907 the construction of the main trunk line from the navigable Niger at Baro to Kano (356 miles), the great market of the Hausa States, was commenced and completed, as a pioneer line, in 1912. During the 14 years from the inception of the Government of Northern Nigeria on 1st January, 1900, to its amalgamation with Southern Nigeria on 1st January, 1914, there were constructed in the Protectorate 700 miles of railways and 5,500 wire miles of telegraphs, while the Marine Department worked 1,000 miles of river.

In the political and administrative sphere a complete Civil Service was created, which in-

Digitized by GOOGIG

creased from half a dozen officers in 1900 to an establishment of 132 residents and assistants in 1913. The guiding principle of the Administration was indirect rule through the native chiefs, the powers delegated to whom varied with their degree of enlightenment. A form of direct taxation was evolved, based on the elaborate system which obtained in the Hauss States prior to the British occupation, but shorn of its abuses. The collection of these taxes was made through the chiefs, a fixed proportion of them being retained in "Native Treasuries," from which the salaries of the native officials were paid.

As an indication of the progress achieved, the Durbar held at Kano on 1st January, 1913, may be instanced, when practically all the chiefs of the Protectorate—from the great Mohammedan Emirs to the petty chiefs of pagan hill tribes—assembled with such retinues as they were allowed to bring, estimated at 20,000 horsemen

and 40,000 foot.

414

THE OIL RIVERS PROTECTORATE.—When, in 1885, the British Government at the conference of the European Powers, held at Berlin, was able to obtain acknowledgment of the fact that a British protectorate had been virtually established over the Niger districts, an Order-in-Council defining them was made, and the portion lying on the coast line was designated the Oil Rivers Protectorate, and placed under Consular rule.

In 1891 the rule of the Consul over the Oil Rivers Protectorate was exchanged for that of a Commissioner and Consul-General, stationed at Old Calabar (now Calabar), while Deputy Commissioners and Vice-Consuls were appointed to the Rivers Benin, Bonny, Brass and Forcados, and to the districts of Sapele and Warri.

By an Order-in-Council of 1893 the Oil Rivers

By an Order-in-Council of 1893 the Oil Rivers Protectorate was extended definitely into the hinterland under the name of the Niger Coast Protectorate, and an administration established under an Imperial Commissioner and Consul-General.

BENIN.—In 1892 Captain Gallwey (now Sir H. L. Galway) concluded a treaty with the king of Benin. As time passed, however, it became evident that this potentate had no intention of adhering to

its provisions.

At this period Benin held enormous power over the surrounding territory, and it was said that her influence extended even so far as Sierra Leone on one side and the Congo River on the other. The terrible nature of the fetish rites and the wholesale human sacrifices which took place in Benin City, urgently demanded European intervention and the introduction of civilised rule.

Early in 1897 a peaceful mission, organised by the Acting Consul-General to establish friendly relations with Overami, the king of Benin, and to induce him to carry out the terms of the treaty of 1892, was treacherously attacked, and with the exception of two, all the European members of the party were massacred. A powerful expedition was sent against Benin, and in a short time the capital had been captured, but the king made good his escape. The state in which Benin City was found passes all description. In every direction human remains, pits filled with bodies in various stages of decomposition, and altars dripping with fresh human blood were to be seen.

Overami eventually surrendered and was sent into exile at Calabar, where he died in the early part of 1914. In 1899 there was a second expedition into the Benin country, which resulted in

the capture and execution of Ologboshers, the leader of the attack on the mission.

THE PROTECTORATE OF SOUTHERN NIGERIA. 1900-1906.-When in 1900 the charter of the Royal Niger Company was revoked by the Crowa that portion of its territories lying between Idah and the coast was added to the Niger Coast At the same time by an Order-in-Protectorate. Council the Niger Coast Protectorate was constituted the Protectorate of Southern Nigeria, the administration being transferred from the Foreign Office to the Colonial Office, and placed under Sir R. Moor as High Commissioner. In 1901 the Niger Coast Protectorate troops were organised into a regiment of the West African Frontier Force, and remodelled on the lines of the original corps of that name raised in the Niger Company's territories by Colonel F. D. Lugard in 1898.

Towards the close of 1901 preparations for the Aro Expedition were commenced. These operations were directed against the southern Ibo people in general and the Aro, or Inokun tribe in particular. The Aros, who may be described as the dominant section of the great Ibo family, held paramount power over a large extent of country lying between the Niger and Cross Rivers. They had established a powerful fetish, probably derived from Benin, known as the Long Juju which exercised an extremely evil influence on the ignorant and superstitious natives for miles around. After five months of ardaous work, the Field Force accomplished the subjugation and disarmament of the Aro tribe, the destruction of the Long Juju and the bringing under Government control of that portion of the territories as far north as about the 5th parallel.

Between 1905 and 1909 several expeditions were sent into the hinterland with the object of opening to trade and civilisation previously unexplored tracts of country. The principal operations were the Bende-Onitaha Hinterland Expedition, 1905-06, and the Niger-Cross River Expedition, 1908-09. As the troops progressed through the country new administrative districts and stations were formed, broad roads constructed in all directions, and many new markets established.

The eastern frontier from the Cross River rapids to the sea was surveyed by an Angle-German Commission in 1905-06; and from Cross River rapids to Yola in 1907-09. For some years before these delimitations, there were frequent raids across the border by German native soldiery from the Cameroons, which were invariably accompanied by robbery with violence and seizure; and even after the boundary line had been demarated this violation of British territorydid not casse.

Lagos or Eko.—During the reign of Kosoke, Lagos, or Eko as it is known to the natives, became the chief centre of the slave trade in the Bight of Benin. Akitoye, his cousin, from whom the throne had been usurped, issued a proclamation to the effect that he would make common cause with the British against slavery if he were reinstated. Acting on this statement, the British Government took decisive measures, and in 1851 a party of bluejackets from Her Majesty's warships attacked and reduced the town. Kosoko fled and Akitove was restored to power. In 1852 Akitoye and his chiefs signed a treaty by the terms of which they agreed to abolish the export of slaves, and to encourage the work of missionaries and the establishment of istations for them.

Digitized by GOOGIC

A Consul was appointed to Lagos for the protection of British interests.

About nine months after the signature of this treaty some Portugese slave traders, who had been expelled, returned to Lagos and renewed their old practices. Akitoye was informed of what was going on, and their attempts were promptly suppressed. In consequence of this, the slave trade party, under the leadership of Kosoko, organised a rebellion which broke out in 1853. Indecisive encounters took place between the two factions, and bluejackets were landed to protect the Consulate. Attempts which were made by the Consul and officers to mediate failed, and finally marines were sent to assist Akitoye, when, after a short fight, Kosoko was defeated and fled. Dosumu, who succeeded his father Akitoye, was unable to adhere to the terms of the treaty, and was induced in 1861 to cede the sovereignty of Lagos and dependent territories to the Crown in consideration of a pension, which he continued to draw until his death in 1885.

THE COLONY OF LAGOS.—In 1862 these territories were erected into a Colony, and the following year Kosoko, who in 1854 had been acknowledged king of Lekki and Palma, districts lying to the eastward, ceded these places to the Lagos Government. At the same time Protectorate rights were established over Ado and Oke-Odan on the west. In 1866 the Colony became a portion of the West African Settlements, retaining a separate Legislative Council, but being subject to the Governor-in-Chief at Sierra Leone. In 1874 the Colony, which extended from Badagri on the west to Odi on the east with an indefinite inland boundary, was united to the Gold Coast Colony.

Colony.

In 1883 Appa, lying on the western border of the Colony, was the next district to be brought under British jurisdiction. In 1884, the British Consul concluded a treaty with the Jekris by which their country as far as Mollume, was placed under British protection, and similar treaties were made with the chiefs of Ogbo and Mahin, small tribal areas situated in the creek region to the eastward. In 1886 the Lagos territories were separated from the Gold Coast and erected into a separate Colony and Protectorate. Between the years 1886 and 1895 Mahin, Ijebu-Ro, Itebu, and Aiyesan to the east, and Kotonu, Igbessa, Ado and Ilaro to the west were proclaimed part of the Protectorate. An expedition was sent against the Ijebus in 1892, which resulted in the military occupation of their country, and in the opening of a most important trade route to the interior.

From this time onward British influence gradually spread inland towards the Niger, and in 1899 the Protectorate was extended to the confines of Northern Nigeria and to the border of the Niger Coast Protectorate. The country generally prospered, and Lagos became a great trading port with many large mercantile firms, both European and native, established. Great trade routes were opened into the interior, and a railway was constructed from Lagos to Ibadan, passing through a thickly populated and fertile agricultural country.

THE COLONY AND PROTECTORATE OF SOUTHERN NIGERIA, 1906-1913.—In 1906 the Colony of Lagos and its protected territory were amalgamated with the Protectorate of Southern Nigeria under one administration and designated the Colony and Protectorate of Southern Nigeria. For administrative purposes the country was partitioned into three main divisions—the Western

Province, which coincided with the former Colony and Protectorate of Lagos; and the Central and Eastern Provinces, which previously formed the Protectorate of Southern Nigeria.

The next few years were spent in building up an extensive system of communications. The railway from Lagos to Ibadan was extended over the Northern Nigeria border to Jebba; thence across the Niger to Zungeru; and finally linked up with the railway in operation from Baro on the Niger to Kano, the great Mohammedan trade centre of the north. A light railway was built joining the main line at Zaria with the tin fields of Bauchi. Broad main roads were driven in all directions and telegraph lines constructed between important administrative and trade centres.

In 1901 the great undertaking of making Lagos an open port by the construction of huge moles and by the dredging of the sandbar, which obstructed the entrance to the harbour, was commenced; and by the end of 1913 sufficient progress had been made to permit of large oceangoing steamers entering the harbour and berthing alongside the wharves. For several years vesseldrawing 20 feet of water have been able to use the harbour.

Large areas in the north-eastern portion of the Protectorate, notably the country inhabited by the warlike and hitherto intractable Munshi people were brought under Government supervision.

THE AMALGAMATION OF NORTHERN AND SOUTHERN NIGERIA, 1914:—By Letters Patent of 29th November, 1913, and an Order-in-Council dated the 22nd of November, 1913, which Instruments came into operation on the 1st January, 1914, the Colony and Protectorate of Southern Nigeria and the Protectorate of Northern Nigeria were formed into the Colony and Protectorate of Nigeria. By another Order of the same date the boundaries of the Colony of Nigeria were defined, and by a third Order, which applied to the Colony and to the Protectorate, an advisory and deliberative body known as the Nigerian Council was established.

Nigerian Council was established.
Provision was made for an Executive Council and for a Legislative Council for the Colony.
The legislative power for the Protectorate was vested in the Governor. The Colony was placed under an Administrator, and the Protectorate, divided into two groups of provinces—Northern and Southern—under two Licutenant-Governors.

Since the amalgamation, the chief events in the history of Nigeria have been the Great War, which resulted in the conquest of the Cameroons; the building of the Eastern Railway, and the development of the ports of Lagos and Port Harcourt, and of the Government Colliery at Enugu; the great trade boom of 1919 and 1920, and the great trade depression which succeeded it in 1921; the institution in 1923 of an enlarged and partly elected Legislative Council for the Colony and the Southern Provinces of the Protectorate (see under Constitution); the visit of the Prince of Wales in 1925, and the introduction of direct taxation in the Southern Provinces.

Political and Administrative Divisions.

Nigeria is arranged in three main divisions, the "Colony" and two groups of provinces designated the "Northern Provinces" and the "Southern Provinces." The Colony comprises the former Colony of Southern Nigeria, while the two groups of provinces are formed from the late Protectorates of Northern and Southern Nigeria.

The Northern Provinces are Adamawa, Bauchi, Benue, Bornu, Ilorin, Kabba, Kano, Niger, Plateau, Sokoto, and Zaria.

The Southern Provinces are Abeokuta, Benin, Calabar, Cameroons, Ijebu, Oyo, Ogoja, Ondo, Oniteha, Owerri, and Warri.

The Provinces are each partitioned into divisions. The seat of Government is established at Lagos. The Administrative Head-quarters of the Colony is at Lagos, while those of the Northern and Southern Provinces are at Kaduna and Enugu, respectively.

THE CAMEROONS:—The conquest of the Cameroons was completed in February, 1916, after a series of operations which commenced in August 1914.

An Anglo-French military and naval force under the command of Brigadier-General C. Dohell, (afterwards Major-General Sir C. Dobell), the Inspector General of the West African Frontier Force, compelled Duala to surrender on 27th September, 1914, and after hard fighting drove the German forces from the surrounding districts.

On the 10th June, 1915, Garus, on the River Benue, fell after a siege of a few weeks by forces from Nigeria and the French Chad Territory under the command of Brigadier-General Cunliffe, the Commandant of the Nigeria Regiment, W.A. F.F.; having cleared the north of the Cameroons, except Mora, these forces marched southwards driving the Germans before them to the Sanaga River.

French forces, with a Belgian contingent from the Congo, invaded the Cameroons from French Equatorial Africa under the command of General Aymerich and gradually pushed forward from the south-east and south towards Yaunde, which had become the headquarters of the German forces. Finally the main German forces, being almost surrounded by the converging advance of the Allied troops, retreated southwards into the Spanish territory of Muni, where they were interned, and the isolated garrison of Mora in the north then surrendered.

By an arrangement which came into effect on 1st April, 1916, the Cameroons was provisionally divided into British and French spheres. The British sphere (about 31,150 square miles in extent) consisted of two portions. The smaller, in the extreme north was intended to include the whole of the Sultanate of Dikwa or German Bornu. The larger consisted of a strip of country bordering on Nigeria, about 400 miles in length and with a maximum width of 80 miles, extending from about 30 miles south of Yola to the Cameroon estuary. It included Buea, the German administrative capital of the Cameroons, and the ports of Victoria, Tiko, and Rio del Rey, and consisted of nearly the whole of the Victoria District, the Kumba (or Johann Albrechtshöhe) District, the Ossidinge District, part of the Chang District, the Bamenda District, and parts of the Banyo and Garua Districts.

The estimated population of the British sphere was about 650,000,

The rest of the Cameroons, about 275,000 square miles, with Duala and Kribi, the chief ports, was assigned to France. Boundary adjustments with the French took place in 1920 in accordance with an agreement signed by Lord Milner and M. Simon on 10th July, 1919. The principal features

of these were the transfer to the British of the country west of the Mandara Mountains from the Dikwa Sultanate in the north to the River Tiel in the south, and the transfer of nearly all

the Chang District to the French.

The British sphere was placed under the control of the Governor of Nigeria, and the parts of the sphere to the north of the Bamenda District were administered by the staffs of the adjoining Nigerian Provinces of Bornu and Yola. Bamenda, Ossidinge, Kumba and Victoria Districts were administered as a separate Cameroons Province with four Divisions (Bamenda, Mamfe, Victoria, Kumba) under a Resident stationed at Buea, responsible to the Governor of Nigeria through the Lieutenant-Governor of the Southern Provinces. The large German cocoa, rubber and banana plantations in the Victoria District. with about 48,000 acres under cultivation, were placed in the charge of a Plantation Department, in order that they might be kept in good order as far as possible until their mode of disposal was settled. They were sold by auction in November, 1924.

By the Treaty of Versailles, Germany renounced in favour of the Principal Allied and Associated

Powers all her rights over the Cameroons.

In December, 1920, the British and French Governments submitted to the Council of the League of Nations draft mandates for the British and French spheres with a joint recommendation (dated 17th December, 1920) for the division of the Cameroons in accordance with the Milner-Simon agreement of 10th July, 1919. In October, 1921, the Council of the League approved in principle the division of the country in accordance with that agreement and the application of the mandate system to those territories, and on 20th July, 1922, after a delay due to negotiations between the United States Government and the Mandatory Powers, the Council confirmed the mandates and defined their terms.

By an Order in Council, dated 1923 and brought into force in February, 1924, and by Nigerian Ordinance No. 3 of 1924, provision was made for the future government of the British Sphere as if it were part of the Protectorate of Nigeria. Under these enactments, the Cameroons Province is administered and legislated for as if it formed one of the Southern Provinces of the Protectorate, while the northern parts are administered and legislated for as if they formed parts of the Northern Provinces of Bornu and Yola: and most of the laws of Nigeria are applied to the British Sphere, subject to the terms of the mandate as regards the few provisions thereof which are not in accordance with ordinary Nigerian law and practice.

Commerce, Industry and Customs.

The progress of Nigeria may be illustrated by the fact that in 1904 the total value of imports and exports (excluding specie) was a little over 5 millions sterling, as compared with over 12 millions in 1914, over 27 millions in 1930 and over 15 millions in 1933.

Imports consist chiefly of the following goods, which are arranged alphabetically, and not in order of value :- Aerated waters, bags and sacks, beads, beef, bicycles, biscuits, chemicals and drugs, cigars and cigarettes, kola-nuts, cooper's stores, cotton and woollen goods, cutlery, earthenware, enamelware, firearms, fish, flour,

^{*} For text of the British mandate see Cmd. 1794.

furniture, galvanized iron, gunpowder, haber-dashery, hardware, kerosene, matches, motor into or exported from Nigeria from the vehicles, perfumery, rice, rope and twine, salt, silk goods, soap, spirits, stationery, sugar, timber, to-bacco, umbrellas, wearing apparel, wines, and a great number of miscellaneous articles. Cottonpiece goods form the principal class in the import table, 3,045,144l. worth being received in 1930 and 2,076,5521. in 1933.

The principal exports are palm-kernels, palm-oil, tin, hides and skins, ground-nuts, cotton lint, cocca, mahogany, rubber, and shea produce.

The influence of railway extensions in the Northern Provinces is shown by the largely increased exports of ground-nuts, hides and skins, and shea produce. In 1911, the year before the railway to Kano was opened, the total value of these three products shipped overseas was 89,000l. only, as compared with 3,130,207l. for these products in 1930 and 2,721,006l. in 1933. There is also a large increase in cotton goods carried to Kano.

Deposits of lignite and coal have been discovered near Asaba and Udi in the Southern Provinces. A colliery was opened by Government in 1915 at Knugu, the coal won being used by Government Departments or sold to the public. The output for 1930 was 364,844 tons and 237,198 tons in 1933.

Amongst minor products exported from the Colony and Protectorate may be mentioned ivory, ebony, copra, coffee, gutta percha, beeswax, silk, gums, benniseed, piassava fibre, capsicums, ginger and estrich feathers.

Crops cultivated for home consumption include maize, yams, cassava, sweet potatoes, sugar cane, guinea corn, ground-nuts, rice, millet, tobacco, plantains and bananas, beans of various kinds, etc. Wheat is grown to a small extent in some parts of the Northern Provinces.

Large herds of cattle, sheep, and goats are raised in the Northern Provinces, and in the extreme north, ostriches and camels are bred. Horses and donkeys are bred and in common use in the northern part of the Protectorate.

The ports served by ocean steamers are, from west to east, Lagos, Forcados and Burutu, Warri, Sapele, Koko Town, Akassa, Bonny, Port Harcourt, Degema, Opobo, Calabar, and Victoria, and Tike, Cameroons.

Import and export merchants are established at the ports, and also up-country along the main waterways, the Niger, Benue, and Cross Rivers, and at inland railway stations.

The Customs Tariff of Nigeria is mainly specific in character. In 1932 the percentage of the proceeds of specific duties to the total import duties was 72, and in 1933 the percentage was 92, the increase being due to the transfer of woven goods from an ad valorem to a specific basis.

Ad valorem duties are imposed on various miscellaneous articles, the rates being 15% or 10% assessable on the purchase price in the country of purchase.

Only articles especially scheduled are dutiable: No Imperial Preference is in operation, existing treaties precluding that possibility.

The tariff imposes export duty on cocoa at 23s. 4d. per ton, on palm kernels at 18s. per ton, on palm oil at 24s. per ton, and on tin at 3s. 4d.

Royalties on tin and other metals are chargeable under the Minerals Ordinance.

The Nigerian Tin Fields.

The principal tin fields are situated on the western boundary of the Bauchi Province and in the Provinces of Nassarawa, Zaria, and Kano adjoining that boundary. Tin is also known to exist in the Provinces of Horin, Calabar, and Yola, but as yet has not been found in payable quantities.

The tin is in the form of cassiterite, and is mostly found in the detrital deposits resultant on the vast denudation that has taken place all over the known field; it is therefore more readily discovered in the existing river-beds; and shows tendency to increase in size and richness of deposit nearer their sources.

The pagan town of Bukuru may be taken roughly as the centre of the field (about 6,000 feet above sea level), from which three great waterways of the Northern Provinces take their origin. Flowing westwards we have the N'gel River becoming the Kwall Danchandon, and eventually the Kaduna, flowing north-east the Delimi River that goes to Lake Chad, and flowing east the numerous tributaries of the Gongola which joins the Benue, such as the Shen, Forum, Ropp and Jarawa Rivers.

Tin ore has been worked and smelted by the natives during the last hundred years, the Seriki (Chief) of Liruein-Delma being a grandson of the native who historically first discovered and worked it. There is, however, strong evidence to show that some former race knew of its existence. Beads may be seen that have been found in the deep detrital deposits that could only have been made by man. These beads bear no resemblance to the modern ornaments made by tin workers, nor are such beads worn by any existing race of natives near the fields, also the depth at which they have been found precludes a modern origin.

418 NIGERIA.

The ore won by the existing mines amounted in 1913 to 5,530 tons. The exports were 8,475 tons in 1923, and 13,070 tons valued at 2,209,545*l*. in 1928, and 10,794 tons valued at 906,185*l*. in 1931, and 5,216 tons valued at 658,598*l*. in 1933.

Banking, Currency, Weights and Measures.

Banking facilities are afforded by the Bank of British West Africa Ltd., and Barclays Bank (Dominion, Colonial and Overseas). The former is established at Lagos (local head office, Marins, and branch office, 196, Broad Street), Abeckuta, Calabar, Ebute Metta, Enugu, Ibadan, Jos, Kaduna, Maldugari, Kane, Onitaha, Oehogbe, Port Harcourt, Sapele, Warri, Minna and Zaria. and there are also a number of agencies. Barclays Bank (Dominion, Colonial and Overseas) is established at Lagos, Burutu, Ebute Metta, Ibadan, Ijibu-Ode, Jos, Kano, Port Harcourt, Zaria and Victoria (British Cameroons).

The coins current in Nigeria are:—U.K. gold, silver and bronze coins; West African silver coins value 2s., 1s., 6d. and 3d., and West Africa alloy coins of the same denomination; West African nickel-bronze coins value 1d., ½d. and ½d. (tenthpence).

All coins, which under the Coinage Acts, 1870 and 1891, are legal tender in the United Kingdom, and all subsidiary coins coined in pursuance of the provisions of His Majesty's Order-in-Council dated 28th July, 1906, as amended by Orders-in-Council dated respectively 9th September, 1907. 19th October, 1908, 2nd August, 1910, and 7th May, 1913, are current in all parts of Nigeria. The United Kingdom coins, however, are being superseded by the West African coins. Gold and silver coins of the United Kingdom and West African silver coins are legal tender to any amount; United Kingdom bronze coins and West African nickel-bronze coins are legal tender to the extent of one shilling.

The West African silver coins, authorised by the Nigerian Coinage Order, 1913, were introduced in May, 1913. Owing to the rapid disappearance of silver coins other West African coins of alloyed metal of the same denominations, and of the same standard weights, but of a low intrinsic value, were introduced in pursuance of the previsions of His Majesty's Order-in-Council dated 9th February, 1920, and the silver coins are being withdrawn. This alloy coinage has been in circulation since 31st July, 1920. The West African nickel-bronze coins were introduced in 1907, 1908 and 1911. Currency notes were introduced in 1916 under the Currency Note Ordinance of that year. Notes of the values of 20s, and 10s, are now in circulation.

The weights and measures in common use are the same as those in Great Britain.

Chief Towns and Means of Communication.

The principal towns of the Northern Provinces are:—Bida, Ilorin, Joe, Kaduna, Kano, Katsina, Lokoja, Maidugari, Sokoto, Vola, and Zaria,; while those of the Southern Provinces are:—Aba, Abeokuta, Benin City, Calabar, Enugu, Forcados, Ibadan, Ijebu-Ode, Onitsha, Opolo, Oshogbo, Oyo, Port Harcourt, Sapele and Warri. The only large town in the Colony is Lagos, the capital of Nigeria.

Steamships maintain a regular service between Nigeria, Europe, other West African Colonies, etc., and there is cable communication with West and South West African ports, Europe and South Africa, and thus with all parts of the civilised world.

The western main line of the Nigerian Railwar (3ft. 6in. gauge) runs from Lagos on the sees through the important towns of Absokuta, Ibelia. Kaduna and Zaria, to Kano, a distance of 6004 miles, thus connecting large and populous con mercial centres in the interior with each other and with the sea. The main line from Kano has been extended to N'Guru, situated just inside Bornu Province; this extension has a length of 1431 miles, and was opened on the 1st of October, 1930. There are also three branch lines, one of 111 miles running from Minna to Baro, on the River Niger, another of 137 miles from Zaria through Funtus and Gusau to Kaura Namoda, opened in 1929, and a third, a 2ft. 6ic. light railway 133 miles long, from Zaria to Jos on the Bauchi Plateau. In 1913-16 a 3ft. 6in. gauge railway was built from Port Harcourt, on a branch of the Bonny River, te Enugu, a distance of 151 miles. This castern main line now connects with the western main line at Kaduna. It runs through a rich oil-palm belt and taps the coal field at the Government Colliery of Enugu. Construction was resumed constrict was a first the war, and the next section, of 139 miles, from Enugu to Makurdi on the Benue River. was completed in 1923. The final section (279 miles, from the Benue to Kaduna, was completed in 1927. The line is 569 miles in length and affords an alternative outlet for the tin-ore and agricultural produce of the north, and renders the coal mined at Enugu available throughout the north-western districts served by the Railway. A branch from the eastern line at Kafanchar to Joe (623 miles) connects the tin mines of the Bauchi Plateau with Port Harcourt.

A short branch line of 271 miles has been constructed to Ifo-Ilaro-Idogo, and was opened on the 1st of June, 1930.

A system of inland telegraphs, also owned and operated by Government, connects the majority of the principal towns on the coast and in the interior, and the African Direct Telegraph Company controls a wireless station at Lagos.

The Government has constructed a very large number of roads, many of which are suitable for motor traffic, between the headquarter stations of the Provinces, and there are, in addition, many minor roads. The Rivers Niger and Benns are in themselves great natural highways, and in the south there are numerous other navigable waterways, which provide means of communication and transport.

Religion and Education.

The bulk of the population of the Northers Provinces is Muhammadan, the majority of the remainder being pagan. In the Southern Provinces however, the proportions are reversed: Muhammadan communities occur, especially in the western districts. Missionary societies of various Christian denominations have established many stations with churches and schools throughout the country.

Education in Nigeria is under the control of a Director in Lagos and two Assistant Directors,

0

at Kaduna and Enugu, the headquarters of the Northern and Southern Provinces respectively.

Although there is now one Department of Education for the whole of Nigeria, the unification of the two systems can only be gradual and modifications in curriculum, etc., are necessitated in the Northern Provinces by local conditions.

In the Southern Provinces education work is for the most part carried on by Missionary Societies. There are 47 Government schools, 303 assisted Mission schools in receipt of an annual grant-in-aid and 2,524 un-assisted schools (mostly Mission). All schools are controlled by the Department. The above figures include a number of Middle (Secondary) schools and classes and 26 girls' schools. There are 167,442 children in the Riementary Classes, and 12,377 in the Middle Classes of the above schools, most of the latter leaving after reaching the equivalent of Standard 6.

There are also Mission Training Colleges for Teachers, Government Elementary Training Centres, where teachers for Elementary schools are trained, and a Higher College for the vocational training of selected students from the Middle

schools.

A new Education Code was introduced in 1926 and revised in 1931. There is a Board of Education on which the interests of Missionary Societies are

largely represented.

In the Northern Provinces there are 131 Government Elementary and Middle schools, all of which are maintained by the Native Administrations. No school yet covers the full Middle course. There are also 3 Elementary Training Centres for Teachers and a Higher College. A beginning has been made in girls' education at four centres.

Mission schools total 230 (mostly elementary, in Pagan areas), of whom 12 are assisted, and 36,506 Native Muslim schools where only the

Koran is read.

There are approximately 15,500 pupils in Elementary Classes, 1,000 in Middle Classes, and 210,000 in the Native Koran schools.

A separate advisary Board of Education functions in the Northern Provinces.

The total Government expenditure in 1933-34 was £238,000, of which £88,000 was paid in grants to Missons. In addition, the Native Administrations contributed £8,000 in the Southern Provinces and £41,000 in the Northern Provinces.

Constitution.

The territorial divisions of Nigeria are the "Colony of Nigeria," the "Northern Provinces" and the "Southern Provinces." The Northern Provinces and the Southern Provinces together form the Protectorate.

The Government of the Colony of Nigeria is provided for by Letters Patent of 9th December-1922, and Royal Instructions to the Governor of the Colony of the same date, as amended by Royal Instructions, dated 17th February, 1928. The Government of the Protectorate is provided for by the Nigeria Protectorate Order in Council, 1922, of 21st November, 1922, and Royal Instructions to the Governor of the Protectorate of 9th December, 1922 and 17th February, 1928.

The Nigeria (Legislative Council) Order in Council, 1922, dated 21st November, 1922, as amended by the Nigeria (Legislative Council) Order in Council, 1928, dated 16th May, 1928, provides for a Legislative Council for the Colony and

the Southern Provinces of the Protectorate, and this Council is also given control over Protectorate Government expenditure in the Northern Provinces. The Legislative Council consists of:— The Governor, as President.

The Official Members, vis:

The Members of the Executive Council.

The Director of Marine.

The Comptroller of Customs.

The Senior Residents.

The Deputy Chief Secretary to Government.

The Secretary, Northern Provinces, and the Secretary, Southern Provinces.

The General Manager of the Railway.

The Director of Public Works.

The Director of Agriculture.
Three Nominated Official Members.

The Unefficiel Members with

The Unofficial Members, vis:

The Elected Members.

Three members elected by persons resident within the Municipal Area of Lagos.

One member elected by persons resident within the Municipal Area of Calabar.

The Nominated Unofficial Members, not exceeding 15 in number, including:

One member nominated by the Lagos Chamber of Commerce.

One member nominated by the Calabar Chamber of Commerce.

One member nominated by the Port Harcourt Chamber of Commerce.

One member nominated by the Kano Chamber of Commerce.

One member nominated by the local Chamber of Mines.

One member to represent Banking interests in Nigeria.

One member to represent Shipping interests in Nigeria.

The qualifications for registration as an elector in Lagos or Calabar are that the elector must be a male person who:—(1) is a British subject, or a native of the Protectorate of Nigeria; (2), is of the age of twenty-one years or upwards; (3), has been ordinarily resident for the twelve months immediately preceding the date of registration in the municipal area for which the election is being held; and (4), was during the calendar year immediately preceding in possession of a gross annual income from all sources, of not less than one hundred pounds.

The Nigerian Council, created in 1914, was abolished in 1923,

Twenty-seven Company Commanders, 750l. or 700l. Seventy Company Officers, 600l. or 510l.

NORTHERN RHODESIA.+

Situation and Area.

Northern Rhodesia comprises the northern part of the Territory formerly administered by the British South Africa Company, whose principal field of operations was defined in the Charter of Incorporation as "the region of South Africa lying immediately to the North of British Bechuanaland, and to the North and West of the South African Republic, and to the West of the Portuguese dominions." It lies wholly to the north of the Zambezi River and is bounded by Tanganyika Territory and the Belgian Congo on the north; Nyasaland and Portuguese East Africa on the east; Southern Rhodesia and South-West Africa on the south and Portuguese West Africa on the west.

The area of the Territory is estimated at about 290,323 square miles.

A map of Northern Rhodesia and Southern Rhodesia will be found in the section relating to

the latter.

Northern Rhodesia is divided into five Provinces for fiscal and administrative purposes. The seat of government is at Livingstone, situated seven miles from the Victoria Falls. important settlements are at Broken Hill, Fort Jameson, Lusaka, Mazabuka, Ndola near which the copper mines of Bwana Mkubwa, Nchanga, Nkana. Roan Antelope, and Mufulira are situated, Abercorn, Kasama, Fort Rosebery, Kasempa and Mungu in Barotseland. A new Administrative Headquarters is in course of construction at Lusaka.

History and Constitution.

In 1855, Dr. Livingstone, the great explorer, with whose advent the authentic history of Northern Rhodesia may be said to begin, arrived at the Zambesi near the place where the town bearing his name now stands. The Arab slave trade had begun a few years before Livingstone's arrival and flourished from that time onwards till 1893, twenty years after the death of Livingstone at Chitambo. The Arab influence was at first most felt in the North but soon extended over the whole country. It was not until 1893, by which time a Government post (Abercorn) near the south of Lake Tanganyika, and several mission stations were established, that this trade received any check. Blow after blow was inflicted by the destruction of the Arab settlements on Lake Nyasa, and with the defeat of the Arab chief Mlozi by Sir Harry Johnston at Karonga in 1894, the days of the slave trade in British Central Africa were numbered. The last caravan of slaves in Northern Rhodesia (intercepted on its way to the East coast via Lake Nyasa) was released at Fort Jameson, which had just been established, in 1898. An account of the early operations of the British South Africa Company under the Royal Charter of Incorporation of 1889 will be found under the section relating to Southern Rhodesia. Prior to 1911 the territory now called Northern Rhodesia consisted of two separate territories (a) Barotseland-North-Western Rhodesia and (b) North-Eastern Rhodesia. On the 4th May of that year these two territories were amalgamated under the title of Northern Rhodesia. Mr. (now Sir) Lawrence Wallace was appointed the first Administrator of the combined territory, and continued in office until 1921.

Several engagements took place during the Great War with forces from German East Africa, and on the 2nd May, 1916, General Northey ordered a general advance into German East Africa of the troops under his command, and by July all enemy territory adjacent to the Northern Rhodesia border had been cleared of the enemy. Towards the end of October, 1918, the fugitive German force, under Colonel Von Lettow-Vorbeke doubled southwards, and on the 1st November made an unsuccessful attack on the frontier station, Fife. From there they proceeded south-west to Kasama, the advanced base of supplies for the forces operating on the border. The bulk of the stores had, however, been evacuated on the first news of the enemy's advance. After burning most of the buildings and their remaining contents, Von Lettow marched along the Kasama-Kashitu motor-road, and early on the 13th November his advanced parties opened fire on the British South Africa Company's rubber factory on the Chambeshi River. At this juncture the news of the Armistice was received by the District Commissioner and communicated to You Lettow, who accepted the position and suspended hostilities.

In March, 1921, Sir Drummond Chaplin, Administrator of Southern Rhodesia, became also Administrator of Northern Rhodesia. He relinquished office in 1923, and was succeeded by Mr. (now Sir Richard) Goode, C.M.G., C.B.E., as Acting Administrator in Northern Rhodesia.

In July, 1923, a settlement was arranged of the various outstanding questions relating to the British South Africa Company's position in Southern and Northern Rhodesia. As far as Northern Rhodesia was concerned, the effect of the settlement, which was conditional on its acceptance by the shareholders and the approval of Parliament, was that the Company surrendered its buildings and assets used for administrative purposes, and its land and monopoly rights other than mineral rights under its concessions in

Northern Rhodesia but retained three freehold areas in the Tanganyika Prevince of North-Eastern Rhodesia; on the other hand the Company would receive on the 1st October, 1923, a cash payment from His Majesty's Government, and would retain a half interest for 40 years in the net proceeds of the disposal of land in North-Western Bhodesia, such disposal to be in the hands of the administration of the territory; the Company would receive the Crown's recognition of .its mineral rights in Northern Rhodesia and a considerable measure of protection for its milway interests; and the Crown would waive its whole claim against the Company in respect of extraordinary military expenditure incurred in the course of the Great War. Subject to the foregoing, the Company would retain the whole of its commercial rights and assets; no further question would be raised as to any liability of the Company in respect of land appropriated for the purpose of its own commercial undertakings or granted to other parties; and the Company would be relieved of the duty of carrying on the administration of Northern Rhodesia. This provisional arrangement was unanimously approved by the shareholders, and on the 25th July, 1923, was approved by the House of Commons.

By Orders in Council dated 20th February, 1924 the office of Governor of Northern Rhodesis was created, an Executive Council constituted and provision made for the constitution of a Legislative Council. The Executive Council is composed of the Governor as President, the Chief Secretary to the Government, the Attorney-General, the Treasurer, the Secretary for Native Affairs, and the Director of Medical Services. The Legislative Council comprises the Governor as President, the members of the Executive Council, ex officio, four nominated official members and seven unofficial elected members. On the 1st April, 1924, Mr. H. J. Stanley, C.M.G. (now Sir Herbert Stanley, G.C.M.G.), assumed office as the first Governor and Commander-in-Chief of Northern Rhodesia.

For the East African Governor's Conference, see under Kenya, page 335.

Administrative and Judicial.

The natives are administered as far as possible through their own chiefs or headmen, who function as Native Authorities and Courts Administrative and judicial functions are combined in the District Officers. The Barotse Province is a native reserve, and is administered under conditions differing in some respects from those obtaining elsewhere. The Paramount Chief of the Barotse has a Khotla or Native Council to assist him.

The law of the Territory is that of England except in so far as it may be inapplicable or may have been or may hereafter be modified by legislation, but no Act of Parliament of the United Kingdom passed subsequent to the 17th August, 1911, is deemed to apply to the Territory unless it has been specifically applied.

Administrative Officers in their capacities as Magistrates of Subordinate Courts have a limited civil and criminal, jurisdiction. Appeals, both civil and criminal, lie from Subordinate Courts of the 3rd Class to Provincial Commissioners' Courts and from Subordinate Courts (including Provincial Commissioners' Courts) of the 1st and 2nd Class to the High Court.

Education.

European.—For the education of European children there were in August, 1934, controlled Schools at Livingstone, Choma, Mazabuka, Lusaka, Broken Hill, Ndola, Luanshya and Nkana offering primary education up to Standard VII, with the additional subjects, Latin, French, Algebra in Standards VI and VII and Geometry in Standard VII. There were schools at Mulendema, Silver Rest and Mufulira, offering primary education up to Standard V. All these schools were under Government Management. The Convent School, Broken Hill, offering education up to the standard of the Southern Rhodesian Junior Certificate Examination, and Mrs. Jeffrey's School at Fort Jameson, offering primary education up to Standard V, were controlled but under private management.

Boarding accommodation was available for girls at the Beit School, Choma, for boys at the Codrington School, Mazabuka, and for boys and girls at Lusaka School, all under Government management, and at the Convent School, Broken Hill, under private management. There was also open during the year a number of uncontrolled schools with small enrolments and uncertain lives.

Native.—The Department of Native Education supervises the educational work of the Missionary Societies working in the Territory, and apportions the grants in aid of the Mission Schools which conform to the Government syllabus and requirements. There is an Advisory Board on Native Education upon which Missions, Settlers and Government Departments are represented. A Government School for the training of "Jeanes" Teachers and Agricultural Demonstrators was opened at Mazabuka in 1930, connected with the Central Research Station. The Barotse National School at Mongu is also a Government Institution. In 1931, Government Elementary Schools were opened at Mazabuka and Ndola, and a Middle School at Mazabuka. In the following year a Normal Training School was opened at Mazabuka, and an Elementary and Middle School at Kasama. In 1934 a Government Trades School was opened at Lusaka.

Climate.

The climate, except in the low-lying parts, may be described as sub-tropical. Temperatures are moderate during the winter months, viz., from April to August. In low-lying parts the mean temperature varies from 70° to 90° with a maximum of 103° and a minimum of 56°. In the high plateau the mean temperature varies from 55° to 75° with a maximum of 86° and a minimum of 40°. In some parts the maximum temperature has been known to reach the high figure of 120°, whilst minima round about 30° are not infrequent.

As a whole the country may be said to be suitable for white settlement, and Europeans have little to fear from the point of view of health if reasonable precautions are taken.

The average rainfall varies from 50 inches in the northern and high-lying portions of the territory to 25 and 30 inches only in the southern and south-eastern parts. On the average little or no rain falls during the period May to September. The month of October usually brings from about half an inch to two inches. The period, November to March, is the real wet season, during which anything from 70% to 90% of the total annual rainfall occurs. From April onwards the rains diminish again. The average rainfall so far as present investigations shew is 34.18 inches per annum.

Agriculture.

The cattle and ranching industries are gradually attaining a more satisfactory position owing to increased fencing and better cattle-management amongst European-owned stock and to the dipping which has been commenced amongst Native-owned stock in the Reserves.

The cattle of the Territory are singularly free from major diseases. Contagious Bovine Pleuro Pneumonia and Foot and Mouth disease exist, however, in the Barotse Province. The latter is being eradicated. The mortality is not high upon those farms or ranches where good cattle-mastership is practised.

The dairy industry has not developed to the extent which the local markets require. A cooperative creamery is in operation at Lusaka and it has no

difficulty in marketing all its products.

The greater portion of the Territory is undeveloped agriculturally. The indigenous population is self-supporting in its food supply, practically the whole of its requirements being produced in the village gardens. There is little or no general trade in food com-modities. The staple native cereals are fingermillet (Eleusine coracana), Kaffir-corn (Sorghum), and Maize. The former is produced over extensive tracts of the Territory on a system of shifting cultivation whereby one grain crop is grown in rotation with forest re-growths, and the gardens revert to bush after each grain crop. Other native crops are bulrush millet (Pennisetum typhoideum), ground-nuts, cassava, sweet-potatoes, and a variety of pumpkins, gourds, and beans. Tobacco is widely cultivated by the natives but on a small scale for private consumption and a small localized trade only. Considerable numbers of cattle are owned by natives in the Territory, but these are mainly confined to certain tribes, notably the Marosi, Baila, Matoka, and, to a less extent, the Angoni in Northeastern Rhodesia.

Many parts of the Territory are impassable to animal transport owing to the presence of tee-tee fly.

In the tracts adjoining the railway line considerable areas are given over to farming and ranching operations under European management.

Maize is the chief crop. During the season 1931-32, 42,700 acres were planted and yielded the record crop of 295,600 bags. The restricted market was unable to absorb the crop and the surplus could not be exported except at ruinously low prices. The acreage under maize during 1932-33 decreased by 20 per cent., largely owing to fear of continued over-production. This decrease, together with the effects of a poor season and considerable locust damage in some areas, resulted in a short crop of approximately 122,000 bags, the marketed crop being the smallest since 1925.

As a result of Agreements with Southern Rhodesia and the Union of South Africa the internal market is protected against imported grain offered at unduly low prices.

Experimental work on the problems of cotton cultivation is being continued at Marabuka with the assistance of the Empire Cotton Growing Corporation. Cultivation by European farmers is not at present recommended owing to the serious losses caused by insect pests. The work, however, is being extended to include experiments in certain native areas where it it is believed that commercial production may be possible.

The tobacco industry has recently shown signs of revival and the production of Virginia leaf for the 1932-33 season was in the neighbourhood of 1,267,000 lbs. The better qualities of leaf are exported and, as the result of agreements with Southern Rhodesian manufacturers and the Union of South Africa, an African market exists for about half a million pounds of Northern Rhodesian leaf annually.

Most of the wheat produced in the Territory is handled by the Co-operative Society at Lusaka. A trade has sprung up for good beer meel and an increasing amount of white flour is being sold.

The headquarters of the Agricultural Department and the Department of Animal Health are now situated at Mazabuka.

Forestru.

More than 60 per cent, of the entire ares of Northern Rhodesia is estimated to be more or less covered with trees and shrubs, but the forest growth, chiefly of the Savannah Woodland type, is undergoing considerable modification in composition and area as a result of native shifting cultivation and annual fires. Forestry Branch has been instituted in recent years and three forestry officers are now carrying out investigations in various parts of the Territory. Reafforestation and protective measures have already been commenced in one forest. It is proposed to maintain certain areas as protection forests for the prevention of soil erosion and the preservation of water supplies in springs and rivers. Further areas are to be dedicated to the production of timber of the more useful indigenous species. Experimental plantations of fast growing exotic tree species are being established and private enterprise in this direction has already commenced in the mining areas.

The only commercial timber industry in the Territory at present is that of the Zambesi Saw Mills Ltd., whose operations extend from Livingstone to the Machili River under concessions granted by the Government. This Company is chiefly concerned with the extraction, by light railway, of timbers of the Kalahari sand belt type, including Mkushi, Baikiaea plurijuga; Mukwa, Pierocarpus angolense; Mwangura, Pterocarpus stevensonii: Mupumena, Entandophragma sp.; Mkamba, Afcelia quanzense; Mugongo Ricinodendron rautanenii; and Musheshe, Burkea africana. The Company has contracts for supplying sleepers to the South African and Rhodesian Railways.

Land Settlement.

An Agricultural Survey Commission has reported upon the unalienated land within 25 miles of the railway suitable for European settlement, and this Commission has advised as to the class of farming or ranching for which the land is suitable. The Government is not embarking on any extensive programme of land, settlement. Crown Land and privately owned land, however, suitable for mixed farming and ranching is available within easy distance of the railway and the price ranges between 2s. and 15s. per acre depending upon the quality of the soil, water supply, distance from railway, etc. A settler

must be in possession of at least 2,000l. capital in order to obtain a grant of a farm from the Government on lease with option to purchase. Special travelling facilities are given to bona fide farm settlers and their wives and families proceeding to Northern Rhodesia for the first time to take up land and special local railway rates are in force for their benefit. Applications for land in Northern Rhodesia, should be addressed to the Lands Department, Livingstone.

Department of Mines.

The Mines Department administers the Mining Law, the Mining Titles Registration Ordinance subsidiary thereto and the Mining and Explosives Regulations. The staff consists of the Commissioner for Mines, two Inspectors of Mines, one European Clerk and one Native Clerk.

The Registry of Claims and Registry of Mining Titles are kept, stamp duty is assessed and the necessary searches are made.

On the Broken Hill Mine zone production recommended at the beginning of 1933 on a basis of 1,600 tons of electrolytic zinc per month. Owing to restricted demand no vanadium has been produced during 1934.

The Roan Antelope and Nkana Mines have further increased their copper output the cost of production being amongst the lowest in the world. Each of these mines is at present producing approximately 5,189 tons of copper per month. Nkana mine is also producing considerable quantities of cobalt as a bye-product.

New shafts are being sunk at the Roan Antelope and at Mindola some three miles from Nkana.

Production has been resumed at Mufulira the output having reached 1,000 tons of copper per month.

The electrolytic copper refinery at Nkana is nearing completion and will be in operation before the end of the year.

Gold is being produced by the New Jessie and Sasare West Mines on a small scale.

Geological and topographical surveying is being actively carried out on the Rhokana Concession and by the Loangwa Concessions and Rhodesia Minerals Concession.

Loangwa Concessions have acquired the exclusive prospecting rights over the North Charterland Exploration Company's Concession for three years.

During 1933, the mineral production figures were as follows:—

					£
Gold			2,588 ozs.		10,994
Silver			25 ozs.	• •	2
Copper			104,896 tons		3,402,696

Means of Communication.

The Railway was extended from Victoria Falls northward to Broken Hill—374 miles—in 1906, and the extension to the border of Northern Rhodesia, a further 132 miles, where it connects with the railway system of the Congo Belge, was completed in 1909. The Zambezi is crossed by a single span bridge, 650 feet long, 30 feet wide and about 420 feet high. The gauge of the railway is 3 feet 6 inches, the standard gauge of South Africa.

Branch lines have now been constructed from Ndola to Luanshya (Roan Antelope Mine), a distance of 24 miles, and to Nohanga via Nkana, a distance of 84 miles. Another line runs from Mokambo, in the Belgian Congo, to Mufulira, nine miles distant.

Read communications are being opened up, and dry season motor tracks are now in use from Victoria Falls (vis Livingstone, Lusaka and Broken Hill) to Elizabethville in the Congo Belge (790 miles approx.); Broken H... to Abercorn (574 miles), and thence vis Mwenzo, on the border of Northern Rhodesis, to Tanganyik and Kenya Colony; this portion forming part of the Cape to Cairo Route. Lusaka and Fort Jameson are also connected by road, a distance of 406 miles, and a road, leaving the Great North Road about 45 miles north of Broken Hill, runs through the Mining Areas vis Ndola, Nchanga, Solwezi, Kasempa, and Mumbwa to rejoin the Great North Road at Chisamba.

The Zambezi, Kafue, Luapula, and Chambesi Rivers are navigable for small boats for a considerable portion of their course, and where necessary for motor traffic these and other rivers may be crossed by pontoons.

Aviation.

The four main air routes are as follows :-

- (i) Livingstone to Mongu via the Zambesi River on the banks of which have been established emergency landing grounds at Sesheke, Senanga and Sioma.
- (ii) Livingstone to Ndola with aerodromes at Kaloma, Mazabuka, Kafue, Lusaka, Chisamba, Broken Hill, Kapiri Mposhi and Ndola.
- (iii) Lusaka to Fort Jameson with landing grounds at Hot Springs, Rufunsa Valley and Beit Bridge.
- (iv) The Imperial Airways route from Broken Hill to Mbeys with serodromes at Broken Hill, Kanona, Mpika, Shiwa Ngandu, Chinsali and Isoka and emergency landing grounds at Ndabala, Mtuga, Kilonje and Mwinimpanza.

Aerodromes are also in existence at Mwinilunga, Kalabo, Mumbwa and Abercorn. The aerodromes at Livingstone, Broken Hill, Ndola and Mpika are connected by telephone to the nearest Administrative Officer.

Broken Hill aerodrome is equipped with a hangar capable of accommodating three Imperial Airways' machines and a ground staff is in residence both at Broken Hill and Mpika.

Hangars are available for small aircraft at Livingstone, Lusaka and Ndola, the two former housing two aircraft, the latter one only.

Air mails are received from and despatched to all countries on the England-South Africa route, the service being once weekly in each direction. Mails to and from England are despatched and received once weekly via Bulawayo and Cape Town. There are 42 post offices, 15 of which are Money Order offices. The main telegraph and telephone route lies alongside the railway line from Victoris Falls to the Congo Border, with branches from Ndola to Luanshya, Ndola to Nchanga and from Nkans to Mufulira. Wireless stations at Abercorn, Broken Hill, Mpika,

Fort Jameson, Livingstone and Mongu-Lealui are equipped for point to point communication on short wave and maintain a public service. Broken Hill and Mpika Stations also provide radio-electrical services in connection with the African International Air Route, and are equipped for communication with aircraft in flight, on a wavelength of 900 metres.

Customa Duties.

The Tariff, excluding the Congo Basin tariff, provides for Empire preference for the following classes of goods which are mainly liable to ad valorem rates of duty: clothing, blankets and rugs, cotton piece goods and all articles usually imported for household and native use, the duty on Empire products being in almost every instance 10 per cent. and the duty on foreign varying from 15 to 30 per cent.; in the case of cotton and silk piece goods, shirts, singlets, and rubber shoes, from foreign countries, the tariff provides for alternative specific rates if the duty should be greater. Agricultural, electrical, mining and other industrial manufacturers imported for industrial purposes, if of Empire manufacture are free of duty and if foreign are subject to an ad valorem duty of 5 per cent. except foreign electrical machinery which is 15 per cent.

Specific rates of duty apply to practically all imported foodstuffs, and to spirits, wines, beer and tobacco; upon the latter items, spart from rum, no preference is granted except under the terms of the customs agreements with the neighbouring territories in the South but varying rates of preference are granted under the tariff, to foodstuffs of British origin.

Imports and Exports.

Loan expenditure for development purposes amounted to £1,821,123 at 31st December, 1933.

[•] These figures are for the nine months April to December. The financial year has been altered to coincide with the calendar year.

An income tax was first imposed in Northern Rhodesia in 1921. The rates of tax now in force are :-

64. For each pound of the first 100% of the charge-

following deductions are allowed :-

(i) Personal, 300l. (ii) For wife, 420l.

(iii) For children, 100% each—age limit 18, unless receiving full time instruction at a University, College, School or other educational establishment, when age limit is 21.

(iv) For Insurance &c.—One-sixth of chargeable income before making deductions for insurance and deductions under (ii) and (iii) above and (v) below,

(v) for dependent, 50l.

The tax on the chargeable income of a Company

is at the rate of 4s. on every pound thereof.

There are branches of the Standard Bank of South Africa at Livingstone and Lusaka and an Agency at Mazabuka and branches of Barclays Bank (Dominion, Colonial and Overseas) at Livingstone, Broken Hill and Fort Jameson, and an Agency at Bwans M'Kubwa.

ADMINISTRATORS.

North Eastern Rhodesia.

R. E. Codrington 1900 to 1907. Sir L. A. Wallace, K.B.E., C.M.G., 1907 to 1909. Sir L. P. Beaufort, Kt., 1909 to 1911 (acting).

North Western Rhodesia.

Sir R. T. Coryndon, K.C.M.G., 1900 to 1907. R. E. Codrington, 1907 to 1908. Sir L. A. Wallace, K.B.E., C.M.G., 1907 to 1911 (acting).

Northern Rhodesia.

Sir Lawrence Wallace, K.B.E., C.M.G., 1911. Sir Drummond Chaplin, G.B.E., K.C.M.G., 1921.

Governors.

1924, Sir Herbert J. Stanley, G.C.M.G. 1927, Sir James Crawford Maxwell, K.C.M.G., K.B.E., M.D. 1932, Col. Sir Ronald Storrs, K.C.M.G., C.B.E. 1934, Major Sir H. W. Young, K.C.M.G., D.S.O.

Executive Council.

The Governor (President). The Chief Secretary. The Attorney-General. The Treasurer. The Secretary for Native Affairs. The Director of Medical Services. Clerk of the Council :- J. H. C. Griffiths.

Legislative Council.

The Governor (President). Members of the Executive Council, ex officio. Nominated official members : E. B. H. Goodall, C.B.E. (3 vacancies). Unoficial Elected Members: L. F. Moore, Captain T. H. Murray, M.C., G. C. Norris, Captain John Brown, M.B.E., K. E. W. Harris, C. S. Knight, J. L. Bruce.

Clerk, M. Barker. Reporters, Miss E. V. Good, Miss I. V. H. Morgan.

Civil Establishment.

Governor and Commander-in-Chief, Major Sir Hubert Young, K.C.M.G., D.S.O., 3,000/. and 1,000/. duty allowance. Private Secretary and Aide-de-Comp, Flying Officer M. Oxford, 450l. Clerk, Miss E. Tatham, 300l. to 390l.

Secretariat.

Chief Secretary, Hon. C. C. F. Dundas, C.M.G., O.B.E. 1,450%

Principal Assistant Chief Secretary, E. A. T. Dutton, O.B.E., 1,000l.

Assistant Chief Secretary, Hon. R. S. W. Dickinson.

D.S.O., 840l. to 920l. Assistant Secretary, J. H. C. Griffiths, 4251. to 9201.

Office Superintendent (vacant), 480l. to 600l. Clerks, 2 at 300l. to 390l., 6 at 186 to 300l.

District Administration. Provincial Commissioners, E. B. H. Goodall, C.B.E.

Audit

Fraser, J. N. Clothier, 480l. to 720l.

Auditor, A. Pollard, 1,000l. Senior Assistant Auditor, E. A. Smith, 600l. to 840l. Assistant Auditor, R. W. Kelly, 425l. to 720l.

NYASALAND PROTECTORATE.

Situation and Area.

The Protectorate comprises the western shore of Lake Nyasa, with the high tablelands separating it from the basin of the Loangwa River, and the region lying between the watershed of the Zambesi and the Shire Rivers on the west, and the Lakes Chiuta and Chilwa and the River Ruo (an affluent of the Shiré) on the east, including the mountain systems of the Shiré Highlands and Mlanje.

It is bounded on the north by Tanganyika Territory, on the west by Northern Rhodesia, on the south and east by Portuguese East Africa, and according to the most recent survey has a total area of about 47,949 square miles (land, 37,596).

It is divided into two Provinces, each under the control of a Provincial Commissioner. These provinces are sub-divided into twenty districts, each in charge of a district commissioner, who is also a district magistrate.

The chief town is Blantyre, in the Shiré Highlands, where there are 666 Europeans. The headquarters of the Government are at Zomba.

Population (1933).

Europeans, 1,817; Asiatics, 1,474; Natives, 1,608,023,

* Bee Map under Southern Rhodesia.

* Empire Cotton Growing Corporation Seconded.

History.

In 1859 Dr. Livingstone was placed at the head of a Government Expedition, and reached the southern shore of Lake Nyasa on the 16th of September of that year. His expedition was recalled in 1863, but resulted in the founding. from 1874 to 1881, of various Missionary Societies, notably the Universities Mission, the Livingstons Mission, and the Church of Scotland Mission.

The Missions were followed by the African Lakes Corporation, and in 1883 Captain Foote, R.N., was appointed first British Consul for the Territories north of the Zambesi, to reside at Blantyre.

Opposition of the new settlers to the slave trade carried on by Arab coastmen and natives alike resulted in a conflict with the Arab traders under Chief Mlozi, settled at the north end of Lake Nyasa, which spread to the Yao chiefs, who were under their influence

In 1889 public attention was drawn to Nyasa-land by the application for a Charter by the British South Africa Company, and the despatch of an imposing expedition under Major Serpa Pinto to the Upper Zambesi and Lower Loangwa At the same time Mr. D. Rankin announced the discovery of a navigable entrance to the Zambesi by the Chinde mouth.

In the summer of 1889 Mr. Johnston (later Sir H. H. Johnston, G.C.M.G., K.C.B.) arrived at Mozambique as H.B.M. Consul, and proceeded to travel in the interior to inquire into the troubles with the Araba.

Treaties having been concluded with the remaining Makololo chiefs and with the Yaos round Blantyre, Mr. Johnston proceeded up Lake Nyasa leaving Mr. John Buchanan, Acting-Consul, in charge, who, after the first encounter between Major Serpa Pinto and Mlauri, a powerful Makolole chief, proclaimed on the 21st September, 1889, a British Protectorate over the Shiré districts.

Mr. Johnston, during his progress up the lake, induced the "Jumbe" or Sultan of Kota-Kota to place his country under British protection, and on arriving at Karonga arranged similar treatice with Mlozi and other Arab and Wahenga chiefa, after which he proceeded to Lake Tanganyika. On his return an agreement was made with Mponda, a Yao chief at the south end of Nyasa.

In 1891, an Anglo-Portuguese convention ratified the work of Mr. Johnston, Mr. Sharpe (later Sir A. Sharpe, K.C.M.G., C.B.), and other pioneers of British Central Africa, and in the following spring a British Protectorate over the countries adjoining Nyasa was proclaimed. The Protectorate of Nyasaland, under the administration of an Imperial Commissioner, was confined to the regions adjoining the Shiré and Lake Nyam; the remainder of the territory under British influence north of the Zambesi being placed, subject to certain conditions, under the British South Africa Company.

In the autumn of 1891 an expedition was successfully conducted by the Commissioner and Captain Maguire against Mohandanji and Mponda, slave-raiding Yaos at the south end of Kyasa. which resulted in the former being attacked and his followers effectually dispersed, and the latter suing for peace after his town had been shelled. The next few years brought much trouble to the Protectorate in the way of slave-trading and constant raids, but owing to three gun-boats being placed on the Lake for the suppression of the slave trade, further reinforcements of Sikhs arriving from India, and the recruitment of native troops from the Atonga of West Nyasa, the slave trade was abolished and the peaceful development of the Protectorate secured. In 1893, the name of the Protectorate was changed to "The British Central Africa Protectorate," but the old name "Nyssaland Protectorate" was revived in 1907, by the Order in Council which amended the Constitution.

Constitution.

The administration of the Protectorate, control of which was transferred to the Colonial Office from the Foreign Office in March, 1904, was originally conducted by a Commissioner and Consul-General, assisted by the Deputy and Assistant Deputy Commissioner. On transfer to the Colonial Office the post of Consul-General was abolished, and by an Order in Council which came into force in October, 1907, the Commissioner became a Governor and Commander-in-Chief. By the same Order Executive and Legislative Councils were established.

The Laws consist of local Ordinances duly enacted with such British Acts as are of general application. Justice is administered in the High Court, which has jurisdiction in Civil and Criminal matters, and also as a Court of Admiralty. Subordinate Courts are held by Magistrates and Assistant Magistrates in the various districts. Appeals from decision of the High Court are heard in H.B.M.'s Court of Appeal for Eastern Africa.

For the East African Governor's Conference, see under Kenya, page 335.

Climate and Products.

There are two distinct climates in the Protectorate, one of the Shire Valley and Lake Nyasa, the other of the Shiré Highlands and the rest of the country which lies at a high elevation. The first has a rainfall averaging 35 inches yearly, and a temperature which touches 120° in the summer. The second has a pleasant climate, the thermometer ranging from 96° or 97° in the summer to a minimum of about 40° in the winter. rainfall in the Shiré Highlands varies from about 40 to 100 inches.

Industry and Customs.

The chief products of the Protectorate are tobacco, cotton, tea, chillies, rubber, rice, maize, wheat.

The export of cotton for the year ended 31st December, 1933, was 2,423,791 lbs.: of tobacco 10,394,498 lbs. 97 39 per cent. of the export trade in 1933 was to the United Kingdom and British Colonies.

The chief imports are provisions, cotton goods, motor vehicles, earthenware, hardware, wines and spirits, salt, silk and woollen goods, agricultural machinery, arms and ammunition. 62.2 per cent. of the imports in 1933 came from the United Kingdom and British Colonies.

The Customs revenue is derived principally from an import duty of 17% on the cost at the seaport of discharge, s.e., Beira. No export duties

are levied.

Nyasaland being wholly within the regions covered by the Congo Basin Treaties, 1885, and the Convention of St. Germain-en-Laye, 1919, may not grant preferential rates of duty. Its Customs Tariff, therefore, applies equally to imports from all nations.

Customs revenue collected during 1933 amounted to 122,863/. as against 134,662/. in the previous

Vest

The following table shows the origin of direct consignments of domestic trade imports during the last five years :-

Year.	United Kingdom.		Briti Posses		Foreign Countries.		
1930 1931 1932	£ 269,708 258,957 302,534 409,092 341,484	% 36°28 34°79 41.68 55°64 53°4	£ 165,808 147,642 136,662 98,396 54,841	% 22.29 19.83 18.80 13.38 8.8	£ 306,029 337,778 287,354 227,807 233,920	% 41.43 45.38 39.6 30.98 37.8	

The total exports of the Protectorate during 1933 weighed 8,510 tons and were valued at 513,6441. Of the domestic products exported 91.31 per cent. of the weight and 97.4 per cent. of the value were consigned to the United Kingdom.

Means of Communication.

A railway from Port Herald, on the Lower Shire, to Blantyre, 113 miles, via Chiromo and Luchenza, was built by the Shire Highlands Railway Company, under an agreement made in 1902 with the Nyasaland Government under which a subsidy was paid to the Railway. Subsequently the Central African Railway Co. constructed a section, opened in 1915, from Chindio on the Zambesi to Port Herald, 61 miles, of which the first 45 are in Portuguese territory. Both lines are of 3ft. 6in. gauge. A railway of the same gauge was opened for traffic in April, 1922, by the Trans-Zambesia Railway Co., which runs from Murraça on the south bank of the Zambesia to Dondo, the junction with the Mashonaland trunk line, about 20 miles from Beira (165 miles, all in Portuguese territory). A bridge across the Zambesi to connect the Trans-Zambesia Railway with the Central Africa Railway is now under construction, as is also an extension of the railway system from Blantyre to Lake Nyasa. Both these undertakings will be completed in 1935. There are eight British steamers plying on the Zambesi and Shiré between Chinde and the railway terminus. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,142. The Nyasaland road system is linked up with the Great North Road to Tanganyika Territory and Kenya Colony. There are five steamers on Lake Nyasa.

There are aerodromes suitable for all types of aircraft at Chilika, Zomba, and Lilongwe; and seasonal landing grounds are available at the

principal district stations.

Mails to and from England, are despatched every week vid Cape Town and Beira, and also weekly by the Rhodesia and Nyasaland Airways from Blantyre linking up with the Imperial Airways at Salisbury.

Rates of Postage.

Letters to the United Kingdom and British Possessions, not exceeding 1 oz., 2d., each additional oz., 11d.; letters to other parts of the world, per oz., 3d., each additional oz., 2d.; Postcards, single, 13d. each; Newspapers, not exceeding 2 ozs., 1d.; Printed papers and samples, per 2 ozs., 2d.; Commercial papers, 2 ozs., 2d., minimum charge, 3d.

Parcels to and from United Kingdom (south route), 3 lbs., 4s., 7 lbs., 6s.; 11 lbs., 7s. 6d.; 22 lbs. 11s. Money Orders are issued at a commission of 6d. up to £3, and 2d. for each additional £1 or portion thereof (up to a limit of £40 for one order), for orders payable in Nyasa-

Digitized by Google

For Money Orders payable in the United Kingdom and all other countries, the commission is for sums not exceeding £3, 1s., and 4d. for every additional £1 (up to a limit of £40 for one order). Local parcels, 2 lbs. 1s.; 5 lbs. 2s.; 8 lbs. 3s.; 11 lbs. 4s. British Postal Orders issued and paid at all Post Offices. Rates of poundage, 6d. to 2s. 6d., 2d.; 3s. to 15s., 3d.; 15s. 6d. to 21s., 4d.

Telegraphs.

In 1925 the Government purchased the assets Trans-continental Telegraph of the African Company. The line is in use from Ujiji on Lake Tanganyika southwards through the Protectorate, vid Blantyre and Tete, to Umtali in Southern Rhodesia and thence to Cape Town and England. The total mileage through the Protectorate is 1028 miles. Telegrams may also be transmitted over the railway line and the Portuguese line between Chinds and Tete. Since Government assumed control of the telegraph service extensions have been constructed providing 233 additional miles of line. The telephone service now links up Zomba, Blantyre, Limbe, Cholo, Luchenza, Mlanje, Chiradzula, and Chikwawa.

Education.

An educational policy has been prepared by the Director of Education. Provision is made for the education of European children; native education in the hands of the missionary societies is controlled by the Government.

A grant of £10,465 was made by the Government in 1933.

Currency and Banking.

By a Proclamation of February, 1894, the legal currency is declared to be English sterling, and by Proclamation No. 11 of 1933, Rhodesian Silver

Coin was declared legal tender.

Banking operations in the Protectorate are governed by "The Banking Ordinance, 1902."

Two Banks have branches at Blantyre, the principal trading centre of the country, viz., The Standard Bank of South Africa, Limited, and Barclays Bank (Dominion, Colonial and Overseas); the former has a branch at Zomba, and agencies at other centres.

There is a Post Office Savings Bank.

Nurses-

Matron, K. R. Cameron, M.B.E., 300l. to 426l. by 18l., and 20l. uniform allowance.

Nurses, N. M. Cremen, M.B.E., H. M. Phillips, N. K. Clemence, M. E. S. Cumming, H. C. Potter, S. Johnson, E. F. McConachy, B. Wells, E. M. R. I. Davies, F. McQuire, 240. to 300l. by 18l. and 20l. uniform, allowance.

Education.

Director, A. J. Lacey, 1,000l.

Assistant Director, (vacant), 720l. to 840l. by 301., to 9201. by 401.

Principal, "Jeanes" Training Centre, B. D. Bowman, 8001.

Supts. of Native Education, W. H. Crutchley, I. F. G. Stott, 400l. for 2 years, 475l. by 25l. to 600l. by 30l. to 840l. by 40l. to 920l.

Assistant Master, "Jeanes" Training Centre.

N. D. Clegg, 480l. to 600l. by 20l., to 720l. by 30l. Assistant Mistress, "Jeanes" Training Centre, Miss M. M. Smith, 240l. by 18l. to 276l. by 24l. to 300l.

Clerk, F. H. R. Paddick, 300l. to 480l. by 18l.

Transport.

Chief Transport Officer, C. C. Metcalfe, M.B.E. M.C., 9201.

Senior Clerk, F. J. Kidman, 390l. by 18l. to 480l. Supt. Engineer, M. W. Bartlett, 480% to 600% by 20%, to 720% by 30%.

Assistant Engineers, F. H. Dally, J. L. Edwards,

372l. by 18l. to 500l.

Posts and Telegraphs.

Postmaster-General, S. Pope, 920l.

Assistant Postmaster-General, J. A. Hudson, 6001. to 840l. by 30l.

Surveyors, J.O. Reilly, H. Thompson, M.B.E.,

425l. to 600l. by 25l. to 720l. by 30l. Accountant, A. R. E. Balderstone, 425l. by 25l. to 600l. by 30l. to 720l.

Senior Postmaster, C. L. L. Cole, 480l. to 600l. by 201.

Postmasters, W. R. H. Morgan, J. W. Crompton, L. R. Langridge, R. E. G. Wilkins, P. Shimmins, S. Lawrie, F. Wood, 4261, to 4801, by 181.

Assistant Postmaster, E. St. G. Brown, 3721. to 480l. by 18l.

Telegraph and Telephone Engineer, D. G. M. Lawson, 600l. to 720l. by 30l.

Telegraph Inspector, F. J. T. Burley, 4801. to 600l. by 20l.

Telegraph Mechanic, F. Purse, 372l. by 18l. to 4801.

Agricultural.

Director, W. Small, M.B.E., 1,100%.

Assistant Director and Agricultural Chemist, A. J. W. Hornby, M.B.E., 4801. to 6001. by 201. to 840l. by 30l. to 920l. by 40l.

District Agricultural Officers, F. Barker, E. Lawrence, B. C. G. Charles, R. W. Kettelwell, 480l. to 600l. by 20l. to 720l. by 30l.

Entomologist, C. Smee, M.C., 600l. to 840l. by 30l. Mycologist, R. Leach, 600l. to 840l. by 30l.

Digitized by GOOGIG

Assistant Chemist, I. W. M. A. Black, 4801. to 600l, by 20l, to 720l, by 30l.

Senior Clerk, J. A. Callow, 400l. to 500l. by 20l. Senior Clerk, J. A. A. Channer, 390%. to 490%. by

Junior Clerk, J. A. Gray, 1861. by 151. to 2461. by 18%, to 300%.

Forestry.

Conservator of Forests, J. B. Clements, 920t. Assistant Conservators, J. E. A. Carver, R. G. R. Townsend, P. Topham, 480% to 600% by 20% to 720% by 30%. Forester, C. G. Searle, 372l. to 426l. by 18l.

Veterinary.

Chief Veterinary Officer, J. de Meza, 9201. Veterinary Bacteriologist (vacant), 7201. to 8401. by 30%.

Veterinary Officers, J. M. Culhane, S. G. Wilson, 600l. to 840l. by 30l.

Stock Inspectors, E. C. Holt-Biddle, H. B. P. Cattrall, 372l. to 426l. by 18l.

Public Works.

Director of Public Works, B. R. Peters, M.B.B., 1,100%.

Assistant Director (vacant), 840l. to 920l. by

xecutive Engineers, E. Wall, M.C., H. R. Price, 600l. to 840l. by 30l. Executive Assistant Engineers, E. F. Bryan, M.B.E., R. E. Allen, H. L. Smith, C. R. P. Curran, 480l. to

600l. by 20l. to 720l. by 30l.

Government Architect, (vacant), 480l. to 600l. by 20l. to 720l. by 30l. Electrical Engineer, W. J. Barnicoat, 5001.

Chief Accountant, L. E. Watson, 600l. to 720l. by 30%.

Storekeeper, H. W. Llewellyn, 4801. to 6001. by 20%. Senior Clerks, L. F. Haselgrove, G. T. Stafford,

390% to 480% by 18%. Clerks, E. Reed, M.M., J. Clyne, M.C., 300l. to

480l. by 18l.

Inspectors of Works, E. G. Snow, D. I. Morgan, S. Harmer, H. M. Mitchell, L. G. Walker, 372l. to 480l. by 18l.

Workshop Manager, A. E. Wiltshire, 372l. to 480l. by 18l.

Road Supervisors, J. McLaughlan, J. W. Hitchner, C. W. Adamson, J. Cameron, 372l. to 480l. by 18%.

Road Plant Superintendent, H. M. Hayes, 3721. by 18l. to 480l.

Assistant Road Plant Supervisor, C. J. Kearns, 300l. by 18l. to 390l.

Lands.

Lands Officer, J. E. Alexander, 9201. Assistant Lands Officer, H. Malpass, 480l. to 600l. by 20l. to 720l. by 30l.

Assistant Surveyors, E. D. Fort (one vacancy), 480l. to 600l. by 20l. to 720l. by 30l.

Computer-Draughtsman, C. A. Higman, 4801. to 600l. by 20l. to 720l. by 30l.

Police, Prisons and Lunatic Asylum.

Chief Commissioner of Police and Chief Inspector of Prisons, Principal Immigration Officer and Registrar of Motor Vehicles, Major F. T. Stephens, O.B.E., M.C., 1,000.

Superintendent (Criminal Investigation Desertment), V. C. Curnock, 600% to 840% by 30%.

Superintendents, R. J. Paul, W. L. Omane, B. J. Pearson, W. B. Bithrey, 6001, to 8401 by 301.; J. Green, 4251. to 6001. by 251. to 7201 by

Assistant Superintendents, H. Stevens, A. R. Wilson, G. D. A. Branfill, C. P. Guise, G. B. Foote, G. H. W. Kitson, 425l. to 600l. by 28l. to 720l. by 30l.

Assistant Inspectors, A. T. Tate, J. R. S. Tennant, 300l. to 372l. by 18l. and uniform allowance. 107.

Superintendent, Central Prison, J. Archer, M.B.E., D.C.M., 425l. to 600l. by 25l., and 100k as Superintendent, Lunatic Asylum

Deputy Superintendent, Central Prison, G. 8. Paveley, 300l. to 480l. by 18t., uniform allowance, 10t., and 50l. as Assistant Superintendent, Lunatic Asylum.

Gaoler, J. R. Lennon, 3721. to 4261. by 181. and uniform allowance 10%.

Geological Survey.

Director of Geological Survey, F. Dixey, O.B.E. 1,000%.

Well Borer, W. H. Rider, 500% Records Officer, E. P. Hodgson, 3001, by 181 to 480%.

Mineralogical Survey.

Geologists, H. E. F. Savage, E. B. Gillanders, 600l. by 30l. to 720l.

Relief Clerks.

U. J. Chamberlain, D. M. Paterson, W. W. Watson, K. W. West, M. V. Smithyman, 300l. by 18l. to 480l.

Nyasaland Volunteer Reserve.

Staff Officer, Major H. E. Green D.S.O., O.B.E., 7001. plus 501. personal. Pay and Quartermaster, J. Mackenzie, M.M., 481

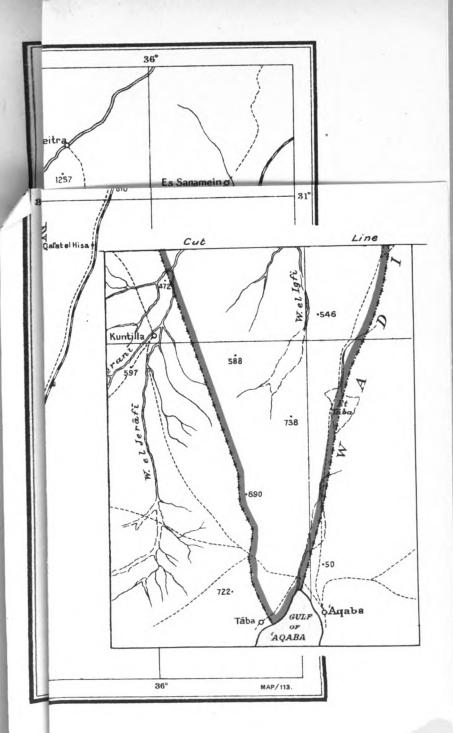

PALESTINE.

Palestine is bounded on the north by the States of Syria and the Lebanon, which are under French Mandate, on the west by the Mediterraness Sea, on the south by the Egyptian province of Sinal (the boundary running from a point west of Rafa on the Mediterranean to a point two miles to the west of where the thalweg of the Wadi Araba joint the Gulf of Aqaba) and on the east by Trans-Jordan. which is included in the area of the Palestine Mandata.

The boundary on the north was determined by the Franco-British Convention of 23rd December, 1920. (Comd. 1195) and in pursuance of that Convention was delimited between the Mediterranean and El Hamme in 1922. The Agreement between He Majesty's Government and the French Government giving effect to the delimitation is published Cmd. 1910 (Treaty Series No. 13 (1923)).

The frontier runs from the Mediterranean at Ras al Nakura eastwards to Yarun, thence N.E. to the village of Qadis, thence N.N.E. to Metullah and across the Jordan Valley to Tel Al Qadi (in Palestine) and Banias (in Syria), thence S.S.W. to Jisr Banat Yaque, thence southwards along the Jordan to the Lake of Tiberias, thence along the eastern shore of the labe of Tiberias to a point almost due east of the town of Tiberias, thence S.S.E. to El Hamme Station on the Hejaz railway.

The frontier with Trans-Jordan is defined as a line drawn from a point two miles west of Aqaba on the Gulf of Aqaba up the centre of the Wadi Araba, the Dead Sea and the River Jordan to the junction of the latter with the River Yarmuk, thence up the centre of the River Yarmuk to the Syrian frontier.

The Natural Divisions of Palestine.

Palestine comprises four zones of country:

- (a) The hill country of Galilee and Judaea,
 (b) The five plains, including that lying in the rift of the Jordan Valley, which, from the north of Lake Tiberias to the Dead Sea, is actually below the level of the Mediterranean,
- (c) the Beersheba area, different in character and population from the rest of the country, (d) the desert area.

(d) the desert area. The five plains are:—The Acre Plain, the Plain of Eedraelon, the Huleh Plain, the Coastal Plain and the Plain of the Jordan.

Geology.

The Hill Country is composed principally of limestone which provides excellent building stone of various colours. Calcareous sandstone abounds along the coast and was used by the Crusaders for their maritime forts and castles (Atlit and Acre); the new Haifa breakwater has been constructed of a similar stone from Atlit. Of metallic minerals, copper ores and important deposits of manganese occur in the southern part of Palestine near the Gulf of Akaba. Petroleum and bitumen exudations are found around the southern part of the Dead Sea. This region and the area westward as far as the Mediterranean Sea is now being explored by Oil Companies. Of non-metallic ores, rock phosphate and bituminous limestone occur in large deposits on the slopes of the Judsean Wilderness. Rock salt occurs in unlimited quantity in the salt dome of Jebel Usdum and has been used for the supply of the Jerusalem market. A sulphur deposit of commercial importance has been located south of Gaza. A plant for treatment and concentration of the sulphur in the ore has now been installed. A good quality of gypsum is found at Menahemiya near Tiberias and impure varieties are found on the slopes of the Judaean Wilderness. Extensive deposits of anhydrite (anhydrous gypsum) occur overlying the rock salt at Jebel Usdum.

The production of potassium Chloride and bromine by Palestine Potash Ltd. shows a substantial increase and the market has now become world wide. Arrangements have been made for producing potash on a large scale at the south end of the Dead Sea. There are hot springs of medicinal value at Tiberas and El Hamme where bathing establishments on modern lines have been erected for the treatment of patients and, in addition, at El Hamme large baths for pleasure bathing and swimming in the waters of varying tepid temperatures are provided.

Climate.

The climate of Palestine varies with the altitude: the coastal region is sub-tropical and humid; the elevated, hilly zone is drier and more temperate, while the Jordan Valley is hot and the rainfall slight. The summer months are almost rainless. January and February are, in general, the wettest months and the main rainfall occurs between November and April. The rainfall varies largely, from a minimum of $2\frac{1}{2}$ inches in the south to a maximum of 3 linches in the north.

Water for domestic use is obtained in the larger towns from piped supplies: in the smaller towns and rural districts, from rock cisterns in which rain water is collected or from small springs or wells. Jerusalem has a piped water supply, pumped partly from a spring about 15 miles south of the town by an installation made by the Military Authorities soon after the occupation, partly from Solomon's Pools, near Bethlehem, by an installation made by the Civil Administration, and partly from the springs of Ain Fara, Ain Fawar and Wadi el Qilt by works constructed by the Municipality in 1926, 1931 and 1932.

In 1933 owing to the very poor rainfall in the previous winter, the springs of Arrub, Solomon's Pools and Ain Fawar totally failed.

The water supply is now obtained actually from Ain Fara and Wadi Qilt and approximately 450,000 gallons per day are pumped to Jerusalem from these sources.

In 1932-33 a new Town Service Reservoir was built, with a capacity of 2,200,000 gallons.

Considerable progress has been made towards the eradication of malaris, formerly so prevalent, by Government distribution of quinine in villages, oiling of wells and cisterns, provision of pumps, and drainage of swamps.

The country is relatively free from epidemic disease.

Government.

Under Turkish rule, part of Palestine was in the Vilayet (Province) of Beirut and part in the Sandjak (District) of Jerusalem. After its conquest in 1917–1918 by the British forces, the country remained under British Military Administration until July, 1920, when Sir Herbert Samuel was appointed High Commissioner, and a Civil Administration set

By the Treaty of Peace, signed at Lausanne on 24th July, 1923, Turkey renounced all rights over Palestine. The Principal Allied Powers had selected His Britannic Majesty as Mandatory at the Conference at San Remo, on 25th April, 1920. The terms of the Mandate were approved by the Council of the League of Nations on the 24th July, 1922, and the Mandate came into force on September 29th, 1923. The Mandatory is responsible, inter alia, for carrying into effect the terms of the Balfour Declaration of November 2nd, 1917, viz.:—"His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of that object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish Communities in Palestine, or the rights and political status enjoyed by Jews in any other country.

On the 1st September, 1922, a Constitution was promulgated.

Under this Constitution Palestine is governed by a High Commissioner, who is also the Commander-in-Chief, assisted by an Executive Council consisting of the Chief Secretary, the Attorney-General and the Treasurer: and by an Advisory Council consisting of heads of certain Departments.

An attempt was made in 1923 to create the Legislative Council provided for in the Constitution, but owing to the refusal of the Arabs to take part in the elections, it was replaced by the Advisory Council in order to secure the enactment of legislation until such time as a Legislative Council is created.

English, Arabic and Hebrew are the official lan-

guages of the country.

In 1921, a Supreme Moslem Council was constituted in order to control and manage Moslem Awqaf and Sharia Courts in Palestine. It consists of a President known also as Rais-Al-Ulema, and four members elected by secondary electors, who again are elected by all male Palestinian Moslems over 20 years of age.

Digitized by GOOSI

The Council nominates for approval by Government the officers of the Sharia Courts and appoints the Awqaf officers.

The Council has established a Moslem Orphanage in Jerusalem, and has carried out important repairs of sacred buildings and extensive tree planting on Waof land and in Moslem cometeries.

Regulations were made under the Religious Communities Ordinance, 1926, by the High Communistioner in 1927 for the organisation of the Jewish Community in Palestine. The Jewish community, like the Moslem and the various Christian communities enjoys autonomy in the administration of its internal affairs, religious, cultural and communial; it has also power to levy rates on its members. The organs of the community are a Chief Rabbinate and local Rabbinical offices, an Elected Assembly, a General Council which is elected by the Assembly and represents the community in its dealings with the Government, and local communities.

Complete freedom in their communal affairs is allowed to those Jewish congregations who have exercised the option to remain outside the recognised community.

The Jewish Agency is recognized as the representative body of the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home: it is represented in Palestine by an Executive whose headquarters are at Jerusalem.

The Palestine Government has maintained in force the status and privileges accorded to the different Christian Communities under the Ottoman regime.

The affairs of the larger towns are administered by Municipal Councils presided over by Mayors. In smaller towns and large villages Local Councils have been set up.

A Central Town Planning Commission supervises the activities of local town planning commissions with the object of securing the proper development of urban areas.

Area and Population.

The country is, at present, divided into three districts—the Jerusalem, Northern and Southern Districts—each administered by a District Commissioner.

Palestine, as administered by the Palestine Government, is nearly 10,000 square miles in extent.

The population of this territory taken by Census on November 18th, 1931, was 1,035,821, of which number 387,525 were living in 23 towns and large villages and 66,553 were nomad bedouin. estimate of the settled population at 30.6.34 based on natural increase and excess of immigration is 1,104,605 of whom 740,627 are Moslems, 253,700 Jews, 99,532 Christians and 10,746 persons of other denominations or of no religious confession. To this must be added the nomad bedouin population (Moslem) about whom no figures are available except those given in the Census of 1931 (66,553). The chief town, Jerusalem, which had been in Moslem hands since 1244, and under Turkish rule since 1517, surrendered to General Allenby on December 9th, 1917. Its population in 1931 was 90,503. Church of the Holy Sepulchre is visited annually by large numbers of Christian pilgrims, principally of the Orthodox and Coptic Churches. The site of Solomon's Temple is occupied by the Dome of the Rock, which contains a relic of Muhammad and the reputed sacrificial stone of Abraham. Bethlehem, the scene of Christ's Nativity and the birthplace of King David, is five miles south of Jerusalem. The Charch of the Nativity, at the east end of the present is said to be the oldest Christian church in The population figures of the other principal towns at the date of the Census (18.11.31) were:-

Jaffa, 51,866; Tel-Aviv, 48,101; Hafi, 50,403;
Gaza, 17,046; Nazareth, 8,756; Nablus, 17,189; Saffad, 9,441; Tiberiaa, 8,601; Hebron, 17,631; Ramle, 10,347; Bethlehem, 6,814; Lydda, 11,250; Acre, 7,897.

Jewish Colonisation.

The total Jewish population of Palestine is estimate to be about 285,000. Jewish agricultural settlements number 150 and have a population of over 64,000. Eighty of them are built on the land of the Jewish National Fund, established by the Zionist Organistion for the purposes of acquiring land to remain the property of the Jewish people. (The total possessions of the Jewish National Fund now amount to 342,000 metric dunums.) These settlements have been equipped and financed by the Keren Hayesod, the Colonisation Fund of the Jewish Agency.

Extensive colonisation work has been performed by the Palestine Jewish Colonisation Association, which took over colonies established by Barm Edmond de Rothschild and established new settlements, the total being about 30.

A number of settlements have been founded on the land sequired by private Companies and individuals. The total area in Jewish possession is now over 1,200,000 metric dunams, of which 140,000 are planted with oranges and grape fruits.

The Jewish urban population is approximately 221,000, its main centres being:—Jerusalem and suburbs 65,000, Tel-Aviv (a purely Jewish cty) 102,000, Haifa 29,000, and Jaffa 14,000. There are about 3,500 Jewish factories and workshops employing 19,600 workers and representing a total capital investment of £P.5,371,000 with a total annual output of £P.5,352,000.

The Jewish community of Palestine is organized under the Communities Ordinance and is represented by the General Council, (Vasd Leumi) which control the Hebrew School system and the Health services.

The British Government and Palestine Administration recognise the Jewish Agency (consisting both of Zionists and non-Zionists) which in Palestine is represented by a local executive as the Agency of the Jewish people in all matters pertaining to the development of the Jewish National Home.

Education.

The approximate number of children in Palestine between the ages of 3 and 18 years was in 193 307,000, of whom 231,000 were Moslems, 49,000 Jews and 27,000 Christians. The number of children who attended school in 1932—33 was 91,943, including 36,175 Moslems, 38,337 Jews, 16,836 Christians and 595 Druzes and Bahais.

The Arab Public System of Education, maintained by Government, embraced in that school year 2% schools with 26,691 pupils, the great majority of whom were Moslems. The schools included 2 Teachers Training Colleges with 79 men and 59 women students, and 11 schools with 21 secondary classes containing 212 secondary pupils. The Kadoorie Agricultural School at Tulkarm had 40 boarders. This school aborovides agricultural training for teachers in rural schools and some of its students are trained in it for teaching in rural schools. Technical education is provided in most of the larger schools. The Lar School in Jerusalem had 85 students.

The Jewish and Christian Communities provide, the former almost entirely and the latter to a very large extent, for the education of their own children.

The Hebrew Public System, controlled by the General Council (Vaad Leumi) of the Jewsh Community of Palestine, embraced 265 schools with 24,190 pupils. These included 4 Teachers Training

Digitized by GOOG

Colleges with 103 men and 271 women students, and 7 schools with 32 secondary classes containing 913 secondary pupils. There were also 124 private Jewish schools with 13,221 pupils, including 6 secondary schools with 524 pupils.

There were 5 Jewish Agricultural schools with 710 pupils, 2 junior technical schools with 81 students and a Technical Institute at Heifs with 127 students. The Hebrew University at Jerusalem had 168 students and 20 auditors. The Hebrew Kadoorie Agricultural School was opened at Mount Tabor in the summer 1934.

The Christian schools, maintained by various foreign and religious bodies, numbered 154, with 17,243 pupils. 33 of these schools had 94 secondary classes with 963 pupils; the 3 agricultural schools had 58 pupils. There were about 40 schools from which Attendance Returns were not received; the number of pupils in these schools was estimated at 2,500.

There were 66 private Moslem schools maintained by private persons and associations, with 5,972 boys and 1,502 girls. There were also 108 kuttabs, 13 in towns and 95 in villages. These provided for 3,123

children, of whom 176 were girls.

Some non-Government schools receive a capitation grant-in-aid from the Department of Education, conditional on the acceptance of a certain measure of Government supervision and inspection. A block grant of £P.22,222 was made to the Jewish Community of Palestine for its schools for the scholastic year

In 1933-34, the Arab Public System embraced 320

schools with 30,842 pupils. The complete statistical returns for 1933-34 have not yet been completed. The Palestine Board of Higher Studies was established in 1924. The Government and many educational institutions are represented on it. It conducts the Palestine Matriculation Examination and the Palestine Diploma Examinations, both of which are public examinations recognised by Government. The Palestine Matriculation Examination is recognised by many British Universities.

Justice.

The Courts in Palestine are either civil or religious courts. The former have jurisdiction over local subjects in all matters save those of personal status and Waqfs (charitable endowments), and over foreign subjects in all matters, subject to the provisions mentioned below.

There is a Magistrate's Court in every sub-district, and, in the larger towns, such as Jerusalem, Jaffa and Haifa, two or more such courts. The Magistrates are for the most part Palestinian and have jurisdiction in first instance in minor criminal cases for which the punishment is not more than one year's imprisonment or a fine of a hundred pounds or both, and in civil cases where the value of the subject-matter does not exceed £P.100. They also have jurisdiction in

actions for the recovery of the possession of land.

There are four District Courts, each composed of a British President and two Palestinian judges. They serve respectively the districts of Jerusalem, Jaffa, Nablus, and Haifa. They go on circuit within the area of their jurisdiction. A District Court has jurisdiction in first instance over all crimes except those punishable with death and in all civil cases outside the jurisdiction of a Magistrate. It also hears appeals from the decisions of Magistrates both in civil and in criminal cases, except in cases for the recovery of the possession of land. Crimes punishable with death are tried by a Court of Criminal Assize composed of the Chief Justice or Senior Puisne Judge of the Supreme Court sitting with the District Court.

In each district, in addition to the District Court's there is a Land Court, composed of the President of the District Court and a Palestinian judge of that court, which hears all cases in which the ownership of land is in issue.

The highest court in Palestine is the Supreme Court which is composed of a British Chief Justice and one other British judge and four Palestinian judges. The court sits in two capacities:—

(1) As a Court of Appeal, in which capacity it has appellate jurisdiction in civil and criminal matters decided in first instance by the District Courts, the Land Courts and the Court of Criminal Assize;

(2) As a High Court of Justice, in which capacity it hears applications of the nature of habeas

corpus and mandamus proceedings.

Each division of the Court of Appeal is composed normally of three judges, while the High Court may ait with two judges. In either case a British judge presides. An appeal lies from the Supreme Court in civil cases to the Judicial Committee of the Privy Council where the value of the suit exceeds £500.

The Chief Justice of Palestine is ex officio a Member

of the Full Court of Appeal of Egypt.

Special arrangements exist in the Beersheba subdistrict, where minor cases are disposed of according to tribal custom by the Court of Sheikhs.

All matters of personal status affecting Moslems are within the jurisdiction of the Sharia Courts. A Sharia Court consists of a Kadi, and appeals from his decision lie to the Moslem Court of Appeal, which is composed of a President and two members.

Jewish Religious Courts have exclusive jurisdiction in certain matters of personal status of Jews, and jurisdiction by consent in other matters. An appeal from the decision of the Jewish Religious Courts lies to the Rabbinical Council.

The different Christian communities (such as the Latin and Orthodox) have similar jurisdiction to that

of the Jewish Courts.

Special provisions exist with regard to the trial of foreigners. The general effect of these rules is that where a foreign subject is charged with an offence other than a petty offence, he may claim to be tried by a British magistrate or by a court containing a majority of British judges. In the Court of Appeal he can claim a majority of British judges and in matters of personal status that the action be heard by the British President.

Security.

The Police and Prisons establishment in December, 1933 was 153 Officers (including 57 British Officers) and 2,538 other ranks (including 650 British N.C.O.'s and Constables). 976 serious offences against persons property were reported in 1933, and two death sentences were carried out.

There are Central Prisons in Jerusalem and Acre for long-term prisoners, and a Female Prison in Bethlehem. There are also two Jail Labour Companies of approximately 350 each, the prisoners of which are employed on public works.

The garrison in Palestine and Trans-Jordan in

1933 consisted of the following units:

Air Headquarters Palestine and Trans-Jordan Jerusalem), which administers the following Army, Royal Air Force and Trans-Jordan Frontier Force unite :---Armu :-

Two Battalions of Infantry, one stationed at Jerusalem and one at Haifa.

One W/T Company, Royal Corps of Signals. One Company, R.A.S.C.

B.A.S.C. Supply Depot (Sarafand).

Detachment R.A.M.C. Digitized by

Royal Air Force .-

Two Squadron (Day Bomber) Aircraft. One Flight (Communication) Aircraft

(NOTE.—The H.Q. and two Flights of one squadron are stationed in Egypt.)

One Armoured Car Company.

Meteorological Station, Amman and Ramleh.

R.A.F. Supply Depot, Sarafand.

R.A.F. General Hospital, Sarafand.

Trans-Jordan Frontier Force.

Regimental Headquarters.

Mechanical Transport Troop, Workshops,

Attached to Regimental Headquarters.

Depot Training Cadre. Three Squadrons Cavalry.

Two mechanised companies.

Six Troops Reserve (Dismounted).

Industry and Trade.

The principal industries of export importance are those of the cultivation of citrus fruits in the Southern District and the sub-district of Haifa, soap-boiling in Nablus, Jaffa and Haifa; wine-making, especially in the Jewish settlements, Zikhron-Ya'acov, Rishonle-Zion and Petah-Tikvah: olive oil in Nablus, Acre. Haifa and the district round Jaffa. Cement, textile goods and a variety of other articles are exported to Syria and other neighbouring countries. Durrah, lentils, sesame, barley and edible oils are also exported in considerable quantities, but this largely depends on favourable climatic conditions.

Oranges, grown chiefly in the Jaffa District, are exported to the United Kingdom and Europe, exports during 1933 amounting to 4,199,915 cases valued at £P1,949,177. The area under citrus cultivation continues to increase.

Melons are exported mainly to Egypt and Syria. The principal imports are rice, flour, sugar, petroleum products, textiles, building materials, automobiles, industrial machinery.

There is a considerable number of small factories and workshops, including flour mills; factories for soap, brick and tile, knitted goods, textile, artificial teeth, iron and wood furniture, matches; oil mills and distilleries. Of the larger industries, a cement factory produces over 120,000 tons annually, 12 tobacco and cigarette factories produce some 20,000 kilos of cut tobacco, 538,000 kilos of cigarettes, 72,000 kilos of tombac and 6,000 kilos of snuff, and an oil factory produces over 10,000 tons of refined oil.

The Hydro-electric Power Station of the Palestine Electric Corporation at Jisr Mejamie now supplies current for light and power to Haifa, Tiberias, Jaffa and many rural centres. The Jerusalem Electric and Public Service Corporation serves Jerusalem and its environs, including Ramallah and Bethlehem.

Agricultural and Forestry.

Modern methods are making headway and hold out hopes of development and progress. The country is generally fertile, and cereals, wine, oranges, grape fruit and lemons, olives and various fruits are produced, while sheep and goats thrive in the lowlands and in the mountains.

For the most part the crops are raised without irrigation, except where springs exist and in the eastern portion of the Plain of Esdraelon.

There are generally two crops harvested each year -the cereal and leguminous crop in May to June and a summer crop in August and September.

The yields of the main crops in 1931 to 1933 were:

		1931 Metric tons	1932 Metric tons	1933 Metric tons
Wheat	<u> </u>	79,650	51,073	44.47
Barley		41,200	24,300	23,926
Durra		16,862	15,452	8,540
Lentils		3,758	1,606	1,547
Olives		33,906	6,559	3,599
		(cases)	(cases)	(cases)
Citrus Fruits		2,468,937	3,734,556	4,498,241
(Exports)		(1930-31)	(1931-32)	(1932-33)

No Livestock Enumeration was taken in 1933.

In 1932 th	ere we	re in Pa	destin	e :	
Horses					14,100
Mules					5,599
Donkeys	٠				74,177
Camela					32,317
Cattle					167.001
Sheep		•••			247,669

Poultry					1.172.047
Minteen	O		£	4	

tore maintained during 1933 and produced approximately 11 million forest plants. Planting, begun in 1920, is being considerably extended. By the end of 1933 Government had planted 4,500 acres. Special attention is being given to the reclamation of sand dunes.

Nearly 173,000 acres of state forests have been

reserved.

Government Agricultural and Horticultural Experiment Stations have been organised at Acre, Bessa, Nablus, Jerusalem, Jericho, Sarafand, Farnden (near Safad) and Majdal (near Gaza). The Acre Station also includes a Stud Farm.

Customs.

The Customs Tariff, which is non-differential. is fixed partly on a specific and partly on an ed veloren basis: 60% of imports pay specific charges, principally petrol, kerosene, sugar, rice, coffee, wheat, flour, leaf tobacco, cigarettes, wood and timber for building, rubber tyres and tubes, boots and shoes. Ad valorem duties are levied on ailk (20%), and woollen (12%) goods and motor-cars (25%)

The revenue from import duties in 1933 was £P.1.687.987.

17.53% of imports came from the United Kingdon. 4.07% from other parts of the British Empire. 10.86% from Egypt, 8.47% from Syria, 10.73% from Germany, 7.54% from U.S.A., 5.23% from Roumana and 4.13% from France.

Exports to the United Kingdom constituted 60-17% of the total exports in 1933, to other parts of the British Empire 2.34%, to Germany 14-42%, to Syria 8.22% and to Egypt 2.77%

Shipping and Communications.

The chief ports of Palestine are Haifs and Jaffs The new harbour at Haifa, started in 1929, was completed in 1933, and adequate facilities for ordinary passenger and cargo vessels, both at moorings and alongside the new quays, with transit she's. road, railway and other services, have been provided.

Acre and Gaza are also ports of entry, but ther trade is small and is carried mainly by sailing vere

The following are the principal shipping best

which call at Haifa and Jaffa:—
Khedivial Mail Line, Lloyd Triestino (Flotte Riunite Lloyd Triestino, Marittima Italiana Sitmar), Messageries Maritimes, Royal Netherland S.S. Co., Prince Line Co. Ltd., Ellerman, Papayan Lines Ltd., Moss Line Co. Ltd., Elder Dempster & Co. Ltd., Anglo Saxon Petroleum Co., Deutsche Levant Linie, Svenska Orient Line, American Export Line, Moris Benin, Fabre Line, Armenent L. Dens & Co., Sovtorg Flot, Bulgarian Steamship Co., United Levant Lines, Hellenic Coast Lines Co. Ltd., Service Maritime Rumanie, National Steam Navig. Co. Ltd. of Greece, Ellerman Wilson Line, Polish Palestine Line, Lauritzen Line, G. & T. Mabro, Orient Shipping Line Co.

In 1933, 1,312 steamers, totalling 3,223,959 tons, and 2,060 sailing vessels, totalling 69,675 tons, called at Palestine ports.

Palestine possesses no shipping of its own, other

than small sailing vessels and power launches.

Postal despatches are exchanged daily (in some cases thrice daily) between all principal towns.

There is also a daily exchange of despatches with Egypt, Syria and Trans-Jordan. Direct mails for Great Britain are despatched thrice weekly by ordinary mail and thrice weekly by air mail.

There is a bi-weekly overland desert mail service

with Iraq and Persia, via Amman.

Imperial Airways have an aerodrome at Gaza which is used in connection with the air mail services to and from Great Britain, Iraq and India.

All the principal towns are connected by telegraph and telephone. There is direct telegraphic communieation with Cyprus, Egypt, Syria and Trans-Jordan, and a trunk telephone service with Egypt, Syria and Trans-Jordan. The trunk service with Egypt affords radio-telephonic facilities with Great Britain, certain other countries in Europe, Australia, America, India and South Africa.

In 1933 there were conveyed 17,716,800 letters, 1,376,400 postcards, 9,604,000 printed communications and samples, 156,873 parcels. 307,000 telegrams were transmitted. Total length of main telegraph and telephone lines, 13,434 kilometres; local lines, 18,172 kilometres. Number of telephone subscribers 3,862; telephone instruments in use, 6,115.

The total length of the Palestine Railways, including branch lines and sidings, is approximately 718

miles, as follows :--

Standard Gauge (4'84").

251

718

Kantara-Rafa				139

Heife /Kilo 9) to A	070			1 5 1

The Kantara-Rafa Section is operated by the Palestine Railways on behalf of His Majesty's Government.

There is through communication with Egypt, and trains connect at Kantara West daily with Cairo, Alexandria, Port Said, Suez and other parts of Egypt. Goods vehicles are sent across the canal by means of a truck transporter.

Sentinel-Cammell Steam Rail Cars are in use on the Haifa-Lydda-Khan Yunis, Haifa-Acre and

Haifa-Samakh Sections.

Nablus-Tulkarm

East of Haifa the Palestine Railways Administration extends to Ma'an in Trans-Jordan, but with a break between Samakh and Nassib which is operated by the Chemins de fer du Hedjaz authorities. There are 590 miles of metalled roads in Palestine

open for traffic throughout the year which are extensively used by motor transport, and in addition, many hundreds of miles of tracks passable for wheeled traffic of all kinds during dry weather.

Banking, Co-operatives and Currency.

The most important bank in Palestine is Barelays Bank (Dominion, Colonial and Overseas), with branches at Jerusalem, Jaffa, Tel-Aviv, Haifa, Nazareth, Nablus and an agency at Acre. Anglo-Palestine Bank has its head office in Jerusalem with branches at Jaffa, Tel-Aviv, Haifa, Tiberias, Safad, Petah-Tikvah and an agency at Rehovoth. In addition there are branches in Jerusalem of the Ottoman Bank (also in Haifa, Jaffa, Tel-Aviv, Nablus and Amman), and the Banco di Roma (also in Jaffa, Haifa and Tel-Aviv). There is a Workers' Bank at Tel-Aviv and Banks have been established for granting building loans to Co-operative Societies. The co-operative movement is extensively established among the Jewish population, both urban and rural. There is a Registrar of Co-operative Societies whose duties include the encouragement of the growth of a similar movement among the Arab farmers.

A Currency Board was appointed in London in 1926 in order to introduce and control a Palestine currency based on the pound sterling; and the new currency was issued on the 1st November, 1927, under the authority of an Order of His Majesty in Council

dated the 7th of February, 1927.

The standard of currency is the Palestine pound, divided into 1,000 mils. The Palestine Currency Order provides for a gold coin of one Palestine pound containing 123-27447 grains of standard gold (the equivalent of the English sovereign). It is not intended at present to introduce gold coins. The Currency Board has issued silver coins of 100 and 50 mils, nickel bronze coins of 20, 10 and 5 mils, bronze coins of 2 and 1 mils, and currency notes of £P.100, £P.50, £P.10, £P.5, £P.1 and 500 mils. The currency notes are legal tender for the amounts expressed therein. Silver coins are legal tender for the payment of £P.2, nickel bronze coins of 20 and 10 mils are legal tender for the payment of an amount not exceeding 200 mils, and coins of lower denomina-tion are legal tender for an amount not exceeding 100 mils. The amount of Palestine currency in circulation at the 31st August, 1934, was :- Coins, £P.461,980; notes, £P.3,947,684.

The metric system is followed by the Government and local authorities, but the use of local weights and measures is still permitted for the general public.

Antiquities.

The administration of the Antiquities Service in Palestine is controlled by the Department of Antiquities, working under the Antiquities Ordinance (1929) and Regulations (1930–32). During 1933, twenty-one licences to excavate or make soundings were issued. The results of the Department's research work, together with summaries of the results of licensed excavations conducted by non-Government bodies, are published in the Quarterly of the Department of Antiquities in Palestine. (Published by Mr. Humphrey Milford, Oxford University Press, London, E.C.4.)

The Palestine Archaeological Museum, built with funds made available by Mr. John D. Rockefeller, Junior, is in course of construction.

For further information on all the above subjects see the "Handbook of Palestine" (Luke, H. C., and Keith-Roach, E.), published in 1930 by Macmillan and Co., and issued under the authority of the Government of Palestine, the Annual Blue Books of the Palestine Government, obtainable from the Superintendent of Printing and Stationery, Jerusalem, and the Annual Reports on the Administration of Palestine and Trans-Jordan, published by His Majesty's Stationery Office.

NOTE.—In addition to the salaries stated above, officers who are neither Palestinians nor natives of Egypt, Iraq, Syria, and other neighbouring territories receive an Expatriation Allowance at the following annual rates: Officers with fixed salaries of 1,100l. and over—200l. Officers on 850l.-50l.-1,100l.-150l. Officers of Grades F. G and H, 1001. Officers of Grades K and L-50%.

ST. HELENA

Situation, Area, &c.

St. Helena is an island in the South Atlantic Ocean, 700 miles S.E. of Ascension, and 1,200 miles from the coast of Africa, in 15° 55′ S. lat., and 5° 42' W. long. It is 103 miles long and 63 broad, covering an area of 47 square miles, or about 30,000 acres (a little larger than Jersey). The distance from Southampton is 4,477 miles, and from Capetown 1,695 miles. The usual mail passage is, from England, 17 days, and from Capetown, 5 days.

A census taken in April, 1931, showed a popula-

tion of 3,995, of whom 48 were members of the Garrison.

The capital and only town is Jamestown, on the N.W. of the island, with a population in April, 1931, of 1,381. The climate is mild, and varies little, the thermometer in Jamestown varies little, the thermometer in Jamestown ranging in summer between 68° and 84°, and in winter between 57° and 70°. The country is 10° colder. The rainfall for the years 1931, 1932 and 1933 was 31°83, 30°38 and 22°48 inches respectively. The island is very healthy. The death-rate per 1,000 inhabitants was for 1931, 14°77, for 1932, 13°90, and for 1933, 18°40, and 14.77; for 1932, 13.99; and for 1933, 16.40; and the birth-rate per 1,000 inhabitants was for 1931, 30.8; for 1932, 36.65; and for 1933, 27.81.

History.

St. Helena, then uninhabited and well wooded, was discovered by the Portuguese Commander Juan de Nova Castella, on St. Helena's day, May 21st, 1502. The Portuguese appear to have kept the situation of the island a secret from other European nations until 1588, when it was visited by Captain Cavendish, on his return from a voyage round the world. They built a church there, but made no permanent settlement. After Captain Cavendish's visit, the island became a port of call for ships of various nations voyaging between the East Indies and Europe. In 1633, Jacques Specz formally annexed it on behalf of the States General; but no attempt to occupy it was made by the Dutch. It was annexed and occupied by Captain John Dutton, who was sent out by the East India Company for the purpose with an expedition which arrived at St. Helena on 5th May, 1659. The first official authorisation of the Company's occupation occurs in a Charter dated 1661. In January, 1673, the Dutch seized it, but they were driven out in May by Captain Munden, of the English Navy. A charter was issued by Charles II. to the East India Company for its possession in December, 1673, and it remained under that Company, with the exception of the period of Napoleon's imprisonment there, till 22nd April, 1834, when it was brought under the direct government of the Crown by an Act of Parliament of 1833.

Education and Local Government.

The Government maintain 3 schools, having 291 scholars. There are also 5 endowed and private day schools, three of which are aided by Government, having 417 scholars. School attendance is compulsory under Ordinance No. 11 of 1903, and fees of 1d. a week per child are charged.

The only local authority is the Poor Relief Board, the revenue and expenditure of which for the year 1931 was 974l. and 863l.; for the year 1932 was 1,025l. and 967l; and for the year 1933 was 1,009l. and 909l. respectively.

Industry, Trade and Customs.

St. Helena is well watered by clear springs, which are abundant. It is situated in the heart of the South Atlantic trade wind, blowing from the S.E. for about 330 days in the year, and in the direct track of vessels homeward bound from the East round the Cape of Good Hope. Previous to the opening of the Red Sea route it was a port of eall for a vast quantity of shipping and passengers to and from India and other parts of the East, and in consequence of its importance in connection with the Eastern trade, large establishments were maintained, both civil and military. For many years it was also a depôt for liberated Africans landed from slavers captured by the West Coast squadron. As early as 1818 a law was passed that all future children born in the Island should be free.

Beyond the supply of the passing shipping it has never produced any article of export properly so called, except flax fibre (phormium tenax). The company which started this industry failed from bad management in transporting the green leaves to town for treatment. For every 100 tons so transported at a heavy cost the yield was only about three tons of fibre, though, under present conditions of working, ten tons of phormium leaves give one ton of fibre and a quarter ton of tow. The industry was re-started with the help of a grant from the Home Exchequer. The Government Mill was opened in 1907, and is now on lease to Messrs. Solomon & Co., of this Colony.

There are now nine mills operating in the Island, the amount of fibre and tow exported in 1933 being 668 and 285 tons respectively. A rope and twine industry was also established in 1925, the amount of rope and twine exported during 1933 being 45 tons.

In 1932 the land under cultivation of Flax was estimated at 3,000 acres.

A lace-making industry was established in August, 1907, with the help of a grant from Imperial funds.

The number of ships calling at Jamestown (now a free port) for supplies, including steamers and ships of war was 40 in 1933. It is a port of registry.

The chief industries are phormium fibre, lacemaking, aloe and bead work, fishing and agriculture, the main arable crop being phormium tenax. The Government savings bank was established

The Government savings bank was established in 1865 (the amount standing to the credit of depositors on 31st December, 1933, was 20,958*l*.), and the Government issues bills of exchange on England at par.

There are excellent facilities for the supply of coal and water to ships.

The customs duties are mainly specific. The tariff is preferential. A number of essential commodities are exempt from duty if they are the growth, produce ormanufacture of the British Empire. Other goods, if of non-British origin, are subject to a surtax of one-quarter of the ordinary duty.

Means of Communication.

Steamers arrive from England at regular intervals of 4 weeks, and proceed to the Capeand Natal, steamers arrive from thence at the same interval and proceed to England. The interval between the arrival and departure of the mails is 14 days.

The rate of postage to the U.K., India, and Brish Possessions is 2d. for the first oz. and ligitor each aditional ounce; to other parts of the vaid 3d, for the first oz. and 1jd. for each addressi eunce. There is no internal post, but there are 11 miles of telegraph, constructed by the Co-mai Government with the assistance of a loan frathe Colonial Development Fund of 475l. The cable from the Cape (which is being worked by the Eastern Telegraph Company with a staff of including a Manager) reached St. Helema at the end of 1899, and was carried forward to Assession by February, 1900. It is completed to St Vincent.

Constitution

The Government is administered by a Governer, aided by an Executive Council.

The Governor alone makes Ordinances, there being no Legislative Council, but power is reserved to legislate by Order of His Majesty in Council.

1920 Colonel R. F. Peel, C. M.G. 1925 Sir Charles Harper, K.B.E., C.M.G.

1932 Sir Spencer Davis, Kt., C.M.G.

Executive Council.

The Governor; O.C. Troops, Government Secretary, H. W. Solomon, O.B.E.; L. S. Bartlett; F. R. Thorpe; F. G. N. Desson; Clerk, G. E. Moss.

Civil Establishment.

Governor.

Governor and Commander in Chief, Sir Spencer Davis, Kt., C.M.G., 1,000l. A.D.C. (vacant).

Secretariat.

Government Secretary, G. C. Kitching, O.B.E., 550l., transport allowance.

Treasury and Customs.

Coionial Treasurer and Collector of Customs, P. F. Barton, 450/., fees. Manager, Government Savings Bank, P. F. Barton.

Audit.

Local Auditor, G. C. Kitching, O.B.E.

Port Office.

Harbour Master, F. W. Lane, M.B.E., fees.

Post Office.

Postmaster, G. E. Moss, 1751., quarters.

Medical.

Colonial Surgeon, L. L. Burton, M.D., F.R.C.S., M.R.C.S., L.R.C.P., L.S.A., 550l., and 30l. transport allowance and private practice.

2nd Medical Officer, P. B. Wilkinson, M.B., B.S., M.R.C.S., M.R.C.P., L.R.C.P., 5002, and 304., transport allowance and private practice.

Dental Surgeon, Dr. W. Johnston, M.R.C.S., L.R.C.P., 240l, and 30l. transport allowance, free quarters.

Sanitary Inspector, A. Nicholls, M.B.E., 151.

Judicial.

Acting Chief Justice, The Governor (ex officio)Police Magistrate, Judge Small Debts Court,
G. C. Kitching, O.B.E.

Registrar, Supreme Court, A. Nicholls (acting). Coroner, F. R. Thorpe, Esq., J.P.

Legal.

Luw Officer, Legal Adviser and Crown Prosecutor (vacant).

Educational.

Supervisor of Education, Rev. Canon L. C. Walcott, 54l.

Head Master, Government Boys' School, W. Corker,

100%.

Registration Department.

Registrar General,

Registrar of Deeds, Registrar of Births, Marriages and Deaths, P. F. Barton, fees.

Troops.

Officer Commanding, Major C. A. C. Lucas, O.B.E., R.M.

Police and Prison.

Superintendent of Police and Gaols, A. Nicholls, M.B.E., 200l. and quarters.

Public Works.

Superintendent of Works, F. W. Lane, M.B.E., 4001., quarters, 301. transport allowance.

Ecclesiastical.

Bishop of St. Helenu, Right Rev. C. C. Watts, M.A.

Chaplain to Hospital and Prison, Rev. Canon L. C. Walcott, 25l.

Roman Catholic (vacant).

Consuls.

H. W. Solomon, Consul for Netherlands (acting), Denmark, Portugal, and Norway, Vice-Consul for Russia (acting), Vice-Consul for Spain. Consular Agent for France, Georges Colin.

ASCENSION.

The island of Ascension, 34 square miles in area, lying in the South Atlantic, lat. 7° 53′ S. and long. 14° 18′ W., was taken possession of in 1815, and, until 1922, it was under the supervision of the Admiralty and a small naval station was maintained there.

By Letters Patent dated 12th September, 1922, it was made a Dependency of St. Helena and placed under the control of the Secretary of State

for the Colonies.

It is famous for its turtles, large numbers of which are caught between December and May. It is connected by telegraph with St. Vincent, St. Helena, and Sierra Leone, and is an important cable station of the Eastern Telegraph Company. It is a barren, rocky peak of purely volcanic origin, and destitute of vegetation, except at the highest point, 2,870 feet high, but has been cultivated to an extent permitting the maintenance of about 600 sheep and cattle.

Population at 1931 Census, 188, of whom 126 are St. Helenians.

Resident Manistrate and Receiver of Wrecks, L. S. Bartlett.

Postmaster, N. T. Bramble. Harbour Master, H. Robson.

SEYCHELLES.

Description.

The Seychelles Islands are situated between the parallels of S. lat. 4° and 10°. The total area of the Colony and its dependencies is 1564 sq. miles. The number of islands under the Seychelles Government is 92.

The death-rate in 1933 was 12:04 per 1,000; the

birth-rate being 28.57 per 1,000.

Mahe is the largest and most populous of the Seychelles Islands. It is 17 miles long and 3 to 7 miles broad, and is estimated to contain 551 square miles. It has about 105 miles of good roads and paths, and communication between all the districts of the island is easy.

It is distant from Mauritius 934, Madagascar 600, and from Zanzibar 970 miles. It is fertile, and healthy. The shade temperature seldom exceeds 84, and falls frequently at night to 72, and the records taken on the hills are several degrees lower. The rainfall at Victoria was in

1932, 75.60 inches.

The island rises abruptly from the sea, and the highest peak reaches the elevation of 2,997 feet. Victoria, the capital of the island, is situated in a valley in the north-east, and has a safe and commodious harbour, provided with a lighthouse showing a white flash of 0.7 second duration every 6.7 seconds.

The other chief islands are Praslin (9,700) acres); Silhouette (4,900 acres); La Digue (2,500 acres), Curieuse (900 acres); Félicité (689 acres). North Island (525 acres); St. Anne (500 acres); Providence (500 acres); Frigate (700 acres); Denis (340 acres); Cerf (290 acres); and Bird or Sea Cow Island (160 acres).

The following islands are also dependencies of Seychelles: — The Amirantes, Alphonse Island, Bijoutier Island, St. Francois Island, St. Pierre Island, the Cosmoledo Group, Astove Island, Assumption Island, Cöetivy, Aldabra and Farquhar İsland.

The island of Coëtivy, formerly a dependency of Mauritius, was transferred to Seychelles by Letters Patent in 1907, and the Farquhar Island

in 1922.

History.

The islands are believed to have been discovered by a Portuguese named Pedro Mascaregnas, in 1505, but the discovery was not apparently followed by any attempt at colonisation.

Previous to the French occupation they were the resort of pirates or corsairs who infested the Indian Ocean, some of whose names are borne by descendants in Mahé at the present time.

Under the Government at Mauritius of Labourdonnais, whose name they originally bore, their position was first defined in 1743, and M. Picault, who took possession of the Islands in the name of the King of France, called the principal island Mahé. In 1756 the group was re-named the Seychelles Islands, in honour of the Vicomte Moreau de Séchelles, who was Controller-General of Finance under Louis XV., from 1754 to 1756.

The natural resources of the Islands, and their freedom from hurricanes, induced the French to transplant from the Isle de France (now Mauritius) cinnamon, cloves, and nutmegs, under the directions of M. Poivre. Much secrecy was at first observed in regard to the existence of retired plantations, the object being to wrest from the Dutch the lucrative spice monopoly which the colonies of that nation then enjoyed in Europe from their own possessions.

The rumours of the war that broke out atten France and England in 1778, induced the then French Governor of Mauritius, Count de sa ne to issue peremptory orders that in the event an attack the spice plantations should be at once destroyed. Soon afterwards a French almost Madagascar, having slaves on board, call at Mahe to take in wood and water, but fearing mat the English might be in possession, adopte the ruse of hoisting the English flag. The main French force at Mahé had already been withdry. and the officer in charge, knowing that resistance was useless, at once set fire to the whole of the spice trees, each of which had previously been sa rounded with dry wood and inflammable materia.

During the war of the French Revolution Mais was extremely useful to French ships as a place of refuge and refitment, but on the 17th May, 1794 it was captured by Captain Newcome, of Ha Majesty's ship "Orpheus."

The last French Governor, M. De Quincy, who was born at Paris in November, 1748, became after Lieutenant Sullivan, R.N., who had been placed in charge, had left, the first Agent Civil under the British Government. M. De Quincy's reign as French Governor lasted twenty years. He remained for eighteen years in the service of the British Government, and died on the loth

July, 1827.

The capitulation was renewed in 1896 by Capt. Ferrier, of His Majesty's ship "Albion." but it was not until the capture of Mauritius in 1810, that Seychelles was formally taken possession of by the appointment of an Agent, and moorporated as a dependency of that Colony. From 1794 to 1810 Seychelles, though nominally a British Colony, seems to have been administered as a French Colony, and all Civil Status Acts ran in the name of the French Government. A Board of Civil Commissioners was appointed in 1872, when the finances of the Seychelles were separated from those of Mauritius. The title of the Head of the Government was changed from that of Civil Commissioner to that of Chief Civil Commissioner. The powers of the Board were further enlarged in 1874 by another Order in Council.

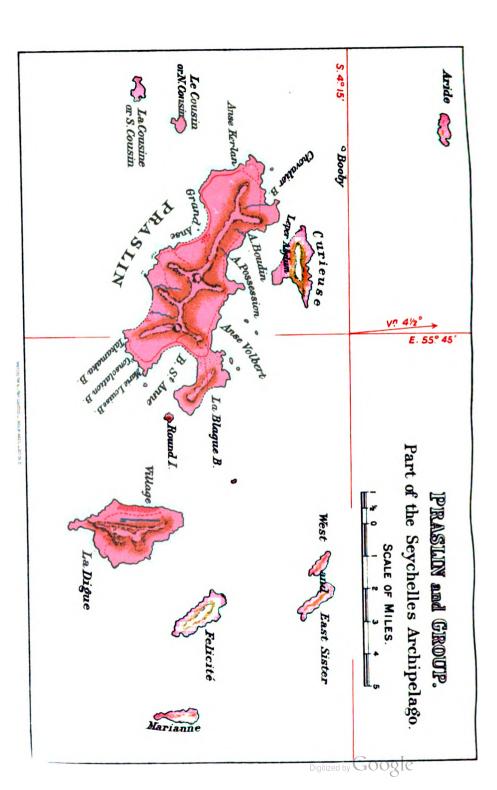

The increasing importance of these islands was considered sufficient to warrant an alteration in the constitution of the Government, and in December, 1888, an Order in Council was passed creating the office of Administrator, and nominating an Executive and Legislative Council. In 1897, by Letters Patent and Royal Instructions, the Administrator was given full powers as Governor, and Sevchelles was practically separated from Mauritius. The separation was completely carried out by Letters Patent of 31st August, 1903, by which Seychelles was erected into a separate Colony under its own

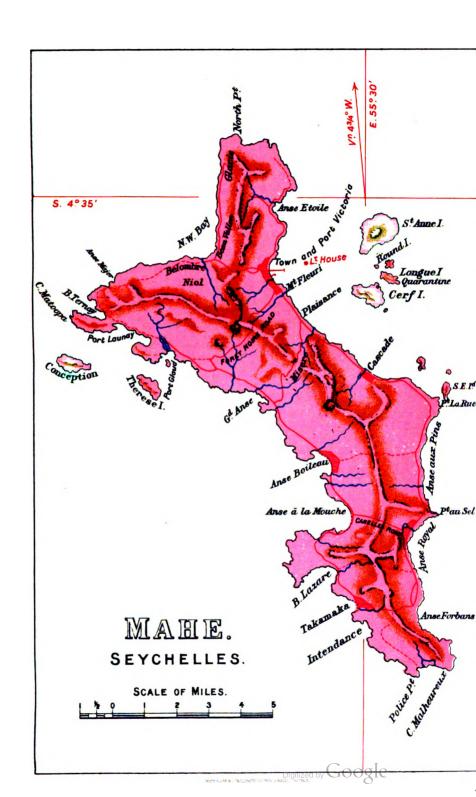

Governor and Commander-in-Chief.

An education grant of Rs. 22,214 is given for assisting schools of all denominations, of which there were 25 in 1932. All schools are now denominational, and Government Scholarships and Awards are offered both to primary and secondary schools. Technical education is dealt with by means of ΑÌÌ Government apprenticeships. schools are inspected by the Inspector of Schools.

Communications, de.

The British India Company's steamers call regularly once every 4 weeks from Bombay to Fast African Ports, and once every 8 weeks on their return voyage from Mombasa to Bombay. The Royal Dutch Mail Line stramers call once every

month on their return journey from Mombasa to Penang and Batavia and the Scandinavian East African Line steamers call irregularly at this port on their way to Europe from Madagascar. The Admiralty used Victoria as a coaling station. Seychelles is now included in the East Indies Naval Station.

Telegraphic communication with Mauritius and Europe vid Zanzibar was completed in November, 1893. Direct cables to Aden and Colombo were completed in 1922. The rates for telegrams from Seychelles are 75 cts. per word to Mauritius or Zanzibar, and Rs. 1.50 to Aden or Europe.

The present letter rate of postage to the United Kingdom, India, Dominions and British Possessions is 12 cents; to other countries of the Postal Union 20 cents. The parcels post has been in full operation since April, 1890. The cash on delivery service for parcel post was introduced in 1911. The money order system is in operation with England and numerous other countries and colonies, including Bombay, Aden, Zanzibar, Mauritius and Ceylon.

Savings Bank and Currency.

A Government Savings bank was established in March, 1897, and at the close of the year 1933, the amount standing to the credit of depositors was Rs. 181,858. All the Savings Bank funds are invested. The branches which were established at Anse Royale and La Digue were closed during 1906, as there were no transactions.

The currency consists of the Indian rupee and the Mauritius subsidiary coinage. Accounts are kept in rupees and cents. Indian, Mauritius, and Seychelles Government Notes also circulate freely.

Local Boards.

A Local Board of Health, vested with powers and duties somewhat similar to those entrusted to Municipal Bodies, was created in Victoria at the end of 1900. In 1922 the title was changed to that of "The Victoria Town Board." Similar Boards were created for the Islands of Praslin and La Digue at the end of 1901, and for the South Mahé District in March, 1902.

Products and Industries, Trade and Customs, dc.

In 1933 the chief exports were copra, 3,236 tons; guano, 12,307 tons; tortoise-shell, 1,191 kilos,; vanilla, 453 kilos; trepangs, 1,933 kilos.; essential oils, 61,367 kilos.

In Victoria, there is a Botanic Garden containing many interesting tropical plants.

More especially at Praslin, though also in other parts of the group, are to be found the celebrated coco-de-mer, with the leaves of which beautiful hats and delicate basket work are made by the natives.

The Aldabra group of islands under the Seychelle administration is the habitat of the gigantic land tortoises; numerous living specimens are, however, to be seen in Mahé and the neighbouring islands.

The revenue is derived principally from specific import duties, which are light, and an ad valorem duty of 15 per cent. on articles not otherwise enumerated (10 per cent. surtax on Customs Imports duty was imposed for the period of the War and is still in force), licences, an income tax on a graduated scale and a tax on immovable property and stamps. An export duty of Rs. 1 a ton is levied on guano, prepared fertiliser, and

oil. The Customs Tariff is partly ad valorem and specific and provision for Empire preference has been included in 1932.

The percentage of trade is as follows:--

•	I	mports.	Exports.
		¯%	%
United Kingdom		31	43
British Empire		35	33
Foreign Countries		34	24

There are lighthouses on Dennis Island 53 miles north of Mahe, on Mainelles Island 94 miles north of Victoria, and in Victoria Harbour, on Dennis Island and Mamelles Island (9 miles north-east of Mahé in long. 55° 32′ 20″ E., and lat. 4° 29′ S. and in Victoria Harbour. The light installed on Capucin Point, discontinued on the 31st July, 1922, was re-exhibited on the 4th December, The quarantine station is placed on Long Island opposite to Victoria.

SIERRA LEONE.

Situation and Area.

The territory known as the Colony and Protectorate of Sierra Leone is an area of some 27,925 square miles, roughly circular in shape, lying between 6°55" and 10°0f N. lat., and 10°16 and 13°18" of W. long. The sea coast, 216 miles in length, extends from Kiragba at 9°2" on the border of French Guinea, to the Mano River at lat. 6° 55" N. on the border of the Republic of Liberia.

The Colony portion of this area, i.e. the territories acquired by the Crown by Treaty of Cession or otherwise consists of the following :- the Sierra Leone Peninsula in which is situated Freetown (the sent of Government), Sherbro Island, the Tasso, Banana, Turtle, Plantain and York Islands and other small islets, the Eake Loke. Mafoxi and part of the Bure Chiefdoms in the Northern Province, and the Bumpe, Kagioro Bagru, Mano Bagru, Timdel, Bendu, Cha. Nonkoba Bullom, Messi Krim, and part of the Mano Sa Krim Chiefdoms in the Southern Province. The Crown has also acquired a strip of land, varying in depth from a quarter of a mile to one mile throughout the whole coast line not included in the areas specified above. Of these areas the Peninsula of Sierra Leone, Tasco Island. Banana Islands, York Island, and the township of Bonthe in Sherbro Island, only, are administered as strictly Colony; the other areas are administered as part of the Protectorate.

History.

The Colony of Sierra Leone originated in the sale and cession of a portion of land by "Kinz Nembana and his subordinate chiefs to Captain John Taylor, of His Britannic Majesty's beg "Miro," on behalf of the "free community of settlers, their heirs, and successors, lately arrived from England, and under the protection of the British Government." This portion of land was described in the treaty as extending from the bar commonly called Frenchman Blay, but of which ONE.

high tide manstore part of the country, to 1.(m) i the name was changed to St. George's Bay, coastwise up the River Sierra Leone to Gambia Island, and southerly or inland from the riverside 20 miles. The treaty is dated 22nd August, 1788.

The main purpose of the Colony in its inception was to secure a home on the African Continent for a number of natives of Africa, and some others, who from various circumstances had been separated from the countries of their origin, and were destitute in and about London. Subsequently the settlement was used for Africans rescued from slave ships during the period when England was putting forth her efforts for the suppression of the over-sea traffic in slaves. The territory received additions from time to time by various concessions from the native chiefs. Thus, on the 10th July, 1807, "King" Farima and "King" Tom ceded all the land they possessed in the peninsula of Sierra Leone lying to the westward of the settlement and on the 1st January, 1808, the whole settlement became a Crown Colony; in 1861 Bai Conteh, "King" of Kwaia, with his chiefs, ceded a portion of the Kwaia country abutting on the Colony of Sierra Leone, measuring 10 miles in width and 16 miles in length from the River Sierra Leone to the River Ribbi, and particularly described as to its inland boundary in the Treaty of Cession. In 1825 the Governor of Sierra Leone made a treaty of cession with various Chiefs in, and in the neighbourhood of, Sherbro Island, for the purpose of adding these countries to the territories of the Colony, treaty, not immediately ratified by the Crown, was revived by a new agreement made in 1882. Other Treaties of Cession were made from time to time.

On August 21st, 1896, a Proclamation was issued declaring a Protectorate over the Hinterland of Sierra Leone, and Ordinances were passed providing for the administration of this Protectorate, which, by Order in Council is divided into two Provinces as follows:—

Northern Province—Districts.—Port Loko, Bombali, Kambia and Koinadugu.

Bombali, Kambia and Koinadugu. Southern Province — Districts. — Moyamba, Kono, Kenema, Kailahun, Bo, Bonthe and Pujehun.

General Description.

The peninsula of Sierra Leone is about 25 miles in length, and from 10 to 12 miles in breadth at its widest part. It is one of the few points on the African coast where there is high land near the sea. It is formed by a range of igneous mountains, running parallel to the sea from N. N. W. o. S. E., the summits of which, in the Picket Hill, Sugar Loaf and Leicester Mountains, rise in conical form to a height of from 2,000 to 3,000 feet. The mountains are composed principally of norite, and are thickly wooded. They are intersected by ravines and small valleys, and there are considerable tracts of level ground, especially on the eastern side of the peninsula, where it sinks to the mainland.

The configuration of the Protectorate varies such in different localities. The coastal strip is flat and low-lying and the river estuaries, below high tide mark, are bounded by extensive mangrove swamps. The western and southern part of the Protectorate consists of rolling wooded country, broken in places by ranges of hills rising to 1,000 ft. or more. The ground rises to the north and east to form an upland plateau having

a general elevation of about 1,500 ft. The Sula and Kangari hills rise to nearly 3,000 ft., while to the east, near the French Guinea frontier, Bintumane Peak and the summits of the Tingi range rise to above 6,000 ft. Unlike many regions on the West Coast of Africa the country is well watered by rivers and streams. The principal rivers of Sierra Leone which empty themselves into the Atlantic Cocan are the Great and Little Scarcies, the Rokel or Seli (or Sierra Leone river), the Tong or Taia, the Ribbi, the Bum or Sewa, the Moa and the Mano, most of which are navigable by small craft for several miles.

The capital, Freetown, lies about four miles up the Sierra Leone River, at the foot of a chain of hills rising 2,900 feet above the sea. In 1931 it contained 54,958 inhabitants. It possesses the best harbour in West Africa, and is an important coaling station and a port of registry.

The peninsula of Sierra Leone and the lands immediately adjoining have a population (including Freetown and its Districts) of 90,885. It yields only a small quantity of exportable commodities, but ginger and coffee thrive if well looked after. The extent of the territory is, however, small (256 square miles), and the generally rocky soil is not very well adapted for cultivation.

Considerable quantities of palm kernels, palm oil, piassava, with other articles of lesser importance are exported via Bonthe in the Southern Province.

Many districts in the Protectorate are fertile and well adapted to the growth of oil palms, coconuts, bene seed, kola nuts, gun-producing trees, ginger, cocoa, rice, and other tropical products.

Alluvial platinum deposits occur near York, and are being worked on a small scale. Alluvial gold in the Protectorate has attracted both companies and individuals. Gold mining is now being actively pursued and is already of great value to the country.

Chromite has been discovered in several parts of the Protectorate and the most promising deposit, occurs in the Kambui Hills near Hangha, but is not at present attracting much interest.

Diamonds are being mined in the Kono District and now form a very important industry in this country.

Two large deposits of iron ore occur and export on a large scale has commenced from Marampa. Preliminary work is now being undertaken in connection with the second, known as the Tonkolili deposits.

The native population of the Protectorate was in 1931 estimated at 1,667,790 and is composed of the following tribes:

Northern Province { Temnes, Limbas, Susus, Lokos, Fulas, Mandingos, Korankos, Yalunkas, Southern Province { Mendes, Sherbros, Konos, Krims, Gallinus, Golas, Vais, Kissis.

Constitution.

A Charter, issued on May 27th, 1863, created an Executive Council for the Colony composed of four members nominated by the Crown. The Legislative Council was to consist of the members of the Executive Council and nominated members.

to 1,000 ft. or more. The ground rises to the . A Charter, dated the 19th of February, 1866, esporth and east to form an upland plateau having tablished a Central Government of the settlements

on the West Coast of Africa, with the seat of | government at Sierra Leone.

A new Charter, dated the 24th of July, 1874, revoked so much of the Charter of the 19th of February, 1866, as provided for the government of the Gold Coast and Lagos under the Governorin-Chief of the West Africa Settlements, and those settlements were erected into a distinct government. A further Charter, dated 17th of December, 1874, erected a new government of the "West Africa Settlements," consisting of Sierra Leone and the Gambia, and created a Legislative Council in each settlement, consisting of the officer administering the government, and not less than two other persons, to be designated by royal instructions or warrant. New letters patent dated 17th June, 1885, provided for the continuance of the government on the same lines, with some minor differences. By letters patent of 28th Nov., 1888, the Gambia was again made a separate government. By letters patent, dated 3rd April. 1913, and Royal Instructions, dated 4th May, 1922, there were constituted an Executive Council composed of the Otlicer in command of the troops, the Colonial Secretary, the Attorney-General, the Colonial Treasurer and the Director of Medical and Sanitary Services, and a Legislative Council, composed of the members of the Executive Council and four unofficial members nominated by the Crown.

On March 7, 1913, an Imperial Order-in-Council was issued providing for the administration of the Protectorate of Sierra Leone. The Order applies to the territories, not being portions of the Colony of Sierra Leone, lying between the sixth and tenth degrees of north latitude and the tenth and fourteenth degrees of west longitude, and beginning at the extreme southerly point of the Colony on the Anglo-Liberian boundary, as delimited under the provisions of the Anglo-Liberian Conventions, November 11, 1885, and

January 21, 1911. The Governor and Commander-in-Chief for the time being of the Colony of Sierra Leone is also the Governor of the Protectorate. Authority is given to the Governor by Ordinances passed in the Legislative Council to exercise and provide for giving effect to the powers and jurisdiction acquired by the Crown in Sierra Leone.

Letters Patent, dated the 28th January, 1924, revoked those issued on the 3rd April, 1913, and made fresh provision for the appointment of the Governor and Commander-in-Chief, and instructions issued under the Royal Sign Manual and Signet on the same date cancelled those of the 3rd April, 1913, and 4th May, 1922. An Order of the King in Council dated the 16th January, 1924, provided for a new and considerably enlarged Legislative Council, introducing an elective element and direct representation of Protectorate into rests into the constitution of that Council for the first time in the history of Sierra Leone.

Climate.

The seasons may be divided into wet and dry, the former commencing in May and lasting till October. The shade temperature varies during the year from about 62° to 97°. Tornadoes or violent thunderstorms occur at the commencement and close of the rainy season. They are accompanied by strong wind, but do not last long, and seldom do much damage. The atmosphere during the rainy season is excessively damp. The rainfall in Freetown for the year 1933 was 145.13 inches, but decreases inland to an average Kailabam. Between the months of December and March the wind known as the "Harmattan" is prevalent; it is very dry, and often brings with it a fine dust said to come from the Sahara. Its direction ranges from N.E. to S.E.

The climate of Sierra Leone, as elsewhere on the West Coast of Africa, is trying, but conditions have been greatly improved in recent years through the efforts of the Medical and Sanitary Services, and if ordinary precautions are taken the risk of contracting malarial fever can be much reduced.

Vegetation and Agriculture.

The greater part of the country is covered by bush growth, the height of the bush varying with the length of time since the area was last cultivated. In the north, where the rainfall is less than that nearer the coast, the country passes from bush into orchard bush and grass. Wild oil palms and raphia palms provide some of the principal exports in the shape of palm kernels, palm oil and piassava, while the semi-cultivated kola tree provides an important kola export to West African territories.

The agriculture of the country is still primitive. "shifting cultivation" being universally practised. Of recent years the utilisation of swamps for swamp rice has been advocated and steady propaganda has resulted in a remarkable spread in the growth of swamp rice all over the Protectorate. Owing to heavy rainfall there are innumerable swamps and considerable areas available for this form of cultiva-

The chief cultivated crops are rice, cassava, sorghums, sweet potatoes, groundnuts, bennisced, peppers, coffee, ginger, and cocoa, the two last being cultivated chiefly for export. These (excepting the last three) are the food crops of the country, the most important being rice which forms the staple food of the inhabitants of the Protectorate. In the Colony Peninsula, cassava products (chiefly foo-foo) displace rice to some extent as a food.

The agricultural exports for 1933 were as follows :-

	(Quantity Tons	Value £
Palm kernels	 	64,083	472, < 24
Kola	 	1,812	43,456
Palm oil	 	1,617	17,637
Piassava	 	3,500	30,108
Ginger	 	1,545	16,544
Rice	 	159	1,671
Peppers	 	69	1,486
Cocoa	 	67	990
Benniseed	 	14	125

Winerale

All minerals are vested in the Crown and rights to prospect for minerals and titles to mine minerals are issued through the Mines Department, Freetown. The mineral industry owes its inception to the discoveries made by the Government Geological Survey. The minerals mined at present are gold. platinum, and diamonds. The following is a comparative statement of the annual mineral production and its value :-

thunderstorms occur at the commencement and close of the rainy season. They are accompanied by strong wind, but do not last long, and seldom do much damage. The atmosphere	Year.		Platinum oz. troy Coarse crude	Diamond Exports in carats	Estimated Value
during the rainy season is excessively damp. The rainfall in Freetown for the year 1933 was 145/13 inches, but decreases inland to an average annual rainfall of about 96 inches at Kabala and	1931 1932 1933	6,650 12,125 14,975 Digitized by	594 531 325	749 26,901	30,815 71,567 159,760

Gold is mined from alluvial deposits in the Protectorate. Platinum is won in the Colony peninsula from stream gravels. Diamonds were first discovered in 1929 in the Nimi Koro chiefdom of Kono district. Diamondiferous alluvial deposits are very widespread. They are worked by a diamond mining company on a profit-sharing basis with Government. Iron ore is being mined at Marampa whence the ore is conveyed by a mineral railway some fifty miles to Pepel for shipment. Exploitation commenced in 1933. Government has lent more than £400,000 to the Marampa company, secured by first mortgage debentures on the property present and future and the uncalled capital of the company. Large iron ore deposits of good grade have been found in the Tonkolili area. These are to be exploited by the Marampa company under an agreement by which a sliding scale royalty and a profits' tax will be paid to Government. Other minerals which are being prospected or are known to exist are chromite. molybdenite, ilmenite, bauxite, lignite, corundum and garnet.

Customs.

The import duties, which make provision for preferential treatment to British goods, are mainly specific—a preference of 100 % as a general rule being accorded to the British article. There are also export duties on palm kernels (10s. a ton), and kola nuts (3d. a lb.).

Specific duties in 1933 brought in 193,7141. Ad valorem ,, 73,3271. ,, ,, 104,6452. Export ٠, ,,

Percentage of trade with the United Kingdom 57:09 Germany 12.06 ,, British Possessions 8.85 U.S. America 6.81 ,,

Currency and Banking.

Besides English currency, West Africa silver coins (2s., 1s., 6d. and 3d.) were put into circulation in 1913, and alloy coins of similar denominations in 1920. Currency Notes of the value of 20s. and 10s. were introduced in 1916 and of 2s. in 1917, and 1s. in 1919, but the last two denominations are not now current. The Bank of British West Africa has two branches in the Colony and some agencies in the Protectorate. Barclays Bank (Dominion, Colonial & Overseas) Ltd. also is established in Freetown. A Government Savings Bank was established in 1882.

Education.

From the beginning of 1928 Primary Education in the Colony passed under the new scheme of amalgamating Mission Schools, thus building up stronger centres, and in a measure providing separate schools for Infants and Standard Classes. The payment of Teachers Salaries having been taken over by government, much closer attention is being made to qualifications, and with the additional supervision now provided, the grade of work is steadily improving. Education is not com-The Church Missionary Society and the pulsory. Methodist Mission have a College at Fourah Bay, affiliated to Durham University, which prepares students for the Degrees of that University. College also undertakes the training of Male Teachers for Primary Schools. The training of Female Teachers for Primary Schools is now undertaken by the Methodist Missionary Society at its College at Wilberforce. In the Protectorate, while the old system still obtains, plans are under consideration for the complete re-organisation of all schools. A Government school for the sons and nominees of native chiefs was established at Bo in what is now transported to Bouther OOSI

the Bo District of the Protectorate on 1st March. 1906, under European supervision. The number of pupils at the close of 1933 was 92. There is also a Government Model School in Freetown at which 348 pupils attended in 1933. torate Central School is established at Koveima with a roll of 87 students. There are also 7 Government Rural Schools in the Protectorate. with a roll of 260 pupils.

The total number of children being instructed in the Government and assisted Mission Schools in the Colony and Protectorate was as follows -

Primary Schools		 	13,144
Prince of Wales' School	ol	 	132

Means of Communication.

Mail steamers leave Liverpool for Freetown and Freetown for Plymouth and Liverpool every fortnight. The passage takes about 10 days.

Telegraphic communication with Europe was established in 1886, there being now three cables, to Bathurst, Conakry, and Accra wireless telegraphic station respectively. was opened in 1913.

The main line of the Sierra Leone Government Railway, which was the first Railway to be constructed in British West Africa, runs from the Freetown terminus to Pendembu in the Railway District, a distance of 227½ miles. The number of stations and flag stations is 53. From Bauya Junction, 641 miles from Freetown, a branch line runs to Makeni, a distance of 823 miles. gauge of the Railway is 2 ft. 6 in. The Marampa railway running from the iron ore deposits at Marampa to Pepel, the port of shipment, is 571 miles long. The railway is open only for the transport of iron ore.

The total railway receipts for 1933 were 145,594l.; the working expenses for the same year were 137,323l.

There are 1,932 miles of combined telegraph and telephone lines in operation.

There are 814 miles of first-class roads in the Protectorate constructed under the supervision of the Public Works Department and about 150 miles of Chiefs' roads of an inferior standard of construction. In the Colony peninsula there are about 60 miles of roads suitable for motor traffic. mainly in Freetown and its vicinity.

The Sherbro river is navigable by ocean going vessels as far as York Island, about 45 miles from the entrance, and the Sierra Leone river as far as Pepel, some 15 miles above Freetown.

The Great Scarcies river, the Little Scarcies river, the Port Loko Creek, the Ribbi river, Bumpeh river, Cockboro river, Yaltukka river, Bagru river and Jong river are all navigable by small craft up to about 7 feet draft for from 20 to 30 miles from their entrances.

For six months of the year the Kittam River is navigable for launches to Mopalma (about 80 miles) all the year and for six months to Pujehun. Much of the produce from the Pujehun District is thus

Railway Department.

General Manager and Traffic Manager, F. B. M. Beatley, 1,200/., duty allowance, 240/.

Assistant to General Manager, R. Lane, Scale A. with maximum of 800%.

Chief Engineer. Senior Assistant Engineer (vacant).

Assistant Engineers, A. Woodburn, A.M.I.C.E.

and J. Ronaldson, Scale C. Telegraph Engineer, F. G. Taylor, F.R.S.A., M.I.R.S.E., Assoc.I.E.E., F.R.G.S., 480l. by 30/. to 720/.

Chief Mechanical Engineer, H. E. Allwood, M.I.Loco, E., 920l., duty allowance, 92l.

Assistant Locomotive Superintendents, T. Delmore, Scale C; J. R. Best, 480l. by 30l. to 72W.

Assistant Traffic Superintendents, V. Dunglinson, J. Hamilton, W. H. Salkield, Scale A, with maximum of 8001.

Chief Accountant, J. Hunter, A.M. Inst. T., 9201., duty allowance 921.

Assistant Accountants, 1st Grade, A. Hidea, Scale A, with maximum of 8001. Chief Storekeeper, A. C. Blanchfield, 8001., duty allowance 721.

Sierra Leone Battalion, Royal West African Frontier Force.

Lieut.-Colonel, G. P. Harding, M.C., 1,000l., and 182l. duty allowance per annum.

Adjutant, Capt. E. H. D. Grimley, 700l. to 750l.,

duty pay, 5s. per diem. Quartermaster, Captain F. G. Winward, M.B.E., 600l. by 20l. to 700l. per annum.

3 Captains, 700l. to 750l.

9 Lieutenants, 510l. to 600l.

Care and Maintenance and Intelligence Officer, Capt. W. W. Dver. R.A., 750l.

SOMALILAND PROTECTORATE.

In 1884, a Protectorate was established over the tribes on the Somali Coast, extending from Lahadu (Loyi-ada), half-way between Ras Jibouti and Zeyla, to the 49th meridian E.long. The boundary has been settled by agreements with France, Italy, and King Menelik of Abyssinia. Till 1898, the Somaliland Protectorate was administered by the Resident at Aden, as a dependency of the Government of India. In that year, it was transferred to the charge of the Foreign Office, and in 1905, to that of the Colonial Office.

General Description and History.

The chief ports are Berbera and Zeilah. ÁTER about 68,000 square miles.

Although the camel remains the chief means of transport, the last few years have seen a considerable increase in the use of motor transport. The approximate mileage of road and cleared tracks suitable for general trafficand mechanical transport of medium weight is 1,000 miles. There are no railways in the Protectorate. There is a weekly steamer service with Aden.

The climate at the coast is trying for Europeans, but is comparatively healthy in the interior, where an elevation of from 4,500 feet to 6,800 feet is reached.

The Haud waterless plains constitute the principal pastures of the country. The chief source of wealth of the people lies in their live stock.

In the beginning of 1901, operations were commenced against a fanatical Somali leader, the Mullah Mohammed Abdullah, and a native levy with British Officers penetrated into the Nogal Valley. The Mullah was defeated at Somala and Fordiddin, and driven into Italian territory.

The dervishes afterwards gathered together again, and a similar expedition, strengthened by the 2nd King's African Rifles (Yaos), was despatched in the summer of 1902, and again drove the Mullah into Italian territory with heavy loss, but met with a severe check in Italian territory at Erigo, on October 6th. The Mullah, however, retired as the result of this action still further into Italian territory, to Galadi.

Five months later a third expedition, comprising British and Boer M.I., Indian and African troops, with the main base at Obbia in Italian Somaliland, proceeded to Mudug, thence detaching a force to Galadi, which place was up till then the head-quarters of the enemy. A force of 200 Yaos and Sikhs, was overwhelmed at Gumburru, in April,

1903, after a fight of the fiercest description. A column of 200 men, was at the same time attacked at Daratoleh, whence it retired fighting to Bohotleh, and in June the expedition fell back on the Berbera-Bohotleh lines of communication, when Lieut.-General Sir C. C. Egerton, K.C.B., was placed in command.

Reinforcements, increasing the force to 7,000 rifles, were despatched and placed in the field, and in January, 1904, 3,250 troops defeated 5,000 dervishes at Jidballi.

In March, 1905, an agreement was concluded between the Italian Government and the Mullah whereby peace was declared between the dervishes and the neighbouring tribes, both those subject to the Government of Italy and those under the protection of the British Government. The Mullah was given a port on the east coast and was assigned certain territories within the Italian sphere of interest, beyond which he and his dervishes undertook not to encroach.

In the latter part of 1908, some unrest was caused by the unfriendly attitude of the Mullah. and reinforcements were brought into the Protectorate from East Africa, Uganda, Nyasaland, and India during 1909.

Subsequently, arrangements were made to arm the friendly tribes to enable them to defend themselves against attack, and in March, 1910. all troops were withdrawn from the interior; the 6th Battalion King's African Rifles was disbanded. and a policy of strict coastal concentration was then adopted. This policy having disappointed expectations, a Camel Constabulary, 150 strong, was raised at the end of 1912 to check inter-tribal fighting, which by this time had assumed serious proportions. A measure of peace among the friendly tribes was quickly restored, but in August, 1913, the Corps, at a strength of 109 rank and file, encountered at Dulmadoba a raiding party of dervishes estimated at 2,000 rifles, and in the action which ensued, though heavy losses were inflicted on the enemy, the Constabulary sustained casualties amounting to 50 %, including the Commandant, killed. The force thereupon fell back on Sheikh, and reinforcements of Indian infantry were moved up from the coast. His Majesty's Government later decided to increase the forces of the Protectorate in order to preserve the necessary grazing grounds of the friendlies from dervish attack, and to maintain peace among the tribes living in the west.

In November, 1914, Military Headquarters were established at Burao, 80 miles from the coast. At this time the dervishes were in occupation of the Ain Valley, which is one of the principal grazing grounds of the friendlies. Strong forts had been constructed by the Mullah at Jidali and Shimber Berris and these were used as forward bases for raids against our tribes. The position at Shimber Berris was accordingly attacked by the local troops and after a stubborn resistance all the forts were finally captured and blown up. In 1914 the dervishes made serious raids and their aggressions went on during the war, but early in 1920 operations against them were carried out by air attacks followed up by mounted forces with infantry supports. These operations were completely successful; the power of the dervishes was destroyed, and the Mullah became a fugitive in Abyssinian territory. He died there in 1921. Since 1923 the condition of the country has been peaceful, and as a result the stock wealth of the native population has largely increased, while in the western areas the development of agriculture has made great progress. A geological survey of the Protectorate has been made.

In June, 1932, the designation of the officer appointed to administer the Government was changed to Commissioner and Commander-in-Chief.

Trade and Customs.

Exports consist of skins and hides, sheep and cattle, gums, ostrich feathers, ghee, and salt.

Imports consist of rice, dates, sugar, cotton

piece goods and shirtings, iron and hardware.

The Customs Tariff is mainly on an "ad valorem" basis of 20 % and 25 %, but specific duties are imposed upon rice, dates, cloth (long cloth and grev sheeting in the piece), matches and alcoholic liquors.

Goods of British or Empire origin to the extent of 50% of their content enjoy preferential rates of duty both specific and "ad valorem." The margin of preference is 10 %.

In 1933, the percentages of Imports from the

countries of origin were as follows: 21% United Kingdom

53 % British Empire 23 % Foreign

No percentages can be given for exports: all produce is shipped to Aden where it is distributed by dealers, mainly to the United Kingdom and to the United States of America.

†TANGANYIKA TERRITORY.

Extent and Boundaries.

The Tanganyika Territory consists of that portion of the former Colony of German East Africa which, under Article 23, Part I, of the Treaty of Peace with Germany, the Principal Allied and Associated Powers agreed should be administered under a mandate by His Britannic Majesty. The remaining portions of the Colony, namely the districts of Ruanda and Urundi in the North-West, and the Kionga Area, South of the Rovuma River, were similarly entrusted to the administration of Belgium and of Portugal respectively. The Territory extends from the Umba River on the North to the Rovuma River on the South, the coast line being about 500 miles in length, and includes the adjacent islands. The Northern Boundary runs in a north-westerly direction to Lake Victoria at the intersection of the first parallel of latitude with the eastern shore of the lake (Mohuru Point), and thence along the first parallel of latitude until it strikes the Kagera River about 70 miles west of Lake Victoria. From this point the western boundary follows the Kagera River to approximately latitude 2.25', and thence along the eastern boundary of Urundi to the Mlagarassi River which it follows to Lake Tanganyika. The boundary then follows a line due west until it reaches the centre line of Lake Tanganvika which it follows to Kasanga (formerly Bismarckburg), at the southern end of the lake. Thence it follows the boundary of Rhodesia to the northern end of Lake Nyasa and continues along the centre line of Lake Nvasa to a point due west of the Rovuma River whence the boundary runs east and joins the Rovuma River, whose course it follows to the sea. The total area of the Territory is about 374,085 square miles. which includes about 20,000 square miles of water.

The Island of Mafia was transferred in 1922 from Zanzibar to the Territory.

General Description.

Along the coast lies a plain, varying in width from 10 to 40 miles, behind which the country rises gradually to a plateau constituting the greater part of the hinterland. This plateau falls sharply from a general level of 4,000 feet to the level of

the lakes (Tanganyika, 2,590 feet, Nyasa, 1,607 feet), which mark the great Rift valley extending northwards to Lake Naivasha.

The seat of government is Dar-es-Salaam (population 30,000) which lies along the northern and north-western shores in an almost land-locked harbour, about 3 miles long. The chief buildings are solid and roomy. The second town in importance is Tanga, 136 miles north of Dar-es-Salaam and 80 miles distant from Mombasa. Other seaports are Pangani, Bagamoyo, Kilwa, Lindi, and Mikindani. The most important inland town is Tabora, which has a population of 10,000°, and is situated at the junction of the main caravan routes from the coast of Tanganyika and from Victoria Nyanza to Nyasa. Other inland towns are, in the north, Moshi and Arusha; in the central area, Morogoro, Kilosa, and Dodoma; and in the south, Iringa, Mahenge, and Songea. On the great lakes the chief towns are Mwanza and Bukoba, on Victoria Nyanza; Kigoma, the terminus of the Central Railway; Ujiji, on Tanganyika; and Mwaya, on Nyasa.

The highest points in the Territory are in the north-east, where are the extinct volcanoes, Kilima Njaro, which rises to 19,720 feet, and is snow-capped, and Mount Meru (14,960 feet). In the south-west are the Livingstone Mountains, where the highest peak is over 9,000 feet.

Portions of the great lakes of Central Africa are included in the Territory, viz.: the southern portion of Lake Victoria, the eastern shores of the lower part of Lake Tanganyika, and the northern and north-eastern shores of Lake Nyasa. There are smaller lakes and numerous rivers.

Climate.

The climate of the Territory varies greatly according to the height above sea level of the several districts. Roughly, four climatic zones can be distinguished, though even among these there are considerable local variations :-(i) The warm and rather damp coast region with its adjoining hinterland. — Here, conditions are tropical, though not unpleasant except just before and during the rainy seasons, when the heat is trying and the atmosphere humid. The average yearly temperature is 78 degrees. (ii) The hot and moderately dry zone between the coast and the central plateau (300 feet-2,000 feet). This zone is characterised by low humidity of atmosphere, less rain, and a temperature rather lower but with greater daily and yearly variations. (iii) The hot and dry zone of the central plateau between 2,000 feet and 4,000 feet in height. -The climate of this zone differs greatly in parts, but its prevailing characteristics are low humidity, little rainfall (at Tabora an annual average of 32 inches), a fairly high mean temperature, with great daily and yearly variations, sometimes exceeding 36 degrees Fahrenheit daily. The heat is dry, but not so trying to the European as the moist and steamy warmth of the coast, while the (iv) The seminights are invariably cold. temperate regions around the slopes of Kilimanjaro and Meru, of the Usambara Highlands, the Ufipa Plateau, and the mountainous areas of the southwestern area (5,000 feet-10,000 feet).-Frosts occur at the higher altitudes, and the nights are cold. These districts enjoy a bracing climate, and alone can be considered healthy for Europeans, but prolonged residence in these altitudes is apt to produce pervous strain, even though physical fitness is maintained. There are two well-defined

[†] For map see under Kenya.

^{*}Decrease due to alteration of Township boundaries.

rainy seasons annually. Generally speaking, the long rains begin in February or March, and last for two or three months, while the short rainy season extends from October to November, but the rainfall is low for a tropical country, and droughts are not infrequent.

History and Constitution.

Plentiful evidence exists of Arab traders having visited the Territory for several centuries and of their opening up the great slave route from Bagamayo on the Indian Ocean to Ujiji on Lake Tanganyika. The British explorer, Burton, first entered the Territory in 1856, and was soon followed by Speke, Livingstone, and Stanley.

The territory was visited in 1884 by Dr. Karl Peters, who made twelve treaties with native chiefs, and in the following year the German Government established a protectorate. This arrangement was recognised by the British Government in 1886. In 1889 an Arab rising was quelled, and the first German steamer launched on Lake Nyasa. A serious native rising took place in 1905. It is estimated that some 120,000 natives died during the struggle or from its immediate results.

Early in 1916 Lieut.-General J. C. Smuts attacked and defeated the German forces at the foot of Kilima Njaro and occupied Moshi on March 13th of that year. By the end of 1916 all the country north of the Central Railway was effectively occupied by His Majesty's Forces or by Belgian troops, and a provisional civil adminis-tration was established in that area on January 1st, 1917. In November, 1917, the Germans were driven across the Rovums River into Portuguese East Africa, and in March, 1918, the jurisdiction of the Administrator was extended to include the greater part of German East Africa. After the surrender of Major-General von Lettow-Vorbeck, in accordance with the terms of the armistice, the military forces were withdrawn, leaving only a garrison of the King's African Rifles; and a Royal Commission was issued in 1919 appointing an Administrator, The Tanganvika Order-in-Council. 1920, which was read and proclaimed in Dar-es-Salaam on September 25th, 1920, constituted the office of Governor and Commander in Chief. The Governor is assisted by an Executive Council. In 1921 the district of Ujiji and portions of the districts of Bukoba and Utipa, which had formerly been administered by the Belgians, were taken over.

In 1920 draft mandates for "German East Africa" were submitted to the Council of the League of Nations in favour of Great Britain and Belgium, and these were approved by the League of Nations in 1922. The mandate for the part to be assigned to Great Britain lays down conditions directed against slavery, forced labour (except for essential public works and services), abuses in connection with the arms traffic and the trade in spirits, the recruiting of labour, transfer of native lands (except between natives) without the consent of the authorities, and usury. It is provided that nationals of States members of the League of Nations are to have complete commercial equality. An annual report is to be made to the Council of the League. By an Order in Council dated the 19th of March, 1926, provision was made for the constitution of a Legislative Council consisting of the Governor as President, thirteen official members, and not more than ten unofficial members, which came into operation on the lat July, 1926.

For the East African Governors Conference, see under Kenya, page 335.

Population.

The number of Europeans in Tanganyika Territory is approximately 8,304. There are also over 23,000 Indians, 7,000 Arabs, and 1,700 Goans. The natives are estimated at 5,000,160. The majority of the natives are Bantu, but considerable areas in the north are occupied by the Masai and other Hamitic races, and in the south by tribes of Zulu extraction. The most important language is Swahili, which is a hybrid between Arabic and Persian and all sorts of African tongues. It is more or less spoken as a lingua franca from Aden in the north to Durlan in the south, and from the Indian Ocean to the waters of the Nile and the Congo.

Most of the natives are pagans, but the majority of the coastal tribes and a few in the hinteriand profess Mohammedanism.

The territory is divided into 8 Provinces as follows:—

Provinces.			Capital.	Approx. Native Population, 1983.
Central			Dodoma	 594,146
Eastern			Dar-es-Salaam	 624,984
Iringa	• •		Iringa	 495.675
Lake			Mwanza	 1.417.156
Lindi			Lindi	 579,234
Northern			Arusha	 353 910
Tanga	•••		Tanga	 305,224
Western	•••		Tabora	 635,897
			Totals	 5,000,160

Education.

The amount allocated to Education in 1933 was 93,000l. Further sums were contributed by Native Administrations.

During 1933 there were 88 Government schools for Africans with an average attendance of 7,000 pupils and 3,359 Mission schools with an average attendance of 135,812 pupils.

There were two schools maintained by Government for the education of European children, one a day school in Dar-es-Salaam, from which a correspondence course for children in outlying districts unable to attend school was also conducted, and the other a boarding school at Ngare Nairobi in the Northern Province.

Assistance is given to three European Kindergarten schools at Tabora, Dodoma and Tanga, three Dutch schools in the Arusha District, one Roman Catholic school in Dar-es-Salaam, four German schools in the Northern, Tanga and Iringa Provinces and two Greek schools in the Northern Provinces. There were 45 Indian schools (with an enrolment of 2,864 pupils) of which 42 were in receipt of financial assistance.

The Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular speaking population.

Forests and Minerals.

The total area under close forests is approximately 4,073 square miles, of which 97-1 per cent. is in Government Forest Reserves, 1-4 per cent. awaite reservation, and 1-5 per cent. is valuable forest in private ownership. The forests are most numerous in the north, on the shores and islands of Lake in the north, on the shores and islands of Lake Wietoria, in the North-east on Kilimanijaro and Mera Mountains; in the East along the Pare and Usambara ranges and in the Uluguru and Nguu Mountains; and at the coast in the districts of Rufiji, Kilwa, and Lindi. Further considerable areas of close forest are

situated in the highlands of Iringa Province, most of which have now been explored and demarcated for reservation and have been gazetted as Forest Reserves. The number of timber producing species is large and includes among many others the following:—Pencil Codar (Juniperus procesa), Podocarpus, Chlorophora excelsa (resembling Burma Teak), Ocetea Usambarensis, Pterocarpus angolensis, Parinarium Holstii, Pygeum africanum, Afzelia cuanzensis, Khaya nyasica, and Cassipourea Eikii. In addition, valuable species of hardwoods occur as single trees or in groups savannah forest. Mangroves of excellent quality cover large areas of the littoral. Ebony and gum copal are plentiful near the coast. Bamboo and baobab are found and may prove suitable for the manufacture of paper pulp. Acacias yielding gum arabic are found in the dry savannahs.

The following have been mined for export or local use:—Gold, diamonds, mica, salt, tin, and red ochre. Other minerals known to exist include:— Coal, copper, iron, graphite, asbestos, and soda. Extensive areas remain to be prospected. The total mineral production for 1933 was valued at £254,493.

Further information with regard to trade and cognate matters in Tanganyika Territory can be obtained from the Chairman, Tanganyika Trade and Information Local Advisory Committee, c/o The Comptroller of Customs, Dar-es-Salaam.

Communications.

The Territory is served by two railways of metre

1. The Central Railway from Dar-es-Salaam to Kigoma on Lake Tanganyika (774) miles), with a branch line from Manyoni (365 miles) to Kinyangiri (94 miles) via Singida, and a branch line from Tabora (524 miles) to Mwanza (236 miles) on Lake Victoria.

The Tanga or Northern Railway from Tanga via Moshi (219 miles) to Arusha (272 miles). From Kahe Junction (206 miles) a line links up with the Kenya and Uganda Railway at Voi. The Voi-Kahe line is run under the management of the Kenya and Uganda Railway.

Light motor traffic is now possible over 15,555

miles of roads during the dry season.

The ports of Lake Victoria are served by the steamers of the Kenya and Uganda Marine; those of Lake Nyasa by the Nyasaland Government steamers, and the Tanganyika Railways steamship "Liemba" and a smaller one "Mwanza," together with a Belgian service, maintain communications on Lake Tanganyika. The British steamer "Liemba" (late German s.s. "Goetzen," 796 and 427 tons gross and net respectively) was put into commission on June 9th, 1927, and maintains a service to Mpulungu, in Northern Rhodesia, via Southern Lake Ports.

Steamships.

The following are the steamship lines serving the coast of Tanganyika :-

To and from Europe and Cape Ports:-Union Castle Mail Steamship Co., Ltd. Clan, Ellerman and Harrison Lines. Deutsche-Ost-Afrika Linie. Holland East Africa Line.

Navigatione Libera Triestina S.A. (Italian). To and from India and Cape Ports :-

British India Steam Navigation Co., Ltd. To and from Europe and Beira:-British India Steam Navigation Co., Ltd.

To and from Europe :-Compagnia Italiana Transatlantica (Italian). To and from Europe and Mauritius via Madagascar,

Messageries Maritimes.

To and from Japan (to South America via Cape-

Osaka Shoshen Kaisha.

To and from United States of America:— Ellerman and Bucknall S.S. Co., Ltd.

To and from East Coast Ports :-

Shell Company. African Wharfage Co., Ltd.

Tanganyika Boating Co., Ltd. Deutsche Ost Afrika Linie. British India Steam Navigation Co., Ltd.

Cowasjee Dinshaw & Bros. The Government Steamers of Zanzibar and

Tanganyika.

Schooner "Vera" (owner-C. Nicholas).

Posts and Telegraphs.

The telegraph system comprises 3,771 miles of pole route with 8,011 miles of wire, and the number of offices, including railway telegraph offices, open for public business, is 135. The principal offices are Dar-es-Salaam, Tanga and Lindi on the coast, Bukoba and Mwanza on Lake Victoria, Kigoma on Lake Tanganyika, Kilosa, Dodoma and Tabora on the Central Railway Line, Moshi on the Kenya border, and Iringa, Mbeys and Tukuyu in the South Western Area.

All classes of business, including Money Order, Postal Order and Savings Bank are conducted at 23 Head Offices, in addition to which 43 offices issue and pay Postal Orders and all perform all classes of postal

work.

The principal places in the Territory are connected by telegraph, and the system forms a land line communication link between Kenya and Uganda to the north, and Nyasaland, Northern and Southern Rhodesia, and the Union of South Africa to the south. Communication with the Belgian Congo is obtained through a wireless station at Kigoma.

Dar-es-Salaam is connected by cable with Zanzibar, whence communication with all parts of the world may be established. In addition the Kenya Radio Service provides a channel of communication with

Great Britain.

There are thirty-nine telephone exchanges comprising 250 route miles and 1,735 miles of wire.

The main telephone trunk service is between Dar-es-Salaam, Tanga and Mombasa, and thence to Nairobi in Kenya Colony. Telephonic communication is available to most places in the Tanga and Northern Provinces. There are also trunk lines between Dar-es-Salaam, Morogoro and Kilosa, and between Tabora and Mwanza.

Radio-telegraph stations are situated at the following places, Dar-ee-Salaam, Mbeya, Musoma, Dodoma, Moshi and Kigoma of which Mbeya, Dodoma

and Moshi are aeronautical stations.

Letter mails from Great Britain are despatched from London weekly via Marseilles, whence they are conveyed direct by vessels of the Messageries Maritimes, and by the P. & O. line via Aden, the average time in transit being 21 days. Letter mails to Great Britain are despatched from Dar-es-Salaam by all available steamers.

Parcel mails are despatched weekly by steamers of the P. & O. line from London by the all-sea route to Aden, whence they are conveyed by any steamer proceeding to Mombasa or beyond. The Aden-Mombasa-Dar-es-Salaam service is irregular, and the average time of transit of parcel mails from London to Dar-es-Salaam is 30 days.

Fortnightly mail services are maintained with India and South Africa, and there is a frequent exchange of mails by sea with Kenya Colony and

Zanzibar.

A weekly air mail service is given to all places on Imperial Airways London-Cape Town route, which passes through the Territory, and also to the places served by the Indian and the European air mail services with which the African service connects. The time taken between Dar-es-Salaam and London is 7 days.

Internal mails are exchanged between offices on the railway as frequently as the regular train service permits (minimum twice weekly), while places off the railway normally have a weekly service by Lake steamer, motor or runner. Lindi is served by sea approximately once a fortnight.

Currency and Banking.

The German Government and the German East Africa Company issued local rupees of the Indian Standard, and subsidiary coins. But the German rupee was exchanged for two shillings of East African Currency and withdrawn from circulation. Indian Rupees (coins and notes) have been demonetised. Shillings and subsidiary coins, and currency notes of the East African Currency Board have been introduced at the rate of twenty shillings to the pound sterling and this is the only currency now recognised.

The Banks operating in the Territory are the National Bank of India, the Standard Bank of South Africa, Barclay's Bank (Dominion, Colonial, and Overseas), and the Banque du Congo Belge.

Trade and Customs.

Since 1923 the Customs Tariff of the Territory has been identical with that in force in Kenya and Uganda and provision was made for the duty-free interchange of all goods grown, produced or manufactured in any one of the three territories. In 1927 the Customs management laws of the three territories were coordinated, and on the 1st August, 1927, effect was given to an Agreement under which all goods on which duty had been collected in one of the territories may be transferred to any of the other territories without further formality except the preparation of simple transfer forms, on which inter-territorial adjustments of revenue are subsequently arranged.

The tariff was revised in 1930, being enacted simultaneously in Tanganyika, Kenya, and Uganda. The basic fiscal rate is 20 per cent. ad ralorem, assessed on the current domestic value of the goods in the exporting country together with the cost of packing, delivery on board, freight, insurance and all other charges up to the time of importation into the Territory. On certain goods which permit of such an imposition duty is charged at specific rates corresponding generally to an equivalent advalorem rate of 20 per cent. Minimum specific rates of duty were imposed on selected imports such as cotton piece goods, artificial silk, cotton blankets, wearing apparel, boots and shoes, umbrellas and cycles in June 1933. On liqueurs and similar spirits

the duty is 48 shillings per Imperial gallon, while whisky, brandy, gin and rum are charged with duty at 48 shillings per proof gallon as ascertained by Syke's hydrometer. Manufactured tobacco is liable to 623 per cent. ad valorem, with a minimum of 5 shillings per pound on cigars, and 2.40 per pound on cigarettes and tobacco. In the case of certain specific commodities such as sugar, timber, wheat flour, bacon and ham, butter, cheese and ghee, which can be produced locally in sufficient quantity to meet the demands of the three territories, provision is made, in the form of additional "suspended" duties, for a modified degree of protection. A reduced rate of 10 per cent. ad valorem is payable on building materials, metals, tools, printing materials, paints, children's toys, and infants' foods, while the free list includes machinery, packing materials, ships and boats, aircraft, motor and steam lorries and tractors, materials and equipment for the construction and maintenance of telegraph and telephone lines and of railways, tramways and roads; medicines, disinfectants and insecticides; coal, coke and oil fuel; fertilisers; blasting compounds; filters and refrigerators; surgical and scientific instruments, and all used personal and household effects imported as passengers' baggage. No provision is made for Imperial Preference.

The values in pounds sterling of the import and export trade of the Territory, the total Customs receipts, and the tonnage of vessels entered at Tanganyika ocean ports, are given below. The import figures are exclusive of Government imports, transit traffic, and bullion and specie, while transit exports are similarly excluded from the export figures.

ing un co	•

• TRINIDAD AND TOBAGO.

TRINIDAD.

Situation and Area.

The island of Trinidad lies about 16 miles to the eastward of Venezuela, between 10° 3′ and 10° 50′ N. latitude, and 60° 55′ and 61° 56′ W. longitude from Greenwich. Its average length is 50 miles, its average breadth 37½ miles, and its area 1,863 square miles. It is soparated from S. America by the Gulf of Paria, into which fall the northern mouths of the Orinoco. The distance between Chacachacare, the most westerly of the Bocas Islands and Venezuela is only seven miles. The island of Tobago (formerly in the Windward Islands) was amalgamated with Trinidad by an Order in Council under the Act 50 & 51 Vict., c. 44, on 1st Jan., 1889.

History.

Trinidad was discovered by Columbus, on his third voyage, on the 31st July, 1498; and taken possession of by him for the crown of Spain. No Governor was, however, appointed by the King of Spain until 1532, and even then, and for many years afterwards, the Spanish colonists had the greatest difficulty in maintaining a footing in the island. It was visited by Sir Robert Dudley, and by Sir Walter Raleigh in 1595, who signalised his visit by burning the newly-founded town of St. Joseph, and it was included in the Earl of Montgomery's grant, 1628. In 1640 it was raided by the Dutch, and again in 1677 and 1690 by the French. Towards the end of the 17th and the beginning of the 18th centuries, cocoa was largely and successfully cultivated, but a blight fell upon the plantations about 1725, and Trinidad made scarcely any progress until 1783, when, in consequence of the representations made to the Court of Madrid by M. Roume de St. Laurent, a French planter of Grenada, who, when on a visit to the island, had been struck by its extraordinary fertility, a Royal cedula or proclamation was issued, by which extraordinary advantages were offered to foreigners of all nations to settle in Trinidad, the sole condition imposed, and that not very strictly insisted upon, being that they should profess the Roman Catholic religion. The consequence of this proclamation was a large influx of population, which was soon augmented by many French families, who were driven from St. Domingo and elsewhere by the terrible events of the French Revolution, and to this cause is to be traced the preponderance of the French element in a colony which never belonged to France.

On the 12th February 1797, Great Britain being then at war with Spain, a British expedition sailed from Martinique for the reduction of Trinidad. The expedition resulted in the surrender of the island to His Majesty's forces, and on the 18th February, 1797, the articles of capitulation were signed by Sir R. Abercromby, Admiral Harvey, and Chacon, the Spanish Governor.

In 1802 Trinidad was finally ceded to the Crown of Great Britain by the Treaty of Amiens.

The population of Trinidad and Tobago at the census of 1931 was 412,783. The white population is chiefly composed of English, Portuguese, French, and Spanish. There is also a large number of East Indians, totalling 142,740. The French lower classes speak a patois peculiar to the West Indies.

[•] For general map of West Indies, see under Digitize Windward Islands

Constitution.

The Government is administered by a Governor, with an Executive Council of seven members. The legislative body is the Legislative Council of Trinidad and Tobago, which was reconstituted by Letters Patent and an Order in Council which came into operation on 21st August, 1924. It now consists of the Governor, the Colonial Secretary, the Attorney-General, the Treasurer, nine nominated official members, six nominated unofficial members and seven elected members. Trinidad is divided into six electoral districts, each returning one member. Tobago forms the seventh electoral district.

General Description.

The north coast is rock bound through its whole extent, the east coast is so exposed to the surf as to be almost unapproachable, while the south coast is steep in most parts; only on the west coast is there a good natural harbour, at Chaguar-The whole Gulf of Paria, however, is so shut in and sheltered as to afford a most safe anchorage. The climate of Trinidad is tropical and may be divided into two seasons, a dry season from January to the middle of May, with an average rainfall of 2 to 3 inches per month, and a wet season from June to December, with an average of 8 inches per month. The coolest months of the year are December to April. average temperature during the day is 84 and during the night 74. The total rainfall in 1933, from records taken at 111 stations, was 78.03 ins. The climate is healthy and by no means hurtful to Europeans, provided reasonable precautions are taken.

There are three ranges of hills running roughly east and west, the most northerly fringing the north coast, and rising to 3,000 feet; the central range runs south-west from Manzanilla point to San Fernando, and the southern runs parallel and near to the south coast. There are numerous rivers, but none of them of any size or navigable, and all running east or

The soil is varied, extremely fertile, and excellently adapted to the growth of tropical products, more particularly of sugar, cacao, and coconuts,

which are its staples.

The chief town and principal port is Port of Spain (population by the census of 1931, 70,334). situated on a gently inclined plane near the north-east angle of the Gulf of Paria. It is a port of registry, and had, on 31st Dec., 1933, 2 vessels registered. Fifteen miles of electric tram-way and 21,831 miles of telephone have been constructed in Port of Spain and its environs. The latter also extends to some of the country districts.

Production and Industry, Trade and Customs. The quantity and value of the principal products exported during the year 1933 were :Value.

1933.			• • •	

In 1933 cane farmers sold 488, 174 tons of canes to the factories, for which they received 297.8221. In 1932 the tonnage sold was 455,213, and the value 276,8571. The sugar manufacturer again voluntarily maintained a basic price of 12st per ton, and the farmers consequently received 120,000/, more than the value of their canes according to the official sliding scale.

Coconuts. - The value of the exports of coconuts. copra and coconut oil in 1933 was 104,351L compared with 104,266l. in 1932.

The factories established in 1930, continued to manufacture copra products, and as a result the sum of 18,8121. 7s. 9½d. was distributed by copra producers by way of bonus, while 380,898 gallions edible oil, and 1,585,848 lbs. lard substitute were manufactured, of which 6,897 gallons of edible oil and 3,360 lbs. lard substitute were exported. Excise duty collected during 1933 on edible oil, lard substitute and laundry soap amounted to 9,264l. 15s. 7d.

Asphalt. - The asphalt lake, 114 acres in extent. situated in the Ward of La Brea, was first leased as a whole in 1888 for 21 years. The lease was renewed for a further period of 21 years from the 1st February, 1909. In February, 1925, a fresh lease of the lake comprising 109 acres was made to the Trinidad Lake Asphalt, Limited, for 2l years, from the 1st February, 1930, on payment of the following Royalties and Export Duties:—

For each ton of Crude Pitch or Asphaltum a Royalty of 2s. 6d.and an Export Duty,

For each ton of Dried Pitch or Asphaltum a Royalty of 3s. 6d. and an Export Duty of 6s. 11d.

The quantity of Asphalt produced during 1933 was 111,337 tons as against 107,457 tons in 1932. The quantity of Asphalt exported during 1933,

including 7,389 tons Asphalt cement valued at 17,0641., was 51,989 tons of the value of 150,994. and yielding a revenue of 26.052l., as compared with 52,679 tons exported in 1932 of a value of 131.651l. and yielding a revenue of 25.513c.

Petroleum.-At the close of 1933 there were 14 Companies actively engaged in the exploitation of oil in the Colony. These Companies, having a total share capital of approximately 12.000.000%... held over 132,388 acres of Crown Lands under licenses and leases, of which approximately 127,684 acres were held under mining lease. In addition, appreciable areas of private lands are held. Up to 30th January, 1902, oil rights were not reserved by the Government when disposing of Crown Land, but after that year all Crown grants reserved the oil rights to the Crown. There are, consequently, three categories of oil lands viz., lands disposed of prior to 1902 in which the oil rights rest in the surface owner. Land sold since that date in which the oil rights are reserved to the Crown, and lands where both the surface and the underlying oil remain the property of the Crown.

The principal oil producing companies are the Trinidad Leaseholds, Limited, from Crown and private lands at Fyzabad, Barrackpore, etc.; the United British Oilfields of Trinidad, Limitel, from Crown and private lands at Point Fortin. Parry Lands, etc.; the Trinidad Lake Petroleum Company, Limited, from their own lands at Brighton; the Petroleum Development Company, Limited, from Crown Lands in the Ward of Oropuche; the Apex (Trinidad) Oilfields Limited from Crown and Private Lands at Fyzahad; Siparia;

the Trinidad Central Oilfields, Limited, from Crown Lands at Tabaquite and Guapo; the Kern (Trinidad) Oilfields, Limited, from Crown and private lands at Guapo, the Trinidad Oilfields Operating Co., Ltd., from Crown and private lands at Palo Seco, Fyzabad and San Francique, the Trinidad Petroleum Development Co., Ltd., from Crown and private lands at Palo Seco, Fyzabad Dome Oilfields from private lands at Fyzabad, and the Siparia Trinidad Oilfields, Ltd. from Crown lands at Palo Seco. There are refineries at Pointe - à Pierre, Point Fortin, Brighton, Tabaquite and La Brea, and all grades of petroleum products from petrol to road oil are produced. The total quantity of oil produced during 1933 was 9,561,354 barrels, a decrease of 564,711 barrels as compared with the production for 1932. Of this total, 5,290,743 barrels were from Crown Lands or lands in which the oil rights belonged to the Crown. The Royalty paid by operating companies on oil, won from Crown rights during the year 1933, amounted to 89,588.
9s. 7½d. as against 90,053. 7s. 4½d. in 1932, and
wayleaves to 1,569. 15s. 2d. as against 2,619.
17s. 1½d. in 1932. The quantity of crude oil and products exported amounted to 8,909,298 barrels valued at 2,254,055/. as against 9,637,474 barrels valued at 2,382,846l. in 1932.

Fruit.—Large areas are being planted in grapefruit, and the area under cultivation increased from 885 acres in 1932 to 1,400 acres in 1933. Owing, however, to heavy rains during the flowering period, there was a very small crop, and the exports fell from approximately 11,000 cases

in 1932 to 3,438 cases in 1933.

The value of the lime and lime products exported during the year 1933 amounted to 27,210*l*. as compared with 18,086*l*. in the previous year.

Of the total area of the Colony, including Tobago, 1,267,236 acres, the alienated acreage at the end of December, 1933, was estimated to be approximately 689,515 acres. About 347,050 acres are under cultivation.

The chief imports are textiles, flour, and rice, dried fish and meat, hardware, machinery, and lumber. About one half of the whole trade of the Colony is with the United Kingdom,

Under the Customs Tariff, goods of Empire origin are admitted at a preferential rate of duty, the principal items being entitled to a preference of 50% of the general rate of duty. Approximately one half the list of items on the tariff are chargeable with duty ad valorem, the remainder, including all high duty goods, being subject to specific duties.

The following tables show the direction of the import and export trade of the Colony for 1933:—

Municipalities.

In 1914 Port of Spain was constituted a municipal city. The corporate body created under provisions of the Port of Spain Board Ordinance, 1907, and known as the Port of Spain Town Board, was dissolved.

The next town and port is San Fernando, about 30 miles south from Port of Spain. The population at the census of 1931 was 14,287.

San Fernando has an elective municipal council and mayor. The chief source of revenue in both boroughs is a rate on property.

A charter of incorporation has been granted to Arima, an inland town about 16 miles from Port of Spain (population at 1931 census, 5,072). The total municipal revenue of the two boroughs, and town of Port of Spain for the year ended 31st December, 1933, was 197,989., the expenditure, 193,7152., and the debt was 300,5112 on the 31st December, 1933. This includes the loan for the purchase of the Woodbrook Estate, which has become an important suburb of Port of Spain.

Means of Communication.

The service to Tobago is maintained by the Government coastal steamers "Tobago" and "Trinidad." The "Tobago" plys between Trinidad and Tobago five times per fortnight, going every alternate week by the northern and southern routes. The "Tobago" is mainly for passengers and the "Trinidad" for cargo.

The railway system consists of the following:— The Port of Spain—Arima—Sangre Grande line (opened in 1897) 29 miles along the southern foot hills of the northern range of hills to

within 8 miles of the eastern coast.

The San Fernando—Siparia line, 44 miles (leaving the former line at St. Joseph) following roughly the western coast line of the Colony (opened to Couva in 1880, San Fernando in 1882, Siparia in 1913); total distance, Port of Spain to Siparia, 51 miles.

The Caparo valley and Caparo valley extension lines, 28½ miles (opened to Tabaquite in 1898, Rio Claro in 1914), leaving the Port of Spain—San Fernando—Siparia line at Jerningham Junction (14½ miles from Port of Spain) and running in a generally south-eastern direction; total distance from Port of Spain 43 miles.

The Guaracara line (10 miles) opened in 1884, leaving the Port of Spain—San Fernando—Siparia line at Marabella Junction (33 miles from Port of Spain) and running in an easterly direction to Princes Town; total distance from Port of Spain

43 miles, and Digitized by Google

The Cipero tramway, to the south of San Fernando, also proceeding by another route to Princes Town.

The total length of this system is 123 miles.

The railways afford opportunities of communication for passengers between all lines three times a day, and there are goods train opportunities once a day.

A suburban service of trains is run between Port of Spain and Arima (16 miles) at low fares, giving a service of 6 trains daily each way.

Road transport feeder services between the principal terminal stations and the coast provide for through transport between all the Districts of the Colony.

In connection with the railway, a steamer makes three trips a week each way between Port of Spain and the Bocas entrance to the Gulf, including the Islands to the West of

Port-of-Spain.

The railway stations are in telegraphic communication one with the other on all parts of the system, giving a total length of about 118 miles of telegraph and about 14 miles of telephone lines. There is also a service telephone along the Cipero Section between San Fernando and Princes Town.

The total receipts from the railways, railwaysteamers, telegraphs and telephones for the year 1933 amounted to 134,517*L*, and the working expenses to 147,593*L*, exclusive of provision for loan and capital interest and sinking fund amounting to 98,487*L*. There was, therefore, a net loss on working of 13,076*L*, as compared with a loss of 26,801*L* in the previous year.

The total number of passengers carried during 1933 was 1,414,380. The total tonnage of goods was 434,341 tons.

The roads are divided into main and local roads. The former and 52 per cent, of the latter are under the control of the Public Works Department. The other local roads are under Local Road Boards. The main roads, with a total mileage of 1,077 miles, are made up of 289 miles metal and oil, 364 miles metal, 204 miles gravel and burnt clay, and 220 miles natural soil roads. The local roads in Districts where there are no Local Road Boards comprise 691 miles and are made up of seven miles metal and oil, 63 miles metal, 210 miles gravel and burnt clay, and 411 miles natural soil roads. In addition there are many miles of Crown Train in charge of the Wardens.

There are numerous motor bus services plying along the Eastern Main Road between Port of Spain and Arima, and along the Southern Main Road between Port of Spain and San Fernando. These services are not continuous, individual owners plying for hire along different sections of the routes. There is also a bus service which links the suburb of Woodbrook to the city.

There is a General Post Office in Port of Spain, branch offices at San Fernando and Tobago, and 119 out-offices throughout the Colony.

Communication by cable with the United Kingdom. Europe, North America and other parts of the world is maintained by the Pacific Cable Board (All Red Route) and the West India and Panama Telegraph Company. The Pacific Cable Board and the West India and Panama Telegraph Company are both now under the management of Cables & Wireless Ltd. of Electric House, London,

A wireless system is maintained between the following Islands—Barbados, Grenada, Carriacou, St. Lucia, Antigua, Montserrat and St. Kitts.

The principal tariffs are :-

To the United Kingdom from Port-of-Spain 2 4 per word

To Eastern Canada 1.6 ., ...

To Western Canada 1/83....

There are also cheap rates at half and quarter of the ordinary tariff, the latter being subject to a minimum charge.

Three wireless stations are maintained by the Trinidal Government at Port-of-Spain and North Post in Trinidad, and at Searborough in Tobago. The North Post Station deals exclusively with ship, Tobago and St. Martin and Martinique traffic while communication with British Guians, Venezuela and Paramaribo is carried out by Port-of-Spain.

Steamers calling at Trinidad comprise the following lines:—Elders and Fyffe, Leyland (Line), Harrison (Line), Compagnie Generale Transatlantique, Societa Italia (Line), Trinidad (Line) (Furness Withy and Coy., Ltd.), Prince (Line), Ocean Dominion Steamship Corporation, Royal Netherlands West India Mail, Canadian National Steamers, Aluminium (Line), Orinoco (Line), Nourse (Line), Hamburg-Amerika (Line), Cocan Dominion, New York Service, Lamport & Holt, Munson Steamship, Bermuda & West Indies, Vancouver & West Indies, McCormick S.S. Co., the Horn (Line), Canadian Transport Company, CompaniaAnonimaVenezolana de Navegacion, Dawnic (Line), and Wilhelmsen (Line), Mails are regularly forwarded and received by these steamers.

In addition an increasing number of steamers call to load oil cargoes, or to take in coal or fuel oil for bunker purposes. During the winter months a number of tourist ships call.

The Pan American Airways maintain a regular air service with the United States via the Lesser Antilles, Cuba and Miami, and with Buenos Aires via a number of South American ports. There is also an Air Mail service to Venezuela terminating at Maracaibo.

The rates of postage are as follows, per 1 oz. letter:—

Currency and Banking.

British Currency and United States gold arlegal tender. Accounts are kept in dollars, and the coin in circulation is almost exclusively British silver and bronze, there being no limit to silver as legal tender.

In 1903 an Ordinance providing for the issue of Government Currency Notes was brought into force. Under this Ordinance notes of the denominations of \$1, \$2, and \$1,000 have been issued, the total value in circulation at 31st December, 1933, amounting to \$525,440.

Government Savings Banks are established in 36 districts with a head office in Port of Spain.

The total number of depositors at 31st December, 1933, was 41,901, with deposits amounting to 457,34%. The savings banks are largely made use of by the East Indians, of whom at the 31st December, 1933, there were 12,863 depositors. The amount deposited by this section of the community during the year is estimated at 56,793%.

The Commercial Banks are (1) Barclays Bank (Dominion, Colonial and Overseas) Ltd., with a note circulation in the Colony estimated at \$1,200,000; (2) the Royal Bank of Canada, with an authorized note circulation in the Colony of \$1,500,000: (3) The Canadian Bank of Commerce, with an authorized note circulation of \$750,000; (4) Messrs. Gordon, Grant & Company, Limited. Barclays Bank (Dominion, Colonial and Overseas) Ltd., the Royal Bank of Canada, and the Canadian Bank of Commerce have Savings bank branches and pay interest at the rate of 2 per cent., while the Government Savings Bank pays 3 per cent. on amounts up to 500l. and 2 per cent, on amounts exceeding 500%. The Bank of Messrs. Gordon Grant and Co., Limited, is not a bank of issue. In addition to the above Banks there is the Trinidad Co-operative Bank, an institution established in 1914, for the encouragement of thrift.

Education.

At the close of 1933 there were 290 elementary and intermediate schools in the Colony, 43 being Government and 247 assisted schools. There were 254 schools in Trinidad and 36 in Tobago.

The number of pupils on the roll in December, 1933, was 71,189. The average daily attendance was 45,889, or 644 per cent of the number on roll. As compared with the previous year there was an increase of 2,978 on the roll, and a decrease of 1,694 in average attendance. The number of teachers and pupil teachers employed was 1,931 (1,813 in 1932).

The total expenditure on education during the year 1933, deducting the amount received in school and examination fees, was 160,875l. as compared with 154,215l. in 1932.

Secondary Education.

The following Colleges afford facilities for the higher education of boys:—The Queen's Royal College and its affiliated institutions, the St. Mary's College in Port-of-Spain, and the Naparima College in San Fernando, the Bishop's High School in Tobago. The St. Joseph's Convent and the St. Hilary's High School in Port-of-Spain, and the Naparima Girls' High School at San Fernando, which are also affiliated to the Queen's Royal College, provide similar education for girls.

The affiliated institutions work under the same curriculum as the Queen's Royal College, and receive a Government grant in aid.

Besides the public schools, of which mention has been made above, there are many private schools.

Opportunities for technical education are afforded by a Board of Industrial Training established in 1906, which also supervises a small institution for the instruction of the blind.

TOBAGO.

History.

Tobago was discovered by Columbus in 1498, at which time it was occupied by Caribs. The British flag was first planted on the island in 1580, and the sovereignty was regularly claimed by James I. in 1608. In 1625 an attempt was made by some adventurers from Barbados to form a colony; but many were killed by the Carib Indians, and the remaining few escaped and settled at Providence. In 1628 a grant of the island was made by Charles I. to the Earl of Pembroke. The island remained unoccupied until 1632, when 300 Zealanders were sent out by a company of Dutch merchants, who styled it New Walcheren. After a residence of about two years these settlers were all destroyed or expelled by the Indians and Spaniards from Trinidad. In 1641 James Duke of Courland obtained a grant of the island from Charles I., and in 1642 two vessels arrived with a number of Courlanders, who settled on the north side of the island. These were followed by a second Dutch colony in 1654, who, having effected a compromise with the Courlanders, established themselves on the southern coast; but in 1658 the Courlanders were overpowered by the Dutch, who remained in possession of the whole island until 1662, when the Dutch Company resigned their right to it. In this year Cornelius Lampsis procured letters patent from Louis the Fourteenth. creating him Baron of Tobago, and proprietor of the island under the Crown of France.

In 1664 the grant of the Island to the Duke of Courland was renewed by Charles II. The Dutch refused to recognise the Duke's title, but in 1667 they themselves were compelled by the French Admiral Estras, to evacuate the island the Dutch Admiral Binks being defeated in Scarborough Bay, whereupon Louis the Fourteenth restored the island to the Duke of Courland, who, in 1681, made over his title to a company of London merchants. In 1748, by the Treaty of Aix-la-Chapelle, the island was declared neutral: the subjects of all European Powers being at liberty to form settlements or carry on commerce but not to place garrisons on it. At the peace in 1763, by the Treaty of Paris, Tobago was ceded by France to England in perpetuity.

In 1781 Tobago was captured by the French under the Duke of Bouillé, after a most gallant defence by the Colonists. In 1783 it was surrendered by treaty to the French Crown. On 15th April, 1793, it was captured by a British force under Admiral Lefrey and General Cuyler, and was once more restored to the French by the Treaty of Peace in 1802, and again reconquered in 1803 by Commander Hood and General Greenfield, and in 1814 finally ceded in perpetuity to the British Crown.

Situation and Area.

To bago lies between 11° 8′ and 11° 21′ N. lat. and 60° 30′ and 60° 50′ W. long., distant from Barbados 120 miles, from Grenada 75 miles, and from Trinidad, 26 miles. It is 26 miles long and $7\frac{1}{2}$ miles at its greatest breadth, and has an area of 116 square miles, or 74.392 acres, of which about 41.675 acres are under cultivation.

The formation of the island is volcanic: its physical aspect is irregular and picture-que, with conical hills and ridges, which descend from a common base or dorsal ridge 1,800 feet high and 18 miles in length.

The population of Tobago in 1931 was 25,358 according to census,

General Description.

Tobago is a Ward of Trinidad and its exports out of the Colony all pass through Trinidad and are included in the general statistics of the Colony. It has also a considerable trade in minor products, vegetables, live stock, etc., with Trinidad. The total value of the Tobago trade in 1933 was 70,2601., made up as follows :-

		£
Cacao		29,670
Coconuts, Copra and Oil		18.83 3
Other Products	• •	21,757

The island is divided into seven parishes. Scarborough, the principal town, is on the south side of the island, about 8 miles from the S.W. point, and is situated at the south-western base of a hill 425 feet above the level of the sea, on which stands Fort King George, now without a garrison. The town had a population, according to the census of 1931, of 833. It is a port of registry. Courland Bay, at Plymouth, also has good anchorage. There is a lighthouse at Fort King George, Scarborough; it is a fixed white light, at an elevation of about 425 feet above the level of the sea.

Regular communication with Trinidad is maintained by means of wireless telegraphy, and a coastal steamer service, provided by the Government.

The island possesses a fair mileage of motor roads.

Education is in the hands of the Anglican, Roman Catholic, Moravian, and Wesleyan bodies, who are assisted by a Government grant.

Constitution.

The Government was formerly administered by a resident Administrator, subordinate to the Governor-in-Chief of the Windward Islands at Grenada, and a Legislative Council was established by an Order in Council of the 7th of February, 1877, to consist of not less than three persons, designated by Her Majesty.

By an Order in Council of 17th November, 1888, issued under Act 50 & 51 Vict. cap. 44, Tobago was amalgamated with Trinidad, the name of the new Colony being Trinidad and Tobago. The latter island was administered by a Commissioner appointed by the Governor of the United Colony, who was ex officio a member of the Legislative Council, and one unothicial member of Council represented Tobago. The Commissioner was assisted by a financial board of five members, two nominated by the Governor and three elected. The revenue, expenditure, and debt of the islands remained distinct, but there was entire freedom of commercial intercourse between them, and the laws of Trinidad were, with some specified exceptions, the laws of both.

By an Order in Council of the 20th of October, 1898, the Order in Council of the 17th of November, 1888, was almost entirely revoked, and it was provided that the Island of Tobago should become a ward of the United Colony of Trinidad and Tobago: that the revenue, expenditure, and debt of Tobago should be merged in those of the United Colony; that the debt due from Tobago to Trinidad should be cancelled; that (with some specified exceptions) the laws of Trinidad should operate in Tobago, and those of Tobago cease to operate so far as they conflicted with the laws

of Trinidad; that all future Ordinances of the Legislature of the Colony should extend to Tobaco. with the proviso that the Legislature should be able to enact special and local Ordinances and regulations applicable to Tobago as distinguished from the rest of the Colonv.

This Order in Council was brought into effect from the 1st of January, 1899, by a proclamation of the Governor issued on the 8th of December, 1898. The post of Commissioner ceased to exist, and the post of Warden and Magistrate was created.

UGANDA.

(FOR MAP SEE UNDER KENYA.)

Extent and Boundaries.

The British Protectorate over Buganda was proproclaimed on August 27th, 1894. The Protectorate was further extended over Bunyoro and Busoga on July 3rd, 1896. By numerous treaties concluded by various officers in the service of the Protectorate, the British administration has spread still further over countries adjoining the kingdom of Buganda proper, and the boundaries of the Protectorate may now be set forth as follows :-

On the east by Kenya Colony as far north as Mount Zulia, near the 4th degree of north latitude, the natural boundaries being the Turkana escarpment, Mount Elgon, and the Sio River running into the north-east corner of Lake Victoria; on the south, by Tanganyika Territory and by the 1st degree of south latitude; on the west, by the frontier of the Belgian Congo, the natural boundaries being Lake Edward, Mt. Ruwenzori, the Semliki River, Lake Albert and the Nile watershed; and on the north, by the Uganda-Sudan boundary.

The area of the Uganda Protectorate is estimated at 94,204 square miles, including 13,616 square miles of water. Pending the complete survey of the country, it is not possible to give the correct area.

For administrative purposes the Protectorate is divided into four provinces (Eastern, Northern, Western, and Buganda), and then again into numerous districts.

The headquarters of the Uganda administration are at Entebbe, and the chief commercial towns in the Protectorate are Kampala and Jinja; all three are on or near the North shore of Lake Victoria.

Climate.

The climate, when compared with that of some tropical countries, is not unpleasant, but there are parts of the country which can by no means be called healthy. The conditions vary with the altitude in different parts of the Protectorate: the Nile Valley, which lies about 2,000 feet above sea-level, is hot, and is considerably more unhealthy than the higherlying regions between Lakes Victoria and Albert. The most congenial climate for European residence is found in the Buganda kingdom and in the Western Province, where in some districts the altitude exceeds 5.000 feet above sea-level. European children thrive well in infancy in a few of the healthier stations, but considerable risk is attached to bringing them out when over six or seven years old, as they are always liable to attacks of malaria and the anæmia and general ill-health resulting therefrom.

The climate is mild, neither excessively hot nor cold, the average temperature for the year 1933 at Entebbe being—Mean maximum, 81.6° Fahrenheit; mean minimum, 59.0° Fahrenheit. Average daily

sunshine, 6.7 hours.

The lowest rainfall for 1933 was recorded at Butiaba, which registered 21.4 inches, the highest (89.98 inches) being recorded at Kalangala, See İslands.

The seasons are not well defined, but there are two dry seasons within the year; one dry season usually includes June and July, and the other December, January and February.

The healthiest months of the year are usually January, February and March, July, August, September and October, and the least healthy, April, May, November and December, or the periods corresponding to those immediately following the rains, when the mosquitoes become more in evidence and malarial infections more numerous.

No part of the Uganda Protectorate can be said to be absolutely free from malaria, but in some districts, for example those of Toro and Ankole in the Western Province, there is comparatively little, while on the other hand, in the Nile valley and along the courses of the larger rivers, malaria prevails at all seasons of the year.

Sleeping sickness, which proved such a scourge to the country in 1902 and the years following and necessitated the evacuation of the natives from the islands in Victoria Nyanza, and from the shores of the great lakes and rivers, is now well under control. During 1921 and 1922 the island population was to a great extent restored and many of the islands were successfully reopened. The focus of the disease is no longer on Lake Victoria.

Plague and smallpox are unfortunately endemic in the native population, but it has been possible to confine outbreaks for the most part within narrow limits. Active measures against these diseases are constantly engaging the attention of the medical and

administrative authorities.

History.

The countries that now make up the Uganda Protectorate did not become known to Europe until the journey of Speke and Grant in search of the sources of the Nile, which brought them to Buganda in 1862 and to Bunyoro a year later. In both countries they found a somewhat advanced indigenous civilisation, and it is around the rivalries of these two principalities that all the early history of the country centres. The Swahili form of "Buganda," the country of the Baganda people, has been adopted as the name of the whole Protectorate, although there are many other quite separate races and tribes among its inhabitants. Speke's discoveries were not at first credited, but were soon confirmed by Sir Samuel Baker and his wife who discovered Lake Albert. The first missionaries arrived in Buganda in 1877, and the rivalries of Protestant, Catholic and Mohammedan which soon naturally arose ended, after the death of the old king, Mutesa, and the accession of his weak and vacillating son, Mwanga, to the throne in 1884, in bloodshed. The Imperial British East Africa Company which, after concluding a treaty with Mwanga in 1890, had occupied Kampala with a weak force under Capt. Lugard, had much difficulty in trying to compose these rivalries, and would have been forced to abandon the country but for the intervention of the British Government, which sent out a Special Commissioner, Sir Gerald Portal, in 1893. His enquiry and negotiations led to the establishment of the Protectorate in the following year. For three years the country remained quict, but in 1897 mutiny broke out among some of the Sudanese troops who had been recruited by the Company from the remains of the Egyptian forces cut off by the Mahdist rebellion. It soon spread to all the discontented elements, but was 'ultimately overcome after having seriously menaced British rule. Finally the two kings-Mwanga of Buganda and Kabarega of Bunyoro-who had always resented European penetration and had seized upon the mutiny as a good opportunity to put an end to it, were captured and deported.

Since then there is little but peaceful progress to record. Sir Harry Johnston was sent out by the British Government in 1900 as Special Commissioner to settle the country, and concluded agreements with the heads of the native principalities of Buganda, Toro and Ankole, which laid down the principles

governing their administrative relations with the Crown and the ownership of the and. No such arrangements could be made at the time with regard to the rest of the present Protectorate, but administration has since been extended gradually over the more primitive and unorganised tribes, and the same principles of "indirect rule" have been followed wherever and whenever it was possible as in the "agreement districts." In 1903 the Eastern highlands of the Protectorate along with the Kavirondo country were transferred to what is now Kenya Colony, and the succeeding years saw further adjustments of frontiers with the Sudan, the Belgian Congo. and German East Africa, now Tanganyika Territory. In 1903 the superintendence of the Protectorates affairs passed from the Foreign to the Colonial Office. In the Great War the population, of all races, remained devotedly loyal and played a great part in the East African campaign. Since then progress, both material and cultural, has continued, the former made possible by the success of the cotton industry and the development of communications, the latter based on the activities of the missions, both Protestant and Catholic, in whose hands was all educational work until 1925.

Native Population	• •		3,604,135
	Total		3,620,193

Constitution.

By the Uganda Order in Council, 1920, it was provided that there should be an Executive Council and a Legislative Council both consisting of such persons as may be directed by Royal Instructions. Under the Royal Instructions dated the 5th June 1920, the Executive Council consists of the Chief Secretary, Attorney-General, Treasurer, and Director of Medical Services (ex-officio members), and such other persons holding office in the public service as the Governor may appoint (official members), and such other persons (if any) not holding such office as the Governor may appoint (unofficial members), with the Governor as President.

It is further provided that the Legislative Council shall consist of the Governor, Attorney-General, Treasurer, and Director of Medical Services (ex-officio members), with official and unofficial members as in

the case of the Executive Council.

The membership of both Councils has since been increased by the addition of the Director of Education and the Director of Agriculture; that of the Executive Council by the addition of Mr. A. E. Weatherhead, C.M.G., and of the Provincial Commissioner, Buyanda.

For the East African Governors Conference, see under Kenya, page 335.

The Native Government of Buganda has certain rights of internal legislation granted by agreement. The king of Kabaka, who is accorded the title of "His Highness," rules the Baganda people with the advice of the Governor and of a native Council known as the Lukiko, which also has judicial functions.

Communications.

The Uganda Protectorate is separated by about 500 miles from the nearest point on the east coast of Africa. Over this stretch of country, all of which

lies within the Colony of Kenya, transport was exceedingly difficult before the construction of the "Uganda Railway" from Mombasa to the northeast corner of Lake Victoria, which the Imperial Government decided in 1895 to undertake. This railway at the end of 1901 had covered the whole 584 miles separating Mombasa from Kisumu on Victoria Nyanza, which was the terminus of the railway until recent years.

There is a Lake Steamer Service connecting Entebbe, Port Bell (Kampals), and Jinja with Kisumu and the other ports on Lake Victoria. Steamers ply also on Lake Kioga and on Lake Albert and the Albert Nile as far North as Nimule. All these services are maintained by the Kenya and Uganda Railways and Harbours Administration.

A railway, 62 miles long, from Jinja to Namasazali on the Victoria Nile, giving access to the waterways of Lake Kioga, was completed in 1912, and one from Port Bell on Lake Victoria to Kampala, the principal commercial centre, a distance of 71 miles, was opened for public traffic in 1915.

Since the Great War considerable railway development has taken place, and the main line of the Kenya and Uganda Railway, leaving the original line at Nakuru, now extends into the Eastern Province of Uganda to join the Jinja-Namasagali railway at Mbulamuti, and so places Uganda in direct communication with the Coast. An extension of this line from Tororo, near the Kenya border, to Mbale and Soroti was completed in 1929, and the linking up of Jinja with Kampala—a scheme which involved the bridging of the Victoria Nile at the former place was completed in the early part of 1931.

The system of all-weather main roads radiating from Kampala to the principal administrative centres is maintained by the Public Works Department, which has a road mileage of 1,882 under its control. A system of roads in the Western Province establishes connection between the tin-mines and the Kagera River steamship service, taps the resources of the Ruchuru area of the Belgian Congo for that service, and links up direct the district headquarters in the west of the Protectorate. About 5,260 miles of excellent roads are also kept up by the Native Administrations. Motor-transport, in consequence of these facilities, has reached an advanced stage of development in the Protectorate.

The Uganda Posts and Telegraphs Department is amalgamated with those of Kenya and Tanganuka under the control of the Postmaster-General at Nairobi

Uganda is now in telegraphic communication with Mombasa and Dar-es-Salaam by land lines, and thence by cable with Great Britain and other countries. All important centres within the Protectorate are connected also by telegraph.

The total mileage of telegraph and telephone pole route at the end of 1932 was 1,608 and the wire mileage 4,247. Telephone exchanges are worked at Entebbe, Kampala, Jinja, Iganga, and Mosis, and connected by trunk lines.

Aviation.

Landing grounds are kept up at Entebbe, Torco, Masindi, Mbarara and Jinja, and landing facilities for sea-planes exist at Entebbe, Port Bell near Kampala, Jinja and Butiaba. There is no accommodation in Uganda for housing aircraft, but repairs can be carried out at the above places. Weekly communication by air with Europe and South Airwahas now been established by means of Imperial Airways, Ltd.

Industries.

Coffee of the Arabica and Robusta varieties has been introduced and thrives exceedingly well; the former is the principal crop on European plantations, and both are being grown in increasing quantities by natives. The principal industry is cotton, and 1,179,315 centals of lint, valued at 2,682,210l., as well as 81,274 tons of cotton seed, of a value of 262,539l. were exported in 1933. Sugar, hides and skins, ground-nuts and chillies, are the other principal agricultural exports, and, except for sugar, practically all the production is in native hands. Mineral discoveries have been made in recent years, and there is a considerable export of high-grade tin ore from the Western Province. This amounted in 1933 to 389 tons, of a value of 57,981l. 1,261 ozs. (troy) of gold, valued at 7,361l. was also exported in 1933. Cattle are plentiful. Leasehold grants of land can be obtained from the government, but the issue of freehold concessions has been withdrawn for the

The weights and measures in common use in the Protectorate are the Imperial weights and measures. The currency is the same as that of Kenya.

Banking facilities are afforded by the National Bank of India Ltd., with branches at Entebbe, Kampala, and Jinja, the Standard Bank of South Africa Ltd., with branches at Kampala and Jinja, and by Barclays Bank (Dominions, Colonial and Overseas), with branches at Kampala and Jinja.

Trade and Customs.

Since 1917 Kenya and Uganda have been one administrative unit for purposes of Customs.

A uniform Tariff was adopted in 1923 for Kenya and Uganda, operating also in Tanganyika Territory. Under this tariff all export duties were abolished and the import schedules were remodelled to provide for the imposition of "specific" duties and of "ad valorem" duties varying from 10% to 621% of the landed value of goods liable to duty on importation. In addition, free trade between Kenya, Uganda and Tanganyika Territory in goods, the growth produce or manufacture of each of the territories was established. The 1923 Tariff with minor alterations, remained in force until April, 1930, advantage of the existence of a tariff common to the three territories being taken to institute in August, 1927, a system of extending unrestricted trading to imported goods passing between the territories. Under this procedure, which is operated by means of transfer forms, single payment of duty only is chargeable, the Customs Revenue involved being credited to the consuming territory by inter-departmental entry.

In 1930 a uniform modernised Tariff scheduled according to commodities as opposed to rates was negotiated and enacted in the three territories simultaneously. Included in the provisions of the Tariff Ordinance is an amended definition of value for purposes of assessment of duty which brings the East Africa Tariff Laws into conformity with the practice followed in many other countries and allows of the acceptance of certificates of value endorsed on invoices in the stereotyped form approved by the Imperial Customs Conference, 1921.

The basis of assessment is now the current domestic value in the country of export plus freight and other charges incurred up to the time of importation of goods into Kenya, Uganda or Tanganyika Territory as the case may be. As regards certain specially protected commodities (wheat flour, sugar, timber, etc.) the device of "suspended duties" has been adopted in order to allow of a defined margin of elasticity in each territory in the matter of imposition

on specified articles of "suspended duties" as distinct from basic duties, without interference with the main principle of a common Tariff. The 1930 Tariff Ordinances of the three territories provide that the Governor, with the approval of Legislative Council, may impose by Proclamation either in part or in full a duty referred to in the Tariff schedules as a "suspended duty," the effect being that each Government has the right to vary "suspended duties" up to the amount specified in the Tariff. At the same time an undertaking has been given by each Government that removals of any of the "suspended duties" will only take place after prior consultation with the other Governments concerned.

In 1931 the Consumption Tax previously leviable on wines and spirits cleared for consumption in Kenya was incorporated in the common Tariff and certain increases in the rates of duty chargeable on vehicles and parts (including tyres and tubes) were imposed in the three territories.

Thei mport tariff as it now stands admits free of duty goods essential to the agricultural, industrial, educational and scientific development of the territories and has been designed, as far as possible, to protect imports essential to the opening up and development of the country and to foster local production of agricultural and other commodities in which Kenya, Uganda and Tanganyika Territory, taken as an economic unit, are, or can be made, self-supporting.

The net amount of Customs receipts credited to Uganda from all sources was 290,203i. in 1933.

The main items imported for Home Consumption during 1933, were:—

Articles.	Value	£
Rice		18,795
Wheat meal and flour		3,576
Ale, beer and stout, etc.		2,513
Spirits and wines		16,128
Cigarettes, cigars and tobacco.		65,654
Chinaware, etc., glass and glass	ware	10,213

Separate statistics of the chief countries of consignment for Uganda domestic produce are not available. For the combined produce of Kenya and Uganda the figures were: - United Kingdom, 35-67%; British Possessions, 42-32% (Total British Empire, 77-99%); Germany, 1-48%; Belgo-Laxemburg Economic Union, 3-06%; France, Laxemburg Economic Union, 3-06%; France, 0-64%; Italy, 0-89%; Netherlands, 1-06%; Hadramaut, 0-24%; Japan, 7-88%; Egypt, 0-71%; U.S.A. 1-65%; Italian Somaliland and Colonia Erytrea, 1-84%; other foreign countries, 2-56%.

The following particulars give the c.i.f. value of imports entering Uganda for consumption in the Protectorate, and the f.o.b. value at Mombasa of exports originating in Uganda:-

Year.			†Imports.		Exports.
1929			2,093,487		4,274,758
1930	••	••	1,515,316	••	2,060,453
1931			1,245,537	••	1,978,262
1932	• •	• •	1,277,315	• •	2,224,878
19 33			1,367,049	• •	3,464,610

Finances.

The Revenue is principally derived from poll taxes, customs duties, cotton tax, trading licences, and land rents. The revenue from poll taxes in 1933 was 542,1021., and from customs duties 308,9681. There has been no grant in aid from the British Government since 1914-15. The Uganda Loan, 1932 (£2,110,060), was floated in January, 1932. The unit of currency is the East African shilling.

			Revenue.	E	xpenditure. £

Administrator General and Official Receiver, Registrar-General of Marriages, etc., A. R. Holliday, 600l. to 840l. (Scale A).

Asst. Admin. General and Deputy Official Receiver, W. B. Cumming, 475l. to 720l.

Registrar, High Court, D. H. Shackles, 600l. to 840l. (Scale A).

Clerical Superintendent and Interpreter, J. D. Kirwan, 300l. to 600l. (Scale D).

Medical.

Director of Medical Services, W. H. Kauntze, M.B.E., 1,500%.

Deputy Director of Medical Services, H. S. de Boer, 1,2001.

Assistant Director of Medical Services, C. R. Lutze-Wallace, 1,200l.

Medical Superintendent and Principal Medical School, Mulago, J. P. Mitchell, O.B.E., 1,150l.

5 Senior Medical Officers, E. A. C. Langton, K. T. K.

Wallington, J. M. Semple, J. C. St. George Earl, A. R. Lester, 1,000l. by 50l. to 1,100l.

11 Medical Officers, A. J. Boase, T. H. Nolan, R. S. McElroy, L. D. Dennard, J. D. Reynolds, N. C. Macleod, S. Forrest, G. Louw, A. H. Maclean, E. N. Cook, 600l. to 1,000l. (Scale A).

20 Medical Officers, A. A. Battson, C. E. Roberts, J. J. Mitchell, R. E. Barrett, A. F. Brown, J. S. Brown, J. J. Black, P. J. Cowin, D. Murray, E. Burton, G. Holmes, J. R. C. Spicer, C. R. C. Rainsford, A. G. Mackay, A. J. Garde, H. G. Floyd, W. A. Wilson, A. H. Mowat, L. J. A. Loewenthal, A. W. Williams, R. Y. Dunlop, 6001. to 920l. (Scale A).

Dental Surgeon, G. S. Bateman, 7201. to 9201. (Scale A). (Salary personal to present holder, 1,000l.).

Senior Bacteriologist, Mrs. M. Turton, 1,000l. by 50l. to 1,100l.

Assistant Bacteriologists, N. J. Willans, R. S. F. Hennessey, 600l. to 920l. (Scale A).

Analytical Chemist, E. C. Haddon, 600l. to 840l.

2 Laboratory Assistants, J. Stewart, E. G. Gibbins, 500l. to 600l. (Scale C).

2 Senior Nursing Sisters, Miss R. A. Bagot, Miss I. Baillie, A.R.R.C., 300l. to 426l. and 20l. uniform allowance (Scale D).

Lady Steward, Miss E. R. Brittain, 360l. and 20l. uniform allowance.

Office Superintendent, H. T. Bott, 500l. to 600l. (Scale

Lady Stenographer and Confidential Secretary, Miss M. J. Mason, 300l. to 426l. (Scale D).

Storekeeper and Pharmacist, (vecant), 4251. to 6001. (Scale B).

2 Hospital Superintendents, E. S. Smout, F. G. Caldwell, 500l. to 600l. (Scale D).

3 European Assistant Superintendents and Dispensers, J. L Parker, H. M. W. Nicholson, L. C. Bell, 300l. to 500l. (Scale D).

10 Sanifary Inspectors, R. J. Wilkinson, G. Gillanders, R. C. D. Hooper, W. M. Carnie, E. J. Hines, G. H. Postlethwaite T. Hughes, F. Smith (2 vacancies), 372l. to 540l. (Scale D), and 10l. uniform allowance.

Human Trypanosomiasis Institute.

Director, H. L. Duke, O.B.E., 1,4001.

Bacteriologist (vacant), 840l. to 1,000l. by 40l. Laboratory Assistant, J. S. McDonald, 3721. to 6001. (Scale C).

Taetae Control.

Sleeping Sickness Inspector, C. W. Chorley, 300l. to 500l. (Scale D), F. W. B. Rolfe (fixed salary, 360l.).

Education.

Director of Education, H. Jowitt, 1,350l.

Deputy Director of Education, R. S. Foster, 1,000l. Chief Inspector of Schools, R. E. Parry, 720l. to 920l. (Scale A).

Inspectors of Schools, R. A. Snoxall, J. N. Russell, 600l. to 920l. (Scale A).

Assistant Inspector of Schools, W. B. Ouseley, 475l. to 7201. (Scale A).

Inspector (Woman) of Schools, Miss A. B. Robertson, 400l. for 2 years, then 475l. to 720l.(Scale C) Clerk and Registrar of Schools, G. F. Turner, 300l. to

500l. (Scale D). Principal, Makerere College, D. G. Tomblings, 1,000l.

Biologist, G. L. R. Hancock.

Master of Method, J. Sykes, 7201. to 9201. (Scale A). 6 Tutors, H. H. Wood, W. N.R. Lee, J. W. F. Marriott, R. J. R. Potts, F. L. Gee, 500l. to 920l. (Scale A.), W. W. Soundy, 400l. to 920l. (Scale A).

Bursar, S. R. Hooper, 372l. to 600l. (Scale B)

Headmaster, Kampala Normal School, A. J. Lush, 500l. to 920l. (Scale A).

Chief Instructor, Kampala Technical School, D. M. Cavers, 480l. to 720l. (Scale C).

3 Instructors, C. S. Grant, 372i. to 500l. (Scale D), W. E. Fisher, F. P. Woodmore, 3721. to 6001. (Scale D).

European Clerk and Storekeeper, L. J. Carter, 3721. to 500l. (Scale D).

Elgon Technical School Instructors, H. R. Griffiths, 480l. to 600l. (Scale C), J. E. Farquharson, 372l. to 600l. (Scale D).

Police and Prisons.

Commissioner of Police and Prisons, Major F. T. G. Tremlett, M.B.E., 1,2001.

Deputy Commissioner, Capt. M. St. C. Thom, 960. 17 Superintendents, Assistant Superintendents and Cadets, Captain F. Roberts, Captain L. Handley, Captain C. S. Wagstaff, E. G. Smith, Captain H. R.

Mather, Captain E. G. Fish, L. L. Ralph, Captain A. W. Parsons, B. Driscoll, Lieut. H. F. Workman, Lieut. W. D. MacLeman, D. Skinner, I. McGregor, Captain P. S. Le Geyt, Captain B. R. Durlacher, M.C., Lieut. J. D. B. Watson, W. J. Hubbard, 3601. to 8401. (Scale B). Superintendent, C.I.D., W. Younger, 600l. to 840l. (Scale B). Assistant Superintendent, C.I.D., G. W. Peskett, 4251. to 840%. 2 Chief Inspectors, (vacant), 480l. to 540l. (Scale D). Inspector, C. A. Mathias, 372l. to 500l. (Scale D).

4 Assistant Inspectors, H. Blackwell, S. L. Lloyd, W. H. Creasey, (1 vacancy), 300l. to 372l. (Scale D). Quartermaster, A. B. Tyte, 600l. to 720l. (Scale B).
Inspector, C.I.D., H. P. Morrison, 372l. to 500l. (Scale D). Drill Inspector, F. J. Robbins, 372l. to 500l. (Scale D). Finger Print Expert, C.I.D., W. A. Jerome, D.C.M., 3721. to 5001. (Scale D). 2 Inspectors, Traffic Branch, H. T. Fairfield, H. C. Money, 3721. to 5001. (Scale D). Clerk, C.I.D., C. A. Hockey, 3001. to 5001. (Scale D) (salary personal to present holder, 6001.).

Clerk and Typist, Traffic Branch, Mrs. L. W. Summerfield, 3001. by 181. to 4261. Superintendent of Prisons, H. P. Robertson, 5001.

Printing and Stationery Department.

Assistant Superintendent of Prisons, S. Salter, 425l. to

3 Head Gaolers, W. A. Brown, P. Snelgrove, J.

Gemmell, 3721. to 5001. (Scale D).

to 7201. (Scale B).

600l. (Scale B).

Government Printer, Manager of "Official Gazette" and Comptroller of Stationery, G. H. Bell, 600l. to 8401. (Scale C). Assistant Printer and Linotype Supervisor, S. Foote, 500l, to 600l. (Scale D).

Second Assistant Printer (vacant), 3721. to 5001. (Scale D).

Public Works Department.

Director of Public Works, A. C. Wilmot, O.B.E., 1,350%.

2 Executive Engineers, W. H. Michell, R. W. Taylor, 8401. to 9201. (Scale C).

2 Senior Assistant Engineers, F. U. M. Greer, J. J. Donaghue, 720l. to 840l. (Soale C).

4 Assistant Engineers, N. W. King, C. T. Mitchell,
F. H. R. Came, H. Collin, F. J. Murphy, 480l. to

7201. (Scale C). Factories Inspector, M. J. Robertson, 600l. to 720l.

(Scale C). Assistant Factories Inspector, J. E. H. Calvert, 4081.

to 500l. (Scale D). Architect, F. C. Haslam, 600l. to 840l. (Scale C). Draughtsman and Quantity Surveyor, W. H. Watts, 480l. to 720l. (Scale C).

Chief Accountant, P. W. Adshead, 720l. to 840l.

(Scale B).

3 Assistant Accountants, F. J. Sheldrake, S. Grey, B. T. Duckworth, R. S. Nicklin, 425l. to 720l. (Scale B).

Chief Storekeeper, E. E. Stow, 600l. to 720l. (Scale B). 3 Assistant Storekeepers, H. T. Leach, J. Carter, A. Slater, 372l. to 500l. (Scale D). 3 Senior Overseers, R. Blackie, D.C.M., A. W. Phillips,

W. Whatley, 500l. to 600l. (Scale D). Waterworks Superintendent, A. W. Legg, 500l. to 600l.

(Scale D). Waterworks Overseer, E. M. Bowick, 3721. to 5001.

(Scale D).

7 Overseers, J. R. Bell, A. Boyers, I. McDonald, F. W. Hollister, P. C. Mowbray, J. L. Wykes, W. O. Ford. 372l, to 500l, (Scale D).

Electrical Mechanician, M. M. Conochie, 3721. to 5001. (Scale D).

Mechanical Foremen, Water Supply, H. J. Pearce, L. F. L'Estrange, 372l. to 500l. (Scale D). Mechanician Foremen, H. P. Zimmerman, C. W.

Wishart, 372l. to 500l. (Scale D). Road Foremen, J. W. Pool, 354l. to 450l., R. N. Gawler,

Transport Section.

Mechanical Transport Officer, W. Dixon, 7201. Transport Officer, G. W. Rawley, 5001. to 6001. (Scale B).

G. B. Kettle, 354l, to 400l. (Scale D).

Clerk and Storekeeper, H. G. Lovell, 3721. to 500L. (Scale D).

8 Mechanics, E. A. Evans, H. O. Torr, J. T. Stewart, R. C. W. Fraser, J. E. Gale, F. J. Hopgood, J. L. Roper, (1 vacancy), 372l. to 500l. (Scale D).

Drilling Section

Drilling Engineer, S. Gill, 840l. to 920l. (Scale C). 3 Drillers, H. N. N. B. Ballans, W. M. Todd, 600l., J. R. Burns, 372l. to 500l. (Scale D).

Land and Survey Department. Director of Surveys, Land Officer and Commissioner of Mines, B. T. Watts, O.B.E., 1,350l. Deputy Director of Surveys, H. B. Thomas, O.B.R.,

1,0000 Assistant Land Officer, J. G. Strickland, 840l. to 920l. Conveyancer and Registrar of Titles, D. L. G. Williams,

600l. to 960l. (Scale A). Assistant Registrar of Titles, C. G. Wrensch, 475L to 920. (Scale A) (Salary personal to present holder).

3 District Surveyors, A. C. McHatton, A. J. Wright,

R. G. Miller, 7201. to 8401. (Scale C).

7 Staff Surreyore, F. M. Thomas, A. G. Ellis, D. Kavanagh, E. L. Walsh, T. G. Braine, G. P. Spurr, G. M. Gibson, 480l. to 720l. (Scale C).

Mines Inspector, A. J. W. Legge, 720l. to 840l. (Scale C).

Chief Draughtsman, D. O. Mathews, 480% to 720%. (Scale C).

Land Assistant, A. T. G. Barber, 425L to 720L (Scale B).

Office Superintendent and Storekeeper, S. Doan, 500L to 600l. (Scale D).

Computer, A. E. Spenoer, 480l. to 720l. (Scale C). 2 Clerks, A. G. Johnson, M.M., D. McLaren, 300L to 500l. (Scale D).

Learners, Miss N. D. Jones, 150l., H. King, 120l. to 144l.

Geological Survey. Director, E. J. Wayland, 1,150l. (personal to present

holder of post). Senior Assistant Geologist, W. C. Simmons, 840. to

9201. (Scale C). 2 Field Geologists, A. D. Combe, K. A. Davies, C. B.

Bisset, 6001, to 8401. (Scale C) Laboratory Apprentice, B. E. R. Kirwan, 1201. to 144.

Forests.

Conservator of Forests, N. V. Brasnett, 1,0501. Senior Assistant Conservator of Forests, R. W. Freeman, 7201. to 8401. (Scale C).

3 Assistant Conservators of Forests, Lieut.-Commander J. T. Templer, R.N. (retired), C. M. Harris, W. J. Eggeling, 480l. to 720l. (Scale C).

4 Foresters, H. Adams, H. R. Webb, A. S. B. Brown, C. S. Cree, 3001. to 5001. (Scale D).

Agricultural Department.

Director of Agriculture, J. D. Tothill, 1,350l. Deputy Director of Agriculture, G. F. Clay, M.C., 1.000l. 2 Senior Agricultural Officers, A. B. Killick, C. E. J. Biggs, 720l. to 840l. (Scale C).

14 Agricultural Officers, R. T. Wickham, D. S. Davies, N. S. Haig, E. F. Martin, W. T. O. Maidment, H. L. G. Milne, A. J. Kerr, R. P. Davidson, W. J. M. Irving, J. D. Jameson, W. J. Badcock, T. R. Hayes, T. McEwen, R. K. Kerkham, 480l. to 720l. (Scale C).

4 Plantation Managers, P. Chandler, C. Hazel, E. A. Ruck, A. L. Stephens, 425l. to 600l. (Scale D). Government Entomologist, H. Hargreaves, 600l. to 8401. (Scale C).

Entomologist, G. H. E. Hopkins, 600l. to 840l. (Scale C). Mycologist, C. G. Hansford, 600l. to 840l. (Scale C). Senior Bolanist, G. W. Nye, 600l. to 840l. (Scale C). Assistant Botanists, H. R. Hosking, A. S. Thomas, 480l. to 720l.

Agricultural Chemist, W. S. Martin, 600l. to 840l. (Scale C).

Assistant Entomologist, T. H. C. Taylor, 480l.to 720l. (Scale C).

Assistant Agricultural Chemist, G. Griffith, 480l. to 720l. (Scale C).

Laboratory Assistant, T. W. Chorley, 372l. to 600l. (Scale D).

Tobacco Officer, G. T. Philpott, 6001.

Statistician, H. G. Smith, 500l. to 600l. (Scale D). (Scale personal to present holder, 600l. to 720l.). Clerk, A. J. Dowse, 300l. to 500l. (Scale D).

Ploughing Instructor, J. K. Shepherd, 3721. to 4261. (Scale D).

Agricultural Department—Educational Division. Superintendent, Agricultural Education, E. G. Staples, 720l. to 840l. (Scale C).

Agricultural Officers, C. W. L. Fishlock, R. W. Stuckey, M. G. de Courcy-Ireland, 480l. to 720l. (Scale C).

Veterinary Department.

Director of Veterinary Services, W. F. Poulton, 1,100l. Veterinary Pathologist, R. W. Mettam, 9201. Assistant Veterinary Pathologist, J. Carmichael, 6001.

to 8401. (Scale C). 2 Laboratory Assistants, E. R. Jones, S. G. Laws,

372l. to 600l. (Scale D).

Senior Veterinary Officer, R. L. L. Hart, 7201. to 9201. (scale personal to present holder).

10 Veterinary Officers, Capt. W. S. Aitken, W. L. S. Mackintosh, R. J. Simmons, W. A. Allan, R. C. U. Fisher, D. L. O. Brien, H. G. Stewart, R. B. H. Murray, C. P. Downes, H. Cronly, 600l. to 720l. to 840l. (Scale C).

Senior Assistant Live Stock Officer, J. T. Kennedy, 600l. to 720l. (Scale C).

Assistant Live Stock Officer, J. J. Victor, 4251. to 6001. 2 Clerks, F. A. Cottage, R. Tompkins, 300l. to 500l. (Scale D).

> Posts and Telegraphs. (See under "KENYA.")

Postmaster General, T. Fitzgerald, 1,600l.

Assistant Postmaster-General (vacant), 720l. by 30l. to 840%.

Municipal.

Superintendent of Conservancy and Executive Officer, Kampala Township Authority, J. V. W. Hodson, 600l. to 720l. (Scale B).

4 Conservancy Officers and Sanitary Inspectors, C. W. G. Tiffin, W. Johnson, W. S. Swann, D. F. Crombie, 372l. to 540l. (Scale D).

Camp Superintendent, C. E. C. Owtram, 300l.

Game Department.

Game Warden, Capt. C. R. S. Pitman, D.S.O., M.C., 720l. to 840l. (Scale B).

2 Game Rangers, Capt. R. J. D. Salmon, M.C., F. G. Banks, 7001.

Treasury and Savings Bank.

Treasurer and Controller of Savings Bank, A. E. Forrest, 1,400l.

Deputy Treasurer, (vacant), 1,000l.

Principal Assistant Treasurer, (vacant), 840 to 9201. (Scale B).

3 Senior Assistant Treasurers, F. Read, Captain E. J. Mateer, B. M. Tatham, 720l. to 840l. (Scale B). 5 Assistant Treasurers, J. W. Groves, H. D. D. Mackay,

W. Jesse, (2 vacancies), 425l. to 720l. (Scale B). Cashier (vacant), 425l. to 720l. (Scale B).

Correspondence Clerk, R. H. G. Bulteel, 3001. to 5001. (Scale D).

Junior European Clerk, P. C. Kean, 1201. to 1441. Relief Clerical Establishment, J. B. Cashmore, A. E. Wilson, D. O. Swane, G. P. Lunn, 3001. to 5001. (Scale D).

Customs.

Coast Agent, Mombasa, L. Shoolman, 6001. to 7201. (Scale B).

Assistant Coast Agent (vacant), 500l. to 600l. (Scale D).

WESTERN PACIFIC.

High Commission.

The office of High Commissioner in, over, and for the Western Pacific Islands, was created by an Order in Council, cited as the Western Pacific Order in Council of 1877.

The jurisdiction of the High Commissioner extends over all islands in the Western Pacific not being within the limits of the territories administered by His Majesty's Governments in the Commonwealth of Australia and in New Zealand or the Colony of Fiji, and not being within the jurisdiction of any other civilised In 1893 a new Order in Council Power. was issued, known as the Pacific Order in Council, 1893, in accordance with which the High Commissioner's jurisdiction is extended to foreigners and (in most cases) to natives residing in British settlements or protectorates within the limits of the Order. Under the provisions of the New Hebrides Order in Council, 1922, the jurisdiction of the High Commissioner extends also to the islands in the Pacific Ocean known as the New Hebrides, and all the islands known as the Banks Islands and Torres Islands. The expenses of the High Commission at Suva, Fiji, are met from the funds of the Gilbert and Ellice Islands Colony and the British Solomon Islands Protectorate, but a contribution is paid from Imperial funds in respect of work in connection with Tonga and the New Hebrides.

The Chief Justice of Fiji, and every other Judge for the time being of the Supreme Court of Fiji, is by virtue of his office a Judicial Commissioner.

Deputy Commissioners are appointed by the High Commissioner on behalf of His Majesty. The High Commissioner's Court consists of the High Commissioner, the Judicial Commissioners,

and the Deputy Commissioners, and in it is vested all His Majesty's civil and criminal jurisdiction exercisable in the Western Pacific Islands.

The Court of a Judicial Commissioner has powers similar to those of the Superior Courts of England, and the Deputy Commissioners have civil jurisdiction in Common Law, Equity and Bankruptcy, with a limited jurisdiction in Probate, and have a criminal jurisdiction in respect of offences not punishable with seven years' penal servitude or

With some few exceptions all decisions of the High Commissioner's Court may be appealed

against to the Supreme Court of Fiji.

In addition to the other means of preserving order the High Commissioner has certain special powers for the deportation of persons whose proceedings endanger the peace of the Islands.

The principal groups under the High Com-

missioner are :-

The Gilbert and Ellice Islands Colony. The British Solomon Islands Protectorate. Tonga.
The New Hebrides. The Phœnix Group. Pitcairn Island.

Particulars of these are given below.

1877 Sir Arthur Gordon, G.C.M.G.

High Commissioners.

1887 Sir C. B. H. Mitchell, K.C.M.G. 1888 Feb., Sir J. B. Thurston, K.C.M.G. 1997 Sir G. T. M. O'Brien, K.C.M.G. 1902 Sir H. M. Jackson, K. C.M.G. 1904 Sir E. im Thurn, K.C.M.G., K.B.E., C.B. 1911 Sir Henry May, K.C.M.G. 1912 Sir Ernest Bickham Sweet-Escott, K.C.M.G. 1918 Sir C. H. Rodwell, K.C.M.G. 1925 Sir Eyre Hutson, K.C.M.G. 1929 Sir A. G. Murchison Fletcher, K.C.M.G., C.B.E.

Establishment.

High Commissioner, Sir A. G. Murchison Fletcher, K.C.M.G., C.B.E., 1,200l. (in addition to 3,000l. as Governor of Fiji, and allowance of 150l. as Consul-General for Western l'acific).

Chief Judicial Commissioner, Captain Sir Maxwell Hendry Maxwell-Anderson, C.B.E., K.C., R.N. Retired) 400% (in addition to 1,200% as Chief

Justice of Fiji).

Secretary to the High Commission, H. H. Vaskess, 700l. to 800l. by 25l., and house allowance, 75l. Assistant Secretary, R. H. Garvey, 450l. to 600l. by 25l.

Chief Clerk and Accountant, L. E. Ambler, 450l.

to 600l. by 25l.

Third Class Clerk, A. H. S. Barrack.
Clerks and Typists, Miss D. Hill, Miss E. L.
Hopewell, 1501. to 2701. by 151.

Auditor, R. F. Pinder, 1201. (in addition to 7001.-800l. as Auditor, Fiji).

THE GILBERT AND ELLICE ISLANDS COLONY.

The Colony, which includes Ocean, Christmas, Fanning, and Washington Islands, besides the Gilbert and Ellice groups, is under the charge of a Resident Commissioner, who is responsible to the High Commissioner for the Western l'acific who resides in Fiji.

THE GILBERT AND ELLICE GROUPS. — The Gilbert Group is comprised of the following sixteen islands :- Makin, Butaritari, Marakei and Abaiang (Northern Gilberts); Tarawa, Maiana Abemama Kuria, Aranuka and Nonouti (Centra! Gilberts); Tabiteuea, Beru, Nikunau, Onotoa. Tamana and Aroræ (Southern Gilberts).

The Ellice Islands are the following nine:— Nanumea, Nanumaga, Nuitao, Nui, Vaitupu, Nukufetau, Funafuti, Nukulaelae and Nurakita. The two groups consist of a series of coral atolls lying between 4° N. latitude and 10° S. and 170° to 180° E. longitude with an area of 180 square

miles. The principal export is copra.

The population of the Colony on the 31st December, 1933, was approximately as follows:—Ocean Island, 2,074; Northern Gilberts District, 6,902; Central Gilberts District, 8,348; Southern Gilberts District, 12,063; Ellice Islands District, 4,162; Fanning Island District, 536; Total 34,085. These figures may be divided into three broad groups: Europeans 244, Asiatics 396, and Natives 33,445. Total 34,085.

With few exceptions the hereditary chieftain-

ships have ceased to exist, but each island has its own native government, presided over by a native

magistrate.

A revised code of native laws is validated by an Ordinance of the Colony, and law and order is well maintained under the general supervision of European officials.

The natives are of Malayo-Polynesian race. The majority are adherents either of the London Missionary Society or the Roman Catholic Mission of the Sacred Heart. There is no similarity between the languages of the Gilbert and Ellice Groups.

OCEAN ISLAND (or Banaba), in lat. 0° 52′ S., long. 169° 35′ E., about 1,500 acres in extent, is the Headquarters of the Government and the site of operations of the British Phosphate Commission. Reaching a height of 28 of and covered with vegetation, it is the only island of the Colony not of stell formation. The popthe Colony not of atoll formation. The population of Ocean Island on the 31st December, 1933, was 2,074. Of these 112 were Europeans. The natives numbered 1,590. Indentured labourers with their wives and families numbered 705. There were also 372 Chinese, all employees of the British Phosphate Commissioners with the exception of the Government Interpreter, his wife and amah.

FANNING AND WASHINGTON ISLANDS lie about 3° 51' N. latitude, and 159° 21' W. longstude. There is no indigenous population but labour is recruited from the Gilbert Islands for the copra industry. An Administrative Officer is in charge of these islands under the Resident Commissioner. On Fanning Island is the mid-ocean Station of the Pacific Cable Board, whose employees and their wives comprise practically the entire European population of 30. There is no regular communication between these islands and the rest of the Colony; periodical visits are made for engaging and repatriating labour by a small auxiliary vessel of the Fanning Island Company. The total population on the 31st December, 1933, was 536, Fanning Island 342, and Washington Island, 194.

CHRISTMAS ISLAND (about 1° 59' N. latitude. 157° 30′ W. longitude) lies 164 miles South East by East of Fanning Island. The area is about 60,000 acres, of which 1,200 are under coconuts. Under the terms of a License dated the 27th

October, 1914, the Central Pacific Coconut Plantations Limited of London were granted the exclusive right to occupy the island fortheir own use for the planting of coconuts, the manufacture of copra, the export of coconut oil, pearl shell, and guano during the term of 87 years from the 1st January, 1914. All vessels employed or chartered by the Company trading between the Society Islands and Christmas Island have been exempted from the Quarantine Ordinance, and may visit Christmas Island without a preliminary call at a prescribed port of entry in the Colony. Periodical visits are made by H. M.'s ships.

The climate of all the groups is fairly healthy for Europeans, but the natives suffer from lung diseases, especially pulmonary tuberculosis. considerable amount of medical work has been undertaken of late years and a large central hospital is maintained at Tarawa in the Gilbert Group. Every Island has a native hospital under the charge of a native student trained at the

Tarawa Hospital.

Communication between the various islands was formerly infrequent, depending on the irregular movements of vessels belonging to or chartered by Messrs. Burns, Philp and Company, Limited, On Chong and Company, and the British Phosphate Commissioners, but the acquisition by the Admini-stration of the auxiliary sailing vessel "Nimanoa" has considerably increased the facilities for

regular communication.

The principal sources of revenue are import duties (general ad valorem rate 25 %, British preferential ad valorem rate 121%); export duty on copra; land tax (paid in copra) on native communities; capitation tax 101. a head p.a.) on non-natives; ship, trading and other licences; royalty on phosphate shipped from Ocean Island;

and interest on invested funds.

The Revenue and Expenditure of the Colony have been as follows :-Year ended 30th June. Revenue. Expenditure.

		£	£

Customs revenue during 1932-33 was 22,985l. from import and export duties. Legislation has now been enacted whereby a British Preferential Tariff has been introduced. Preferences range

from 50% to 100%.

Resident Commissioners, 1892.—Swayne, Esq., 1901, W. Telfer Campbell, Esq.; 1910, Captain J. Quayle Dickson; 1913, E. C. Eliot, Esq., C.B.E. (1931); 1921, H. R. McClure, Esq.; 1926, A. F. Grimble, Esq., C.M.G., (1930), M.A.; 1933, J. C. Barley, Esq., B.A.

Civil Establishment.

Resident Commissioner, J. C. Barley, B.A., 8001. to 1,0001. by 501.; 1001. duty allowance and quarters.

Secretariat.

Secretary to Government, E. L. Leembruggen. 4001. to 5001. by 251. and quarters.

Native Clerk and Ellice Interpreter, Ocean Island, S. Pine, 100l. to 150l. by 10l., with quarters and rations.

District Administration.

Senior Administrative Officer, C. A. Swinbourne,

O.B.E., 600l. to 700l. by 25l. and quarters.

Administrative Officers, W. C. B. Baverstock,
A. C. F. Armstrong, B.A., and H. E. Maude,
B.A. (one post vacant), 500l. to 600l. by 25l. and quarters.

Passed Cadet, P. D. Macdonald, 4001.-4501. by 201., and 201. and 101., or quarters. Cadet Officer, C. G. F. Cartwright, 3751., and quarters.

Native Assistant to Administrative Officers, W. McG. Bose, 100l. to 150l. by 10l., with quarters and ration allowance.

Clerk and Storekeeper and Postal Assistant, Tarawa, F. Highland, 75l. to 100l. by 5l. and ration allowance.

Four Clerks and Interpreters, Tiriata, Iaokiri, Bauro Ratieta and Penitala, 401. to 601. and ration allowances.

Two Clerks in Training, Kaburara and Pasifica. 24l. to 36l. by 6l., and ration allowances.

Treasury, Customs and Postal Departments.

reasurer, Collector of Customs, and Chief Post-master, S. G. Clarke, 550l. to 650l. by 25l. and quarters.

A. B. Bentley, 4001. to Accountant, н. 500l. and quarters; receives also an allowance of 481. as Customs and Boarding Officer. Clerk and Customs Officer, P. T. English, 3001. to 400l. by 25l. and quarters.

Postmaster, Ocean Island, Morning Star, 1001. to

150l., with rations and quarters. Clerk in Training, Tekaiwa, 24l. to 36l. by 6l., and ration allowance.

Police and Prisons Department.

Officer in Charge of Constabulary and Superintendent of the Gaol, Ocean Island, S. C. Methven, 500t. to 600t. by 25t. and quarters. Receives also 181. as boot and uniform allowance.

Chinese Interpreter, Yam Sik Cheong, 2001. and quarters.

Medical Department.

Senior Medical Officer (post vacant).

Medical Officers, D. C. M. Macpherson, M.B., Ch.B., 600l. to 650l. by 25l., and quarters and allowance of 100l., K. R. Steenson, M.B., Ch.B., 7001. to 8001. by 251. and quarters. vacancies.)

First Native Medical Practitioner, P. Sowani, 150l. to 200l. by 10l., and personal allowance of 50l., with quarters and ration allowance.

Second Class Native Medical Practitioner, Tutu Tekanene, 651. to 851. and ration allowance. Third Class Native Medical Practitioners, Bakoa

Tewei, Arekibo Tekai, Tatoa Naou, and Teavoki Bukitava, 60l. and ration allowance.

Education Department.

Superintendent of Education, F. G. L. Holland, M.B.E., 500l. to 600l. by 25l. and quarters. Headmaster, Ellice School, D. G. Kennedy, 4501. to 550l. by 25l. and quarters.

Headmaster, King George V School, Bairiki, Tarawa, J. I. Blaikie, 400l. to 500l. by 25l. and quarters. Digitized by GOOS

Head Master, Ocean Island, G. E. Hard 4001. and quarters.

Public Works Department.

Superintendent of Works, A. St. C. Compton, 500l. and quarters.

Transport.

Master, H.M.C.S. "Nimanoa," M. L. Singleton, 420l. and uniform allowance of 20l.

Engineer, H.M.C.S. "Nimanoa," C.W. Blakelock,

360l. and a uniform allowance of 20l. Chief Officer, H.M.C.S. "Nimanoa," Lieutenant Commander F. C. Ree, 3001. and a uniform allowance of 201.

Wireless Department.

Engineer Operator in Charge, Wireless Station, Ocean Island, T. Moore, 400l. to 450l. by 25l. and quarters.

Operator, Wireless Station, Ocean Island, A. Cookson, 300l. to 400l. by 20l. and quarters.

THE BRITISH SOLOMON ISLANDS PROTECTORATE.

British Solomon Islands Protectorate is situated between the parallels of 5° South and 12° 30° South, and the meridians of 155° and 170° of East

longitude. The Protectorate consists of a double row of mountainous islands, extending at its extremities from Bougainville Straits to Mitre Island, in the Santa Cruz Group, for a distance of 900 miles, and north and south from the Ontong Java Group to Rennell Island for a distance of 430 miles, in an area approximately 249,000 square nautical miles, of which about 11,000 square miles are land.

The native population (mainly Melanesian) is

93,415.

The Solomon Islands were first discovered in the year 1568 by Alvaro de Mendana, while on a voyage of discovery from Peru. The island first sighted they named Ysabel because it was on that Saint's day that they left Callao. In the year 1595 a second expedition under Mendana sailed from Peru, but failed to locate the island of Guadalcanal, whereon it was intended he should form a settlement, and he arrived in the Santa Cruz Group, and landed at Graciosa Bay. The new colony proved a failure, the death of Mendana put an end to any prospect of success, and the remnants of the original party returned to Peru.

In 1767 Captain Carteret re-discovered the Santa Cruz Group and the north-west coast line of the island

of Malaita.

In the same year de Bougainville in the frigate La Boudeuse, sailed from Monte Video on a deliberate quest of the Terra Australia which he missed, and arrived at New Guinea; in sailing back he passed through the Straits which are the present northeastern boundary of the Protectorate, the island on the right being named Bougainville after him, and the one on the left named after Choiseul, who was at the time Minister of France.

Twenty years later, and 700 miles to the southeast, la Perouse, in command of the French frigates L'Astrolabe and La Boussole, on a voyage of discovery, was wrecked at P'iou on the island of Vanikoro.

His fate was unknown for 40 years.

From this time, many Europeans visited the Group, and British ships-of-war paid periodical visits. In 1860 natives were recruited to work on planta-tions in Queensland and Fiji. The recruiting for

Queensland ceased in 1903 and most of the natives were repatriated.

Recruiting for Fiji continued until 1910.

Between the years 1860 and 1893 the number (resident white traders gradually increased, until a the time of the Proclamation in 1893 of the Britis Protectorate over the Southern Solomon Island (Guadalcanal, Savo, Malaita, San Cristoval, the Net Georgia Group and its Dependencies) the number of white residents approached 50.

In 1898 and 1899 the islands of the Santa Cru, nme Group, including Utupua, Tucopia, Vanikoro, the remote islands of Cherry and Mitre, Sikaiana, and the islands of Rennell and Bellona, were added to the Protectorate, and in 1900 the Northern Islands, namely, Ysabel, Choiseul, the islands of the Bougainville Straits, south and south-east of the main island of Bougainville, and the atoll group of Ontong Java, were transferred under convention from Germany to Great Britain.

The population of the Protectorate in April, 1934,

The climate of the Solomon Islands, owing to the prevalence of malaria, is not healthy, but the conditions of living have been greatly improved during recent years and the possibilities of good health during temporary residence have been enormously increased.

Generally speaking, the seasons are well defined by the trade winds. The south-east season lasts from April until November when the lowest minimum temperature is recorded, and the highest mean and maximum temperatures are, as a rule, recorded in the months from November to April which is commonly known as the north-west season.

The rainfall varies considerably from month to month and year to year, though the average ramfall, recorded at Tulagi, is approximately 120 inches

The British Solomon Islands Protectorate is administered by a Resident Commissioner (stationed in Tulagi) acting under the authority and control of the High Commissioner for the Western Pacific (who resides in Suva, Fiji).

There is no Legislative Council. Laws are made by the High Commissioner—in the form of King's Regulations—under powers conferred by the Parise Order in Council, 1893.

There is an Advisory Council, consisting of the Resident Commissioner and not more than seven members, three of whom may be officials.

The Protectorate is divided up into eight administrative areas, each under a District Officer. There regular steam communication with Sydney, New South Wales.

The Customs Tariff consists of duties at specific or ad valorem rates on certain imports and experts and includes provisions for Empire preferences. 1933 34

Advisory Council.

The Resident Commissioner is assisted by an Advisory Council, inaugurated in 1921, by virtue of King's Regulation No. 12 of 1921, as amended by King's Regulation No. 5 of 1927.

The Council consists of the following Mem-

bers:-

Official Members.

The Resident Commissioner.

Chief Magistrate and Legal Adviser (vacant).

Secretary to the Government, N. S. B. Kidson. Treasurer and Collector of Customs, F. E. Johnson, I.S.O.

Nominated Members.

D. Mackinnon. G. E. Clift.

Major F. R. Hewitt, M.C. Bishop of Melanesia.

Civil Establishment.

Resident Commissioner, F. N. Ashley, 1,2001. to 1,400l. and duty allowance, 100l.

Secretariat.

Secretary to the Government, N. S. B. Kidson, 500l. to 600l.

Clerk, Resident Commissioner's office, P. Colley, 340%. to 400%. Central Typist, M. J. Bernhardt, 2701. to 3401.

District Administration.

Chief Magistrate and Legal Adviser, P. C. Hubbard, 600l. to 750l.

First District Officer (vacant), 600l. to 700l. District Officers, C. E. J. Wilson, W. H. Miller, L. W. S. Wright, B. E. Crawfurd, W. Fowler, 500l. to 600l.

Assistant District Officer (vacant).
Cadets, F. McL. Bartlett, C. N. F. Bengough,
J. K. Brownlees, 375l.

Treasury, Customs and Postal Department.

Treasurer and Collector of Customs, F. E. Johnson, I.S.O., 550l. to 650l., receives also a

personal allowance of 100l.

Accountant, W. V. J. Blake, 400l. to 500l.

First Clerk and Boarding Officer, A. W. Dickes, 400l. to 450l.

Second Clerk and Boarding Officer, J. B. Hicks, 340l. to 400l.

Third Clerk and Boarding Officer, G. H. C. Train. 270l. to 340l

Storekeeper, V. J. Shearwin, 340l. to 400l. Postmaster, F. Stock, 340l. to 400l.

Medical Department.

Senior Medical Officer, H. B. Hetherington, M.D., Toronto, C.P. & S., Ontario, 7001. to 9001. and fees

Travelling Medical Officer, N. Crichlow, M.B., Ch.B. (Glasgow), 550l. to 650l.; (200l. consolidated travelling and subsistence allowance).

Sister-in-Charge Government Hospital, Tulagi, Miss M. Cleaver, 2001. and victualling allowance, and 121. uniform allowance.

Nurse, Tulagi Hospital, Miss G. R. Roberts, 160l. and victualling allowance and 12l. uniform allowance.

Yaws and Hookworm Officer (temporary appointment), C. H. G. White, 450l. Dispenser and Clerk, C. H. G. White, 300l. to 350l.,

F. T. Stackpool (temporary), 300l. to 350l.

Engineer-Navigator Medical Department Vessel, J. S. Elder, 240l. to 300l. Receives also a messing allowance of 6s. per diem.

Native Medical Practitioners, G. Bogese, 75l. to 100l. and ration allowance 24l., M. Ravai, 100% to 120%, and 24%, servant allowance, and 241. ration allowance.

Police and Prisons Department.

Officer Commanding Armed Constabulary and Superintendent of Prisons, E. N. Turner, 450l.

Sub-Inspector of Constabulary, G. E. D. Sandars, 340l. to 400l.

Gaoler (vacant).

Lands Department.

Commissioner of Lands and Crown Surveyor, S. G. C. Knibbs, 600l. to 700l. and 25l. personal allowance.

Surveyor, A. H. Wilson, 500l. to 550l.

Public Works Department.

Superintendent of Works (vacant), S. G. C. Knibbs, acting, allowance 601. Foreman of Works, J. S. Mutch, 300l. to 375l.

Native Labour Department.

Inspector of Labour, S. G. Masterman, 340l. to 400l.

Agricultural Committee.

Senior Entomologist, H. T. Pagden, 700l. p.a. Entomologist, R. J. A. W. Lever, 500l. to 600l.

Digitized by GOOGIC

Wireless Department.

Engineer Operator in Charge, Wireless Station, Tutagi, A. E. Osborne, 350l. to 450l., and personal allowance 40l.

Wireless Operator, R. S. Taylor, 300l. to 400l.

The above all receive free quarters and 501. local allowance. Local Allowance, however, is not payable to the Engineer-Navigator, Medical Department Vessel, and Native Medical Practitioners.

TONGA.

THE TONGAN, or FRIENDLY ISLANDS, with an area of about 250 square miles, are situated between the 18th and 22nd degrees of south They were discovered by Tasman Most of the islands are of coral latitude. in 1643. formation, but some are volcanic, notably Tofus, Kao, and Niusfoou (Good Hope Island). The natives belong to the Polynesian race, and are closely allied to the natives of New Zealand and Samoa. The islands are very rich in coconuts; and copra forms the principal export. There is monthly communication by steamer with Auckland. Passengers, goods, and mails from other countries tranship, as a rule, at Suva. During the dry season, i.e., from April to December, steamers call at regular intervals for copra freights. Census of Population, April, 1933:-

In 1845 George Tubou I, who was the first to establish an effective government over the whole of Tonga, was proclaimed King. The present Ruler is assisted by a Parliament and a Privy Council. The Privy Council is composed of two European and six Native Ministers of the Crown who are also heads of the various government departments. The civil service is composed mostly of Tongans, the European officials numbering about 43. The general tariff is 20 % ad valorem and British preferential 121% ad valorem.

Year.			Imports.	Exports.

The imports, apart from oils, timber and drapery are of Empire origin. The following figures show the percentage of imports from foreign countries:—

.60 00 00			_	~ .
Year.			P	er Cent.
1929		 		14
1930		 		12
1931		 		12
1932		 		14
1933	• •	 		23.37

Of the rest of the imports during 1933 the United Kingdom supplied 12:96 per cent, New Zealand 25:97 per cent, Australia 28:38 per cent and other British possessions 9:29 per cent.

The climate may be considered a healthy one. The thermometer ranges between 53 and 93

degrees Fahrenheit.

There are seven churches in Tonga, viz., the Wesleyan Free Church of Tonga, with about 16,560 adherents: the Free Church of Tonga, and the Church of Tonga, with about 1,500; the Roman

Catholic Mission, with about 3,000; the Church of England, 180; the Church of Latter Day Saints, 630; and the Seventh Day Adventist Mission, with about 190 adherents.

The Wesleyan Mission was first founded in Tonga in the year 1826, and a few years later the chiefs and people embraced Christianity and became members of the Church. The control and management of the Mission in Tonga were eutrusted about the year 1857 to the Australasian Conference and continued until the year 1885. when King George Tubou I, after trying unsuccess fully to obtain local autonomy for the Church in Tonga, seceded, with a large majority of his chiefs and people and, with the assistance of the Rev. Shirley Baker, established the Weslevan Free Church of Tonga as a separate and independent body though retaining the same doctrines, discipline, and form of worship as the Weslevan Church. In January, 1887, an attempt was made by some escaped native convicts on the life of Mr. Shirley Baker, the Premier. The attempt was made the pretext for increased persecution of the "Fakaogos," or members of the Weslevan Mission Church. About 100, whom no ill-usage could induce to abandon the Mission Church, were ordered to be deported to Pylstart Island. a barren islet south of Tonga, but they were finally allowed to go to Fiji. Shortly after an inquiry was made into the causes of the dis-turbances by Sir Charles Mitchell. At this inquiry the allegation that the attempt on Mr. Baker's life was due to a "Fakaogo" conspirace was abandoned, and a letter written by Mr. Baker, purporting to be signed by the king, was addressed to Sir Charles Mitchell, promising an amnesty to political prisoners and freedom of worship. The services in the Mission Church at once recommenced.

In 1890 complaints were made that freedom of worship was still being interfered with; that persons were deprived of their lands and unjustiv imprisoned on account of their adherence to the Wesleyan Church; and Tongan officials denied that the king had written to Sir Charles Mitchell promising to accord freedom of worship. Sir John Thurston therefore made a further inquiry, and finding that Mr. Baker was the principal cause of the wrongs endured by the Wesleyans, he issued an Order prohibiting Mr. Baker from being within the group for a term of two years from the 17th July, 1890. A few days before the issue of the Order, the king, on the request of the leading chiefs, had dismissed the Premier from office, and a fresh Government was formed with a native Premier (Tukuaho). Under the new Government the fullest freedom of worship was allowed, and the exiles were recalled from Fiji, the king having requested Sir John Thurston to make arrangements for their return.

In the year 1923 much dissatisfaction existed in the Wesleyan Free Church, and an enquiry that was held into the state of the finances disclosed a very lax state of affairs. As a result of this enquiry it was decided to approach the Weslevan Church with a view to the union of the two bodies as a separate and independent Conference of the Weslevan Methodist Church. At a joint conference of the two churches held in April, 1924. union was decided upon. A minority, under to leadership of the late Rev. J. A. Watkin, declined to join the united body and carried on under the title of the Free Church of Tonga. Protracted litigation ensued as a result of this division in respect of the ownership of the churches and

property of the Wesleyan Free Church of Tonga | established by King George I in 1885. It was finally decided on appeal in favour of the united Church, of which the present Queen is the head.

King George Tubou died on 18th February, 1893, and was succeeded by his great grandson, George Taufaahau, under the title of George Tubou II. On the death of the latter on the 5th April, 1918, Princess Salote, his daughter by his first wife the late Queen Lavinia, succeeded to the throne. The young Queen, who was born on the 13th March, 1900, was married in 1917 to Prince Uiliami Tugi, the present Premier, and chief of highest rank in Tonga.

Early in 1900 Mr. Basil Thomson was sent out to Tonga by Her Majesty's Government, and concluded a Treaty with the king by which the latter placed himself and his territory under Her Majesty's protection. A protectorate was pro-

claimed on 18th May, 1900.

The present premier, Uiliame Tugi, is the Prince Consort, and was formerly Minister for Lands. The progress of Tonga since 1905 has been satisfactory.

Every Tongan is entitled to an allotment of land for cultivation, so that no unemployment exists. Primary education for Tongans between the ages of 6 and 14 is compulsory. There are two boys' colleges at which provision is made for secondary education. Secondary education of girls is entirely in the hands of the Christian missions. Medical work is well organised; and, unlike most native communities in the Pacific. the native population steadily increases in number.

British and foreign nationals charged with any offence against the laws of Tonga, not including crimes punishable by death or by imprisonment exceeding two years, are subject to the jurisdiction of the Tonga Courts. In other respects they are subject to the jurisdiction of the Court of the High Commissioner. Licences are charged for carrying on stores and trades.

Currency and Banking.
The legal tender currency is British and Australian sterling.

Arrangements were made in 1919 for the issue of Tongan Government Treasury notes. At the end of 1933, 4s., 10s., 1l., and 5l. notes were in circulation to the value of 21,000l. The issue is secured by a coin and investment reserve

There are no private banks in the Kingdom. A Government Savings Bank was established in At the end of 1933 there were 961 depositors and 25,951l. in deposits.

Statistics. Year. Revenue. Expenditure. 96,887 1928-29 ... 76,709 ... 1929-30 ... 89,505 85,442 ... 70,66378,506 1930-31 ••• ... 1931-32 57.224 63,986 •• 64,072 60,347 1932-33

There is no debt and the amount of accumulated balances or surplus amounted on 30th June, 1933,

to 137,457l. 18s.

Chief Justice (vacant).

The shipping entered and cleared during the rear 1933 amounted to 54,865 tons of which 32.825 tons was British.

Agent and Consul, Tonga, J. S. Neill, 800l. to 1,000l. and quarters; duty allowance 200l., and office allowance of 50l. as Consul.

Tonuan Ministers. Premier, Uiliame Tugi.

Speaker of the Legislative Assembly and Minister of the Crown, J. Finau Ulakalala.

Minister of Police, Jiobe Kaho.
Minister for Finance, W. G. Bagnall.
Minister for Lands, Solomone Ata.

Governor of Vavau, Satcki Faletau. Governor of Haapai, J. Tuihaateiho.

The foregoing Ministers constitute the Privy Council, meetings of which are presided over by the Queen.

The Cabinet Council is composed of the same Ministers, with the exception of the Minister of

the Crown.

THE NEW HEBRIDES.

THE NEW HEBRIDES, to which are attached the Banks and Torres Islands, lie between the 12th and 20th degrees of south latitude, and the 165th and 170th degrees of east longitude. The area is about 5,700 sq. miles, and the population under 3.000.

The natives are Melanesians, but in many places there is an admixture of Polynesian The Europeans are mostly British or blood

French.

Missions have been established by the Melanesian Missionary Society, Seventh Day Adventists and Church of Christ, by the Presbyterian churches of Canada and Australia, and by the Roman Catholic Church.

The principal exports are copra, cocoa, cotton, coffee, trocas; maize, hides and various miscellaneous products are also exported. The climate of most of the islands is rather unhealthy and malarial fever is prevalent. At first, a joint commission, of British and French naval officers, was appointed to protect the lives and property of British and French subjects, and to maintain order. British and French Residents were appointed in 1902. In February, 1906, a conference of British and French officials took place in London, and a draft convention was prepared to provide for the settlement of land claims, and for an arrangement which would put an end to the difficulties arising from the absence of jurisdiction over the natives. A convention confirming the above-mentioned draft was signed in London on October 20th, 1906, and was provisionally proclaimed at Vila, the chief town of the New Hebrides, on December 2nd, 1907. Its provisions include the establishment of a joint court, and of an executive government consisting, for some purposes, of the British and French representatives in the group acting in concert. For other purposes British and French nationals remain subject to the control only of their own authorities.

A Protocol drawn up in London in 1914 to replace the Convention of 1906, was ratified on March 18th, 1922. It was proclaimed in the New Hebrides in August, 1923.

British and French Resident Commissioners, subordinate to their respective High Commissioners, each with a staff of officers have been appointed. In addition there is a Condominium Staff working in Departments under the joint control of the two Resident Commissioners.

The Customs Tariff in force in the New Hebrides is mainly on an ad valorem basis at varying rates

with specific duties in a few cases.

The import trade of the Group is mainly confined to Australia and France in roughly equal proportions while the bulk of the exports are shipped to the latter country. No statistics are available of imports from and exports to the United Kingdom.

British Staff.

Resident Commissioner, G. A. Joy, 800l. to 1,000l.

quarters and duty allowance 100l.

Judicial Commissioner, A. de J. Carey, receives 800% as British Judge of the Joint Court and quarters, and an allowance of 501. as Legal Adviser to the Resident Commissioner.

Assistant to the Resident Commissioner, R. D.

Blandy, 650l. to 750l. and quarters.

District Agent Efate and Commandant of Police, E. A. G. Seagoe, M.B.E., 650l. to 750l. (7501. personal to present occupant) and quarters.

District Agents, T. R. Salisbury, J. M. Nicol, 500l. to 600l. with 30l. personal allowance; C. G. Adam, 500l. to 600l. and quarters.

Clerk and Accountant, H. Forbes, 400l. to 500l. and 10l. personal allowance and quarters.

Assistant to Commandant of Police, R. J. Keegan, 3401. to 4001. and quarters.

Correspondence Clerk, Bernard Blackwell, 2301. and quarters.

PHŒNIX GROUP.

The Phoenix group comprises Phoenix, Birnie, Hull, Canton, Gardner, McKean, Enderbury, Sydney, Baker and Howland Islands, and is situated to the east of the Gilbert and Ellice groups. The Islands are of coral formation, and several of them are planted with coconuts. All except McKean and Enderbury Islands are leased to Messrs. Burns, Philp (South Sea) Company, Limited, for 87 years, from 1st January, 1914.

PITCAIRN ISLAND.

Pitcairn Island (two square miles) is situated in the Pacific Ocean, nearly equidistant from Australia and America (25° 3' S. lat., 130° 8' E. long). It was discovered by Carteret in 1767, but remained uninhabited until 1790, when it was occupied by the mutineers of H.M.S. "Bounty," with some women from Otaheite. Nothing was known of their existence until the island was visited in 1808. No regular government was established, but assistance of various kinds was given on the subsequent visits of English vessels. In 1856, the population having become too large for the island's resources, the inhabitants (192 in number) were, at their own request, removed, with all their possessions, to Norfolk Island: but 40 of them soon returned. In 1879 these had increased to 90. The population numbers 200 persons.

It is a British Colony by settlement, and was brought within the jurisdiction of the High Commissioner for the W. Pacific in 1898 under s. 6 of the Pacific Order in Council, 1893. Chief Magistrate, P. R. Christian.

The islands of Henderson, Ducie, and Oeno were annexed in 1902, and are included in the district of Pitcairn.

THE WINDWARD ISLANDS.

Situation, Area, and Trade.

The Windward Islands consist of the three islands of St. Lucia, St. Vincent and Grenada, lying in the order named from north to south, together with the smaller islands known as the Grenadines, which lie between St. Vincent and Grenada, and are attached partly to the one island and partly to the other. Geographically, Barbados,

Trinidad and Tobago belong to the group, and were formerly associated with it politically, Tobago from 1764 to 1783, and all three in 1838. The three first-named islands are grouped for administrative purposes under one Governor, who usually resides at St. George's, Grenada. The total area of the three Colonies is 524 square miles (about twice the size of Middlesex), and their estimated population at the census of 24th April, 1921, 162,254.

	 (Gret 	 (Grenada) 	

History.

Some account is given of the history of each island in its proper place, but particulars of their several federal unions may be conveniently inserted here. As early as 1764 there was one Governor for the "Southern Caribbee Islands" of Grenada. Dominica, St. Vincent, and Tobago. Dominica was separated in 1771, St. Vincent in 1776, and in 1783 Tobago was ceded to the French. In 1833 St. Vincent was included with Barbados, Grenada, and Tobago in one general government, the Governor-in-Chief being resident at Barbados, with Lieutenant-Governors in each of the other islands. In 1838 St. Lucia was included in this general government

On the 17th March, 1885, Letters Patent were passed constituting the Government of the Windward Islands, Barbados being omitted. was subsequently united with Trinidad.

The majority of the inhabitants are of the negro race, less than 5 per cent. being white and there are some Indian Coolies. A few Caribs still remain in St. Vincent. English is spoken throughout, but in St. Lucia, the prevailing language with the peasantry is a French patois. In Grenada the same condition obtains, but to a less extent.

Constitution.

Each island retains its own institutions, and, when the Governor is absent, is presided over by a resident Administrator, who is also Colonial Secretary. There is no common legislature, nor common laws, revenue, or tariff. A Windward Islands Court of Appeal was set up in 1850 (13 & 14 Vict. c. 15), and abolished in 1920 by an Act (9 & 10 Geo. V. c. 47), which set up a Court of Appeal for the West Indies, consisting of the chief justices of the several West India Islands except Jamaica. There is also a common audit system instituted in 1889

Currency and Banking.

The legal tender currency is British sterling and the gold coins of the United States. Barclays Bank (Dominion, Colonial and Overseas) Ltd. and the Royal Bank of Canada, which have branches in the larger islands, issue fivedollar notes. Public accounts are kept in sterling, but banking and private accounts generally in dollars. There is no limit to the legal tender of silver.

Communications.

The usual length of the voyage from England to Grenada is about 14 days.

The steamers of Harrison Direct Line call at Grenada on the outward voyage, and on the homeward voyage they call at the three islands as cargo offers. There is also direct communication between Grenada and New York by the steamers of the Furness, Withy Line. The passenger and cargo steamers of the Canadian National Line call regularly at Grenada, St. Lucia and St. Vincent, and connect these islands with Canada, St. John and Halifax being the ports of arrival and departure there.

There are no railways in any of the islands. Government-owned telephone systems exist throughout the islands. All three islands of the group are in communication with Europe, the United States, Canada, and the other West Indian islands by wireless, operated by the Pacific Cable Board, and by the Cables of the West India and Panama Telegraph Company Ltd. The rate per word for

telegrams to the United Kingdom from Grenada, st. Lucia and St. Vincent is 2s. 4d. The rate to Europe varies from 3s. $2\frac{1}{2}d$. to 3s. $7\frac{1}{2}d$. per word. (Government messages pay half rates.) There are also cheap rates at half and quarter of the ordinary tariff, the latter being subject to a minimum charge.

A wireless installation has been erected at Carricou by the local Government. It communicates with Grenada and through that island to the United Kingdom, Canada, North America, &c., the ordinary tariff being 2d. per word more than from Grenada.

GRENADA.

Situation, Area, &c.

Grenada, the most southerly of the Windward group, is situated between the parallels of 12° 30' and 11° 58' N. lat., and 61° 20' and 61° 35' W. long.; is about 21 miles in length, 12 miles in its greatest breadth, and contains about 133 square miles (about half the size of Middlesex). It lies 68 miles S.S.W. of St. Vincent, and about 90 miles north of Trinidad, and between it and the former island are certain small islands called the Grenadines, attached partly to the government of St. Vincent, and partly to that of Grenada; the largest of the latter is Carriacou, which has an area of 8,467 acres, and a population (at 24th April, 1921) of 7,104.

General Description.

Grenada is mountainous and very picturesque, its ridges of hills being covered with trees and

brushwood. The mountains are chiefly volcanic, and have several lofty peaks, the highest of which is Mount St. Catherine, 2,749 feet, running off in spurs from the centre of the island, giving it an appearance of romantic beauty when viewed from the sea.

The island abounds in streams, and in mineral and other springs. The Grand Etang, a lake on the summit of a mountain ridge 1,749 feet above the level of the sea, and 7 miles from the town of St. George, and Lake Antoine, both old craters, are among the most remarkable natural curiosities; near the former a sanitorium is established. The roads of the colony are in excellent condition. and are kept in a state of thorough repair. About 146 miles of main roads, and a network of byeways (275 miles), provide good inland communication. The island is divided into six districts or parishes-St. George, St. David, St. Andrew, St. Patrick, St. Mark, and St. John-while the dependencies of Carriacou, Petit Martinique and other adjacent islets form a separate district, administered by a Commissioner. St. George's, the principal town, is a port of registry for shipping and had on 31st December, 1932, 143 vessels registered, of a total tonnage of 2,644 tons; its fine harbour, owing to its situation, healthiness. and great natural advantages, including a plentiful supply of water of the purest quality, offers exceptional inducements as a port of call for steamers. The town had a population of 4,629 by census of 24th April, 1921.

The other towns in the colony are Gouyave (or Charlotte Town), Victoria (or Grand Pauvre), Sauteurs; Grenville (or La Baye); and Hillsborough, in Carriacou. English is universally spoken, but the peasantry speak among themselves a French patois. About two per cent. are of European blood, the remainder being of the Negrorace, except the East Indian population, which was 181 in number according to the census of 1921.

Climate.

The climate in the dry season is delightful. In the wet season, as in all other tropical islands, it is damp and hot. But for six winter months, say from December to May, it is excellent, and is healthy at all times. The average annual rainfall at St. George's for the last 30 years is 7456 inches and the highest and lowest readings of the thermometer for the last five years are 90.0° and 60.0° respectively, 60.0° 8th August, 1928, the average mean temperature being 80.0° in the shade. The rainfall in other parts of the island is much greater; at the Grand Etang, in 1933, it was 256.44 inches.

Industry, Trade and Customs.

The prosperity of the island, like that of its neighbours, depends almost entirely upon the planting industry. It has long ceased to be a sugar-producing colony, The chief produce of Grenada is cocoa, of which a total value of 106,5351. was shipped in 1933. Attention has been turned with some success to the cultivation of other economic plants, such, for instance, as rubber, limes, coffee, kola nut, cloves, vanilla, pepper, cardamoms, coconuts, etc. Nutmeg cultivation occupies a prominent position. The value of spices exported in 1933 was 59,5011. In Carriacou cotton is the staple product, its cultivation having never been wholly abandoned there; the value exported in 1933 was with cotton seed, 5,9641. The cultivation of limes has now

been successfully established in Carriacou, the exports of lime products in 1933 amounting to 6,612. Tropical fruits of almost every description and of the finest quality are fairly plentiful, and are shipped to the Barbados and Trinidad markets. The principal food resources are yams, sweet potatoes, tanias, kush-kush, pigeon-peas, plantaina, bananas, Indian corn, cassava, bread fruit, etc. Fresh meat is always obtainable, and the animals slaughtered for the purpose are reared in the island. An excellent oyster is obtained in Carriacou, and turtles and fresh fish are plentiful. The forests produce valuable timber, such as bullet wood, locust, mahogany, red and white cedar galba, etc. Rum is manufactured for local consumption. the total number of proof gallons in 1933 being 36,679.

The main imports are food-stuffs, textiles, timber for building purposes, and hardware.

The principal exports, besides those products already mentioned, are turtles and turtle-shell,

hides and skins, fruit and poultry.

The tariff of Import duties is partly on an ad valorem and partly on a specific basis. The rates in the case of the former are mainly 15% on Empire goods and 22½% on foreign goods. The preference on Empire goods is generally 33½°.

The percentages of Trade in 1933 were as follows:—

	Imports.	Exports.
United Kingdom	45%	439
United States of America	9	18
Canada	18	28
Other British Possessions	20	10
Other Foreign Countries	8	1
	100%	100%

The total acreage of land, exclusive of Carriacou is 76,548; acreage of Carriacou, 8,467.

There is a Government savings bank in St. George's, established in 1881, and extended to the out districts in 1889, and on 31st December, 1933, the amount at credit of depositors was 51,6224.

History.

Grenada was discovered by Columbus on 15th August, 1498, and was named by him Conception. It was at that time inhabited by Cariba. settlement was attempted in 1609 by a company of London merchants, but the colonists were so harassed by the Caribs that the attempt was abandoned. In 1650 Du Parquet, Governor of Martinique, purchased Grenada from a French Company, and established a settlement at St. George's. Finding the expense of maintaining an armed force to support his authority not compen. sated by the expectation of future profits. Du Parquet sold the island in 1657 to the Comte de The Governor Certillac for 30,000 crowns. appointed by the new proprietor ruled with se much tyranny that the most respectable settlers left the island; he was at length seized, tried, and executed by the colonists.

In 1674 the island was annexed to France, and the proprietors received compensation for their claims; and in 1762 it was surrendered to the British under Commodore Swanton, and was formally ceded to Great Britain by the Treaty of Paris on the 10th of February, 1763. In 1.79 it was retaken by the French under the Count D'Estaing; and in 1783 it was restored to Great Britain by the Treaty of Versailles. In 1785-6 it was the scene of a rebellion against the British rule, instigated by the French Republic. The Lieut.-Governor, and 47 other British subjects

SHIPPING ENTERED AND

were massacred by the rebels, and the colony brought to the verge of ruin. In June, 1796, Sir Ralph Abercrombie suppressed the rising, and the ringleaders were executed.

In 1834 the apprenticeship system was established in regard to the African slaves, and this was followed in 1838 by their unconditional emancipation.

Constitution.

There was from 1766 a Legislative Council as well as a House of Assembly, the latter consisting of 21 elected members.

Under an Act of 1856, and limited in its duration to a term of three years, an Executive Council was formed, composed of members of both branches of the Legislature. The Act was allowed to expire, and the Legislative Council resumed its executive functions under the style of Her Majesty's Council.

This constitution was remodelled by an Act of the 7th of October, 1875, and a single Legislative Assembly established in lieu of the Council and Assembly. The Assembly consisted of 17 Members, 8 elected by the people, and 9 nominated by the Crown. The Act also appointed an Executive Committee of 5 members, 3 being nominated and the other 2 elected Members of Assembly. These Members received each a salary of 100% a year, and were charged with the duty of advising the Lieut.-Governor on the conduct of affairs.

This Assembly at its first meeting on the 9th of February, 1876, addressed the Queen, informing Her Majesty that it had passed a Bill providing for its own extinction, and leaving "it entirely to your Majesty's wisdom and discretion to erect such form of Government as your Majesty may deem most desirable for the welfare of the Colony." The Imperial Act (39 and 40 Vict. c. 47) empowered Her Majesty to comply with this address, and Crown Colony Government was established in December, 1877.

On the 17th March, 1885, letters patent were passed constituting anew the office of Governor of the Windward Islands, and on 1st June, 1885, Grenada became the headquarters of the Government, which includes the colonies of St. Lucia and St. Vincent.

Until the 1st of December, 1924, the Legislative Council consisted of six official members besides the Governor, and seven unofficial members nominated by the Crown.

By an Order in Council dated 21st March, 1924, which came into operation on 1st December, 1924, a partly elective Legislative Council was constituted, consisting of the Governor, seven ex officio members, three nominated unofficial members and five elected members. The Island is divided into five electoral districts, each returning one elected member.

The Government is assisted in the internal administration by six semi-elective District Boards.

Education.

There are 60 elementary schools, 10 Government and 50 aided. These schools are of five classes, Senior, Combined, Junior, Infant and Manual Training Centres. Head teachers of senior and combined schools are paid from 80% to 160% per annum, according to their certificates of proficiency, and to the class of school. Bonuses are given them for extra duties. Grants are also given by Government in aid of buildings, furniture and apparatus. The administration is entrusted to a Board of Education nominated by the Governor, half the members being Roman Catholic. In

1933 the average attendance was 8,071 children, the number on the rolls being 13,490. There is a Government secondary school for boys, and three for girls which receive grants-in-aid from the general revenue.

ST. LUCIA.

Situation and Area.

The island of St. Lucia was discovered by Columbus, during his fourth voyage, on the loth June, 1502. It is situated in 13° 54' N. lat. and 60° 59' W. long.; at a distance of 24 miles to the south of Martinique, and 21 to the northeast of St. Vincent. It is 27 miles in length and 14 at its greatest breadth; its creurference is 150 miles, and its area 233 sq. miles, rather less than Middlesex. Near 12 northern extremity lies Pigeon Island, formerly 233 4 a military post of some importance.

Castries, the capital of the island, contains shout 1,422 houses, and a population of 5,899 accords to the census of 24th April, 1921. Next in " portance is the town of Soufrière, containing population of 2,480.

History.

At the period of its discovery St. Lucia was inhabited by the Caribs, and continued in their possession till 1635, when it was granted by the King of France to MM. de L'Olive and Duplessis. In 1639 the English formed their first settlement, but in the following year the colonists were all murdered by the Caribs.

In 1642 the King of France, still claiming a right of sovereignty over the island, ceded it to the French West India Company, who in 1650 sold it for 1,600t. to MM. Honel and Du Parquet. After repeated attempts by the Caribs to expel the French, the latter concluded a Treaty of Peace

with them in 1660.

In 1663, Thomas Warner, the natural son of the Governor of St. Christopher, made a descent on St. Lucia. The English continued in possession till the Peace of Breda in 1667, when the island was restored to the French. In 1674 it was re-annexed to the Crown of France, and made a

dependency of Martinique.

After the Peace of Utrecht, in 1713, the rival pretensions of England and France to the possession of St. Lucia resulted in open hostility. 1718 the Regent, d'Orléans, made a grant of the island to Marshal d'Estrees, and in 1722, the King of England made a grant of it to the Duke of Montague. In the following year, however, a body of troops, despatched to St. Lucia by the Governor of Martinique, compelled the English settlers to evacuate the island, and it was declared neutral.

In 1744, the French took advantage of the declaration of war to resume possession of St. Lucia, which they retained till the Treaty of Aix-la-Chapelle in 1748, when it was again declared neutral. In 1756, on the renewal of hostilities, the French put the island in a state of defence; but in 1762 it surrendered to the joint operations of Admiral Rodney and General Monckton. In the following year, by the Treaty of Paris, it was

assigned to France. St. Lucia continued in the peaceable possession of the French till 1778, when effective measures were taken by the British for its conquest. In the early part of 1782, Rodney took up his station in Gros Islet Bay, in St. Lucia, with a fleet of 36 sail of the line, and it was from thence that he pursued Count de Grasse, when he gained the memorable battle of the 12th of April in that year. This event was followed by the Peace of Versailles, and St. Lucia was once more restored

to France.

In 1793, on the declaration of war against revolutionary France, the West Indies became the scene of a series of naval and military operations which resulted in the surrender of St. Lucia to the British arms on the 4th of April, 1794.

In 1796 the British Government despatched to the relief of their West Indian possessions a body of troops, 12,000 strong, under the command of Sir Ralph Abercrombie, supported by a squadron under Admiral Sir Hugh Christian. On the 26th April these forces appeared off St. Lucia, and after an obstinate and sanguinary contest, which lasted till the 26th May, the Republican party, which Had been aided by insurgent slaves under Victor Hughes, laid down their arms, and surrendered as prisoners of war.

The British retained possession of St. Lucia till 1802, when it was restored to France by the Treaty of Amiens; but on the renewal of hostilities it surrendered by capitulation to General Greenfield on the 22nd June, 1803, since which period it has continued under British rule.

General Description.

On its final acquisition by the English, the island had become much depopulated, partly by war, but chiefly by internecine struggles, the fruits of the rench Revolution. The recovery from this state of things has been slow, having been retarded by the severe epidemics of cholera and small-pox which have at different times visited the West Indies. Each census, however, has shown an advance in this respect, and the population at 31 December, 1933, is estimated at 62,000. Most of the inhabitants speak a French patois, but English is gradually becoming more generally used. very small percentage is of European descent, the remainder being of the negro race, except 2,189 of East Indian origin. The reputation of the island for peculiar unhealthiness is undeserved, the death rate for 1933 being 16:1 per 1,000, and for the year 1932 18:3 per 1,000. Certain spots situated in narrow valleys between high mountains are undoubtedly unhealthy, but are becoming less and less so as the forests fall before a yearly extending cultivation.

The danger from venomous reptiles is also much exaggerated. Owing to the introduction and spread of the mongoose snakes are now but rarely met with. Among white inhabitants, consumption and other of the most fatal diseases of temperate climates are almost unknown. temperature from December to April seldom exceeds 80° Fahr., even at midday, in spots situated a few hundred feet above the sea, and a fresh trade wind blows continuously. The scenery is of peculiar beauty, even as compared with that of other West India Islands, and in the neighbourhood of the Pitons has the less common element of grandeur. These are two cone-shaped rocks rising sheer out of the sea to a height of nearly 3,000 feet, and near them is the crater of a volcano and a soufriere, the ordinary characteristics of the Caribbean Cordillera

Castries, the chief town, has an excellent harbour. Dredging operations have been carried out in the harbour, rendering it more commodious. A substantial concrete wharf, 650 feet in length, with a depth alongside of 27 feet at low water, has been completed, and the western wharf, having a length of 552 feet, has been refaced in wood, and dredged to an average depth alongside of 18 feet to 24 feet. The facilities offered by the port as a port of call and coaling station are widely recognised. It is a port of registry, and had, on 31st December, 1933. 16 vessels registered, of a total tonnage of 511 tons.

A Government savings bank was established in 1871, and has now 795 depositors, with 16,696l. to their credit on 31st December, 1933. Branch savings banks were opened at Soufrière and Vieux Fort in March, 1898, at Dennery and Gros Islet in November, 1905, and at Anse-la-Raye in December,

Constitution and Law.

Up to the period of the French Revolution, and after the restoration of order in 1800, the island was governed according to the law and ordinances of the French monarchy. The Courts of Justice were an inferior Court called the "Senechaussee, and a higher Court, called the "Conseil Superieur," or Court of Appeal. The latter Court was composed of a President and twelve Councillors; the Governor often presided, and it was invested with certain executive and administrative functions.

The Government is now conducted by an Administrator (who is subordinate to the Governor of the Windward Islands), aided by an Executive

Council. By an Order in Council dated 21st | March, 1924, which came into operation on 1st December, 1924, a partly elective Legislative Council was constituted, consisting of six ex-officio members, three nominated unofficial members and three elected members. On the 12th February, 1931, that Order in Council was amended to provide that the Council should consist of three ex officio members, three nominated official members, three nominated unofficial members, and three elected members. The Island is divided into three electoral districts, each returning one elected member. The first election under this constitution was held in March, 1925. Law is administered by a Chief Justice, from whom in civil cases there is an appeal to the West Indian Court of Appeal, and two magistrates, whose decisions are liable to review by the judge. In criminal cases tried in the Superior Court facts are decided upon by a jury of twelve as in England.

A code of civil law, the authors of which were

Sir G. W. Des Vœux, G.C.M.G., and Mr. James Armstrong, C.M.G., became law in October, 1879. This code was framed upon the principles of the ancient law of the island, with such modifications as are required by existing circumstances. The Statute Law of the Colony was consolidated to 1916 by Mr. F. H. Coller, Chief Justice, who also edited the Commercial Code, 1916.

The revising and editing of the Criminal Law and Procedure of the Colony by Mr. J. E. M. Salmon was completed during 1920 and proclaimed as the Criminal Code, 1920. It came into force on the 1st January, 1921.

Education.

On the 30th June, 1891, the trustees of the Lady Mico charity closed the eleven schools which they had till then maintained, and withdrew their connection with the Colony. Three of these schools became Government schools, and the others assisted schools under the new Education Ordinance. In 1898 all the Government schools were handed over to the Roman Catholic body, and became assisted schools. There were, on the 31st December, 1933, 50 assisted schools. Of these, four were Anglican, three Methodistand 43 Roman The number of children on the rolls Catholic. was 9.762, with an average attendance of 6,428, and the amount spent by the Colony on primary education was 5,088%. The Government grants 450%. a year to a Roman Catholic second-grade school, which has 49 boys on the roll: the Sisters of St. Joseph conduct a similar school for Girls. The number of pupils on the roll is 102 and a Government grant of 1751. is made to the school annually.

Industry, Trade and Customs.

Sugar, rum, cocoa, logwood, coconuts, copra, limes, bananas, Lime oil, Bay oil, Bay rum, and spices are produced. There are four sugar "Usines" with the best machinery, 16 lime-juice factories, 3 rum distilleries, and two bay-oil distilleries. The cultivation of bananas is being rapidly extended. Rubber and cotton grow well, and samples of the former prepared at the Botanic Station, from trees growing there, have received favourable reports.

A considerable amount of land is in the possession of the Crown, and may be purchased in lots up to and including 50 acres, at £1 per acre, and for every acre beyond 50 at 10'- per acre, payable by four equal annual instalments. In the event of a certain area being put into permanent cultivation before the due date of the last

instalment, that instalment may be remitted Under the Crown Lands Regulations us period over which (in certain cases) the payment of the purchase money may be spread a ten years. The soil will grow any kind of troped fruit trees or economic plants.

Surveys are made at the cost of the purchaser. The Customs Import Tariff is mainly on a specific duty basis, with a preference in favour of Empire products which in most cases amount

to one third of the general tariff rate.

The percentage of the Colony's Import Trade with the United Kingdom, other parts of the British Empire, and the principal foreign countries during 1933 was as follows :-

Sweden, G. M. Peter (Vice-Consul).
Venezuela, Senor M. Planchart (residing at Trinidad).

ST. VINCENT.

Situation and Area.

The Island of St. Vincent is popularly supposed to have been discovered by Columbus on the 22nd of January, 1498. It is situated in 13° 10′ N. latitude, and 60° 57′ W. longitude, at a distance of 21 miles to the south-west of St. Lucia, and 100 miles west of Barbados. It is 18 miles in length, and 11 in breadth, and contains about 96,000 acres of land, about half the area of Middlesex. Most of the Grenadines, a chain of small islands lying between Grenada and St. Vincent, are comprised within the government of the latter island. The principal is Bequia, situated at a distance of 9 miles from Kingstown.

General Description.

Kingstown, the capital of St. Vincent, is situated at the side of an extensive bay, at the southwestern extremity of the island. It consists of three principal streets, each about a mile long, running parallel with the beach, and contained at the census of 1931, a population of 4,269 souls. It is a port of registry, and had, on 31st December, 1933, 28 sailing vessels of a net tonnage of 1,119 tons and 1 motor vessel of 11 tons net.

There are five other small towns in the island, the most important being Georgetown on the north-east, and Barrouallie on the west.

The most striking natural feature of the island is its "Soufrière," or volcano, situated at the northern extremity of the island, and rising to about 4,048 feet above the level of the sea. After a violent eruption in 1812, it remained dormant for a period of ninety years, and then broke into violent eruption again on May 7th, 1902, when the entire northern half of the island was devastated, and nearly 2,000 lives were lost. The eruption synchronised with that of Mont Pélèe in Martinique which destroyed the town of St. Pierre. The "Soufrière" remained inter-

mittently active throughout 1902, and there was a further eruption in March, 1903, since when it has remained quiescent.

The whole island is of volcanic origin. A backbone of densely wooded and almost impassable mountains traverses it from the "Soufrière" at its northern end to Mount St. Andrew (2,500 ft., dominating the Kingstown valley at its southers extremity. This range sends off spurs on each side, cutting up the island into a series of valley, trending east and west from the central range to the coast. There is a somewhat level tract called the Carib Country at the north-east of the island, between the "Soufrière" and the sea. This district formerly comprised the most ferule sugar estates. The next highest point after the "Soufrière" in the range is Richmond Peak, 3,539 feet high. The streams are numerous but small, except after heavy rains; the principal is the Richmond River.

In September, 1898, the island was visited by a severe hurricane, which caused widespread destruction, and reduced large numbers of the inhabitants to destitution. In September, 1921, the island was again struck by a hurricane which although not as violent as its predecessor, did considerable damage to property and crojs, entailing considerable hardship on the populace and necessitating the expenditure by Government of 3,2882, on relief measures.

Climate

In the dry season, January to May, the olimate is charming. In the wet season, and especially from August to November, the climate is damp and hot, but not at all unhealthy. The nights are cool all the year round. The rainfall during 1933 was 121 48 inches. The highest reading of the thermometer during the same year was 89° F., the lowest 67° F., the mean monthly temperature being 79 5° F. in the shade. The prevailing wind is N.E.

Industry, Trade and Customs.

Sugar, syrup, rum, cocoa, copra, and excellent arrowroot are produced. The cultivation of ground nuts and spices is also attracting attention, and Sea Island cotton, the best in the Empire, is extensively planted, for the ginning of which a Government Ginnery has been erected. Most of the sugar and all the arrowroot mills are worked by water power. A large proportion of the cultivable land is owned by a few individuals; portions of Crown lands, have been alienated to peasant proprietors, and several estates have been purchased by the Government with the aid of an Impensing grant and allotted to the same class of settlers. The forests produce excellent woods. There are 65 miles of highway running round the island, for the most part close to the coast, but on the leeward coast communication is mainly by boat, and nearly all the produce is water borne. There are also some 30 miles of byeway connecting with the highway.

The port of Kingstown is visited weekly by steamers of the Canadian National Steamships, fortnightly by Steamers of the Ocean Dominion Steamship Corporation and Furness Withy Lines and occasionally by steamers of the Harrison and Munsen Lines.

A telephone system has been established, having 1 central and 3 branch exchanges, with 231 connections and some 446 miles of line.

The import duties are largely ad valore mostly 15 %; but there are many specific duties.

Preferential rates, mostly two-thirds of the general rate, are charged on imports from other British countries.

Export duties are levied on cotton, arrowroot,

ground nuts, cocos, and copra.

The following table shows the direction of the Trade for the year 1933.

•	History.	-		

At the time of its discovery, St. Vincent, like some of the other small islands, was inhabited by the Caribs, who continued in the undisputed possession of it until 1627, when the King of England made a grant of the island to the Earl of Carlisle. In 1660 it was declared neutral, and in 1672 it was granted to Lord Willoughby.

No steps, however, appear to have been taken to form a settlement on the island, and the English and French came to an agreement to abandon the Islands of Dominica and St. Vincent to the Caribs, on condition of their renouncing all claim to the

other islands.

In 1722 George I. made a grant to the Duke of Montague of some of the West India Islands, including St. Vincent.

From statistics of the year 1740 it appears that the white inhabitants then amounted to about 800, and the slaves to 3,000, producing commodities for exportation to the value of 63,625l.

In 1748 St. Vincent was declared neutral by the Treaty of Aix-la-Chapelle. In 1756, however, hostilities were renewed, and the island was taken in 1762 by General Monckton; and by the Treaty of Paris in the following year it was coded to Great Britain, when General Melville was appointed Governor.

By a treaty, which was concluded in February, 1773, an extensive district of St. Vincent was allotted to the Caribs (who for some time had been in a state of open rebellion) on condition of their laying down their arms and acknowledging the King of Great Britain as the rightful sovereign of the island.

In 1779 the island surrendered to the The following year has been rendered memorable by the occurrence of the greatest hurricane of which there is any record in West Indian annals. By the Treaty of Versailles in 1783, St. Vincent was restored to Great Britain.

From this period to the breaking out of the French Revolution the island appears to have enjoyed comparative prosperity and peace; but in 1795 the Caribs and their allies (the French) again overran the country, burning the cane-fields, plundering the houses, and mercilessly murdering the English colonists. This state of things continued till the arrival of the "Zebra" sloop of war, with succours from Martinique, then the British headquarters.

The contest was carried on, with alternations of good and ill fortune, until the arrival of Sir

Ralph Abercrombie with reinforcements in June, 1796. After an obstinate struggle the insurgents surrendered at discretion. The Government, in anticipation of such an event, had resolved that the Caribs should be transported to the Island of Ruatan, in the Bay of Honduras; and accordingly, on the 11th March, 1797, the necessary transports having been provided, the Caribs, to the number of 5,080, were embarked at Bequia, and sailed for their appointed destination.

In 1834 the apprenticeship system was established, and was followed in 1838 by unconditional emancipation of the negro slaves. The year 1846 witnessed the first introduction of Portuguese labourers, a class of immigrants who amounted in a few years to 2,400, and have proved a valuable addition to the general population of the island.

St. Vincent received its first East Indian Coolie labourers in 1861. Most of them returned to India, but some made their home in the Colony.

Constitution.

The Government of St. Vincent originally consisted of a Governor, Council, and Assembly.

The Council consisted of twelve members, one half of whom were named in the Governor's Commission, and the remainder appointed on his recommendation. The Assembly was composed of nineteen members, including two for the Grenadines. In 1856 an Executive Council was created, consisting of ten members, five from the Legislative Council, and five from the Assembly. In 1859 this Council was re-modelled, with the addition of an Administrative Committee, selected by the Governor and composed of three members—one from the Legislative Council, and two from the Assembly. This Act of 1859 had, however, a duration of only five years.

The constitution, however, was found no longer suited to the altered circumstances of the Colony. and in 1867 the Legislative Council and House of Assembly were abrogated, and a single Legislative Assembly was created instead thereof. This Assembly was composed of 12 members, viz.:three ex officio, three nominated by the Crown, and six elected by the people. (The number of electors registered for the year 1874 was only 388.)

But this constitution also was abrogated by an Act of the Local Legislature (confirmed by an Imperial Act, 39 & 40 Vict. c. 47), by which the future modelling of the constitution was left to the Crown. Until 1st December 1924, the Legislative Council consisted of official and unofficial members nominated and appointed by the

By an Order in Council dated 21st March, 1924, which came into operation on 1st December, 1924, a partly elective Legislative Council was constituted, consisting of the Governor, four ex officio members, one nominated unofficial member and three elected members. By the SaintVincent (Legislative Council) Amendment Order in Council, 1931, the Legislative Council was constituted of the Governor, of three ex officio members, of one nominated official member, of one nominated unofficial member, and of three elected members. The Island is divided into three electoral districts, each returning one elected member.

The several courts of the Colony were, by an Ordinance of the Local Legislature passed in 1880, consolidated into one court, styled the Supreme Court of Judicature. The Chief Justice of the Colony is the sole Judge of this court.

Education.

There were, on 31st December, 1933, 37 primary schools, with 9,291 children on the rolls. The average attendance during 1933 was 5,258. There is also a government secondary school for boys, and a high school for girls.

An Island Scholarship is awarded biennially tenable for from three to five years at an approved University. Annual value 250l. and cost of passage.

The Government expenditure on primary education in 1933 was 7,973l.

Savinys Bank.

A savings bank was established in 1866, and had 740 depositors, with 14,946l. deposited, on 31st December, 1933. Branches of the bank have been opened at Georgetown, Barrouallie, and Union İsland.

Sub-Inspector, Lieut. G. E. E. Williams, 200%. to 250%, and free quarters.

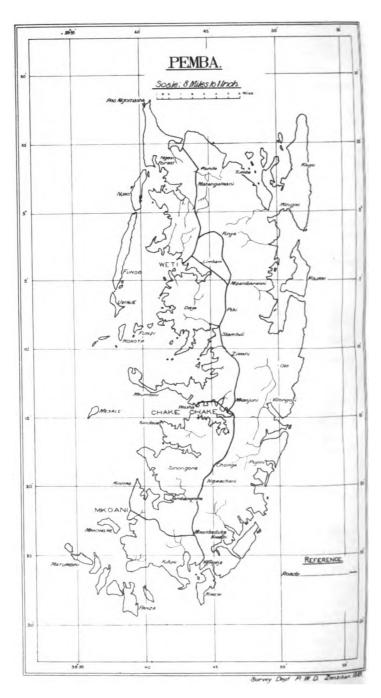

Judicial.

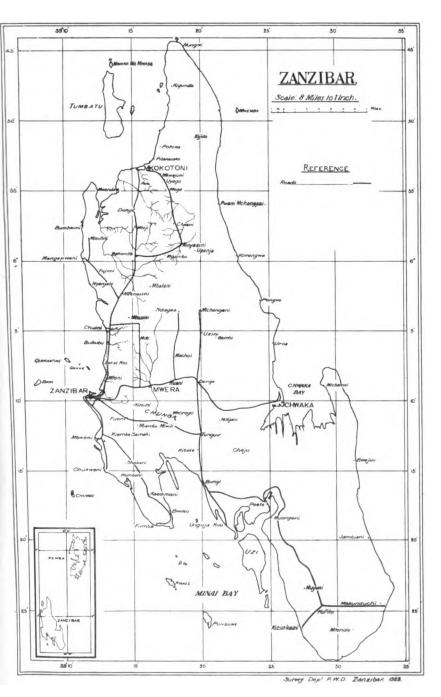

Chief Justice (vacant), 650l. to 700l. Attorney-General and Registrar, Supreme Court, C. C. Ross, 500l. Chief Clerk to Attorney General, etc., V. D. Archer, 2001. to 2501.

Magistrates:-

1st District (vacant), (paid as Chief Justice). 2nd District, H. J. Hughes, 300l. to 350l., and 801. travelling allowance. 3rd District, Dr. R. Austin (See Southern

Grenadines District)

Medical.

Chief Medical and Health Officer, Dr. S. Branch, 500l. to 600l., 60l. travelling allowance and free quarters.

District Medical Officers, H. B. Gregory, R. Bonello, E. D. B. Charles, J. W. Gallwey, A. E. Slinger, A. B. Brereton, 400l. to 450l., with travelling allowances ranging from 601. to 901. Resident Surgeon, Colonial Hospital A. Lai Kiow,

400l. to 450l. and house allowance of 36l. Nurse-Matron, Colonial Hospital, Miss L. E. Elphick, 180l. to 200l. and 10l. uniform

allowance and free quarters. Steward and Chief Dispenser, Colonial Hospital, E. T. Young, 150l. to 200l. Chief Sanitary Inspector, J. L. Chapman, 250l.

to 275l, and 80l, travelling allowance.

Educational.

Headmaster, Secondary School, J. S. Clarke, 5001. and quarters,

Assistant Master, Secondary School, W. M. Lopey, M.A. (Durham), 250l. to 300l.

Science Master, Secondary School, D. S. Cozier, 150l. to 225l.

Head Mistress, Girls' High School, Mrs. L. S. Moffett, 300l., and 30l. house allowance.

Inspector of Schools, E. C. M. Theobalds, B.A.

(London), 250l. to 300l.,75l. travelling allowance.

Public Works, Surveys, and Crown Lands. Superintendent of Works (vacant), 350l. to 400l., and 100l. travelling allowance.

Assistant Superintendent of Works and Roads, S. B. Isaacs, 250l. to 300l. and 85l. travelling allowance.

Postal Department.

Postmaster, P. L. Hutchinson, 2001. to 2501. and 50l. personal.

Agricultural Department.

Agricultural Superintendent, A. K. Briant, 4501. to 600l., 80l. travelling allowance and free quarters.

Agricultural Assistant (vacant).

Manager, Government Cotton Ginnery, A. W. Dowers, 200l. to 250l.

Southern Grenadines District.

Medical Officer, District Officer and Magistrate, Dr. R. Austin, 300l. to 400l. as Medical Officer, 1201. as District Officer etc., 601. travelling and subsistence allowance and free quarters.

Ecclesiastical.

Chief Ministers of Religion:— Church of England, The Right Reverend Vibert Jackson, D.D., Bishop of the Windward Islands. Church of Scotland Minister, Rev. Dr. D.

Wesleyan Minister, Rev. W. H. Richards. Roman Catholic Priest, Rev. Father D. Carlos Verbeke, O.S.B.

Foreign Consuls.

Belgium, J. de Neeff (Havana, Cuba). France, J. M. C. Pingaud (Trinidad). Norway, J. Brunchorst (Havana, Cuba). Venezuela, M. Planchart (Barbados). Italy, J. Salvatori (Trinidad). Netherlands, H. De Minvielle (St. Lucia). Latvia, Gabriel Descamps (Trinidad). Germany, Paul Urich (Trinidad). Portugal, A. Da Silva (St. Vincent). Peru, Thomas Hunte (Barbados).

ZANZIBAR.

Situation and Area.

The island of Zanzibar is situated in 6° S. latitude and is separated from the mainland by a channel 224 miles across at its narrowest part. It is 53 miles long by 24 broad (maximum measurements), and has an area of 640 square To the north-east at a distance of some twenty-five miles lies the island of Pemba in 5° S. latitude. It is smaller than Zanzibar, being 42 miles long by 14 broad (maximum measurements), and having an area of 380 square miles.

Climate.

The normal annual rainfall amounts in Zanzibar to 58.59 inches and in Pemba to 73.25 inches. The rainy seasons are well defined: the heavy rains occur in April and May previous to the setting in of the south-west monsoon, the light rains in November and December before the recurrence of the north-east monsoon. The mean maximum temperature in Zanzibar is 844° and the mean minimum 76.6°. The corresponding figures for Pemba are 86.6° and 76.1° respectively.

People.

The Arabs were the conquerors of the islands. They founded the clove industry and still possess considerable property in plantations. They understand the natives and the natives understand them and accept their control and that of Europeans

more readily than that of other races.

The bulk of the native population numbering 186,000 is known by the generic name of Swahili, a term formerly used to denote the Bantu coast tribes from Somaliland to Mozambique, "sawahil" in Arabic meaning "coasts." This general appellation includes the descendants of the carly settlers of the island of Zanzibar who intermarried with negro women. They are called Wahadimu and live on the eastern and southern portions of the islands. A quiet shy people, occupied mainly in the cultivation of native crops and fishing, they rarely move from their homes except to pick cloves. The name Swahili also includes the descendants of the early settlers in Pemba who are known as Wapemba. These people engage chiefly in agriculture but raise a smaller variety of native crops than the Wahadimu. Many of them own clove and coconut plantations. They live in less aeclusion than the natives on the larger island. Another tribe included in the term are the Watumbatu whose chief stronghold is Tumbatu Island. They are a very exclusive people but by no means shy. They go down to the sea and man most of the craft plying in Zanzibar waters

There is in addition a considerable influx of various tribes from the mainland, of whom the Wanyamwezi are economically the most important, being now the chief source of supply for the weed-

ing of plantations.

In the 1931 Census the total population of the Protectorate was returned as 235,428. The non-native population numbers 49,000 of whom 33,400 are Arabs. The Khojas, Bohoras, Hindoos, Parsees, and Goans possess most of the trade, either as merchants, shopkeepers, moneylenders, small traders, or skilled mechanics.

History and Constitution.

The beginnings of Zanzibar history are lost in antiquity. It appears more than probable that the islands of Zanzibar and Pemba were known to the ancient Egyptians, Phoenicians, Assyrians, and Jews, but though the expedition of Necho

(C. 600 B.C.) doubtless passed the Islands it is not till the first century that the Periplus gives a description of one of them under the name of The Hindus appear to have settled Menuthias. at a very early date and traces of Greek colonisation are not lacking. From about the 7th Century B.C. the Islands appear to have had a close connection with the South Arabian States. Bantu settlers probably made their appearance during the first five centuries A.D., and thereafter for the next five hundred years or so came also traders from China and Malaya in addition to those from the Persian Gulf. The Coast was probably converted to Islam early in the 10th Century. The Zenj Empire was founded by Ali bin Hassan, a prince of Shiraz, about 975 A.D. but it soon broke up into separate states and, by the time the Portuguese began the conquest of the East African littoral, was already declining. It was during the sixteenth century that the Arabs of the East Coast sought the assistance of the Imams of Muscat to drive out the Portuguese, and the capture of Mombasa Fort in 1698 may be said to mark the downfall of Portuguese power north of Mozambique. On the ruins of the Portuguese power in the seventeenth century arose that of the Imams of Muscat. The allegiance to Muscat, however, was of a more or less nominal character until Seyyid Said, after having subdued his enemies on the mainland, transferred his capital to Zanzibar in 1832. On his death in 1856 a dispute as to the succession arising between his sons Seyyid Thwain of Muscat and Seyyid Majid of Zanzibar the African possessions were made independent and confirmed under Majid by an arbitration (dated 1861) of Lord Canning, then Governor-General of India.

Seyyid Said laid the foundations of Zanzibar's importance by transferring his capital from Muscat and making the island his permanent residence in the year 1832. Under his direction Zanzibar soon became both politically and commercially the principal native city in East Africa.

"If you play on the flute at Zanzibar," says an Arab proverb of the period, "everybody as far as the lakes dances," Said's son Majid was succeeded in 1870 by Barghash, the first of his race to be commonly known as Sultan of Zanzibar.

In the year 1890 the supremacy of British interests in the islands themselves was recognized by France and Germany, and they were declared a British Protectorate in accordance with conventions by which Great Britain waived all claims to Madagascar in favour of France and ceded Heligoland to Germany. In the same year the mainland possessions which extended over the coast of East Africa, from Warsheikh in 3° Nr. latitude to Tunghi Bay in 10·42° S. latitude were coded to Italy, Great Britain, and Germany respectively, Great Britain and Italy paying rent for the territories under their protection, while Germany acquired the Sultan's rights by the payment of a sum of 200,000. At a later date Italy also acquired these rights by payment of a sum of 144,000.

In 1891 a regular government was constituted with a British representative as first minister. On the death of the Sultan in 1896 the palace was seized by a member of his family, Seyvid Khaled, and to compel the latter's submission the palace was bombarded by British warships. In 1906, the British Government assumed more direct control over the Protectorate and reorganized the Government. In 1911 Seyvid Ali abdicated the

throne and was succeeded by the present ruler, Seyyid Khalifa bin Harub. On 1st July, 19:3, the control of the Protectorate was transferred from the Foreign Office to the Colonnal Office, legal effect being given to the change of administration in the following year.

The Government was vested in a High Commissioner, who was also Governor of the British East Africa Protectorate, and a British Resident. A Protectorate Council, with His Highness as President, was established at the same time. It was of an advisory and consultative nature and ceased to exist in 1926 when Executive and Legislative Councils were constituted.

During the Great War a European Defence Force and a Native Carrier Corps were raised and many natives enlisted in the King's African Rifles. Zanzibar contributed £70,000 to the Imperial Government and £245,000 was invested in War Loan. £19,000 was raised by public subscription for the British Red Cross Society.

Since the War the principal event has been the abolition of the High Commissionership in 1925. During the last few years great progress has been made in Education and the provision of improved means of transport. Much attention is being directed to the regeneration of the clove industry.

For the East African Governors' Conference, see under Kenya, page 335.

Industries and Trade.

Zanzibar is now the dominant partner in the clove industry, holding as it does about 83 % of the shares. The other partners are Penang, Amboyna and some other islands in the East Indian Archipelago, and Madagascar.

Authorities differ as to the date when ard country from which the clove tree was first introduced into Zanzibar. Some say that it was brought from Réunion by an Arab at the end of the 18th century. Colonel Rigby, Her Majesty's Consul and British Agent, in his report on the Zanzibar dominions written in the year 18th states "the first clove trees were introduced about 30 years ago from Mauritius; being found to thrive they were extensively planted and they have now become the most valuable production of these Islands."

To Seyyid Said belongs the credit of establishing and promoting the clove industry. Burton records that he threatened confiscation to those who did not plant three clove trees for every coconut and that the country was almost denuded of the latter to make room for cloves. In 1839—40 the output amounted to about 9,000 frasilas. (The Frasilas equivalent to 35 lbs., is the local measure of weight for cloves). In 1849 it had risen to frasilas 120,000. In 1859 frasilas 139,000, valued at 255,6662, were exported, and the average output during the next decade was frasilas 200,000, valued at about 85,0002. Owing to the increase in production the price had, however, fallen from \$5.86 to \$1.82.

In 1872, a hurricane of great violence swept over the Island of Zanzibar and destroyed two-thirds of the clove and coconitrees. Pemba, though touched by the hurricate sustained little damage. The years following the disaster were years of short supply, high process and intensive cultivation. The Pemba owners actuated by motives of gain, hastened to cutders coconit trees on a wholesale scale throughout the island and to plant clove trees in their part.

The Zanzibar owners, though temporarily ruined set to work with commendable fortitude to replace the trees which the hurricane had destroyed, and ten years after the hurricane the normal output of cloves had not only been restored but increased.

Another event of great economic importance to the industry was the abolition of slavery. The industry was built up and for many years sustained on slave labour imported from the interior of Africa. In 1873 Seyvid Burgash entered into a treaty to suppress the sea-borne traffic in slaves and to close all public markets in his dominions for the buying or selling of imported slaves. Various treaties and legislative measures followed until the year 1897, when by a decree of Seyvid Hamoud the legal status of slavery was abolished. It may be noted parenthetically that in the year 1890 Great Britain assumed a protectorate over Zansibar.

The history of labour subsequent to 1897 is a tale of shortage, disinclination on the part of the labour available to engage in any form of settled work, inability or disinclination on the part of the Arabs to pay money wages, and administrative effort to organize the available supply. The introduction of Indian labour was at one time or another canvassed but never materialized. In 1904 and 1906 and at other subsequent times recourse was had to recruitment of labour on the mainland. Mainlanders have also come voluntarily, settled in appreciable numbers, and are now the chief source of supply for cultivation of plantations. The situation has also doubtless been eased by the gradual passing of much property in plantations from Arabs to natives.

Since the abolition of slavery no event of major economic consequence has occurred. There have been the usual ups and downs, but production has steadily increased, 215,325 cwts. of cloves valued at Rs. 66,16,871 were exported in 1933.

A Clove Growers' Association established in 1927, was incorporated by decree in 1934. Its major object is the marketing of cloves and other agricultural produce.

The coconut industry ranks next in importance after cloves, the conditions in both Islands being favourable to the growth of the tree and its nut-bearing properties. It is estimated that there are about 55,000 acres under cultivation and 3½ million trees in both Islands. The export of domestic copra, amounted to 12,244 tons in 1933. Much is produced by the small grower or trader, neither of whom possesses proper drying facilities, with the result that the quality of the product compares unfavourably with that of Cochin and Ceylon.

There is a general ad valorem duty of 15 per cent. on imported goods with the exception of certain articles which have either a specific duty or a higher ad volorem duty, such as spirits, motor spirits, kerosene, cigarettes, tobacco, matches, tea, milk, cotton and artificial silk piece goods, shirts, singlets, boots and shoes, etc. There is also a schedule of articles exempt from duty. The Tariff includes no provisions for Empire preference.

The principal articles of import are rice and grain, cotton piece goods, motor spirit and petroleum, copra, sugar, tobacco, manufactured (including cigars and cigarettes), flour, and ghee.

The principal articles of export (including reexports) are cloves, copra, cotton piece goods, clove stems, rice and grain, motor spirit and petroleum, ivory, and millet.

The following are the percentages of imports from and exports to principal countries of origin and destination during the year 1933:—

Currency and Banking.

The silver rupee of British India of the standard weight and fineness enacted in the Indian Coinage Act, 1906, is the standard coin of Zanzibar. All other silver coins of British India of the standard weight and fineness enacted in the Indian Coinage Act, 1906, are legal tender for the payment of an amount not exceeding 5 rupees. These coins are ½, ¼, and ½ of a rupee. Seyyidieh copper pice are legal tender at the rate of 64 pice to 1 rupee for the payment of an amount not exceeding 1 rupee. There is a Government note issue of the denominations Rupees 1, 5, 10, 20, 50, 100, and 500.

The National Bank of India, Ltd., and the Standard Bank of South Africa, Ltd., have branches in Zanzibar.

Shipping and Communications.

The port of Zanzibar is one of the finest in Africa, and was for long a main centre of commerce between India, Arabia, and the mainland. Of late years, however, the importance of Zanzibar as a port of trans-shipment and distributing centre has largely decreased owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, nevertheless, tend to indicate that the Island will continue, by reason of its geographical position, to retain control of the local traffic.

It possesses an excellent water supply, the best on the East Coast of Africa. A considerable quantity is supplied to shipping annually.

The British India Steam Navigation Company maintain a monthly service between London-Zanzibar-Beira, the Union Castle Mail Steamship Company a monthly service London—Zanzibar—London round Africa in alternate directions, the Bank Line a monthly service Calcutta — Zanzibar — Cape Town, the Clan— Ellerman - Harrison Line between Glasgow -Liverpool — Zanzibar — Beira (cargo only), the Compagnie des Messageries Maritimes a fortnightly service Marseilles-Zanzibar-Madagascar, the German East Africa Line a monthly service Hamburg-Zanzibar-Durban-Hamburg in alternate directions, the Holland Africa Line a monthly service Rotterdam-Zanzibar-Rotterdam round Africa in alternate directions, Royal Packet Steamship Co. a monthly service between Java and Zanzibar, the Tirrenia a monthly service between Genoa and Zanzibar and an irregular coastal service between Zanzibar and Italian Somaliland, the Navigazione Liuera Triestina a monthly service Venice-Zanzibar-Venice in alternate directions. The British India Steam Navigation Company also maintain a fortnightly service Bombay-Zanzibar -Durban, also a coastal service Lamu-Zanzibar-Mikindani, the Osaka Shosen Kaisha a monthly service Kobe - Zanzibar - Durban and South America. Messrs. Cowasjee Dinshaw & Bros., maintain irregular service between Zanzibar and Kismayu. Government steamers maintain regular weekly connection with Pemba and Dares-Salaam. Zanzibar has become a port of call in the itinerary of a number of large tourist steamers.

There is cable communication with Europe either via Aden or via Durban.

There are 165 46 miles of roads throughout the Island of Zanzibar and 73 22 miles in Pemba suitable for motor traffic. The Government maintains wireless stations and telephone systems in Zanzibar and Pemba.

There are 4 post offices in the two Islands.

There is a regular weekly air service (passenger and mail) between Zanzibar, Dar-es-Salaam and Tanga in Tanganvika Territory, and Mombasa and Nairobi in Kenya Colony, which connects with the Imperial Airways Service at Nairobi for destinations on the London to Capetown air route. This feeder service is maintained by a private company operating from Nairobi, Kenya Colony.

Constitution and Government.

The Government is administered by a British Resident, who is appointed by commission under His Majesty's Sign Manual and Signet, and exercises his functions under the Zanzibar Orders in Council, 1924 and 1925.

Legislation consists of the Decrees of the Sultan, and certain Imperial Statutes of general application. Many Indian Acts, such as Penal Code, Civil and Criminal Procedure, etc., have been adapted to local requirements and enacted in the form of Decrees. The Penal and Criminal Procedure Codes are, however, about to be repealed and the Codes in force in the Mainland Territories of East Africa adopted with suitable adaptations. His Highness adcrees when countersigned by the British Resident under Article 42 of the Zanzibar Order-in-Council, 1924, are binding upon all persons. The Mu-

hammadan Law, declared in civil matters to be the fundamental law of His Hightens Dominions, controls in some measure personal relationship and land tenure among the Islame population.

There are Executive and Legislative Councils. established by the Sultan's Decree No. 1 of 1935

(see below).

Justice, in cases in which persons subject to the Zanzibar Orders in Council, 1924 and 1925, are concerned, is administered by H.B.M.'s High Court and the Courts subordinate to it, and in other cases by H.H. the Sultan's Court for Zanzibar and the Courts subordinate to that Court. Subordinate Courts are held by Resident Magistrates, Administrative Officers, and Arab Kathis. In addition, District Courts, composed of benches of local headmen, exercise a limited criminal jurisdiction. An Appeal lies from the Brush Court and from the Zanzibar Court in the exercise of their original civil and criminal jurisdiction to His Majesty's Court of Appeal for Eastern Africa and thence to the Privy Council.

Sultan of Zanzibar, His Highness Seyyid Sir Khalifa bin Harub, K.C.M.G., K.B.E. Private Secretary to His Highness the Sultan, 6.

H. Shelswell-White

Executive Council.

H.H. the Sultan, President.

The British Resident, Vice-President.

Ex-officio members: Chief Secretary, Attorney-General and Treasurer.

Official members: A. J. Findlay, W. Hendry and Dr. W. L. Webb.

Clerk of Executive Council, G. H. Shelswell-White.

Legislative Council.

The British Resident, President.

Ex-officio members: Chief Secretary, Attorney-General and Treasurer.

Official members: W. Hendry, J. P. Jones, A. J. Findlay, Dr. W. L. Webb and H. G. Peake.

Unofficial members: Sheikh Suleiman bin Nasur el-Lemki, C.B.E., Seyyid Salim bin Kindeh el-Busaidi, Khimji K. Sualy, M.B.E., B. H. Wiggins, Sheikh Said bin Ali el-Mugheiri and Tayabali H. A. Karimjee.

Clerk of Legislative Council: C. Seymour-Hall.

Civil Establishment.

British Resident, Sir Richard S. D. Rankine, K.C.M.G., 2,400t. and duty allowance, 1,125t. Private Secretary, Seconded from Administration, 400t. to 920t.

Secretariat and Administration.

Chief Secretary to the Government, S. B. B. McElderry 1,450l.

Assistant Chief Secretary and Provincial Commissioner, J. P. Jones, 1,200l.

Administrative Officers (1st Grade), C. F. Battiscombe, O.B.E., C. Seymour-Hall, G. H. Shelswell-White, 720l. to 920l.

Administrative Officers (2nd Grade), D. W. Saunders-Jones, W. Addis, W. R. McGeagh, J. Poncia, E. A. Sweatman, I. H. D. Rolleston, R. H. W. Pakenham, C. W. F. Footman, W. Wenban-Smith, 4751, to 7201.

Administrator-General's Department.

Land Officer, Administrator-General, Public Trustee, Registrar of Documents, Official Assignee and Registrar of Patents, Designing and Trade Marks, J. Parnall, 1,000t., 56tl. (non-pensionable) allowance as Secretary to Wakf Commission, 56tl. (non-pensionable) allowance as Trustee to H. H. the ex-Sultan's household.

Assistant Administrator - General, J. G. Mathison, 600l. to 720l.

Agricultural Department.

Director of Agriculture, A. J. Findlay, 1,250l. to 1,350l.

Assistant Director of Agriculture, H. Waterland, 840l. to 920l.

Government Chemist, L. W. Raymond, 600l. to 840l. Silviculturist, L. G. T. Wigg., 480l. to 720l.

Agricultural Officers, J. E. Baker, J. R. P. Soper, F. B. Wilson, R. Johns, 480l. to 720l.

Manager of Government Plantations, I. G. C. Squire, 480l. to 720l.

Produce Inspector, R. W. Donkin, 400l, to 600l.

Attorney-General's Department.

Attorney-General, A. N. Doorly, 1,400l.

Assistant Attorney-General, J. H. Vaughan, M.C., 600l. to 920l.

Audit Department.

Auditor, F. W. P. Kingdom, 960l.

Education Department.

Director of Education, W. Hendry, 1,2001.

Chief Inspector of Schools, G. B. Johnson, 840L to 920l.

Headmaster, Teachers' Training School, L. W. Hollingsworth, 600l. to 920l.

Supervisor of Education, L. A. C. Buchanan, 475l. to 840l.

Superintendent of Female Education, Mrs. G. R. Johnson, M.B.E., 475l, to 600l.

Judicial and Legal Departments. Courts.

Chief Justice, C. E. Law, 1,500l.

Assistant Judge, W. T. S. Fretz, 1,000l.

Magistrates, G. K. Knight-Bruce, R. A. Haig, 600l. to 920l.

Registrar, M. T. Hincks, 600l. to 720l.

Medical Department.

Director of Medical Services, W. L. Webb, 1,300l. Resident Surgical Officer, S. M. Vassallo, 1,100l.

Senior Medical Officer, S. W. T. Lee, 1,100l.

Medical Officers, W. A. Young, A. C. Freeth, W. H. Smith, 600l. to 1,000l., D. D. McCarthy, R. Nicklin, J. D. Robertson, 600l. to 920l.

Pathologist, H. G. Wiltshire, 600%. to 1,000%.

Sanitary Superintendent, E. H. Lavers, 3901. to 5401.

Matron of Hospitals, Miss A. E. Davis, 300l. to 426l.

Nursing Sisters, Misses M. A. McKie, M. K. O'Shea, M. Cottier, M. E. Cleaver, A. M. Brewster, M. V. Jones, E. O. Hickling, M. M. M. Rose, H. M. Cheshire, 240. to 300.

Municipal Office.

Municipal Officer (vacant), 600l. to 720l.

Police and Prisons Departments.

Commissioner of Police and Commissioner of Prisons, A. I. Sheringham, 1,100l.

Assistant Commissioner of Police, L. E. Skinner, 8401. to 9201.

Superintendents, W. Manning, Capt. F. H. Bustard, C. V. Curtis, 425l. to 720l.

Superintendent of Prisons, W. Inskip, 480l. to 600l.

Bandmaster, Capt. F. H. Bustard (receives an allowance of 501.)

Port and Marine Department.

Port Officer, Lieut.-Com. C. J. Charlewood, D.S.C., R.N.R. (retired), 960l.

Assistant Port Officer, C. G. Somers, 6001. to 7201.

Printing and Stationery.

Editor of Gazette and Press Liaison Officer, C. Seymour-Hall.

Assistant Treasurer, H. Allen, 7201, to 8401. Assistant Comptroller of Customs, F. E. Irving, 840l. to 920l.

Assistant Customs Officer, H. L. Renwick, 4254 to 720l.

APPENDIX.

This Appendix gives some account of North Borneo, Sarawak, Trans-Jordan and certain miscellaneous British Possessions and Protectorates which are not included in the main portion of the Historical and Statistical Account above.

NORTH BORNEO.

Situation and Area.

The territory under the jurisdiction of the British North Borneo Company (incorporated by Royal Charter under date of 1st Nov., 1881), now known as "The State of North Borneo," comprises the whole of the northern portion of the island of Borneo from the Sipitang River on the west to lat. 4° 10' N. on the east coast, together with adjacent islands; it is held under grants from the Sultans of Brunei and Sulu, and contains an area of about 31,000 square miles (equal to Scotland), with a coast line of about 900 miles. It extends from 115° 20' to 119° 20' E. long., and from 4° 10' to 7° 25' N. lat. The southern frontier was delimited in 1912-1913 by an Anglo-Dutch boundary commission, whose report was confirmed by a treaty at London on the 28th September, 1915.

The principal stations of the Company are at Sandakan, Lahad Datu, and Tawau, on the east, Kudat on the north, and Jesselton on the west. At each of these there are excellent harbours, especially at the first-named, which is situated in a magnificent bay some fifteen miles in length, with an average breadth of five miles. It is 1,000 miles from Singapore, 1,200 from Hong Kong, and 1,600 from Port Darwin. The headquarters of administration are at present at Sandakan. Other stations are at Semporna, Lamag, Beluran, Langkon, Kotabelud, Tuaran, Penampang, Papar, Beaufort, Mempakul, Sipitang, Tenom, Keningau, Tambunan, Ranau, and Pensiangan.

General Description.

The greater part of the country is at present covered with jungle, but the soil is well adapted for the growth of almost all tropical products, more particularly rubber, tobacco, coconuts, sugar, coffee, sago, tapicca, and pepper.

The country is mountainous. The highest point is Kinabalu, over 13,000 feet.

The inhabitants, who at the Census taken in 1931 numbered 270,223. are mainly Bruneis, Bajaus, and Sulus on the coast, who subsist by fishing and trade. Further back, the Dusuns, the most numerous native race in North Borneo, cultivate yearly well-irrigated rice fields, and in the uplands they plant tobacco and hill padi (rice), and hunt. The Muruts, another interior tribe, are numerous; formerly they varied more peaceaful pursuits by head-hunting but are now peaceable. The Chinese population is steadily increasing and is now not far short of 48,000; they form the trading, gardening and artisan section of the community. There is a State-aided scheme of Chinese immigration. Europeans number about 400. Sandakan, the chief town, with suburbs, has a population of about 17,600. There are several missions, including the Church of England, with stations at Sandakan, Kudat,

and Jesselton, and the Roman Catholic with a church and school at Sandakan and four stations on the West Coast and twenty schools in various parts of the country. The Church of England, which is supported by the Society for the Propagation of the Gospel in Foreign Parts and the Church of England Community, has a stone church and two schools at Sandakan and five schools elsewhere. The Basel Mission has eighteen schools, the principal ones being at Jesselton, Sandakan, Kudat, and Papar. Government maintains seven vernacular schools at various places in the territory.

History.

The State and town of Brunei appear to have been prosperous from a very early age. They were visited by Europeans in 1322, 1503, and 1520, but the first settlement in Borneo was made by the Dutch at Landak and Sukadana in 1608, and soon abandoned. Two English settlements were made about 1609, and abandoned in 1623. The Dutch factories were re-established in 1747 and 1776, but finally given up in 1790.

A British settlement was formed under the East India Company in 1762, at the island of Balambangan, which had been ceded by the Sultan of Sulu. This was attacked by pirates in 1775, and the staff was removed to Labuan, a small factory being at the same time established at Brunei. A second attempt in 1803 was made to establish a settlement on the former island, and in Marudu Bay, and on its failure the East India Company gave up its connection with Northern Borneo.

Sir James Brooke, in 1842, established the independent State of Sarawak, which, as well as Brunei, is under the exclusive influence of Great Britain: and Labuan became a British Colony in 1846. Some Americans obtained extensive cessions in North Borneo in 1865 from the Sultan of Brunei, but they were never utilised. In 1872 a Company, called the Labuan Trading Company, established itself in Sandakan, the business of which was later carried on by its manager, Mr. W. C. Cowie. Finally, in 1877 and 1878, the Sultans of Brunei and Sulu ceded to a syndicate formed by Baron Overbeck and Mr. (afterwards Sir Alfred) Dent the greater portion of the territory now known as the State of North Borneo. This syndicate's rights were acquired in 1881 by the British North Borneo Provisional Association, and transferred by that body in 1882 to the British North Borneo Company. Some further cessions have since been added to the Company's territory. The British Government assumed a formal protectorate over the territory by agreement dated the 12th May, 1888. By this agreement the State is to continue to be administered by the Company as an independent State, under the protection of the British Government, who may appoint consular officers, and shall conduct all foreign relations, but does not interfere in internal administration tized by GOOGIC

Climate.

The climate, though tropical, is equable; the temperature varies from 70° to 90° , but there is usually a light breeze. The annual rainfall is from 80 to 150 inches, according to situation.

Annual Mean Temperature... 81 degrees Recorded extremes maximum 96 minimum 60

Constitution.

The territory is administered by a Court of Directors in London, and a Governor and Civil Service appointed by them. There are four Residencies, viz., the Sandakan, West Coast, Tawau, and Interior Residencies.

The appointment of the Governor is subject to

the approval of the Secretary of State.

The law of the country is based upon Indian law and the principal Indian Codes have been adopted in the State. Many enactments of the Straits Settlements also have been incorporated in local Ordinances. Courts of law are correlative to the Indian Courts under the Indian Criminal and Civil Procedure Codes, while there are Imams' Courts for the administration of Moslem matrimonial law, and Native Courts to deal with matters of native custom.

Industry.

The principal products of the country are estate rubber, timber, copra, and cutch. rapid expansion of the rubber industry is indicated by the increase in exports of the commodity from 24 tons in 1910 to 7,783 tons in 1933. The vast timber resources of the country form one of its principal assets; until 1920 only the fringe of the forests was worked, but in that year a company was formed for more adequate timber exploitation with modern lumbering apparatus. At Sandakan two large steam-driven sawmills have been working for some years; there are also a modern band sawmill and an electrically driven sawmill. Exports of timber in 1933 were valued at 264,9621.: the principal markets were Hong Kong, China, Japan and Great Britain. The number of coconut plantations has rapidly increased in the last two decades and exports of copra have risen considerably; in 1933 the value of copra shipped was 40,556l. Cutch, a tanning material obtained from the bark of certain mangrove trees, is manufactured at Sandakan; exports in 1933, 21,055l. Tobacco grows well; extensive areas were formerly cultivated by European companies with the special variety used for the wrappers of cigars, but this industry has waned. The natives also engage in the cultivation of tobacco, but the principal crop grown by them is rice, the production of which is however still insufficient to meet local demands. The fishing industry gives employment to a large number of natives; exports of dried and salt fish in 1933 were valued at 24,238l. Sago is manufactured and exported. Other articles of export are damar, livestock, edible birds' nests collected in certain limestone caves, firewood, rattans, charcoal, and seed pearls. Fruit growing is an important industry and increasing attention is being given to the cultivation of manila hemp, coffee, and pepper, all of which thrive.

The Chartered Company does not itself directly

engage in trade.

The revenue is derived from import and export duties, excise, quit rents, licences, royalties, poll tax, and other usual sources of revenue.

Sandakan on the East and Jesselton on the West are the principal ports. Both towns have developed rapidly, and are now supplied with electric light and cold storage. Considerable sums have been spent by Government on reclamation. improvement of water supplies, etc., at both

Large resources of coal exist in the country behind Cowie Harbour in the south east and seams occur elsewhere in the territory. Gold in alluvial form is found in certain of the rivers

on the East Coast.

Large deposits of iron ore have been discovered. Indications of the presence of petroleum occur in many parts of the State, but so far it has not been found to exist in commercial quantity : prospecting work is still proceeding.

Customs Tariff.

Customs duties are leviable in North Borneo both on an ad valorem and a specific basis. prevailing ad valorem duty rates are 5 per cent. and

10 per cent.; chiefly the latter.

A preferential import tariff (varying from one-third to three-quarters of the general tariff import rates) came into force on 10th October, 1933, applicable to certain specified goods imported from any part of the British Empire. Following Colonial practice, as in the United Kingdom, a proportion of 25 per cent. of Empire material, labour, etc., is required in most cases, and of 50 per cent. in a selected few.

The rates of duty on the most important articles

are as follows :-

Currency and Banking.

The Company has a copper coinage of $\frac{1}{2}$ and 1 cent. pieces, a nickel coinage of 1 cent., $2\frac{1}{2}$ cent. and 5 cent. pieces, and it issues notes. There is also a silver coin of 25 cents. The State Bank of North Borneo has its head office at Sandakan. There are agencies of the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, and the Bank of Taiwan.

Money orders on North Borneo are issued in England, India, the Straits Settlements, Ceylon, Hong Kong, and elsewhere, and vice versal, and British postal orders came into use in the State during 1908.

Means of Communication.

The Straits Steamship Company run steamers every week between Singapore and local ports. There is additional communication by steamer with Hong Kong, Japan, and the Dutch East Indies, and a local company maintains a service along the coast and to the Philippine Islands. The State Railway on the West Coast, which is a metre gauge line, connects Jesselton with Beaufort, 57 miles distant. At Beaufort the line divides, one section proceeding to the port of Weston (20 miles), the other to Melalap in the interior (40 miles). In all, the length of railway (including branches) completed is 124 miles. At Jesselton there is a steel jetty where vessels up to 1,000 tons can load and discharge cargo. There is a first class metalled road 21 miles long, from Jesselton to Tuaran; another proceeds from Sandakan in a north-westerly direction, 15 miles of metalling have been completed and earthworks to mile 19. Road being pushed forward in of the State. There is a Road construction other localities There is a system of bridlepaths covering a total distance of 600 miles. Wireless stations exist at Jesselton, Kudat, Sandakan, Tawau, and Lahad Datu. The State has joined the Postal Union. Course of post from London, about thirty days. Postage to all British possessions for letters 8 cents for the first oz., 4 cents each succeeding oz.; foreign countries, 12 cents for the first oz., 6 cents each succeeding oz.

On the completion of the Singapore-Labuan-Hong Kong cable in 1894, the mainland of Borneo was joined to Labuan by a cable covering a distance of about 10 miles to Mempakul.

There is a telegraph line from Mempakul where the cable reaches land to Jesselton, whence messages are transmitted by radiotelegraphy to Kudat, Sandakan, Tawau, and Lahad Datu. Branch telegraph lines establish communication with Beaufort and Tenom from Jesselton. The majority of the smaller Government stations are in telephonic communication with one another and with the local centres of administration. Telephone exchanges are in operation at Jesselton, Sandakan, and Kudat.

SARAWAK.

General.

In 1864 Great Britain recognized Sarawak as an independent State. An agreement was entered into with the Rajah of Sarawak, on the north-west coast of Borneo, on the 14th of June. 1888, under which that State has been placed under British protection. Her Majesty's Government undertake not to interfere with the internal administration of the State, but they are to determine any questions that arise as to the succession, to control the foreign relations, and to have me right to establish consular officers in the territory. British subjects are to have most-favoured nation treatment, and no part of the territory is to be alienated without the consent of H.M.'s Government.

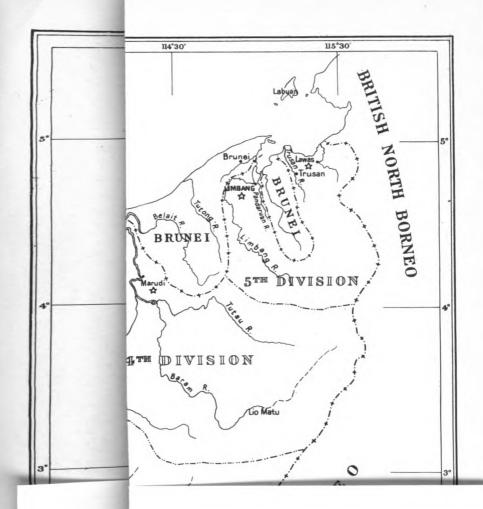

The territory of Sarawak comprises an area of about 50,000 square miles (more than equal to Ireland and Wales together), with a population of about 475,000 composed of various races. It is intersected by many rivers, navigable for a considerable distance inland, and commands about 450 miles of coast line. The government of the district from Tanjong Datu to the entrance of the Samarahan River was obtained from the Sultan of Brunei in the year 1842 by Sir James Brooke, who became well known as Rajah Brooke of Sarawak. In 1861 a second cession was obtained from the Sultan of Brunei of all the rivers and lands from the Samarahan River to Kedurong Point. In 1882 a third cossion was obtained of 100 miles of coast line and all the country and rivers that lie between Kedurong Point and the Baram River, including about three miles of coast on the north-east side of the latter; and in 1884 another cession was obtained of the Trusan River. situated on the north of the mouth of the Bruner River. The Limbang River was also obtained in 1890, the transfer being approved and confirmed by H.M.'s Government in 1891. The Lawse River was added in 1905. The present Rajah, H.H. Sir Charles Vyner Brooke, C.C.M.G. (born 26th September 1874, married, 1911, Hon. Sylvia Brett), succeeded his father, H.H. Sir Charles Johnson Brooke, G.C.M.G., in 1917.

Heir presumptive. Bertram Brooke (H.H. the Tuan Muda), born 8th August, 1876.

Norz.—Jelutong gutta is the sap of a fairly common jungle tree. It is said to be shipped mostly to America, and used in the manufacture of paint, chewing gum, and insulating material. -The bulk of the trade is with Singapore.

Chief Towns.

Kuching, the capital, population about 25,000, on the Sarawak River, about 23 miles inland (N. lat. 1° 33′10″, E. long. 110° 20′ 13″), besides excellent Government offices and Court House, possesses hospitals and a museum with a complete collection of exhibits relating to Borneo. The Bishop of Labuan and Sarawak has his headquarters there, and has a mission school with 565 scholars, and also a girls' school. The Roman Catholics also have a mission there, with a boys' school under four resident priests, and a girls' school under the

The S.P.G., and Roman Catholic Missions have stations at various other places all over the Country.

Sibu, on the Rejang River, has a large population of Chinese traders, who exchange European goods for jungle produce. The river has a native population estimated at 90,000. The Chinese here trade direct with Singapore, as well as with Kuching. Muka, a large town on the Muka River, near its mouth, is devoted to the production of sago, the stems of the sago palm being cut in the upper reaches of the river and floated down to the town, where the pith is extracted and beaten, to be carried in native schooners to Kuching, to be oleaned.

Other towns are Sadong, Lundu, Simanggang, Betong, Sarafok, Engkilili, Sarikei, Binatang, Matu, Kapit, Oya, Rejang, Miri, Baram, Bintulu, Limbang, Lawas, Trusan.

Communications.

Vessels of the Sarawak Steamship Company Limited and Straits Steamship Company Limited, provide a service every week between Kuching and Singapore. A service between Sibu and Singapore is maintained by the Sarawak Steamship Company Limited, which also provide a coasting service.

There are roads around the capital and thence to Upper Sarawak (about 25 miles) and to Satong (about 40 miles). Internal communication is almost entirely by means of the numerous rivers, which form natural highways and byways, by which any point in the country can be reached in steam launches or boats.

Posts and Telegraphs.

Sarawak joined the Postal Union in 1897.

Local.-To any place in the country, 5 cents per 2 oz., and 5 cents to Singapore. Inland post cards 2 cents.

Foreign.—The same as from Singapore (Sarawak stamps).

Letters come in direct bag from London, but vid

Singapore. Wireless installations have been erected at Kuching Town, Kuching Substation, Lundu, Simanggang, Saratok, Sibu, Binatang, Kapit, Mukah, Bintulu, Belangian, Tatau, Miri, Baram, Limbang, Lawas, Kanowit.

Sources of Revenue.

The principal sources of revenue are the Monopolies, Customs, and Mineral Royalties.

The Customs Tariff covers a wide range of imports and exports. Import duties are levied on an ad valorom basis at the Sarawak port of entry. Goods produced or manufactured within the British Empire are admitted at preferential rates. Detailed information can be obtained at the Sarawak Govt. Offices, Millbank House, London, S.W.1.

Harbour, buoy, and light dues:-Five cents per ton, payable on arrival, and chargeable to all vessels of five tons and upwards.

The taxes levied are: - Exemption, \$2 per annum, payable by Malays; \$1 per annum per door, payable by sea Dyaks; \$2 per annum for every able-bodied land Dyak.

The weights are, 1 picul = 133 lbs.; 1 coyan = 2 tons 7 cwt. 2 qrs. 18 lbs.

TRANS-JORDAN.

DM 10:

A strip of country fringing the Syrian desert and extending from Syria in the north to the Gulf of Akaba in the south forms the territory known as Trans-Jordan. It is divided from Palestine by the Rivers Yarmuk and Jordan and the Dead Sea.

The frontier between Neid and Trans-Jordan starts in the north-east from the point of intersection of meridian 39°E, and parallel 32°N. and proceeds in a straight line to the point of intersection of meridian 37°E. and parallel 31°30'N. and thence along meridian 37°E. to the point of its intersection with parallel 31°25'N. From this point, it proceeds in a 31 25'N. From this point, it proceeds in a straight line to the point of intersection of meridian 38°E. and parallel 30°N, leaving all projecting edges of the Wadi Sirhan in Nejd Territory, and thence proceeds along meridian 38°E. to the point of its intersection with parallel 29°35'N.

The southern boundary of Trans-Jordan is yet to be defined.

The northern portion of Trans-Jordan consists of elevated country, rising to 3,500 to 4,000 feet above sea level, which on the western margin falls abruptly to the narrow fertile plain of the Jordan valley, and on the eastern falls more gradually to grass lands through which runs the Hejaz Railway line and which gradually merges into the desert.

The grass land strip forms the summer pastures of Bedouin tribes who in the winter move further east for pasturage. West of the railway are the wheat and barley lands of the Kerak, Balqa and Ajlun tribes as well as of the Circassian colonies in the Balqa and the numerous Arab villages in the north. Perennial water is found in the deep lateral valleys which is used for the irrigation of cultivable land in the valleys themselves, and subsequently waters relatively large areas of the fertile land of the Jordan depression which are cultivated by semi-nomad tribes. The remainder of this depression is used by these tribes as winter grazing grounds. In the north there are a number of large villages, but the only towns of any size are Amman, Salt and Kerak.

No census has been taken but the population is believed to be between 250,000 and 300,000.

His Britannic Majesty is the Mandatory for Trans-Jordan, to which the terms of the Mandate for Palestine, with the exception of the provisions dealing with the establishment of a national home for the Jewish people, are applicable. The de-claration of His Majesty's Government with regard to its Mandatory obligations in Trans-Jordan made to the Council of the League of Nations in September, 1922 (Cmd. 1785) was in the following terms:-

"In the application of the Mandate to Trans-Jordan, the action which in Palestine is taken by the Administration of the latter country, will be taken by the Administration of Trans-Jordan under the general supervision of the Man-

datory

His Majesty's Government accept full responsibility as Mandatory for Trans-Jordan and undertake that such provision as may be made for the administration of that country in accordance with Article 25 of the Mandate shall be in no way inconsistent with those provisions of the Mandate which are not by this resolution declared inapplicable."

On the 20th February, 1928, an Agreement between His Britannic Majesty and his Highness

the Amir for the purposes of setting up an independent and constitutional Government and placing His Britannic Majesty in a position to fulfil his international obligations in respect of Trans-Jordan, was signed by the representatives of the High Contracting Parties and an Organic Law thereupon came into force provisionally, pending the ratification of the Agreement after its acceptance by the Legislative Council provided for in the Law.

The Legislative Council, consisting of six official and sixteen elected members, met for the first time on the 2nd April, 1929, and accepted the

Agreement during its first session.

The Mandatory is represented in Trans-Jordan by the British Resident, assisted by a few British officers and a small clerical staff. The British Resident acts under the instructions of the High Commissioner for Trans-Jordan, who is also the High Commissioner for Palestine.

A local Arab Administration has been formed under His Highness the Emir Abdullah ibn Hussain, G.B.E., K.O.M.G. (son of ex-King Hussain of the Hejaz and uncle of King Ghazi of Iraq).

Amman is the capital, while Salt, Kerak, Irbid and Ma'an are headquarters of District Governors. The Ottoman Code is in operation with but few

changes. The official language is Arabic. The system of Turkish taxation, which was most uneven in its incidence, has been replaced by a Land Tax based on a fiscal survey. The Land Tax is assessed at the rate of 6% of the annual revenue of the land. Urban property is subject to a House and Land Tax assessed at the rate of 10% of the rental value.

The Customs Tariff is mainly on a specific basis. The following are the principal articles subject to specific duties:—Cigarettes, Tobacco, Benzine and Kerosene, Flour, Rice, Sugar, Coffee, Cotton, woollen and silk materials, Timber, Rubber

Tyres and Tubes, and Matches.

Palestine pays Trans-Jordan an annual sum of £P.17,000 on account of the Customs Duty collected on goods of foreign origin which are reexported to Trans-Jordan. The Trans-Jordan collects and retains the import duty on goods imported in transit through Palestine. Syrian Government also refunds the duty collected on articles of foreign origin when re-exported to Trans-Jordan; and Trans-Jordan in addition collects a further small percentage of the value of the goods as assessed at Damascus. Trans-Jordan collects a specific additional excise duty on imported alcohol and tobacco.

Until 1926, public security in Trans-Jordan was maintained by a locally-recruited force known as the Arab Legion and a number of civil police in the larger towns. In 1926 these forces were reorganised. A military force called the Trans-Jordan Frontier Force was raised in Palestine and Trans-Jordan for the defence of the two territories, and police duties in Trans-Jordan were entrusted to a civil police force, to which the old name of the Arab Legion was given.

MISCELLANEOUS POSSESSIONS. •ADEN.

The peninsula of Aden is situated in lat. 12° 47' N. and long. 45° 10' E., about 100 miles east of the Straits of Bab-el-Mandeb, on the Arabian coast. The province of Aden (the total area of which, exclusive of Perim, is 75 square miles) consists of two old craters forming rocky peninsulas: -Aden proper (area 21 square miles; population 34,471), on the south, and Little Aden (area 15 square miles) on the west—and a flat strip of coast, about three miles broad (area 39 square miles; population, including Sheikh Othman, Imad, and Hiswa, 12,167). The peninsulas form the horns of a bay called Aden Back Bay, which is about eight miles broad from east to west and about four miles deep. Its entrance is about three miles across. The native town of Aden is situated on the east of the Aden peninsula, opposite a gap in the crater walls. On the west side of the peninsula, some five miles from the town, is Steamer Point, off which the large steamers lie. The highest point of the peninsula is 1,725 feet above sea level. The average annual rainfall is about 3 inches, and the maximum is about 8 inches. The climate is very hot and damp, especially during the summer months.

Aden, after being a trade centre under its native kings, became subject in succession to the Abyssinians, the Persians and the early Caliphs. In 1538 it was captured by the Turks, who lost it some years later, but captured it again in 1551 and held it until they evacuated the Yemen in 1630. The Aden peninsula was occupied by the British in 1839, and in 1868 Little Aden was obtained by purchase. The coastal strip between the two peninsulas was secured by purchases in 1832 and 1888.

Aden is an important oil fuel and bunkering station, and also an entrepôt for the trade with Arabia. The exports consist of coffee, gums, skins and hides, cotton goods, dyes, feathers, spices, etc.

The Aden Protectorate, which comprises the Hadhramaut, covers an area of about 42,0%0 square miles and includes the territories of a number of Chiefs and tribes in treaty relations with His Majesty's Government. The Resident and Commander-in-Chief deals with Protectorate matters under the direct control of His Majesty's Secretary of State for the Colonies. It has a population of over 100,000.

The Aden Protectorate borders on the Arab State of the Yemen, with which there have been frequent frontier difficulties for several years. These were adjusted by a treaty signed at San'a (the capital of the Yemen) between His Majesty's Government and the King of the Yemen, on 11th February 1934, by the terms of which the status quo on the date of signature is to be preserved for the duration of the treaty, a period or 40 years. Prior to signature the King of the Yemen by mutual agreement, evacuated certain parts of the Protectorate which were in his occupation.

Administration.

The administration of Aden was formerly directly under the Government of Bombar, but new arrangements came into operation in 1928. The Imperial Government is now responsible for military and political affairs in Aden and the Aden Proteotorate. The province of Aden itself remains under the Government of India. The financial settlement required by this division of authority provides for the payment by India to Imperial Revenues of £150,000 a year. This amount is considerably less than the annual expenditure falling upon Indian revenues under the former system of control.

The administrative control of the Settlement of Aden was transferred from the Bombay Government on 1st April, 1932, when Aden was tormed into a separate province under the direct control of the Government of India.

The administration is vested in a Chief Commissioner who is also Resident and Commander-Since the introduction of the dual control referred to above, the Resident's post is to be held alternatively by an officer of the Indian Service and an officer of the Colonial Service. The Court of the Resident is the Colonial Court of Admiralty under Act XVI of 1891, and its procedure as such is regulated by the provisions of the Colonial Courts of the Admiralty Act 1890 (53 and 54 Vic. Chapter 27). The laws in force in the province of Aden are, generally speaking, those in force in India, supplemented on certain points by special regulations to suit local conditions. The management of the port is under the control of a Board of Trustees formed in 1888. The principal business of the Port Trust in recent years has been the deepening of the harbour so as to allow vessels of large size to enter and leave at all states of the tide. The police force, consisting of land, harbour and armed police, has recently been reorganised.

Aden is a free port and there is no customs tariff. Excise duty is, however, levied on spirits, wines and beer, perfumed spirits, intotating and dangerous drugs on specific duty basis.

PERIM, a bare rocky island, five square miles in area, with a population of 1,700, lies in the Straits of Babel-Mandeb, about 1½ miles from the south-west corner of Arabia. It possesses a good harbour on the south-west side, with an entrance 860 yards in breadth. It was occupied by the British in 1799, but subsequently abandoned, and was only re-occupied in 1807, when the overland route to India made the position important. It is a coaling, oil-fuel and cable station, and forms part of the province of Aden.

Government Agent. Perim. C. Davey.

SOCOTRA, an island situated about 150 miles E. N. E. of Cape Guardafui, in 12° 19'—12° 42' N. lat., and 53' 21'—53° 30' E. long. and lying in the direct route to India, has been since 1876 under the Government of Aden, which pays a small subsidy to the Sultan of Qishu, on the Arabian mainland, to whom it belongs. It is famous for its aloes.

Sultan of Qishu, on the Arabian mainland, to whom it belongs. It is famous for its aloes. The population of the island is about 12,000. It is rather less than 100 miles from east to west and about 30 miles broad. Its interior is mountainous. It was formally placed under British protection by agreement with the Sultan in October, 1886, together with the neighbouring Abdal Kuri and Bromers Islands.

TRISTAN DA CUNHA.

Tristan da Cunha is the principal of a group of islands lying in lat. 37° 6' S. long., 12° 2' W., about midway between South Africa and South America. It is an extinct volcano rising to 7,640 feet above sea level, with a crater-lake near its summit. It was taken possession of by a military force during the residence of Napoleon at St. Helena. When the garrison was withdrawn in 1817, William Glass, a corporal of artillery, and his wife elected to remain, and they were joined by two ex-Navy men, Alexander Cotton and John Mooney, and these, with certain ship-wrecked sailors, became the founders of the present settlement, which is on the north-west of the island. where there is a comparatively level area about 9 miles long and 1½ miles broad and about 100 feet above the sea. After some years, the five un-married settlers contracted with a sea captain to bring them wives from St. Helena. A supply of stores and provisions was provided out of a grant voted by Parliament, and sent out by a man-ofwar in 1886, nearly all the able-bodied men having been drowned while attempting to board

a vessel in December, 1885.

In November, 1933, the population numbered 167, all with the exception of 6 having been born in the Island. 13 were over the age of 60, including one man aged 76 and one woman aged 94. The inhabitants are generally healthy, and are spoken of as moral, religious, and hospitable.

or as moral, religious, and nospitable.

In the way of live stock, the inhabitants have between them about 170 head of cattle, about 600 sheep and a stock of poultry. Potatoes do well, and crops are got in annually. Potatoes form the staple article of diet. Fish of good quality is obtainable in plenty. During the nesting season penguin and albatross eggs are gathered. For flour, sugar, jam and ether prepared or manufactured food the island is dependent upon passing ships. Despite the limited choice of diet no evidence of malnutrition or deficiency disease is observable. Apple trees are in fair number, and bear well; there are also a few fig trees, but they do not fruit. The tree of the island, which apparently is a juniper, and upon

which the islanders are dependent for their wood for fuel, is getting scarce in the neighbourhood of the settlement, but is abundant further off, and there is no fear of supply failing.

and there is no fear of supply failing.

The Society for the Propagation of the Gospel
has from time to time maintained a clergyman in

the island.

In January, 1904, the island was visited by H.M.S. "Odin" in order to ascertain whether the islanders would accept the offer of the Cape Government to settle them in the Cape Colony, but out of eleven families only three families elected to go. The islanders are liable from time to time to privations. In March, 1907, owing to information indicating probability of failure of supplies, relief was sent by His Majesty's Government by the "Greyhound," chartered at Cape Town. On this occasion also the inhabitants were unwilling to leave the island, and the Rev. J. G. Barrow, a clergyman who had gone to the island in April, 1906, reported that though there is sure to be privation from time to time, it does not cause absolute distress. (See correspondence presented to Parliament in Cd. 3098 and Cd. 3764.)

Arrangements are usually made for the island

to be visited by a ship at least once a year.

January, February, and March are the best months for visiting the island. It is in these months that weather at times becomes so settled that the islanders are able to make visits to

Inaccessible and Nightingale Islands, which are some 20 miles off. They also are often able to visit these islands in November to gather eggs, etc.

MISCELLANEOUS ISLANDS.

A number of islands and rocks throughout the world are British territory, or under British pretection, but are not included in any Colony or separate Protectorate. Many of these have no permanent inhabitants, but are, or have been, leased by the Lords Commissioners of the Treasury for guano collection, or for ecconut planting. The rents are paid into the Exchequer. Among such may be mentioned the Ashmore Group (Indian Ocean), Bird Island and Cate Island (in the Norfolk Island Group). Raine Island, and Bell Cay (near British New Guinea, Caroline Island, Flint Island and Vostoc Island. (Pacific Ocean, 9° 56'S. lat., 150° 6'W. long., and 11° 26'S. lat., and 151° 48'W. long.), Malden Island (4° 1'S. lat., 155° 57'W. long.), leased to Messrs. Grice, Sumner, and Co., and Starbuck Island; also Gough, Nightingale and Inaccessible Islands (in the S. Atlantic), and there are many others.

The Kuria-Muria Islands, five in number, off the south-east coast of Arabia, were ceded by the Imam of Muskat for the purpose of landing

the Red Sea telegraph cable.

PART III.

LIST OF HONOURS.

Conferred on persons (now living) for Services in and for the Oversea Dominions, Colonies, &c.

PEERS.

Atholstan, The Right Hon. Baron, 1917. Byng of Vimy, G.C.B., G.C.M.G., M.V.O., Field-Marshal The Right Hon. Viscount, 1919. Islington, G.C.M.G., C.B.E., D.S.O., The Right Hon. Baron, 1910. Jellicoe, G.C.B., O.M., G.C.V.O., Admiral of the Fleet the Right Hon. Earl, 1925. Lugard, G.C.M.G., C.B., D.S.O., Colonel The Right Hon. Baron, 1928. Morris, K.C.M.G., K.C., The Right Hon. Baron, 1918. Stonehaven, G.C.M.G., D.S.O., Major The Right Hon. Baron, 1925. Strickland, G.C.M.G., LL.B., The Right Hon. Baron, 1928. (III) Which are filled by open competitive examination.

(I) APPOINTMENTS WITH WHICH THE DIRECTOR OF RECRUITMENT (COLONIAL SERVICE) DEALS.*

Applications for the following appointments should be addressed in writing to the Director of Recruitment (Colonial Service), 2 Richmond Terrace, Whitehall, S.W.1., from whom memoranda giving full details of these appointments may be obtained on written request.

VACANCIES.

Where information is given in the following paragraphs as to the number of vacancies available annually it is based, unless otherwise stated, upon the average requirements of the four or five years prior to 1931 during which, in the case of certain classes of appointment, a considerable amount of expansion of staff took place. In consequence of the economic depression the number of vacancies filled in and since 1931 has been considerably reduced. A continued reduction in the number of vacancies of all descriptions is inevitable so long as the period of financial stringency lasts, and it is not possible to say whether normal recruitment, when conditions have become more stable, will approximate to that of the years immediately preceding 1931, since this will depend upon so many factors which are at present unknown. Whilst it seems likely that recruitment may continue to be on a reduced scale for some years, developments may arise in the future, as in the past, which will require the provision of additional staff.

AGE LIMITS AND QUALIFICATIONS.

It will be seen that the fourth group of appointments is the only group open to boys of school leaving age, but there is a wide range of administrative, scientific, and professional posts open to candidates who obtain appropriate qualifications. Specialised training is required in some cases but not in others. In all cases special importance is attached to personal qualifications and general record.

ADMINISTRATIVE APPOINTMENTS.

The Colonial Administrative Service was constituted as a "Unified" Service with effect from the lat of July, 1932.

The following paragraphs contain information regarding Administrative Appointments in Tropical Africa, where most vacancies occur, Cadetships in Malaya and Hong Kong, and Fiji and Western Pacific Cadetships. As regards Cadetships in Ceylon see page 598.

(a) QUALIFICATIONS.

A high standard of general education is essential for these appointments. Whilst a University Degree is not an absolutely indispensable qualification, the candidates selected for Administrative appointments in the last few years have nearly all been in possession of a University Degree, usually with Honours. The few exceptions have been in cases where a candidate has had some special qualifications (e.g. legal qualifications), or where the higher maximum age limit for appointments in Tropical Africa permits of consideration being given to candidates who have acquired some special experience likely to prove of value (e.g. such experience as that of an officer of H.M's. Forces, especially one who has commanded native African troops with success, and has been recommended for civil employment), and there is no reason to anticipate that at future selections the standard in this respect will be any less high.

(b) East and West Africa.

The average number of Administrative Officers recruited for Tropical Africa from the end of the war until 1930 was 95 per annum.

During this period very considerable enlargements of staff contributed to maintain the average recruitment at this high rate despite the small number of 18 vacancies filled in 1922 as a result of the financial depression prevailing at that time, and a continuation of recruitment at so high a rate was not to be expected. In recent years, however, an average of between 50 and 60 cadets would have been required to replace annual wastage through retirement, etc., without allowing for any increase of staff. In 1930 the actual number of vacancies filled was 74, but in 1931 and 1932 it fell to 20 as a result of the financial depression. In 1933, the number of vacancies rose to 24, and in 1934, to 33.

One annual selection takes place in the summer. Completed applications must reach the Director of Recruitment between the 1st of January and the 30th of April, in the year of the selection.

Digitized by Google

The Secretary of State for the Colonies set up a Colonial Service Appointments Board in 1931 to make selections on his behalf for all the first appointments to the Colonial Service which are at his disposal. Selections so made are submitted to the Secretary of State for his final approval and ensuing appointments are made on his authority.

Candidates must be between the ages of 21½ and 35 when they take up their duties in Africa, but there a definite preference for candidates of under 30. Selected candidates are, however, required to underget course of training in this country before embarkation (as explained below) and candidates who are under 2. years of age may therefore apply, but must be not less than 201 years of age on the 1st of August in the of application.

The course of training undergone by selected candidates takes place at Oxford or Cambridge, and lasone academic year, during which allowances are paid at the rate of £75 at the beginning of the first term

£50 at the beginning of the second and third terms, and £50 on completion of the course.

An Administrative Officer may be employed either in the Secretariat of a Colony or in a District. Es duties may be very varied. If employed in a district his functions are of a magisterial and political nat reand he is the immediate agent of the Government in his District, and his responsibilities extend to all decarments of the Administration which have no local representative. His duties may involve a considerate amount of travelling.

In West Africa, salaries start at £400 per annum and rise on a long scale to £1,000 per annum: in Ea-Africa salaries start at £350 per annum and rise on a long scale to £1,000 per annum. There are higher po-u

above these scales.

The normal age of retirement in West Africa is 50, and pensions are calculated at the rate of n / 1 th of c = 1officer's pensionable emoluments for each completed month of service. In East Africa, pensions will be calculated at the rate of aba th, the normal retiring age being 55.

It should be noted that in the Tropical African Dependencies, free quarters are provided, or an alloware

in lieu is given, in addition to the salaries described above.

In the interests of economy it has been found necessary, in the case of most Colonies, to impose a temporalevy on all salaries.

(c) CADETSHIPS IN MALAYA AND HONG KONG.

The average number of Cadets appointed to Malaya and Hong Kong during the period 1919-1931 was between 9 and 10 annually. Since 1932, the average has been between 5 and 6 annually. In 1934, 2 Cadets we appointed to Hong Kong and 4 to Malaya.

Prior to 1932 these appointments were filled through the competitive examination for Eastern Cadetal ite but the method of appointment is now assimilated to that already in force for Administrative appointment

in the Colonial Service generally.

One annual selection will take place in the summer, concurrently with the selection for Administrative appointments elsewhere in the Colonial Service, and completed applications must reach the Director of Recruitment between the 1st of January and the 30th of April in the year of the selection.

Cadets may be required to undergo a course of instruction at Oxford or Cambridge, resembling that described

in section (b).

Candidates must have attained the age of 21 and must not have attained the age of 25 on the lat of Apresi

in the year in which the selection takes place.

The Cadet Services provide the higher Administrative staff for all the various Government activities incluive the Secretariats, the Courts, the Treasuries, District and Land Offices, and in Malaya the Residencies in the Malay States.

In Malaya the Cadet starts at \$350 per mensem (£490 per annum) and has the prospect of rising eventual. to appointments in Class I, with salaries between \$1,050 per mensem (£1,470 per annum) and \$1,50;

mensem (£1,820 per annum).

In Hong Kong the initial salary is £450 per annum and the appointments in Class I are on a scale of from £1,500 to £1,800 per annum.

In both Malaya and Hong Kong there are special appointments (not necessarily reserved for Cadeta) above these scales.

(d) FIJI AND WESTERN PACIFIC CADETSHIPS.

Up to three or four vacancies may occur annually for Cadets in the Fiji and Western Pacific Servers. Five vacancies occurred in 1933, but only one in 1934. One annual selection will take place in the summer. concurrently with the selection for Administrative appointments elsewhere in the Colonial Service, and completed forms of application must reach the Director of Recruitment between the 1st January and use 30th April in the year of selection.

The age limits are 22 to 25.

Cadets may be required to undergo a course of instruction at Oxford or Cambridge, resembling that described in section (b).

The duties correspond to those of an Administrative Officer in Tropical Africa.

The initial salary is £350 per annum for Cadets serving in Fiji, and £375 per annum for Cadets serving in 🏰 Gilbert and Ellice Islands Colony and the British Solomon Islands Protectorate. In the British Solomon Islands Protectorate, a local allowance of £50 a year is also paid.

(e) OTHER ADMINISTRATIVE APPOINTMENTS.

In many Dependencies, including those in the West Indies, vacancies for junior officers in the Administrate a and Secretariat are usually tilled by the selection of local candidates or by promotion or transfer within use

Vacancies may, however, occasionally occur for Assistant District Commissioners and Assistant Secretaries in Cyprus. They are filled as and when they occur, but are very infrequent. The age limits are 211 to 1. with a definite preference for candidates of under 30. The initial salary is £360, rising on a long scale w £840 per annum.

EDUCATIONAL APPOINTMENTS.

A considerable number of vacancies for junior Educational officers may be expected to occur in any vest of normal prosperity. The great majority of these occur in either East and West Africa, or Malaya are! It was Kong, and are filled during the summer months; though a few vacancies may occur to be filled during the winter. Applications to be considered for vacancies in the summer should reach the Director of Recruitment as soon as possible after the end of February. Digitized by GOOGLE

Candidates must have a Degree, usually a Degree with Honours, of a British University. For a proportion 1.15 of vacancies they must normally have also a recognised Diploma in Education, or equivalent professional qualifications though candidates who have had sufficient proved experience of school teaching may sometimes 557 be considered. For other vacancies candidates having no professional qualification, and little or no teaching 5:5 experience, are considered who, if selected, will be required to undergo a special course of training in educational method, practice, etc., at the University of London Institute of Education (leading to the Diploma in Education of London University) before proceeding overseas. Fees for this course are paid from Public a les funds and Probationers attending it receive an allowance of £20 a month.

Candidates must be between the ages of 21; and 35 at the time of taking up their duties overseas: definite preference is given to men under the age of 30. Those who would be required to take the London training course may apply when they are under 21 years of age, provided that they will be not less than 20\frac{1}{2} on the 1st of August in the year of application. Such candidates will often be men who, like the majority of applicants for Administrative appointments in Tropical Africa, expect to graduate at a University in the current summer.

In Tropical Africa, while there is one common Educational policy which aims at providing a sufficient and wisely adapted system of education for the Native populations, there are naturally variations of organ- \mathbb{P}^* : isation and method in the different Dependencies, and the duties of a junior Educational officer will vary accordingly. In general it may be said that his work demands both skill as a teacher and ability, born of enthusiasm, to participate in and supervise all forms of school activities, e.g. organised games. Boy Scout 19 × 2 work, etc., which experience has shown to be of particular value in creating esprit de corps and a sense of service and leadership amongst African native boys. Sooner or later an officer may be called upon to undertake the duties of an Inspector of Schools, though the work of administration is generally confined to the higher appointments in the Education Department.

The normal scale of salary in East Africa is £400 (for 2 years on probation) rising by annual increments to £920 per annum. In West Africa the normal scale is £480 (for 3 years on probation) rising to £920 per annum. It should be noted, however, that these scales of salary are at present under revision.

In Malaya and Hong Kong a junior officer is usually appointed as a "European Master" for duty on the staff of a secondary school organised on lines somewhat similar to those of a Public School in this country. He will be required to teach either English subjects, or Mathematics or Science up to London Matriculation or equivalent standard. The "English" schools in Malaya are attended by Malay, Chinese and Indian boys. In Hong Kong there are both English and Chinese schools, and also some "Anglo-Chinese" schools, where the study of English and Chinese is carried on side by side. In all cases games, Boy Scout work or Cadet Corps, etc., play an important part. Above the time scale there are a number of senior administrative offices, promotion to which is by merit; and opportunities may occur for appointment to an Assistant Inspectorship, or other post connected with vernacular education, at an earlier stage in an officer's career.

The scale of salary for European Masters in Malaya is \$400 per mensem rising by annual increments to \$800 per mensem (£560-£1,120 per annum). In Hong Kong European Masters receive £500 per annum rising to £950. In both cases appointments are in the first instance on a three years' agreement.

EAST AND WEST AFRICAN POLICE (COMMISSIONED APPOINTMENTS).

Prior to 1931 about eight vacancies for Police Officers in East and West Africa occurred annually. Vacancies are filled as and when they occur, but in consequence of the economic depression, there have been no vacancies during the last four years and they are likely to be of very infrequent occurrence for some time to come.

The age limits are 214 to 35, but candidates of over 30 years of age are soldom selected. There is a preference for unmarried candidates.

A high standard of general education is essential and as the organisation of the majority of Police Forces is on military or quasi-military lines experience either in the Regular or Territorial Army or in an Officers Training Corps is desirable and in some cases essential.

Salaries usually commence at £360 or £400 and rise to between £600 and £920, with higher posts above these scales.

APPOINTMENTS OPEN TO BOYS OF SCHOOL LEAVING AGE (COMMISSIONED RANK).

These appointments comprise Police Probationerships in Cevlon, Malaya, Hong Kong and Palestine; Probationerships in the Malayan Customs and Excise Departments; Sub-Inspectorships of Constabulary in British Guiana, Trinidad and Jamaica.

During the years prior to 1932, between twelve and twenty vacancies occurred annually. Two appointments were made in 1932, nine in 1933, and 16 in 1934.

The selection takes place in the summer and completed applications should be submitted between the 1st of January and the 15th of March.

Candidates for Probationerships in the Police, Customs and Monopolies Services of Malaya and for Probationerships in the Police Service of Hong Kong must be not less than 19 on the 1st of August and under 22 years of age on the 1st of January in the year in which selection takes place. Candidates for Police Probationerships in Palestine and Ceylon must be over 19 and under 22 years of age on the 1st of August in the year in which selection takes place. For the West Indian Services they must be over 19 and under 26 years of age

Candidates must be in possession of the School Certificate, or of certain equivalent or higher educational qualifications, except in the case of Ceylon for which a special qualifying examination is held in the years in which vacancies occur. The part taken by a boy in the general and athletic life of his school is also taken into

Police and Customs and Excise Probationers selected for Malaya may be required to take a three months course in the Malay language at the School of Oriental Studies in London, during which they receive an allowance of £20 a month.

Digitized by Google

Commencing salaries are as follows:—Hong Kong, £400; Ceylon, £360; Malaya, £350; Palestine £360 with pensionable expatriation allowance of £50; Trinidad, £300; British Guiana, £200; Jamaica, £360 with other allowances which vary. Salaries in the Far Eastern Services are on a long scale. To take the Malayan Police as an instance. A Probationer who is appointed at £350 receives, if he has passed the necessar examinations, £420 after two years, and after three years £490 rising by £35 per annum to £1,120. Aborabis scale there are a number of appointments on the scale £1,120 to £1,330. The Inspector General, Stras Settlements Police, and the Commissioner of the Federated Malay States Police receive £1,630 each.

The duties of a Police or Customs Officer in a Tropical Dependency are extremely varied and should apparticularly to the young man with a teste for an out of door life who would appreciate doing far more a sponsible work than would normally fall to a man of similar age in this country.

OTHER COMMISSIONED POLICE APPOINTMENTS.

Vacancies in other Colonial Police Forces are so seldom filled by the selection of candidates from this cocarrand the qualifications required are so diverse that no general statement can be given, but in almost all cases unmarried candidates with considerable experience in Civil Police duties are required.

TREASURY APPOINTMENTS IN EAST AND WEST AFRICA.

Vacancies in these departments are not frequent and the Secretary of State has seldom been asked to immore than three or four annually in recent years, mainly in West Africa.

They are filled as and when they occur.

Candidates must be between the ages of 21½ and 35, but there is a definite preference for candidates of unic 30, and in certain cases for candidates of not more than about 24.

Candidates must have attained a high standard of education. A University degree is not regarded as as essential qualification for these appointments but would weigh heavily in a candidate's favour. Cand it must have a natural inclination for figures and accounts and in the absence of a University degree, a candidate would normally be expected to have qualifications or experience in accountancy.

In East Africa the commencing salary is usually £360 per annum rising to £720, and in West Africa £40 rising to £840, with higher posts above these scales, but it should be noted that these scales are at pressunder revision.

CUSTOMS APPOINTMENTS IN EAST AND WEST AFRICA.

Vacancies in these departments are very infrequent. They are filled as and when they occur.

Candidates must be between the ages of 21½ and 35, but there is a definite preference for candidates of ead30, and in certain cases for candidates of not more than about 24.

A Candidate must show satisfactory evidence of a high standard of general education and should also have a natural inclination for figures and accounts, though definite experience of accounts is not always ements. Previous experience of Customs work is not normally required for Supervisorships of Customs in West Africa Where candidates with such experience are required, as for certain East African Customs appointments, of or a particular vacancy, the Home Customs Service is usually asked to recommend suitable candidates.

In East Africa the commencing salary is usually £360 per annum rising to £720, and in West Africa £42 rising to £840, with higher posts above these scales, but it should be noted that these scales are at present under revision.

APPOINTMENTS IN THE COLONIAL AUDIT DEPARTMENT.

Normally, four or five vacancies may be expected annually and they are filled as they occur. Candidates must be over 21½ years of age and under 26.

The essential qualifications for these appointments are: a good general education, preferably at a University a natural inclination for figures and accounts; character and ability such as would qualify a candidate in as course for the higher branches of the Service.

Selected candidates undergo a short period of training in the Home Establishment of the Colonial Apat Department, during which an allowance at the rate of £20 a month is paid.

Usual commencing salaries are between £360 and £450 per annum, rising to between £600 and £930, w.t. higher posts above these scales.

LEGAL.

The Colonial Legal Service was constituted as a "unified" service with effect from the 1st July, 1933 Before 1931, the average number of vacancies filled annually was between 11 and 12, but, on account the financial depression, considerably fewer appointments have been made since that year. Vacancies if filled as and when they occur.

The majority of appointments which are filled from outside the Service are for Crown Counsel and Magistra of for which barristers only are eligible. Occasionally, however, a vacancy occurs for which a solicitor can reconsidered.

Candidates should be under 40 years of age and should normally have had at least four years' praction experience in their profession.

Initial salaries vary from £400 to £720 per annum, but seldom exceed the latter figure.

MEDICAL

The Colonial Medical Service was constituted as a "unified" service with effect from the 1st of Januar. 1934. Officers are appointed to the Service by the Secretary of State and are liable to be posted at his dearct... The wishes of individual officers are, however, consulted as far as possible, both as regards posting on an appointment and as regards subsequent transfer.

Digitized by Google

The average annual number of appointments for Medical Officers made during the period 1926-1930 was 97. In 1931, as a result of the general financial depression, the actual number of appointments made was 35 and this figure fell to 12 and 22 in the years 1932 and 1933 respectively. In 1934, 31 appointments were made.

It is not possible to forecast actual requirements in the immediate future.

Vacancies may occur at any time of the year and are dealt with as circumstances require. Candidates should be under 35 years of age, must be fully qualified and must be on the Medical Register. Preference is given to candidates who have held hospital or public health appointments or who have special knowledge of ansesthetics, radiology, surgery, medicine, ophthalmology, gynæcology and midwifery, diseases of the ear, nose and throat, venereal diseases, etc. In the case of Lady Medical Officers, for whom there are occasional vacancies, experience in child welfare work is almost invariably essential.

Selected candidates are normally required to undergo a course of instruction in Tropical Medicine and Hygiene before proceeding overseas.

The majority of vacancies for Medical Officers occur in West Africa, East Africa and Malays. The vacancies for Lady Medical Officers are usually confined to West Africa and Malaya.

Commencing salaries in West Africa, East Africa and Malaya are normally £860, £600, and £700 per annum respectively, but it should be noted that the salary scales in East and West Africa are at present under revision. Vacancies occasionally occur for Medical Entomologists.

DENTAL SUBGEONS.

It is very rarely that a vacancy for a Dental Surgeon occurs. The conditions of these posts vary too much for general information to be given.

AGRICULTURE.

For several years prior to 1931 the average number of vacancies occurring in the Colonial Agricultural Departments for officers for general investigational, advisory and similar duties, was about 24; whilst vacancies for agricultural specialists, such as botanists, mycologists, entomologists and agricultural chemists, averaged about 9. For the present, almost all such appointments are likely to be filled by the selection of Colonial Agricultural Scholars on completion of their training (see below). For any further vacancies candidates with University degrees in agriculture or natural science who had opportunities for post-graduate study or research similar to those of Colonial Agricultural Scholars would be most likely to be selected. Until the year 1932, a certain number of vacancies were usually available, in addition to the above, in connection with the inspection of crops and of produce for export. For these appointments candidates are usually required to be in possession of a degree of diploma in agriculture or horticulture. The Secretary of State is also occasionally asked to till vacancies of a definitely horticultural nature in connection with the care of botanic gardens or fruit cultivation. For these a horticultural qualification such as that obtainable at the Royal Botanic Gardens, Kew. or the horticultural diploma of an Agricultural College, is required.

The majority of appointments are filled in July and August, but vacancies may be filled at other times. Candidates should usually be over 211 and under 30 years of age. Commencing salaries usually vary from £400 to £500.

The Secretary of State offers annually in the summer a certain number of Colonial Agricultural Scholarships. These are post-graduate scholarships, tenable in most cases for two years, one of which is spent in this country and the other at the Imperial College of Tropical Agriculture in Trinidad or some other institution abroad. The scholarships are intended to provide a pool of men trained in agriculture and agricultural science from which vacancies in the Colonial Agricultural Service can be filled. Candidates should possess, or be about to qualify for, a degree in agriculture or natural science. The value of a scholarship is :-

- (i) Whilst a scholar is in this country; £200 per annum with payment of fees for tuition and, if necessary, of matriculation or examination fees;
- (ii) Whilst a scholar is abroad: £225 per annum with payment of passages and of cost of travelling, if required, among the West Indian Islands or elsewhere; and also of tuition fees up to a maximum of £75:
- (iii) Each scholar will also receive an allowance not exceeding £5 for the purchase of approved books.

VETERINARY.

A few vacancies for veterinary officers and for veterinary research officers may normally be expected to occur annually in Colonial Veterinary Departments. The majority, if not all, of these vacancies will in future be filled by the selection of Colonial Veterinary Scholars on completion of their training (see below), though urgent vacancies may be filled, as and when they occur, by the appointment of candidates possessing the Diploma of Membership of the Royal College of Veterinary Surgeons or a veterinary qualification obtained in one of the self-governing Dominious. Candidates should be over 211 and under 30 years of age on assuming their duties overseas. The commencing salary in the larger Veterinary departments is normally £600 per Annum

The Secretary of State offers annually in the summer a limited number of Colonial Veterinary Scholarships. These post-graduate scholarships, which are tenable for from one to four years, are intended to provide a pool of qualified candidates from which vacancies in Colonial Veterinary Departments can be filled. Candidates should possess, or be about to qualify for, either (a) the Diploma of Membership of the Royal College of Veterinary Surgeons or a veterinary qualification obtained in one of the self-governing Dominions or (b) a science degree of a British University or some equivalent qualification. The value of a scholarship is £200 per annum, with payment of fees for tuition, and if necessary of matriculation or examination fees. Each scholar will also receive an allowance not exceeding £10 for the purchase of approved books,

FORESTRY.

The Colonial Forest Service was constituted as a "unified" service with effect from the 1st of Januare 1935.

A limited number of vacancies for Assistant Conservators of Forests may be expected to occur in each var. The number varied from 12 to 16 for some years prior to 1931, but in that year fell to 7, and only 4 vacan mere filled in 1932. In 1933 six candidates, and in 1934 three candidates, were selected to take a post-gradient course at the Imperial Forestry Institute in anticipation of vacancies. By December, 1934, five of the cardidates selected in 1933 had received appointments in the Colonial Service. For the present candidates mepossess a Degree or Diploma in Forestry involving not less than three years' study at a University, included two years at Forestry subjects. They are also required to pass a test in regard to their technical knowleds which is applied by a Board of forest experts. This Board usually meets in London early in July, so the candidates should apply in May or early in June. Selected candidates usually undergo a year's post-graduationing at the Imperial Forestry Institute at Oxford, during which they receive an allowance of 275 a term and approved expenses up to £50 in respect of practical forestry work. The commencing salaries of Assicar Conservators vary between £400 and £500.

ZOOLOGICAL.

There are usually one or two vacancies a year, in connection with mosquito, testse-fly, and similar invariants, which are open to graduates in zoology or natural science who have specialised in medical Entomologists occur, however, rather more frequently in the Agricultural Departmenta. Above). There are also occasional openings for trained Zoologists in Colonial Fisheries, Game Preservative and Museum Departments.

CHEMICAL

Some three or four vacancies are usually available in each year for officers for general analytical work the as Government Analysts or Assistant Government Analysts). A candidate should usually be under 35 years of age, should be an associate of the Institute of Chemistry, and should possess a good University Degree and Chemistry. The certificate of the Institute of Chemistry in Branch E. (Foods, Drugs, etc.) is a value additional qualification. The duties usually include any analytical work required by Government, which is a value of falls outside the scope of the Agricultural Chemist (e.g. the examination of stores, foods, drugs, water, one etc., and bacteriological and medico-legal work). There are also occasional vacancies for specialists in bechemistry for medical and other Departments as well as for geological chemists. Initial salaries vary between \$4400 and \$600.

GEOLOGICAL.

Vacancies are not of very frequent occurence, and are filled when they occur.

Candidates should be between the ages of 214 and 35. They should possess a University Degree, preferably with Honours, ensuring a good general knowledge of geology, and also have carried out independent necessing investigations.

Commencing salaries vary from £480 to £600.

MINING.

Vacancies are not of very frequent occurrence, and are filled when they occur.

The age limits are 211 to 35.

Candidates should usually hold a Degree or Diploma in metalliferous mining of a British University or School of Mines. Practical experience of metalliferous mining may be required.

Commencing salaries vary from £480 to £560.

SURVEY.

The annual number of vacancies for Survey Probationers before 1931 varied considerably but about 12 were expected annually. In 1931 only three were filled, and during the last three years recruitment has been suspended.

Selections are usually made during May and June.

Candidates must normally be not less than 21 and under 28. They should either be in possession of as Honours Degree in mathematics, physical sciences, or engineering, or certain other equivalent qualificat. as or may in certain cases, qualify at a special examination which is normally held annually in March.

Completed application forms must be submitted before January 1st by candidates who would be required to take this examination and before April 1st by other candidates.

Selected candidates usually undergo a 6 to 8 months' course of training under the Ordnance Survey Office. Southampton, followed in some cases by a year's training at Cambridge. During these courses allowances are paid at the rate of £50 a quarter at Southampton and £75 a term at Cambridge. Commencing salars vary from £400 to £480.

METEOROLOGICAL.

Vacancies occasionally arise in Colonial Meteorological Services and Observatories. Candidates should usually be under 30 years of age and hold a good Honours degree in Mathematics or Physics. Before taking up their duties selected candidates may be required to undergo a course of training in meteorological wife of about six months duration in this country during which an allowance is paid to them.

ARCHAEOLOGICAL AND ETHNOGRAPHICAL.

Vacancies of this nature are rare, but the Secretary of State may occasionally be asked to select a trained Archaeologist or Anthropologist for a Museum appointment.

Digitized by GOOGIC

ECCLESIASTICAL.

The Secretary of State is rarely called upon to fill an Ecclesiastical appointment. If a post falls vacant a candidate is selected in some special manner with particular reference to the requirements and circumstances of the Office.

No list of candidates is kept at the Colonial Office.

HARBOURMASTERSHIPS.

Vacancies occur very infrequently for Port Officers or Harbourmasters.

Candidates for such appointments must either—(1) have a held a commission in the Royal Navy, or (2) have held a Master's or extra Master's certificate, and be an officer of the Royal Naval Reserve.

The conditions of these posts vary too much for general information to be given. The better paid posts are, however, usually filled by promotion from within the Colonial Service.

IMMIGRATION.

Very rarely a vacancy may occur in the Immigration Department of a Colony which provides facilities for the immigration of natives of India.

Persons possessing a competent knowledge of one or more Indian languages are at liberty to apply to the Director of Recruitment, if they wish their names to be noted for consideration in case such a vacancy should occur.

AVIATION.

The openings in connection with aviation in the Colonial Service are at present limited. Should any vacancy occur the Air Ministry would probably be asked to advise as to the selection of a suitable candidate. No list of candidates is kept in the Colonial Office.

PERSONAL STAFF.

Appointments, such as those of Private Secretary and Aide-de-Camp, on the personal staff of the Governor of a Colony are made by the Governor concerned. It occasionally happens, however, that a Governor sake the Secretary of State to recommend a suitable officer to act in such a capacity. A candidate who wishes his name to be noted for consideration, in the event of such a request being made, should apply in writing to the Director of Recruitment (Colonial Service). As a rule only unmarried candidates are selected for such appointments. Previous experience in a similar position is valuable, but not as a rule essential. For appointment as Aide-de-Camp an officer, or sometimes an ex-officer, of H.M. Forces is usually selected.

OTHER APPOINTMENTS.

Vacancies in Departments, other than those already mentioned, may occasionally occur. Owing to their diversity, however, it is not possible to give any general account of the qualifications which might be required.

(II) APPOINTMENTS IN THE COLONIAL SERVICE WHICH ARE FILLED BY THE CROWN AGENTS FOR THE COLONIES.

The appointments mentioned in the paragraphs which follow are filled, as and when vacancies occur, by the Crown Agents for the Colonies, 4, Millbank, S.W.1., from whom further details may be obtained on request.

Officers selected to fill the following appointments are engaged under agreement for temporary service.

CIVIL, MECHANICAL AND ELECTRICAL ENGINEERING.

The majority of vacancies occur in West Africa, East Africa and Malaya.

The commencing salaries vary from approximately £480 to £600 per annum.

Candidates should be between 23 and 35 years of age.

The qualifications required are as follows:-

CIVIL ENGINEERS.

Assistant Engineers on Government Railways must be Corporate Members of the Institution of Civil Engineers or hold an Engineering degree or diploma recognised as granting exemption from Sections A and B of the A.M.I.C.E. examination, and possess experience on Railway Survey, Construction or Maintenance.

Assistant Engineers in Public Works Departments must be Corporate Members of the Institution of Civil Engineers or hold an Engineering degree or diploma recognised as granting exemption from Sections A and B of the A.M.I.C.E. examination, and possess experience on Public Works. It is preferred that all candidates should have had at least 2 years practical experience of good Engineering work after taking their degree or completing their Articles, but consideration will be given to the applications of candidates with less than two years practical experience provided they are in possession of one of the qualifications above mentioned.

igitized by GOOS

MECHANICAL ENGINEERS.

Assistant Locomotive Superintendents (Railways).—Engineering degree or A.M.I.M.E. and apprenticeship a locomotive works, including running shed and footplate work, and subsequent experience in a railway running department, or in railway works management.

Assistant Mechanical Engineers (Public Works Department).-Engineering degree or A.M.L.M.E. and as prenticeship with subsequent experience of steam, oil and gas engines, motor cars, etc.

ELECTRICAL ENGINEERS.

Electrical engineering degree or A.M.I.E.E. and apprenticeship, with subsequent power station and many experience.

Shift Engineers.—Apprenticeship to mechanical engineering and subsequent experience in power status running. In addition marine and electrical experience is desirable.

TELEGRAPH ENGINEERS.

Thorough training in telegraph and telephone engineering and experience in a Home or Colonial Post Office Engineering Department or a British Railway. In addition, an electrical engineering degree or A.M.I.E. is usually required.

DRAUGHTSMEN.

Candidates should be between 23 and 35 years of age.

Engineering.—Experience in Civil Engineer's Office, Plotting Surveys, Levels, etc. Quantities Estimate: and Design of buildings, bridges, etc.

Locomotive.—Apprenticeship in Locomotive works and subsequent experience in a Locomotive draw at office.

The commencing salaries vary from approximately £400 to £480 per annum.

ARTISANS.

Vacancies for artisans etc., in the following trades occur from time to time.

Foremen of Works (Buildings)

Saw Mill Foremen Plumbers

Loco Foremen

- Fitters Erectors
- Turners ••
- Boilermakers

Carriage & Wagon Examiners

Builders

Moulders Millwrighte Loco. Drivers Platelavers Electricians

Cable Jointers Telegraph Foremen Mechanicians

General Fitters

Candidates are required to possess previous experience and to be between 25 and 35 years of age. I. commencing salaries vary from £370 to £400 a year.

ARCHITECTURAL.

Architects and Architectural Draughtsmen.

Candidates should be between 23 and 35 years of age.

The qualification of A.R.I.B.A. is generally required, with experience in design, supervision of builts: operations, specifications, and the general work of an architects office. A knowledge of quantity survey at is desirable.

The commencing salaries vary from approximately £450 to £700 per annum.

MARINE.

The majority of vacancies occur in Nigeria, Tanganyika and Kenya (Lake Steamer Service).

Sub-lieutenants of the R.N.R. who are not qualified for promotion to the rank of Lieutenant are 7: required to resign their commissions as a condition of appointment to the Nigerian and Lake Steamer Servibut they must definitely understand that they are liable to removal from the active list for failure to qualifor promotion to rank of Lieutenant and that, if so removed, they cannot be placed on the retired into

The qualifications for appointment to the Nigerian Marine Department are as follows:-

Executive Officers.-Retired officers of the Royal Navy or officers on the Active List of the Royal Nava Reserve are given preference, though these qualifications may be waived in the case of otherwise suitab. candidates possessing an Extra Master's or Master's Certificate. Ceylon.—Sergeants, age 21-29 (in the case of ex-Navy men the maximum age limit is 32 years), beix 5'9", single. Previous Police experience unnecessary. Commencing salary £200 per annum. Free quarter and uniform.

Chest measurement must be in proportion to height, with good expansion.

Candidates for all the above police appointments must be of good education.

(III) APPOINTMENTS WHICH ARE FILLED BY OPEN COMPETITIVE EXAMINATION.

CEYLON CADETSHIPS.

Administrative officers for Ceylon have hitherto been recruited annually on the results of the created competitive examination held annually by the Civil Service Commissioners for appointments in the Hexaminor Ireland and Indian Civil Services and for Eastern Cadetahips (including Cadetahips in Malaya and Hong Kong prior to 1932 (see page 582 above). The future method of recruitment for the Civil Service of Ceylon is under consideration, and the recruitment of European officers for that Service is at present suspended.

European candidates for Ceylon were required to be natural-born British subjects of pure European descent. The age linits are from 22-24. The examination is held in July and August and full information about it can be obtained from the Civil Service Commissioners, 2, Burlington Gardens, W.1. An examination is best simultaneously in Ceylon for the convenience of Ceylonese candidates for the Ceylon Civil Service, who may also, however, sit for the examination in the United Kingdom.

At the present time Cadets receive a salary of £400 a year, increasing to £450 on passing the prescribed examination locally. Thereafter the salary scheme is:—Class IV, £500-£40-£700; Class III, £760-£40-£1,000. Class II, £1,050-£50-£1,300; Class I, the salaries of officers range between £1,400 and £1,700 a year; above that there are special appointments (not necessarily reserved for Cadets) with salaries ranging between £1,500 and £2,400.

Information about the method of appointment hitherto in force and the terms of service and conditions of life in Ceylon are contained in the memorandum Eastern No. 68—Ceylon Cadetships which can be obtained a written request to the Director of Recruitment (Colonial Service), Colonial Office, 2, Richmond Terrace, Walks, S.W.1., but applications for Ceylon Cadetships should not be addressed to the Director of Recruitment, but to the Civil Service Commissioners.

PART IV.

RECORD of the Public Services of Officers of the several Dominion or Colonial Governments and other persons connected with the Dominions or Colonies.

The titles of "His Excellency," "His Honour," are to save space, not inserted in the following records of services

A Governor General is styled "His Excellency" and his wife "Her Excellency." A Governor is styled "His Excellency" while actually administering a Government and an Officer Administering

a Government in the absence of a Governor General or Governor is entitled to be similarly styled.

The designation of a Lieutenant Governor in a Canadian Province is "His Honour," and this is the customary designation of a Lieutenant Governor or Administrator. But the Administrators of

the several Provinces of the Union of South Africa are styled "The Honourable.

Judges of Supreme Courts in His Majesty's Self-Governing Dominions are styled "The Honourable." In Colonies, etc., they usually bear the local designation of "His Honour."

The title of "Honourable" is given for life to all Members of the King's Privy Council for

In His Majesty's Self-Governing Dominions the title of "Honourable" is borne during tenure of office by all members of Executive Councils, by all members of Legislative Councils (other than Legislative Councils of Provinces of Canada) and by the Speaker of the Lower House of the Legislatures; also by Senators of the Dominion of Canada and the Union of South Africa. It is also used locally by Members of the Executive and Legislative Councils of all Crown Colonies, etc., but

not by Members of the Legislative Councils of the Presidencies of the Leeward Islands.

The following in His Majesty's Self-Governing Dominions are eligible to be recommended to retain the title of "Honourable":—Retiring Executive Councillors who have served for at least three years as Minister or one year as Prime Minister. Presidents of the Senates and Legislative Councils and Speakers of the Legislative Assemblies on quitting office after having served three years in their respective offices. Senators and Members of the Legislative Councils on retirement or resignation after a continuous service therein for not less than 10 years. Judges of Supreme Courts on retirement.

Owing to the increasing pressure on their space, the Editors have been compelled to abbreviate the records of service as much as possible, and for the same reason it is impossible to continue to publish the record of an officer's services after his retirement unless he has received the honour of Knighthood.

Officers are requested to furnish prompt information of any errors or deficiencies in the record. Insertion or correction of records in next year's list cannot be guaranteed unless particulars are forwarded in time to reach the Editors not later than 31st December.

Records of officers of whose death the Editors have been informed while the sheets have been going through the Press are marked with an asterisk.
